SIR JOHN ADYE'S paper on "The Egyptian Transport Service" furnished interesting reading. "Black is not so black, or white so very white." It was all owing to the hurry; after all, there was very little to find fault with; nothing at all, in fact, in the plans of those who worked the great machine, although there might be some deficiencies in the execution of them! These, however, were to be accounted for by the universal explainer of all mysteries,—circumstances. Sir John Adye is one of the clearest-headed and most adroit and skilful of officers. But he is also woefully obstinate. Witness his infatuation about muzzle-loaders; his resolute resistance to all attempts when he was in power to introduce the system which was accepted by all the Armies of the enlightened Powers of the world. Having put the Committee of the House of Commons on their mettle, Sir John was heckled on Wednesday by Dr. Cameron, but he displayed a power of fence in the face of that ponderous but useful Member worthy of all admiration as an exhibition of tactical skill. "What do you mean by 'unfit for service'? I do not know anything about the term. I did not see any mules that were not fit for service that I know of. I am not responsible for the Commissary-General's reports. I do not not what 'too late' means. Many mules were kept in Cyprus because I did not know that I would want them, and therefore I kept them there. Other mules were kept in Smyrna, because the Turkish Government would not let them go. We all complained of transport; the transport was not adequate for all our requirements. We knew Graham was in danger, but we relied on the Canal." And so forth. "Bakeries ought to be dispensed with." We may imagine the face of an old Peninsular or Crimean officer on being asked whether he "thought ice and champagne were absolutely indispensable for the sick." This by parenthesis. Sir John Adye went on to tell the Committee that he had not heard of a great many things,—certainly not about the badness of the hay or the age of the artillery horses. No doubt, some of the flour was bad; but he "was not an expert in flour." Perhaps, if Sir John had had a mild course of the material turned out by the bakers from some of the flour as ration-bread, he might have announced himself as a very competent judge as to what bad bread was! We can quite enter into his defence of the matter, if transport departments assist writers in the Press, who had no responsibility and no knowledge, because Sir John Adye is careful to explain that he did not know anything about many of the matters referred to him, and that he had no responsibility with regard to reports and affairs of that kind, which had led very largely to the appointment of the Committee before which he gave his evidence. For ourselves, however, we must disclaim having made any attack upon the Medical or Transport Departments, although we do not hesitate to admit that complaints directed against them by officers and men found expression in these columns in common with those of the Press. There was one good result from the outcry. It is gratifying to see that Sir Redvers Buller, speaking at Exeter on Wednesday evening, observed that no expedition had ever been more satisfactorily equipped, or had done its work with less discomfort to the men, than that with which he had been recently engaged in the Soudan.

PERHAPS it was at Plevna more than anywhere else in recent times, that the necessity of having the spade became most apparent. For the want of it the Russians could not for a considerable time make good the ground they gained. It would seem from the Instructions for the new equipment, "1882 pattern," that the authorities in this country are fully aware of the importance of the spade in modern warfare. In future it will, with the pick, form a part of every Infantry soldier's equipment. The spade introduced by Major Wallace, late 60th Rifles, is undoubtedly a most useful implement, but when used as a pick it is from all accounts by no means free from fault. Now, the pick is quite as essential as the spade, the latter, in fact, being perfectly useless without the former on rough and stony ground, or in frosty weather. It is also stated that the axe attached to the spade becomes blunted when the latter is being used. It would appear that the combination of pick, axe, and spade does not work well, and that what the Infantry soldier really wants is a spade, pick, and axe. The pick and axe will work well enough together; but the addition of the spade weakens the working effect of at least two out of three. The axe is quite as valuable an adjunct to the soldier's field kit as either the pick or the spade; indeed, it may frequently happen that it will be the first thing he requires on entering fresh campaigning ground, to cut down trees and clear away underwood; but it should be a strong and useful implement, and not a toy. If we take a battalion 1,000 strong, it will occupy, roughly speaking, 1,000 feet, or 333 yards, and as in shelter-trench exercise a spade is used for every five feet only, it would not require more than 200 spades to dig a trench sufficiently long to cover the front of the battalion. Therefore, to give every man a spade is unnecessary. The Committee now sitting would do well to recommend that the pick and axe should be separate and distinct from the spade. On parade, the spades and picks should stand in alternate files,—that is, if the right-hand man has a spade, Number 2 should have a pick, the rear rank man of Number 1 a pick, and the rear rank of Number 2 a spade, and so on. By this means, while the front rank was covering the battalion, the rear rank might be digging the shelter trench. The matter is one of some importance, as upon the working-out of these small details in peace time, the success of operations might in a large manner depend in the field.

CRITICISM has been described as the last refuge of those who have failed; and to a great extent this is true. It is easier to find out a mistake than to correct it. "Every schoolboy knows" that it is one thing to find fault with another boy's reply, but that something more than this is required; and no good schoolmaster would allow a boy to take up another unless he could set his class-mate right. Now, the Secretary of the Admiralty has very properly pointed out some gross errors in Sir T. Symonds's comparisons of the amount to be spent in ironclad shipbuilding this year in France and England. The Admiral asserted that while France was spending this year £1,819,360, we were only voting £912,446 in this country—"about half the French;" on which Mr. Campbell-Bannerman points out that Sir T. Symonds has omitted the sum to be spent on materials in his estimate for England, while he has counted an account of no less than £794,000 twice over in the French votes. Making these corrections, we are told that the Admiral has made a mistake of £1,300,000. The question is thus put on a much more satisfactory footing for this country; but is it too much to ask the Secretary to give us the correct figures, now that he has tripped up his opponent? These we will endeavour to give; but there are two remarks which will naturally occur to us. First,—How came the Admiral to make such a glaring mistake in our Estimates? And, secondly, Why are the Admiralty so shy of explaining exactly how we stand as regards comparison with the French, when they have been so frequently challenged on the subject? The Admiral's error is to be explained by the omission of the Estimates to furnish any exact account of the material to be spent on ironclad shipbuilding during the current year. At p. 191 the gross amount to be spent in labour, and at p. 211 the amount to be spent in machinery, is given; but neither in the Dockyards expenditure nor in ships built by contract is there any information as to the expense of material. As, however, the total estimate for material for each ship is given, we may take the proportional expense of material to labour, which is approximately nine to seven with ironclads, and thus the expense of the material can be arrived at. The figures for ironclad shipbuilding in England in 1884-85 will then stand as follows:—Labour, £343,799; materals, calculated as above, £441,000; machinery, £271,650; Benbow, by contract material and labour, according to the Secretary of the Admiralty, £160,000: making a total of £1,216,449. Making similar corrections to the Admiral's figures for the French Navy, we find that the French are only spending £1,025,360, or, in round numbers, some £200,000 less than we are. Now, we sincerely hope that these figures are correct; but as it is the fact that the French are building fifteen ironclads to our twelve, not to mention a little item of eight canonnières cuirassées, we should certainly like to have official assurance that the Admiral's figures not being correct, the conclusions to be drawn from the Secretary's corrections are not equally erroneous. This is certainly news to most of us, and, we fear, almost too good to be true; but if this is the outcome of comparisons between our shipbuilding and that of our nearest neighbour, our critics have indeed been beating the air; and we are at a loss to understand why we have not been set right before. Some years ago, these comparisons were freely given in Parliament, but then, as Sir T. Brassey was able to state with truth, in a pamphlet published by him in 1873, "we no longer observed with anxiety the Naval development of France." Now, it is not thought politic to give them, and rumour with its thousand tongues exaggerates the causes for this by no means golden silence. We trust, then, Mr. Campbell-Bannerman will be more explicit; and it certainly needs explanation how it is that we are spending more than the French when they are employing some 5,000 men more in their dockyards than we are—(Brassey gives their number as 26,000 to our 16,000 in his Memorandum on the Estimates for 1881-82)—and there building programme is a larger one than our own.

IT is, unfortunately, a common delusion among Members of Parliament to fancy that they have a more intimate knowledge, and an acuter perception of technical and intricate questions connected with Army administration and discipline, than are possessed by those who have devoted a life-time to the study of them. If this self-sufficiency were confined to words, it would be of little moment. Unfortunately, it too often bears fruit in deeds; and matters that should have been entrusted solely to the discretion and judgment of the superior military authorities become subjects for popular agitation, and are often finally settled by Parliamentary legislation in a manner directly in opposition to the cool and impartial judgment of those whose opinion is the most worthy of attention and respect. The evils of popular interference in matters of detail connected with the Army received a curious illustration some time ago. For some years hostility to flogging in the Army was a popular election pledge, to be swallowed by any candidate whose conscience was more pliable than his seat was secure; a position which hostility to the Contagious Diseases Act now appears to occupy. Many candidates for election were quite indifferent whether flogging was abolished or not; a few, who had paid little attention to the subject, and retained unpleasant recollections of their own school-boy days, really believed that it might advantageously be dispensed with. At all events, it cost little to swallow the pledge, and voters might thereby be influenced. In course of years, so many Members, from ignorance, conviction, or external circumstances, became anti-floggers, that at last, in a thin and indifferent House, they obtained a majority, and by a Parliamentary decree suspended the use of the lash in the Army, except in time of war. It is a curious coincidence that almost simultaneously with this abolition, power was given to police magistrates by a special enactment to inflict corporal punishment on a certain class of civil offenders, for whom the morbid sentimentality of popular opinion had no compassion. Since the philanthropists achieved their triumph, insubordination and breaches of discipline are on the increase; and the means by which it is now proposed to meet the evil are increased indulgence towards offenders, and the loosening of the bands of authority and of regimental control. The War Office has notified that a nod is as good as a wink in the case of blind horses. To maintain that implicit obedience and respect for authority which stand the strain of adversity and hardships in war, and without which success is impossible, it is absolutely necessary to have in the background some condign punishment the certainty and severity of which will deter from crime, which no fear of imprisonment could prevent. In extreme cases, such as gross treason, plotting wholesale murder, as was the case during the Fenian movement, the punishment of death, however much deserved, was never carried into effect. In what to civilian minds appear minor offences, but are in fact serious military crimes, such as striking a superior, or insubordination with or without violence, the punishment of death would never be sanctioned by the country in time of peace, even were it in other respects desirable to inflict it. Some years ago, the condition of our Indian Army was deemed by Lord Napier of Magdala so unsatisfactory as to necessitate the publication of a General Order, to be read to every regiment under his command, and we fear that there is no great reason for satisfaction about it at present, if we are to judge by paragraphs in the Indian papers; but as penal servitude sentences can only be carried out at home, there seems to be a tendency to force courts-martial to give light sentences. We have always urged that discretionary power should be given to the superior military authorities in matters of discipline, and that they should be unshackled from the bonds imposed by popular legislation. Much of the agitation which existed regarding flogging might be traced to ignorance on the part both of the agitators and the agitated as to the way in which the punishment was inflicted, just as Members in the House of Commons inveighed against "the barbarous system of branding soldiers," under the belief that the same branding was inflicted by a hot iron, not knowing it is a perfectly painless species of the "tattooing" so common among sailors. We must reiterate the opinion that the power of flogging was valuable, that it prevented crime that now causes great expense and trouble, to fill the military prisons, and injure the efficiency of the Army, and that any further relaxation of the military code in favour of criminals will be fraught with mischief to the service.

The unwillingness of the Admiralty to comply with the Duke of Edinburgh's desire to take the combined Squadrons up the Baltic will be received with general regret in both, the Baltic being decidedly unbeaten ground to the great majority of Naval officers.

The resignation of their commissions by three Marine officers in one month under somewhat similar circumstances, is certainly an unpleasant event for that corps, which has hitherto been singularly devoid of scandals. The Admiralty appear to acquiesce in the rule which obtains in the Army, to permit an officer to resign his commission; the Naval officer has either to appear before a Naval tribunal, or have the indelible stigma of "resigned to avoid court-martial" eternally attached to his name.

Several Naval officers under Commander Hammill are employed in the Upper Nile sounding and making charts, and assistance has, we understand, been sent from the ships at Alexandria to Colonel Duncan, R.A., commanding the Egyptian troops at Assouan. These are dependent on the Nile for their supplies, and the Blue-jackets sent from the Fleet are lent to organise the transport arrangements. The *Alexandra* and *Superb*, having refitted at Malta, have been ordered to relieve the *Monarch* and *Invincible* at Alexandria. The camels being purchased in Egypt and the saddles being manufactured for those animals are all intended to serve as transport to Colonel Duncan's force.

Captain Fullerton, at present in command of the *Sapphire*, and Captain Seymour, of the *Inflexible*, are named as likely to succeed Captain Thompson in the command of the *Victoria and Albert*.

The Admiralty have exercised the right conceded to them by Order in Council of rewarding special merit by special promotion in the case of Brevet-Major Crosbie, from lieutenant to captain in September, 1878, for services in Western Africa; and Brevet-Major Dowding, from lieutenant to captain in November, 1879, for services at Ekowe. Major Tucker has twice been brought to the front in Egypt, first at Kassassin, where he seized a gun from the enemy and turned it upon themselves, and again at El Teb, where he performed a similar service. Major Tucker has jumped over the heads of eighteen of his seniors on the captains' list.

From a return issued this week by the Admiralty to an order of the House of Commons, made on the motion of Lord Henry Lennox, showing the number of men borne on the Lists of the Royal Naval Reserves during the last four years, we find the strength of this force has fluctuated but little, the grand total each year since 1880 being 20,000 odd. The present year shows an increase of 400 men over the first mentioned date.

A report reaches us from Portsmouth that the *Inconstant* is being sent to Plymouth to get her out of sight, as both that cruiser and the *Shah* are sadly in want of repairs. But it would cost so much to put these two ships in an efficient state that the Admiralty is afraid to ask Parliament for the money. New boilers, new armaments, torpedo fittings, and machine-guns and shields, besides the electric light, are all required. It is, however, most discreditable to the Government and dangerous to the State if the matériel of the Navy, as well as its personnel, be so grossly neglected.

A Flying Squadron composed of full-rigged ships is a necessity in these days of mastless armour-clads, as it is the only nursery we are capable of maintaining for our seamen in which to learn seamanship. Nevertheless, the very frigates wanted for this work have been allowed to decay and become useless. The *Rover* has been four years in the Reserve; the *Active* and *Volage* now over five years; the *Conquest* four years,—and never yet commissioned. There are sailing cruisers enough in the Reserve wherewith to form two Flying Squadrons, but the Admiralty fear the first expense, the great expense of placing a sufficient number of these ships in thorough repair to form even one squadron. Then there is the paucity of men to be taken into consideration. Even though the ships were repaired, there would be neither seamen nor marines to man them. Last, but not least, comes the expense of maintaining a Flying Squadron, the great deterrent in the case. Ten millions would hardly suffice to make the Navy efficient. Foreign Governments know this, and, while professing the greatest friendship for England, are steadily creeping up to her in Naval strength.

It is somewhat amusing to read in the daily papers serious reports of a "strong reinforcement," "a battalion," "several companies," of Marines, having been ordered by the Admiralty to be held in readiness to proceed to Egypt. We wonder where the men are to come from! The Marine Barracks are at this moment nearly empty; so much so, that we doubt very much whether it would be possible to bring together a thousand Marines were all available men collected from the three great naval ports, and then every artificer in barracks would have to shoulder his rifle. But what would the ships to be commissioned do without marines? Already the Admiralty have been obliged to reduce the detachments serving on board the guardships by 10 per cent.

Notwithstanding the strenuous efforts made last year by the Admiralty to keep the seamen of the Navy up to the establishment, the monthly average under it was about 600 men. No wonder their Lordships find much difficulty in carrying out the necessary arrangements to relieve ships whose period of foreign service has expired. There are at present six ships whose commission has already extended into the fourth year, for whom no relief can be provided until the men recently paid off return from leave. The Naval Barracks are empty, and so are the guardships.

It surely is time for the Admiralty to direct their attention to the prevalence of the non-combatant element on board her Majesty's ships. Bandsmen, shoemakers, butchers, barbers, tailors, lamptrimmers, *et hoc genus omne*, form a goodly array on board one of our modern ironclads, while in the aggregate forming a serious element of weakness. It is no exaggeration to say that most, if not all, of these ratings could be filled by trained seamen or marines, as is actually the case in smaller vessels, without any loss of efficiency to the service. The accommodation for the crew is gradually lessening in our newest types of vessels, the "idler class" (we do not use the term in any invidious sense) appears to be gradually increasing, and it certainly seems time that serious attention were directed to the matter.

The Admiralty are at present paying great attention to the armament of the Navy, and every effort is being made to replace the old armament by new and improved ordnance and rapid-firing arms. The reports daily reaching Whitehall from the Fleet as to the performance of the War Office Gardner mitrailleuse are very disappointing; so much so, that it is unlikely that their Lordships will sanction any more of these guns being purchased. The Gatling gun has been improved lately by the invention by Mr. Accles of the so-called "positive feed;" but having once dropped into disrepute, it is unlikely that this gun will ever again establish for itself the position it once held in our armament. At Tamai the jambs were frequent, and no improvement in the feed will obviate the plungers cutting the cartridges. One of these guns jambed most inopportunely. Those who had charge of it sarcastically remarked, however, that it hit off the exact right time to cease fire. The Arabs were just upon it, and though they captured it, they could not possibly use it—some comfort to those who had to leave it for a time in their hands.

The Naval pension of £50 per annum, vacant by the death, on May 13, 1884, of Retired Captain Timothy W. Sullivan, R.N., has been awarded to Retired Staff Commander Thomas Bowen, from that date.

The Russian Navy has in use several Palmcrantz Baranovsky, Engström, Gatling, and Nordenfelt guns. Admiral Schestakoff has ordered trials to be made in June, in the Gulf of Finland, with rifle-calibre guns, and rapid-firing shell guns. The Minister of Marine intends to be present.

His Majesty the King of Abyssinia, whose Imperial style and title we cannot give at length, seems to be in no hurry to meet Admiral Hewett at Adowa, nor has the Admiral been very rapid in his motions, whether the delays were voluntary or not, for he took a month to get over the ground between Massowah, and Adowa, where he was on May 6, awaiting the truculent monarch, who was expected in less than a week from that time. Mason Bey, who is mentioned by Lord Edmond Fitzmaurice as the Admiral's companion, is an American formerly in the Confederate service, who is well acquainted with the Soudan, having resided there for several years, and who is also thoroughly informed respecting the manners and customs of the fellaheen, as he was for a long time engaged in the Cadastre, having his head-quarters in the Fayoum. He is a gentleman of courage and ability, who cannot fail to prove most useful to Admiral Hewett, who has the extraordinary advantage of having by his side as well, in the person of Captain Speedy, a man whose equal in the matter of Abyssinian knowledge it would not be easy to find. We look with great dislike, if not with apprehension, on this mission. By all accounts, King Johannes, the pet of many of the missionaries, is a most brutal, ferocious, and cruel despot, and the filth and savagery of his Christian subjects offer a strong contrast to the mildness and comparative culture of the Egyptians, and place them far below their Arab neighbours from a civilised point of view. Such alliances can bring us no good; and we have no right, in pursuit of our own political ends, to invite these cruel barbarians to add to the miseries which afflict the unfortunate inhabitants of the Nile Valley. If Sir William Hewett has been authorised to invite the assistance of the King of Abyssinia in an invasion of the Soudan for any purpose whatever, we hope he will fail; and we can scarcely believe that he will, when he has ascertained what sort of people they are amongst whom he is, ardently desire his own success.

The Admiralty might do well in considering the few remarks recently made in Parliament by Admiral Egerton respecting the steam department of our Navy, and his practical suggestion that many of the duties now done by engineers might well be performed by men of a class similar to warrant officers, will, we are sure, be endorsed throughout the whole Naval service. Notwithstanding the reductions during the past seven years in the Engineers' List, further alteration is desirable, and this could be effected by offering inducements to a superior class to enter the Navy, with a prospect of attaining a position apart from the ship's company. Unfortunately, the Admiralty have never looked necessity "straight in the face" in matters connected with the steam branch of the service, and only met it by piece meal legislation. But the gallant Admiral's opinions will prevail before the present decade closes.

The Admiralty and the War Office have been directed to furnish the Cabinet with their views as to the practicability of sending an expedition to Khartoum in the autumn, and the Government have received in return what may be termed the Naval and Military Mobilisation Scheme. Beyond this, nothing has been done.

Whether Sir John Hay be wise or successful, no one can doubt that his motion for a vote of thanks to Sir W. Hewett and Sir G. Graham, and the naval and military forces engaged against Osman Digna's followers, will put the Government "in a hole" from which they cannot be extricated by the "previous question." There may be many arguments and some precedents for refusing the thanks of Parliament to the officers and men of the Suakim Expedition; but the opposition should not come from the Government which employed it! References to the numbers engaged and the losses sustained are not arguments in favour of the vote, and comparisons between the actions and those for which the thanks of Parliament have been given have no value. Tel-el-Kebir, for instance, was a battle which decided a war and vindicated the policy of forcible interference in Egypt; whereas Graham's operations were of a punitive and local character, scarcely susceptible of strict military definition, and the Navy splendidly represented on shore by the Naval Brigade had no sea fighting at all. It would be difficult to show from our friends Puffendorf, Gertius, or Vattel, that the British had any right to attack Osman Digna, except that which they derived from their ability to do so. Had the troops marched on to Khartoum, *viâ* Berber—not then we believe possible, or, at all events, prudent—and had they relieved Gordon, they would no doubt have been entitled to and would have received a most hearty vote of thanks from Parliament, but it was not their fault they did not try for it.

Three weeks ago an announcement was made in our columns that the Government was preparing an expedition for the relief of General Gordon, including in the operation, we presume, the liberation of the Egyptian garrisons in the Soudan, unless a change has come over the situation and the intentions announced by Government when they accepted General Gordon's offer and despatched him as a *boucq émissaire* into the wilderness. The leading journal on Thursday, however, deplored that the Government had not adopted, or even considered, the expediency of at once adopting a plan of campaign outside the scope of hypothetical inquiries; and described the rumours relating to the expedition of 10,000 men of all arms, under Lord Wolseley, to be despatched to Suakim, and march by way of Berber to Khartoum, and the commencement of a military railway from the Red Sea to the Nile as "probable conjectures, founded on the answers of professional experts to Ministerial questions." But as it is perfectly plain that no expedition could be sent across the desert from Suakim to Berber at this time of year, and that it would be impossible to despatch a flotilla by the river until late in July, when the Nile has commenced to rise, the Government can scarcely be blamed for refusing to send out troops to kick their shins on the shores of the Red Sea, or to swelter on the banks of the Nile, awaiting a time when they can begin operations. It seems almost absurd to deal with the question of the personality of the commander of such a force at present; but assuredly, if Lord Wolseley insists upon it, there is no reason to oppose his desire to take command of the expedition, unless it be the inconvenience which would be involved in the absence of the Adjutant-General of the Queen's army from the Horse Guards or the graver consequences which might result from his absence, should any of the sudden emergencies to which this Empire is subject arise to invite the serious consideration of the Military authorities. Our great contemporary admits that there has been a complete scheme, or, to be precise, "has reason to believe that such a project has been drawn upon paper," and affects to think that it is a mere plan of campaign, to give effect to which no practical steps have as yet been taken. Now, we believe, on the contrary, that the measures, which are needful for the execution of a scheme upon paper, are already in such a state that the mobilisation of the troops to be engaged might be effected in a few weeks. But at the present moment the Soudan is inaccessible to any but Asiatic or African troops. "Too late! too late! Ye cannot enter now!" But when the time comes for the Nile and the sun to open the portals, and the genii of the place utter their "Open sesame!" there may be much more grave questions to be decided than even the retention, reconquest, or evacuation of the Soudan, or the carrying away of Gordon and his Egyptians out of captivity.

The Russian advance in Asia, on which Mr. Ashmead Bartlett keeps an eye the like of which was only possessed by the editor of the *Skibbereen Eagle*, who assured Lord Palmerston that he never removed that penetrating organ from his policy or person, was made the subject of an inquiry by the former honourable gentleman on Thursday night in the House of Commons; and Lord Edmund Fitzmaurice, duly primed and loaded by a Foreign Office clerk with materials from the Intelligence Department, gave a neat little *résumé*—which Mr. Ashmead Bartlett challenged, not without reason—of the various stages of the advance, but which anyway was no answer at all to the inquiry; because Mr Ashmead Bartlett wished to show, apparently, that, in some mysterious way, Mr. Gladstone, who was once accused of being an emissary of Russia, had connived at the advance of the Czar's troops since he came into office, whereas Lord E. Fitzmaurice grappled with the subject since December, 1870. We do not see that it facilitates matters very much to call attention to the number of steps on a staircase taken by a burglar. The main question is how he is to be dealt with when he approaches, or menaces the strong box; and that is a matter which General Hsmley did not satisfactorily dispose of in the lecture to which we adverted last week; nor was it much further elucidated by the speeches, excellent as they were in themselves, of Lord Napier of Magdala and the other distinguished officers who took part in the discussion at the United Service Institution. Again we repeat that the essence of the danger to be expected in the advance of Russia towards the borders of Afghanistan is to be found in the rear of our frontier, and not in front of it, and that our wisest and best defence and our most urgent policy is to secure the base of operations which constitutes also the Empire for which we are contending.

The French Infantry of Marine, which has to do most of the colonial business, has had very hard service for some years past, and it is now said that should the expeditionary force in Tonquin be reduced, the Algerian troops will be brought home and the *marsouins* will be left to look after the protectorate. It is further said that in the event of the effective in Madagascar being raised to 3,000 men, that the *marsouins* will be called upon to make up the requisite number of troops. A report lately issued by the French Admiralty shows what very tough work the Infantry of Marine has had to do. "The total loss of this corps," says the report in question, "exhibits the fearful total of 78 officers in three years killed in insurrection or by endemic maladies contracted in pernicious climates. This figure would appear incredible without proof; that is to say, that in 29 years the whole staff would die off if it were not renewed." The whole force consists of under 20,000 men, divided into four regiments. The following record will tell its own tale very eloquently. The 12th Company of the 4th Regiment left France for Senegal in 1866; it had hardly arrived when it was moved up country with a column, and took part in the disastrous affair of Tiofat, where it was decimated. The yellow fever in 1867, and the cholera in 1868 and 1869, carried off its effective, which had to be renewed several times. In July, 1870, the company returned to France, and was almost entirely massacred at Bazeilles, and those men who were spared by sickness and bullets endured a long captivity in a Silesian fortress, which was a severe change from a torrid region. At Bazeilles the *marsouins* lost altogether 1 Lieutenant-Colonel, 4 Majors, 8 Captains, and 19 Lieutenants. At Sedan, out of 8,000 men engaged, they had 3,652 killed or wounded. Jean Frollo, from whom we borrow these details, says:—"I have before me a manuscript newspaper which is called *Marsouin-Journal*, which was edited by the corporals and sub-officers of the Marine Infantry with incredible good humour. Now, the post of Kermandoubekary in Senegal, which they had occupied the year before, had lost 94 men out of 100 by yellow-fever. All round the post was a regular cemetery. The epidemic, hardly allayed, might break out again. Yet they laughed and joked, and said that the Marine Infantry lost more men in time of peace than the troops of the Line in time of war. They were nearly correct. In 1873, at Guyane, the mortality rose to 36 per cent.; at Senegal, during the last epidemic, to 79 per cent. And for Cochin China, who would dare to acknowledge the losses of this unfortunate Marine Infantry, which has been continually exposed?" The writer winds up with a graphic account of the excitement which reigns when a battalion of *marsouins* return home, and friends and relatives crowd round the column in search of lads who too often have been struck off the roll.

Five officers of the War Office were, in February, 1880, appointed C.B.'s (civil division) for their services at home in connection with the campaign in South Africa. No officer of the Military Administration of the Government of India has received any honour or reward for services in connection with the Afghan War. Early in 1880 the Government of India recommended "Captain Collen and Captain Deane" for promotion, on account of exceptional services as officers of the Military Administration during the campaign of 1879-80, and Lord Lytton expressed his full concurrence in the opinions of the Council and of Sir E. Johnson, that their work was deserving of recognition by brevet promotion. Lord Ripon also approved, and in a despatch in August, 1880, the names were duly sent in to the Secretary of State by the Indian Government, with a memo. which stated that these officers had performed duties of an extremely valuable character. Nothing was done. Captain Deane was in charge of the Kabul Section (except when on field service) from September, 1879, to April, 1881, and the whole work of the war business of the Military Department (apart from Supply and Transport) fell upon him and upon the Secretary, Colonel Allen Johnson. Captain Deane was specially mentioned in Lieutenant-General Sir Frederick Roberts's despatch, dated February 9, 1880, as assisting Colonel MacGregor in collecting a party of the 9th Lancers, 14th Bengal Lancers, and artillerymen in the recovery of the abandoned guns on December 11. He rallied the entire detachment by which the guns were recovered. He also served with the 3rd Sikhs in the action on the 13th, and with the 14th Bengal Lancers in the action on December 14, and was mentioned in the despatches of Generals Baker and Hills. Captain Deane acted as Staff officer to General Hills during the investment of Sherpore by the enemy. Sir Frederick Roberts brought Captain Dean's services prominently to notice. In his letter of May 12, 1881, to the Commander-in-Chief, Sir Frederick Roberts again brought Captain Deane, with other officers, to notice with the remark that "these officers are, I consider all deserving of brevet promotion. They did excellent service during the campaign in Afghanistan." Sir Michael Kennedy acknowledged Captain Deane's services in his final report on supply and transport operations, stating that he was "indebted to him for cheerful, ready, and very useful aid on that occasion." Captain Collens was recommended for the C.S.I., and he received some sort of reward by departmental promotion, but, notwithstanding the repeated representations of the Indian authorities as to the services rendered in the wars of 1879 by these officers, nothing was done for them.

A correspondent, who asks whether there is any precedent for the extraordinary court-martial at Dover to try two soldiers of a distinguished regiment for cowardice, is informed, if he means whether courts have sat upon soldiers on charges preferred for conduct such as that which caused the men to be subjected to two years' hard labour, that, fortunately, the instances are rare. But, whatever may be the punishment awarded in this country, it is certain that in most foreign armies the punishment for the crime laid to their charge, if established, would have been death. It is to be regretted, we think, that no authentic account of this particular court-martial has been, as far as we know, made public. It is impossible to suppose that the character of a regiment would be affected by the misbehaviour of individual soldiers in it. At all events, the regiment to which the men belonged is identified and known to all the world. According to the Articles of War in the United States, when a commissioned officer is cashiered for cowardice, the crime, the name, the place of abode, and punishment, are published in the newspapers; and we believe a similar publication was made when it was found necessary, for example's sake, in the war of 1861, between the North and South.

Never was a testimonial better deserved than that which is to be presented to Captain Edward Walter in the United Service Institution on June 14. The idea was most happy, and the execution of it masterly. At the outset, the bantling was nursed in the cold cradle of indifference. Nobody seemed to give a thought to the fate of the poor old soldiers, who, maimed or unfit for service, were leading a miserable, useless, if not dishonoured existence in the courts and alleys of our great towns, earning, at best, precarious additions to their scanty means of livelihood, or who were scattered over the country, the hangers-on of the village alehouse, the awful warnings to the intending recruit. It is 25 years since Captain Walter, whose service in the 8th Hussars seems to have been turned to good account in engendering a kindly interest in the fate of the soldier, formed the first little detachment of 13 men, clothed them in uniform, and established them with a roof over their heads, in the service of the public, who have by degrees been educated to appreciate the enormous advantages offered by the habits of obedience, cleanliness, and discipline taught in the Army as fitting the Commissionaires especially for offices of trust, where respectful behaviour and upright conduct and prompt attention are desirable, if not always attainable, qualities. And so at the present moment Captain Walter finds himself at the head of more than 1,200 men, most honourably and usefully employed, to the great advantage of the service and of the public. We do not think that any eulogium is needed to give force to the bare statement of what has been accomplished by Captain Walter; and we think that no regiment in the service can refuse to admit the claims his exertions have established upon it for modest support. See what has been effected by the energy and judgment and will of one man! We believe that all the spring Captains who have expended their time and money for generations in the pleasures of London, and in assiduous attention at ball-rooms and race-meetings, have not effected one hundred-thousandth part of the good to the Army which has been wrought by Captain Edward Walter; and we say not this in order to disparage their innocent amusements, but in the hope that some one of them will cast about and see whether he cannot start a fresh idea, and emulate so admirable an example.

Truth asserts that the Bombay command will be vacated shortly by Sir Arthur Harding, and the Duke of Connaught will be appointed to Bombay.

When the Franco-German war was brought to a close, the French found that, in addition to a war indemnity of £200,000,000, &c., they would have to lay out £80,000,000 in replenishing their magazines, rearming their troops, and erecting new fortifications. Every year a large sum of money was voted, under the title of liquidation account, in completing the defences of the country. The £80,000,000 has been found insufficient, and £12,000,000 more will be required. Next year the War Minister will ask for £4,000,000, and the remaining £8,000,000 will be demanded in the following years. In the way of arms and ammunition, we find that over £40,000,000 has been spent during the last twelve years, and more than half that sum in fortifications. Out of the sum which remains to be spent, nearly £4,000,000 will be laid out in arms and ammunition, and more than £5,000,000 on completing the system of fortifications. The next heaviest item is for clothing, which has cost over £8,000,000, and upon which more than another million is to be expended. These figures will not astonish those who reflect on the large works with which France has been obliged to replace Metz, Strasburg, &c., the new forts round Paris, the improvement and re-arming of old forts, and the masses of men which with compulsory service have to be armed and clothed.

The French are elated with their success in Tonquin, and we regret to see some of their papers boasting that the "Black Flags were beaten, although they were paid and supported by the Chinese, and although behind the Chinese were the English." We are represented as having wished to drag the French into a war in Egypt, and as having left the Chinese in the lurch. *Ni vero ni ben trovato.*

The *Progrès Militaire* gives the biography of Captain Fournier, of the Navy, who is said to have exhibited great diplomatic skill in the matter of the Tien-Tsin Treaty, signed between Li Hung Chang and himself. Captain Fournier is one of the youngest officers of his rank in the service. He gained the Legion of Honour during the siege of Paris, and was one of the few Naval officers who survived all the sharp fighting at Le Bourget, which was more than once taken and retaken. In addition to being one of the most brilliant officers in the French Navy, Captain Fournier is the author of several scientific works which are very highly thought of. He has long been on intimate terms with Li Hung Chang, and this fact accounts in a measure for the unexpected signing of the Treaty between France and China. The Government have approved of the treaty, and it now only remains to be seen whether it will be executed. We may add that the French already propose to raise some Native battalions in Tonquin, to recall a portion of the expeditionary force, and to augment the Marine Infantry, whose duties will be increased by the Treaty of Tien-Tsin.

A WASP FLEET.

M. Gabriel Charmes, in *La Revue Politique*, says he is firmly convinced that the time has passed for constructing huge ironclads, which have become obsolete without having had a fair chance of exhibiting their merits. He points at the way in which the Thorneycrofts behaved during the recent cruise of the French fleet in the Mediterranean, when such heavy weather was encountered, to show that they can be trusted to take long voyages alone, and, in fact, that they are autonomic. "They could be sent to Tonquin," he says; "whereas the large ironclads could not pass through the Suez Canal. No squadron," he adds, "will venture to sea without an escort of torpedo-boats, and naval battles in future will begin with skirmishes between torpedo-boats, which will be supported by ironclads. The advantages of the torpedo-boat are numerous. They are cheap,—that is to say, sixty torpedo-boats can be built for the price of one ironclad. An ironclad takes seven or eight years building, while a torpedo-boat can be built and launched in six months. Four or five torpedo-boats would be quite a match for an ironclad. The torpedo-boat is gifted with rapidity and agility, and presents so little mark that it is difficult to hit." M. Charmes has very little confidence in ironclads being able to protect themselves with Nordenfelts and other machine-guns, especially in rough weather, when the torpedo-boats would disappear behind the waves. In still weather it would be almost impossible to make them out through the smoke—such smoke as hung over the British Fleet at Alexandria. M. Charmes says:—"It is evident that the great Naval Powers will not be able to go on swallowing up millions on gigantic vessels without madness." He then adds that when the cruiser disappears the monster gun will become useless, for it will have nothing to pierce. M. Charmes is of opinion that the nation which has the largest number of torpedo-boats will be mistress of the seas, and he points out that Denmark is the most possessed in this matter; then comes Germany. England is very much behind; but the British Colonies seem quite alive to the necessity of having a numerous wasp fleet.

A telegram from Odessa states that the British graveyards around Sebastopol were consecrated on Wednesday by the Bishop of Gibraltar.

Reviews.

FOREIGN MILITARY LITERATURE.

Das Moderne Kriegsrecht der Civilisirten Staatenwelt. Systematisch dargestellt von Professor Peter Resch. Graz und Leipzig: Ulr. Moser's Buchhandlung. 1884.

This is a systematic exposition of the laws of war as practised by civilised nations. Bluntschli states in the preface to his well-known work on the subject, that "the laws of war have become more humane since recent wars in Europe and America. The dangers of war have been alleviated by them, and the fury of violent passions has been tempered. But an acquaintance with the modern laws of war, however highly important it may be both to the soldier and the civilian, is by no means as general as it ought to be; it is, therefore, a duty imposed upon learning to make them accessible to everybody." The work of Bluntschli's is based upon the articles of war drawn up by Professor Lieber, of New York, and adopted for the Federal army by President Lincoln in 1863, and has been acknowledged by critics to be an appropriate and meritorious composition. If, notwithstanding this, the author of the *résumé* before us—which, by-the-bye, is extracted from his work just issued on "European International Law"—publishes it, this step may be justified by the fact that in it he merely gives the laws of war as actually practised; whilst Bluntschli, as well as later writers, Heffter and Dr. Geffcken, mingle the law as now recognised with what, in the author's opinion, it ought to be. Our author, like Bluntschli, distinguishes between the actual laws of war proper and the laws of neutrality as created by war. But he is of opinion—and he acts upon it—that the treatment of those laws ought to be preceded by a review of the origin of conflicts between nations in general, the settlement of international quarrels by compromise, and the adjustment of such disputes by self-help, without hostilities. This is the treatment adopted by the author, whose lucid exposition ought to be carefully studied by military men, by business men, and scholars alike.

Militär-Wochenblatt (Supplement).—The supplement contains a lecture by Major Wachs, of the 4th Pomeranian Regiment No. 21, on the Mediterranean from a military point of view. The author looks upon as a vital point the position which Russia has succeeded in taking up in the Black Sea and on the Lower Danube. The northern arm of that river, the Kilia, is now entirely controlled by Russia. It is thought that that arm of the Danube will finally be the most important outlet. It is reported that Russia contemplates the creation of a large harbour at Wontchok, east of Schebrieny, and to guard it by powerful works. No one can prevent Russia making the best of the position she has conquered; but there is one young nation full of aspirations which smarts under the injury inflicted on her under the Berlin Treaty by the cession of Bessarabia to Russia. It will be impossible for Roumania to counteract the military power of Russia on the Lower Danube; she is, however, trying to emancipate herself commercially. There is reason to hope that the contemplated sea canal from Küstendje to Tchernavoda will be constructed, and that Russia will be checkmated thus far by being prevented to interfere with the trade of the Danube. Batoum is another Russian acquisition. As to the Mediterranean itself, England has held the western entrance for many a year; and the safety of her Indian Empire demands that she should hold the other as well. It is the logical sequence of events that the British lion should seize the key to the road to India; for without complete control of Egypt and the Suez Canal, the intercourse of the sovereign country with the Eastern Empire would be paralysed. The tendency of English action on the Nile is to regulate the trade of Central Africa, and counteract French efforts on the Congo; those are the first beginnings of coming events. Cyprus is an important acquisition, the value of which as a coaling-station, &c., is now as much recognised as the possession of Malta, or that of Aden and Perim in the Red Sea. Those *points d'appui*, however, would be nothing without that moveable chain the links of which are formed by the British Navy. Under present conditions, there is no denying the fact that, with those points in her possession, England is, and always will be, the mistress of the Mediterranean. The author sounds one note of warning. He thinks that the English nation will have to face the question of general liability to military service sooner or later—the sooner the better, if that world-empire is to be maintained which forms Great Britain's strength.

Organ der Militär-Wissenchaftlichen Vereine (Vol. X., xvii., Part 4).—"The French Autumn Manœuvres of 1883" is a *résumé* of the remarks of the *Avenir Militaire* upon the operations carried on by the various French *corps d'armée* during the autumn of 1883. On the whole, the autumn manœuvres of the French Army in 1883 leave the impression behind that it is making progress, but that the latter might be a little more rapid. The *Avenir* admonishes the French Army not to forget that a watchful nation on the other side of the Vosges is constantly improving and perfecting its Army, and hopes that this year will witness greater successes at home.

Art in Provincial France. By J. Comyns Carr. (Remington.)—The writer, acting for the *Manchester Guardian*, proceeded to visit some of the principal museums of provincial France. The time was propitious; the subject of art administration was attracting attention at home; and the Corporation of Manchester was preparing an Art Gallery. The author, however, in carrying out his commission experienced some difficulties which he had not calculated on. Among others, he found that arrangements which worked well enough in one town seemed to produce under different conditions of local management results that tended to modify the first impression; and just as often it would be found that the energy and enterprise of the citizens themselves had served to exhibit in a more favourable light some element in the general scheme of organisation that had elsewhere proved comparatively ineffective. The introduction to Mr. Carr's work is highly interesting.

We have received the first volume of *The Bandmaster's Guide*, by Mr. Palgrave Simpson, published by Boosey and Co., price 7s. 6d., which appears to be a well-ordered and useful treatise, setting forth in scientific, yet simple order, the principles of military and orchestral harmony. It is dedicated to the Duke of Edinburgh, "by permission, in recognition of his valuable aid to the cause of Music, not only as an executant and composer, but as a promoter of the Royal College of Music." The work seems to us, as far as we can form an opinion, extremely sound, well reasoned, useful, and sensible.

INDIAN NOTES.

The *Pioneer* says:—"When Brigdr.-Gen. Wilkinson, commanding the Presidency District in Bengal, goes away on short leave, it is probable that no successor will be appointed; the duties of the Brigade being undertaken by the senior officer on the spot, Col. McNair, 4th N.I."

Col. A. G. Ross, 1st Sikh Infantry, who was deputed to inquire into some alleged grievances of the Sikh lascars attached to the Royal Artillery at Hong Kong, has returned to India.

Lieut.-Col. Sartorius has taken over the acting command of the Marine Battalion at Bombay.

Brig.-Surg. Webb and Surg. Stuart have been ordered to Meerut; Surg.-Major Townsend, to Allahabad; and Surg.-Major O'Brien to Cherat. Surg. Pierson is transferred from Peshawur to Rawul Pindee.

The *Pioneer* learns "that the Duke of Connaught will not relieve the Hon. A. Hardinge, and that the latter will probably have his term of service in Bombay prolonged for a year or more."

A despatch from the Governor of Dongola, with regard to whose good faith some doubts have been expressed, is to the effect that Gen. Gordon has declared that as the British Government have refused his demands for a relief expedition, he has determined to embrace the Mussulman faith. The Governor mentions no date, nor does he give any source for this information.

The *Morning Post* says:—"Sir R. Thompson and Mr. Robinson have been appointed, on behalf of the War Department, on the Treasury Committee to inquire into printing expenditure."

Mr. W. T. Quigley, Divisional Officer in the Dingle Division of the Limerick Coastguard district, has been selected to take charge of the newly-formed Naval Reserve Battery at Peel, in the Isle of Man. Mr. Quigley is an old highly experienced and much valued Coastguard officer.

A new lodge of Freemasons, formed in connection with the West Kent Volunteers, numbered 2,041, was consecrated by Viscount Holmesdale, the Provincial Grand Master for Kent, at the Lullingstone Masonic Hall, Dartford, on May 21. Lieut.-Col. William Bristow, commanding the 2nd Volunteer Battalion of the Queen's Own Royal West Kent Regiment, was installed as W.M., and Major Gordon and Captain Graham of the same battalion as Senior and Junior Wardens.

The *Daily News* correspondent says:—"My proposal to send a light-draught flotilla from Umbokol is the only quick and safe way to rescue General Gordon without incurring the enormous cost of a large military expedition. Umbokol is about fifty miles south of Wady Halfa. It is also south of the Samna Rapid, which forms the chief obstable to the navigation of the Nile. It is 25 miles south of Sarras, where the Soudan Railway actually terminates, but the permanent way of the Soudan Railway is completed to Umbokol. Sleepers and rails are on the spot ready to be laid down, and the line from Wady Halfa to this spot would be completed in two weeks. From Umbokol a flotilla of gunboats should be sent, not drawing more than 3 ft. of water. No difficulty would be experienced in getting the flotilla over the Samna Rapid."

Active Service cannot wear out the teeth that are brushed night and morning with Rowland's Odonto, the purest and most fragrant dentifrice ever made. All dentists allow that neither washes nor pastes are as efficacious for polishing the teeth and keeping them sound and white as a pure and non-gritty tooth-powder; such Rowland's Odonto has always proved itself. Ask any dealer in perfumery for Rowland's Odonto, and avoid spurious imitations, theirs being the only original and genuine Odonto.

DIMNESS of SIGHT.—Dimness of Sight and Blindness are often caused by the use of unsuitable Spectacles. Mr. H. Laurance, F.S.S., Oculist Optician, 1a Old Bond Street, scientifically adapts his improved Spectacles to strengthen and assist the weakest sights. Testimonials from Earl Lindsay, Sir Julius Benedict, F. D. Dixon Hartland, Esq., M.P., Thomas Cook, Esq., the well-known Tourist Agent, &c. Pamphlet, containing valuable suggestions, post free.

DISTRICT TARTANS, OR CLAN COLOURS AND THEIR VARIETIES.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—I observe a friendly invitation to me that I, among others, should go into the question of the "origin of various tartans." The paragraph begins by saying, "Now that there is some difficulty about the tartan for the Argyll and Sutherland Highlanders." Now, Sir, I fancy I detect in this invitation perhaps some slight desire to trip me or others up on a difficult subject. My immediate reply, however, is this, "Wait till a work I am engaged on now comes out, and perhaps some of the questions affecting the origin of tartan may be found answered." It would be neither fair to my publisher or to myself were I relate all the fruits of my researches; but a few facts I will state. Let me begin at home anent the Campbell tartan. A lady related to our family has often seen the Campbell plaid which was worn by her ancestor at Culloden. It was faded, but was of the common Campbell colours,—dark blues, black, and greens. Earl Crawford, colonel of the 43rd, later 42nd, chose, as we all know, a new pattern for his regiment, the component colours of which were the "clan colours" of the Campbell clan, but at that date varied as to "sett," or "set." The only new tartan, if we may so say, was the tartan then called "42nd." But it is worth noting that in Argyllshire among the peasantry the Black Watch and Campbell tartan are synonymous. The reason is this:—Before the Black Watch became numbered the 43rd or 42nd, the independent companies of which it was composed wore. the tartan of their various districts and various leaders, Thus the Campbell company wore the Campbell colours and the people of the country saw and knew the Campbell company of the Black Watch, of course; and though later on the new pattern chosen by Crawford varied a little from the true Campbell, yet the 42nd tartan and Campbell are still named as one and the same. Earl Crawford was much at Inverary, where he lived with the Duke in the old castle, and became acquainted with the people of the district, its dances, and also with the tongue they spoke. He took the Campbell colours for his regiment, varying the set. The colours of a clan are found grouped in large districts. The foundation colours, the varieties, family variations in a clan colour, are endless, the original clan colour being retained in the foundation or ground colours of a district. These variations arose from family pride, and were purposely made, so that men at a glance should be able to distinguish friend from foe. A glance suffices to tell whence a man hails, and this appears to have always been the case. A gentleman whose word cannot be doubted, and whose antiquarian knowledge is great, not many years ago saw in a cottage, preserved in a "kist," a fragment of a McKenzie tartan plaid which, together with a mystic crystal, had come down from father to son from the time of the battle of Kilsyth; the ancestor of the owner of the fragment of tartan was killed in that action, and the friends and tribesmen tore this from the plaid which, bloodstained, formed the dead man's shroud; the crystal ball was taken also, as being too valuable to be buried with the body, for these were reckoned to bring luck, ward off cattle and other plagues in ancient time, as is well known. I name these because it has been often said "tartans are not older than regiments," which is unmitigated rubbish. In olden days we never hear of tartan, but of the spotted cloth,—that is the Gaelic interpretation: spotted, brindled, striped. This "spotted cloth" is often mentioned in poetry of the seventeenth century. In the poems of Tain Lom and others, clan colours existed "from the beginning." In Laudatory's effusions of the seventeenth century we read (speaking of the spotted cloth), "well does the green become you;" or, in another passage, "well does the red and white become you." Now this proves the variety of colours worn in the "spotted cloth," and it is very noteworthy, because the Irish colours were yellow and black. The fragments or entire dress of an ancient Irish dress, found in a peat bog, shows the yellow blanket-like foundation, with black cross stripes. The women of every highland district took the greatest care in the making of the various tartans, and pride in producing the true tartans of their respective lords, or rather, true clan colours belonging to their lords. They also were always noted for wearing with pride the tartan belonging to their native districts, and continued to wear such distinctive "clan colours," if belonging to another district. To ask about the origin of clan tartans is like seeking for the origin of love-of-ornament pride in dress. In the seventeenth century Stirling produced a scarlet cloth, which was much worn also in the Highlands, admired doubtless for its brilliant colour. To seek the "origin of tartan" is to seek for the first rude idea of decoration or ornamentation of stuffs, and simply goes back into the ages when women and men could first dye cloth; to seek the day the first lassie culled the first blae berry to dye the cloth of her lover; to seek the primæval man who first used bullock's blood to dye the splendid red used in some of the clan colours. Who was the first man in the East who wore a striped garment? What is the origin of the Bedouin's striped vestment? Do not these things, these inquiries, go into the dark ages? What says common-sense anent clan colours?—that the dye most common to the district was used in such district; that variations were made by families or clans, and jealously kept up, as all such distinctions even now are jealously kept up. Has human nature varied? Does it vary much now from what it always has been? Such questions as "the origin of tartan" are answered by a little reflection. No one now-a-days, with all the wealth and luxury of our days, can dye cloths as the ancients dyed them. No one firm in Europe can invent the lovely clan colours as handed down to us through past ages; to us,—an ignorant race after all, Sir! Let us look into the composition of clan colours, Sir, to see that they are older than the history of any costume that was ever written. He who dubs them not ancient wants an eye,—that barbaric eye which found the glorious tinctures in the fields, on the mountains, and beside the foaming ocean of our native land. It is not the case that there is any question as to the tartan of the Argyll (91st) and Sutherland (93rd) Highlanders. A rumour arose to that effect, but it arose from a question having been asked one of the officers of the Sutherland Rifle Volunteers, as to whether the Sutherland corps would object to wearing a tartan of a neighbouring county. The Sutherland people naturally objected to such a suggestion. There are 7,456 Scotch in the home Army. Why not gradually draft Scotchmen now in English regiments into the Scottish regiments, thus rendering the regiments more national? In time, at all events, there could be no great obstacle to such an arrangement,—namely, in insisting that the majority of a Scotch regiment be composed of Scots. Martin's chapter concerning plaid, in his book published about 1703, is interesting:—"The plaid worn only by the men is made of fine wool. It consists of divers colours, and there is great ingenuity required in sorting the colours. For this reason the women are at great pains first to give the exact pattern of the plaid upon a piece of wood, having the numbers of every thread of the stripe on it. . . . . . Every isle differs from each other in their fancy of making plaids and the stripes in breadth and colours. This humour is as different through the mainland of the Highlands, in so far that those who have seen these places are able, at the first view of a man's plaid, to guess the place of his residence." Mr. Skene, in a letter to me, says:—"In speaking thus, Martin spoke of the breacan an fheile—that is to say, the whole dress as then worn, before the philabeg or kilt was cut off from this 'plaid.'" In the opinion of the learned Mr. Skene, this points to distinct tartans or colours; and while the general arrangement of colours was peculiar to each district, the clans inhabiting it had their distinctive set of it. "If any one takes the trouble to compare, for instance, the MacDonald tartan and the beautiful tartan worn by Cameron of Lochiel, both from the Lochaber country, the basis, the foundation will be found to be the same, differenced by a variety of stripes and placement of such stripes, the colouration falling into large groups indicating the prevalence of particular colours in particular districts." These words are the words of the learned Skene, and I have found what he says true. Many other instances will occur where the foundation or district colour is the same; one clan, at all events, inhabiting the Sutherland district has the same foundation colour, or, as Mr. Skene calls it, district colour. Martin speaks of the Tiree people all being dressed in the highland dress, 1703, and we also know they wore the hair long, as did the Irish in Elizabeth's reign, which fashion was, as will be remembered, visited by death. This visit of Martin's to Tiree took place just after the Glencoe affair. I think these customs and fashions adduced suffice to explode the erroneous idea that tartans date from the raising of regiments. If they do not, Sir, wait a while till my book comes out, and let us pray that the unbelieving will then be converted. As I have previously observed, I must not suck my own eggs before they are hatched. I observe, in conclusion, that your correspondent, "A Chameleon," does not know regimental history sufficiently well to preach on this subject, for he leaves out the 91st Argyll Regiment in his list of those who had a right to recruit in Scotland. I am not aware that this regiment was forbidden so to do. It was no fault of theirs that breeks, grey breeks, were given them for many years, and the Campbell clan colours, or tartan, withdrawn; also, of course, the feather-bonnet and ornaments. As to the exact numbers of Scotch to each regiment, that varies year by year. Englishmen, or foreigners, as they are called in Highland regiments, dressed in what "Chameleon" calls "once clannish tartan," do not alter the tartan or clan colours. Any way, do not let us have any more MacSnooks or MacJones' tartans invented, —"hunting tartans," so-called (and not a bad name either for those who seek useless changes). Those who wish to see what the composition of a Highland regiment should be must now go, I think, to the Sutherland Volunteers, or to the Argyll Volunteer and Perthshire regiments, and others truly composed of Highlanders; or else he must look over the water, and find the right stuff in the fertile plains, the cities, or backwoods of America and Canada. The refusal of the Sutherland men to adopt the tartan of a neighbouring clan on a recent occasion was no surprise to any one of Highland origin; and no Highlander could ever have made the blunder of asking these men to change their clan colours,—the armorial colours, so to say, belonging to the poorest and the richest of the Sutherland men alike. Some one during the tartan-fever row scoffed at my assertion that tartan or plaid was worn at the epoch of the battle of Flodden, and twitted me with the account of the Caithness men being dressed "in green." The Sutherland clan dress in a green tartan, now; so do the Gunns and others. So I see nothing extraordinary in the Caithness men of that day dressing in a district plaid, so much spoken of in the first part of this letter.—I am, &c., ARCHIBALD CAMPBELL.

Coombe Hill Farm, May 4.

A COMPARISON.

"An Ex-C. O." observes:—"The value and class of persons and a comparison of positions are by the public often determined in accordance with income. In looking over a scale of Army pay, I have observed that a serjeant-major of Artillery gets 5s. 10d. per diem, and a lieutenant 5s. 7d., and thus the former appears to the public the superior appointment. The serjeant-major's value I don't wish in any way to detract from; but to point out that the lieutenant is now a professional man, and has to instruct and practise his men, yet he is not paid in full for professional services. When will the Government pay its officers proportionately?"

Major-General Luard, on relinquishing the command of the Militia of Canada, which he had held for nearly four years, expressed his thanks in a general order to the many officers and men who have done their best towards improving the force in discipline and appearance; and, as he stated in his last annual report, there are, he is glad to say, many who have made marked improvement in these respects. He has had the pleasure of making (he hopes) life-long friends, for whom he entertains a warm feeling of regard, and he now wishes to all prosperity and a hearty farewell.

The Army.

1st (King's) Dragoon Guards. Col. Marter is about to be placed on half-pay, on appointment to a brigade command in India. Lieut. Forbes has been granted leave for six months, on private affairs.

2nd Dragoon Guards' Steeplechases took place on the 16th inst. at Aldershot. Stewards, Lieut.-Col. Hanning-Lee, Capt. Gould, and Lieut. Dawson; judge, Major Aubertin; starter, Capt. Kay; clerk of the course, Lieut.-Col. French. The Stapylton Challenge Cup, Mr. Flood's Lady Margaret; the Captains' Challenge Cup, Capt. Clerk's b g Leap Frog; an Open Hunters' Steeplechase, Capt. Armitage's (15th Hussars) br m Tame Vixen; the Regimental Challenge Cup, Lieut.-Col. French's b m Snapdragon; Consolation Race, Mr. Kirk's b g The Spider.

3rd Dragoon Guards. Capt. and Pymr. G. F. Harris died at Manchester on the 19th inst., aged 41 years.

6th Dragoon Guards (Carabiniers). Lieut. O'Farrell has been granted leave for six months, on medical certificate.

9th Lancers. The Governorship of British Honduras has been offered to Mr. Goldsworthy, Governor of St. Lucia, formerly Colonial Secretary in Western Australia. Mr. Goldsworthy served with the regiment as a subaltern before entering the Colonial service, and has been everywhere most popular.

10th Hussars. The officers have deferred their annual dinner till June 30, when the Prince of Wales will preside as usual.

15th Hussars will remain at Aldershot for the drill season, and then move to Brighton.

18th Hussars. The *Times* announces that Col. Phillips, lately commanding the regiment, is to succeed to the command of the 14th Regimental District (York), vice Col. Chichester, who retires under the age clauses.

ROYAL ARTILLERY.

Major A. D. Anderson has been selected for R.H.A., and has been appointed to E Baty. B Brig., vice Major Wing.

Ordnance survey maps have been issued to Royal Artillery districts, that the instructions regarding practice in range-finding may be carried out by batteries.

The *Pioneer* remarks that all command appointments of late have been "temporary," showing that the order for the reorganisation of the Artillery in India may be soon expected.

ROYAL ENGINEERS.

Col. Donnelly, R.E., has been appointed secretary and permanent head of the Science and Art Department of the Privy Council.

The Royal Engineeer Telegraph Corps is in future to be designated the "Telegraph Battalion, Royal Engineers."

1st, the Royal Scots. The 2nd Batn. held one of their bi-monthly rifle meetings at the Curragh on May 16 and 17. The committee, consisting of Major Thompson, Lieut. Tippinge, and Serjt.-Major Gay, provided an excellent programme. First day—Individual and volley firing, open to the battalion, for which prizes to the value of £36 were given; 480 competed in individual, and 100 in volley firing. Second day—Ten non-commissioned officers and men from each corps in the garrison; at 200 yards kneeling, 500 and 600 yards any position. For this match eight corps entered. First prize, £5, 2nd Batn. the Royal Scots, 522 points; second, £3, 2nd Batn. Yorkshire Regt., 515; third, £1, 2nd Batn. West Kent, 482.

3rd Buffs (East Kent Regiment). Capt. Chippendall, 2nd Batn., is ordered to join head-quarters at Hong Kong, on exchange with Capt. Lewis.

6th Royal Warwickshire Regiment. Lieut. Helyar, 2nd Batn., has been granted leave for 15 months, on private affairs.

12th Suffolk Regiment. Major Hext has been selected for the adjutancy of the 6th West Suffolk R.V.

15th East Yorkshire Regiment. Lieuts. Thomson and Crawford, 2nd Batn., have passed the higher-standard examination in Hindostanee.

19th Yorkshire Regiment. Capt. Simonet, 2nd Batn., is a candidate for the Pay Department.

25th King's Own Borderers. The *Bugle*, the regimental paper of the 51st Light Infantry, gives an account of the infantry polo tournament held at Umballa lately:—"The following teams were specially noted for the way in which their ponies were turned out,—the 51st, 60th, and 25th. In the first round the 11th drew the 14th, and beat them easily. The 33rd drew the 88th, and, after a fast game, the 88th were beaten by five goals to three. The 51st played the 60th, with the result of five to two for the Rifles. The next match was between the 25th and the 68th. Shortly after the commencement Mr. Emering, of the 68th, had a bad fall, and was taken away insensible, and so the 68th had to play one short; the consequence was that the 25th had it all their own way. In the second round, after a good game, the 2nd Queen's, who had drawn a bye in the first round, beat the 33rd; and then, after a very hard game, the 25th beat the 60th, and the 11th were lucky enough to draw a bye. In the third round the 2nd Queen's beat the 11th, and in the final tie of all, the 25th beat the 2nd Queen's easily. No one can be disappointed with the result of the tournament, as undoubtedly the best team was the 25th. Besides playing so well together, they were extremely well mounted. Most of the teams lived at the 25th lines during the tournament, where they were made most comfortable, and it was in a great way owing to the kindness and hospitality of the K.O.B.'s, as well as to the trouble taken by Mr. Taylor, of that regiment, the hon. secretary, that the polo tournament was such a success."

29th Worcestershire Regiment. Major Watson has passed the higher-standard examination in Hindostanee.

33rd West Riding Regiment. Lieut. Colomb, a probationer, attached to the 25th Bombay N.I., is about to be admitted to the Bombay S.C., from July 6, 1882.

41st Welsh Regiment. The head-quarters and mounted company of 190 officers, rank and file, left Etshowe on the 16th ult. for Pietermaritzburg.

46th Duke of Cornwall's Light Infantry. Lieut. Martyn has been appointed to the Mounted Infantry in Egypt.

48th Northamptonshire Regiment. Lieut. Gamble is ordered to Buttevant as acting paymaster, 1st Batn. 10th Foot.

ROYAL MARINES.

Major Bamber has been found medically unfit for further service.

An exchange on the foreign-service roster has been allowed between Major C. Frampton and Capt. W. T. Allen.

Lieut. French, Chatham Division, at present at the School of Musketry, Hythe, has been ordered to embark on board the Achilles to relieve Lieut. Willis, disembarked.

Lieut. Hailes, Chatham Division, has embarked in the Minotaur, vice Lieut. Johnstone, disembarked.

Lieut. Sanders, Chatham Division, has embarked in the Sultan, vice Lieut. Swanton, disembarked.

Major Allen, R.M.A., has three months' leave on disembarkation; Major Edwin Poole, R.M.L.I., one month, with permission to visit the Continent; Lieut. A. G. Latham, R.M.A., fourteen days on disembarkation.

Capt. E. R. M. Crooke, Lieut. Herbert Slessor, two serjeants, three corporals or bombardiers, one bugler, and 52 gunners, embark in H.M.S. Humber the first week in June, for passage to Port Said to join the R.M. Batn. under the command of Lieut.-Col. Ozzard, R.M.L.I.

Lieuts. R. M. Ussher and F. E. Watson, R.M.L.I., have been permitted to resign their commissions.

We insert this letter without expressing any opinion on the justice of the complaint made by "Nemo":—"The promotion of Brevet Major Tucker, R.M.A., to a regimental majority for his services in the Soudan is so monstrous an example of rewarding men at the expense of their brother officers, that I trust you will allow me to call attention to the subject through the medium of your columns. Major Tucker, an officer of 16 years' service in a small corps, where promotion is unusually slow, is promoted over the heads of 18 officers, some of them nine years his seniors, and several of the 18 having been distinguished on active service. The legitimate prospects of reaching a superior rank are, in the cases of some of these officers, annihilated by this promotion,—they are, in fact, professionally ruined. While fully admitting that Major Tucker's distinguished services deserve well of the country, which could easily afford to reward him without doing this grievous injury to those whose who have always done their duty in peace time and war, it is evident that whoever is responsible for this method of recognising his services cannot have taken into consideration the above-mentioned circumstances. Your publication of this, Sir, cannot conceal the harm done, but may prevent the recurrence of a grave injustice most prejudicial to the interests of a distinguished corps."

51st King's Own Light Infantry. The *Bugle*, the regimental paper for May, contains the following notes:—"H Company was the best shooting company for 1883-84, and on April 18, at 6 a.m., a parade was held for the purpose of presenting the shield to the company. We regret to publish the fact that Capt. Milton has left the regiment, on getting his promotion into the sister battalion. He served with the 1st Batn. ever since he was commissioned, and was with it during the Afghan Campaign of 1878-79-80."

53rd King's (Shropshire Light Infantry). The death is announced from Malta of Major R. Prince. The deceased entered the Army, Aug. 11, 1856; became lieut., Nov. 19, 1857; capt., May 15, 1866; brevet major, Oct. 30, 1878; and Major, July 1, 1881. He served with the regiment in the Indian campaign of 1857-59, including the relief of Lucknow by Lord Clyde, battle of Cawnpore and pursuit of the Gwalior Contingent (medal with two clasps), and also in the Egyptian War of 1882 (medal and Khedive's Star).

57th Middlesex Regiment. Lieut. Jones, a probationer, attached to the 2nd Bombay Lancers, is about to be admitted to the Bombay S.C., from March 16, 1883.

60th King's Royal Rifle Corps. The 3rd Batn. left Suakim for Alexandria on the 11th inst.

65th York and Lancaster Regiment. At a court-martial held at Dover on Friday, two privates were sentenced to two years' imprisonment each, for cowardice on the battle-field.

72nd Seaforth Highlanders. Lieut. Munro, one serjeant, and eight privates, who formed the carrying party at the funeral of the Duke of Albany, received enamelled photographs of his Royal Highness, as souvenirs, from the Queen at Windsor Castle on Wednesday. Her Majesty presented Lieut. Munro with a memorial pin and a photograph.

84th York and Lancaster Regiment. Capt. J. Leppard, late of the regiment, died on the 26th ult. at Mount Pleasant, Tunbridge Wells, aged 54. The deceased served in the Burmese campaign of 1852-53 (medal with clasp); in the campaign of 1857-58, including siege and capture of Lucknow (medal with two clasps and a year's service); received a commission in Feb., 1868. He retired on pension in Sept., 1878, and commuted the allowance two years ater.

87th Royal Irish Fusiliers have left Rawul Pindee for Kuldunnah, where they will be quartered during the hot weather. Mr. A. Wernthal, bandmaster, died at Rawul Pindee on April 25. He joined the regiment in India in 1857, and served in it 27 years. He was one of the few remaining civilian bandmasters in the Army, and was most popular with both officers and men of the regiment, and his death will be very much regretted both by the regiment and a large circle of friends in the various stations in which the "Faugh-a-Ballaghs" have been stationed during the past 27 years.

89th Royal Irish Fusiliers. Lieut. Cartwright, a probationer, attached to 20th N.I., is about to be admitted to the Bombay S.C., from April 18, 1882.

91st Argyll and Sutherland. About 200 men, including a mounted company, arrived at Etshowe on the afternoon of the 15th ult., to relieve a similar number of the 41st Regt.

101st Royal Munster Fusiliers. Capt. and Adjt. Druitt has been selected for the adjutancy of the 4th Batn. (Kerry Militia) on July 31. A party of 30 recruits proceeded from the depôt to head-quarters on the 15th inst. This makes a total of 365 men sent to the battalion since its arrival from Nova Scotia.

Medical Department. Inspector-Gen. J. Mure, M.D., on the Retired List, died at 40 Tedworth Square, on the 16th inst. He entered the service Oct. 4, 1839; became surg., Dec. 24, 1847; surg.-major, July 6, 1855; deputy-inspector-gen., Aug. 7, 1867; and retired, with the rank of inspector-gen., Dec. 1, 1869.

Pay Department. "Fusile" writes:—"It is rumoured that subalterns of seven years' service are to be permitted to join the Army Pay Department, and no doubt a good many candidates will come forward, tempted by the, to them, large increase in pay and allowances. The work in a regimental pay office is pleasant and not too hard, but when these young officers learn what is expected of them when they become staff paymasters, very few will consider the pay, &c., sufficient compensation for the hard work and responsibility connected with the financial charge of a regimental district. It is the universal cry amongst staff paymasters that the work is too onerous, and every fresh regulation issued adds to our burden; notably, the latest regulations as to Militia sub-accountants. The result will be that subalterns will spend a pleasant five years in the department, and then rejoin their regiments as captains, and the pertinent question will then be how are the higher grades to be filled up. In most branches of the Army, the higher one gets the less onerous becomes the work, although it may be more responsible; in the Army Pay Department it is the reverse." It is notified in General Orders that "combatant officers who are candidates for the Army Pay Department are to be tested generally upon the examination of troop and company monthly pay lists, posting in general account book and ledger, abstracting of debits and credits for proof of regimental pay list, preparation of balance sheets, and of monthly estimates. They will also be examined as to their acquaintance with the Pay Warrant, allowance regulations, financial instructions, and savings bank regulations; as to their knowledge of book-keeping by double entry, the duties attending the payment of soldiers, aptitude for accounts, quickness at figures, neatness in work, and also as to their general intelligence and ability." Capt. G. F. Harris, attached to the 3rd Dragoon Guards, died at Manchester on the 19th inst., aged 41 years. The deceased joined the Army Dec. 31, 1858, and entered the Department from the Buffs Dec. 19, 1881.

The Auxiliary Forces.

MILITIA.

Royal Artillery, Welsh Division. The inspection of the 3rd Brigade (late Carmarthenshire), took place on the 20th inst. The regiment, under command of Lieut.-Col. Jones, consisted of 13 officers, 27 serjeants, 287 rank and file, and 6 trumpeters. The 4th Brigade (late Royal Pembroke), was inspected at Haverfordwest by Col. Cumming on the 16th inst. Col. J. Owen was in command, assisted by Major Graham. Col. Cumming complimented the men on their smart, clean, and soldier-like appearance, and their steadiness at drill. The brigade numbered about 330 rank and file, being upwards of a hundred short of its complement.

Royal Artillery, North Irish Division. The 4th Brig. has assembled at Dublin for training, and proceeded to Wicklow, where they are encamped. There were few absentees. The officers present are Col. Magill (in command); Major Dickenson; Major and Adjt. Tabor; Capts. Thompson, Smythe, Whitty, and Rooke; Lieuts. Briscoe, Meredyth, and Eustace.

Royal Fusiliers (City of London Regiment). The officers of the 5th Batn. (late Royal South Middlesex), dined together at the Holborn Restaurant on Friday evening last. Present—Lieut.-Col. Hon. C. E. Edgcumbe; Majors Winter (late Adjt.), Guyon (Adjt.), and Halahan; Capts. Vincent and Pendleton; Lieuts. Dibley, Parsons, Boileau, Scoones, Sant, Evatt, Faulkner, Warde, Wallis, Gramshaw, and Surg.-Major Douglas.

Gordon Highlanders. The Princess of Wales will present new colours to the 3rd Batn. at Aberdeen about Aug. 29.

Duke of Cornwall's Light Infantry. The 3rd Batn. was presented with new colours at Bodmin on Wednesday by Lady Elizabeth St. Aubyn. The service was performed by the Bishop of Truro, who delivered an address which, in the matter of appositeness, was not quite the thing, because his lordship, when eulogising the institution of colours, as to the value of which we quite agree with him, forgot that by a recent extraordinary decision of what are called "the authorities," these emblems and symbols are to be carefully stowed away in case of danger. The privates of the battalion will have a serious duty, for the Bishop told them that they must henceforth cheer, strengthen, and elevate the ladies of Cornwall. Col. Warren inspected the regiment after the speeches and the march-past. Earl Mount-Edgcumbe, Lord-Lieutenant of the county, formerly captain in the regiment, took part in the ceremony, and made a short address, in which he complimented the corps on their good conduct and sobriety. Col. St. Aubyn and the officers gave a luncheon to their friends. It was formerly known as the Royal Cornwall Rangers Militia; and under Col. Elliott, whose grandson is the present major, it was employed for seven years in garrison work in the forts left vacant in England and Ireland by the drafting of the Regulars for the war with France. The Port Admiral, Sir W. H. Stewart, and Major-Gen. Sayer and a large company were present.

East Surrey Regiment. The officers of the 4th Batn. dined at the Café Royal on Wednesday. There were present—Cols. Daniell and Evelyn; Majors Antis, Scott, Flower, and Deverell; Capts. Moon, Darley, Haines, Smith, Maude, and Gilpin; Lieuts. Scobell, Sutherland, Chambers, Buller, Moon, Benson, Persse, and Combe; and Mr. B. Atkinson.

The pay of serjeants of Militia will be increased by 1d. per day, and that of corporals by ¾d., as the fines inflicted in cases of drunkenness are to be divided among them in future.

"Hythe" writes:—"With reference to a recent paragraph in your paper, claiming for the 4th Batn. Worcester Regt. the credit of being the best shooting Militia battalion, it seems desirable to observe that only 263 men of that battalion appear to have gone to the targets at all, while of the 3rd Batn. Royal Scots Fusiliers no less than 477 men fired."

THE VOLUNTEERS.

13th Middlesex (Queen's Westminster) Rifles. The annual dinner was held at St. James's Hall, on Thursday, under the presidency of Col. Howard Vincent. Gen. Sir G. Graham, Count Münster, the German Ambassador, the Russian and Austrian Military Attachés, Mr. W. H. Smith, M.P., Lord A. Percy, M.P., and Col. Bushby, were among the company. Sir G. Graham, in replying for the Army, said:—"During the latter part of the last half-century there had been a great national movement, of which every Englishman should be proud, and that was the great Volunteer movement. The time had long since gone when that movement could be called 'playing at soldiers,' for the Volunteers had given that taunt the go-by in steady work. The Volunteer service had awakened a military spirit in the country, and had also brought out a better feeling than formerly existed towards the Army." The German Ambassador (Count Münster) said that all nations looked with admiration on the spirit which had prompted the Volunteer movement in England, and he had always felt that this movement added enormously to the power of England. Major-Gen. de Lantz, the Russian military attaché, and Capt. Baron Von Haan, the Austrian military attaché, also responded, the latter observing that he was perfectly convinced that behind the Volunteers was the whole manhood of England, and that any necessity for calling out the Volunteers would be answered by all England rising to arms.

24th Middlesex (Post Office) Rifles. The annual inspection will be held at noon to-day on the Guards' Ground, Hyde Park, when the regimental field-telegraph waggon, fully equipped, will be on the ground.

Indian Army.

4th Bombay Rifles. After a lapse of nearly four years since the events they commemorate occurred, the 4th Bombay Rifles received their medals for service in Afghanistan, fortunately, and, as if it were to reward them for their long waiting, a few days before the arrival on his visit to Aden of his Excellency the Governor of Bombay, who graciously consented to present the decorations. On the evening of April 18, the regiment paraded for the occasion in review order, and after the usual salute in line, were formed in column at open order, when his Excellency walked round the ranks presenting each man with his medal and pinning on those of the native officers himself. The regiment afterwards marched past in column, and was then formed in three sides of an oblong, when his Excellency addressed the officers and men as follows:—"Col. Forteath, officers, non-commissioned officers, and men,—I am glad that I am able as the head of the Government of Bombay to deliver you the memorials of the last campaign in which you were engaged. Those memorials are the testimony of the sense of your services entertained by your sovereign and your countrymen. They add one more to the record, longer, I believe, than almost any in this Army, of services on the field of battle. It is more than a century since this battalion was raised, though during that period it has been known by more than one name; 60 years since it was formed into Fourth of the Line, and more than 40 since, first of any regiment in India it was distinguished by the title of 'Rifles.' It has taken part in many famous campaigns, among many others it served under Arthur, Duke of Wellington, at the capture of Seringapatam; it was in the 2nd Sikh war, and the Persian expedition; in 1857, true to its salt, it fought in Central India, and lately it was in Afghanistan. It did not, indeed, arrive in time for the chief events of the campaign, but it often happens that on the line of communication, and in subsidiary operations, as great hardships and as severe trials are undergone as in the shock of battle. The traditions of a regiment are among its most precious possessions; they are the objects of legitimate pride; they nerve the soldier to be worthy of his corps. The Bombay Army was never more efficient than it is now, and your condition and appearance are creditable to it. I am certain that if occasion should require fresh services from the regiment and this Army the Government may call upon them with full confidence in their devotion and efficiency. I trust that the honours which have been conferred upon you by the Empress will be highly prized, and that those who bear them on their breasts will, throughout their service, prove examples of discipline and courage to their younger comrades."

ROYAL CAMBRIDGE ASYLUM
for SOLDIERS' WIDOWS.
Office—40 CHARING CROSS, S.W.

Payment on completion of order, when the goods are approved of; not when ordered, without knowing how the instructions may be carried out. [ESTABLISHED 1851.

SCHWEITZER'S COCOATINA
ANTI-DYSPEPTIC COCOA OR CHOCOLATE POWDER.
Guaranteed Pure Soluble Cocoa, without Sugar, Spice, or any Admixture.

Specially adapted for Ships, Camps, Sportsmen, &c., being in a concentrated form, made with BOILING Water. Keeps in all climates, and palatable without milk.

Being all Cocoa, it is four times the strength of preparations mixed and therefore *weakened* with arrowroot, &c., and is in reality cheaper, a Tea-spoonful to a Breakfast Cup costing less than a halfpenny.

The Faculty pronounce it "the most nutritious, perfectly digestible Beverage for Breakfast, Luncheon, or Supper," and invaluable for Invalids and young Children. Samples per post.

Highly commended by the entire Medical Press.
Adopted as a Medical Comfort in H.M.'s Royal Navy.
In air-tight canisters at 1s 6d, 3s, 5s 6d, &c., by Chemists and Grocers.

ELKINGTON and CO.
ELECTRO PLATE.
SILVER PLATE.
CLOCKS and BRONZES.

ELKINGTON and CO.
TESTIMONIAL PLATE.
CUTLERY, &c., &c.
Illustrated Catalogues post free.
ELKINGTON and CO., 22 Regent Street, or 42 Moorgate Street, City.

AYALA & Co.

CHÂTEAU D'AY
CHAMPAGNE.

EXTRA QUALITY DRY.

AS SUPPLIED TO ROYALTY, THE MILITARY AND NAVAL MESSES, MALTA UNION CLUB,
&c., &c.

For Books Received, &c., and Notices to Correspondents, see page 387.

Army & Navy Gazette.
LONDON, SATURDAY, MAY 24, 1884.

WE understand that Sir Samuel Baker, who leaves town this week for his country seat, had a long interview with Lord Hartington on Wednesday, in which he gave the Secretary of State for War all the information which his experience of the Soudan enabled him to accumulate, with regard to the transport and operations of a military expedition. But he went further, and impressed upon his lordship the necessity of making up his governmental mind upon a still more important matter than the details of an expedition to the Soudan. Lord Hartington is not, of course, in a position to direct the policy of Government. In considering the ulterior consequences of an invasion of the Soudan, the Secretary of State must take counsel with the Cabinet, which appears to be but an office of registration for the decrees of the Prime Minister. Whether Mr. Gladstone will yield to the representations of all who have the smallest knowledge of the subject, that it is impossible for Egypt to abandon the Soudan to the Mahdi, and that Khartoum and Berber—not the town, but the province—must be retained, it is impossible to say. But we cannot suppose that the English Government is prepared to embark upon the enormous expenditure of money, and possibly of life, involved in the despatch of troops into Equatorial Africa without considering what they are going there for, what they will do when they get there, and what they intend to leave behind them. The authorities in Egypt have been co-operating very zealously with the War Office here in collecting information, but great difficulty is experienced in obtaining data upon which the military authorities can rely with certainty respecting large portions of the route between Wady Halfa and Berber. From Berber to Khartoum any difficulties which may occur in the march of troops and the transport of supplies are common to the expeditions to the latter place, whether they start from Suakim, or take the river course from Wady Halfa. Notwithstanding the long detour and grievous delays presented by a strict adhesion to the course of the Nile, we retain the conviction that it would be far wiser and, in the end at least, as expeditious, to despatch the troops by the banks, and against the stream as soon as the Nile begins to rise, avoiding all short cuts and desert routes, than to incur the risks presented by the route from Suakim to Berber, and the obvious inconveniences entailed by the despatch of the whole force from Suez down the Red Sea to the former port. It is quite plain that no railway can be laid from Suakim to Berber until the country is in the possession of a friendly force, and although Osman Digna and his tribesmen have been terribly punished, and are reduced to comparative impotency, they are still powerful enough to frustrate the efforts of labourers to put down rails, unless the latter are adequately protected. To the question of the railway must turn round in a circle for some time to come. All the Egyptian authorities believe that the evacuation of Berber would be a fatal step; and they cannot understand how, if the Bishareen Arabs be friendly, there should be any difficulty in opening communications with Khartoum from Dongola. Hassan Kalifa is described as an able, intelligent, and civilised gentleman, with great knowledge of the country, and it is considered very strange that if he has received orders from the Khedive's Government to communicate with Gordon at all hazards, that he has not succeeded yet in doing so. Some timorous people, remembering the great silence which fell over the land after the annihilation of Hicks's army, shake their heads, and speak doubtingly of the fate of Khartoum; but we have as yet heard and seen nothing to induce us to alter the opinion that, except from treachery or an outbreak of fanaticism, Gordon has nothing to fear in his military position for some time to come, although anxiety and the climate may tell upon a frame and constitution which are by no means robust.

Colonel G. J. Smart, R.A., is to be appointed a Brigadier-General in India, vice Brigadier-General Bruce, whose period of Staff service has expired.

When Hicks Pasha started from Khartoum on his ill-fated expedition, Colonel De Coetlogon was ordered to protect the left flank of Hicks's army, by patrolling the White Nile in a gunboat and keeping its neighbourhood clear of foes. This arduous service he succeeded in performing most satisfactorily with a force of only 50 men, being under the enemy's fire every day for two months. He then returned to Khartoum and superintended its fortifications, having sole charge there until relieved by General Gordon, when, after fourteen months' constant hard service in the Soudan, he returned to Egypt, where he has received but sorry treatment for his services, and is put on reduced pay in an inferior command.

Major Collen succeeds Colonel Lees, who will receive colonel's allowances as First Assistant Secretary, Military Department. Major Collen joined the Staff Corps from the Royal Artillery as a subaltern, and is in possession of the Staff-College certificate.

A common danger brings enemies together. Although the relations of Belgium and Holland are not unfriendly, there is no real sincerity or attachment between the political parties in the two States; and there are wide differences between portions of the populations of the two countries in feeling and religion. But in Berlin looms a portentous form, shielded by a dense cloud, through which, however, there come from time to time the mutterings of the storm; and when it breaks, not all the dykes and ditches of the Dutchman, nor the fortresses of Belgium, can stay its course.

We understand that the cost of the extension of the Sibi Railway to Quettah will be, according to a rough estimate, two millions sterling.

Government appears to have put down its foot on the Wellington statue, and not only has it resolved to carry out the vote of the House for the new statue at Hyde Park Corner, but Mr. Boehm has actually received the order, and has already prepared a very charming—if that is an appropriate word—design for the new equestrian statue, while the necessary steps are being taken to remove the unhappy effort of Mr. Wyatt's genius to a commanding site at Aldershot, where it will stimulate the ambition and improve the taste of our infant soldiery. We are really astonished at the susceptibility of the people of Dublin if they are rightly represented by Mr. T. P. O'Connor, because, after all the expense which the French Government went to in erecting the Luxor monument in Paris, and the efforts of private munificence which secured to us the benefits of contemplating Cleopatra's Needle on the Thames Embankment, it would assuredly be extraordinary if the Irish capital desired to be rid of the enormous obelisk in the Phœnix Park, which has the advantage of being twice as big, we should think, as either of its Egyptian rivals.

Major-General Sir John Ross is expected home from India shortly on leave.

The Government still undergo "the question"—the new Ministerial torture, and are put on the rack about Gordon and Khartoum every night. It is not to be wondered if sometimes the answers are rather hazy, the questions being frequently in a similar condition as regards substance. On Thursday night Mr. Gladstone gravely told the House that Lord John Hay was arranging to patrol the Nile above Assiout and below Wady Halfa by steamers, forgetting that between Assiout and Wady Halfa there is the only true Cataract on the Nile, viz., at Assouan. Between Assiout and Assouan, steamers at this time of the year of the ordinary draught of those on the Nile cannot "patrol" with certainty.

Lieutenant Codrington, Coldstream Guards, has been appointed A.D.C., and Captain O. Rowe, R.A., Acting A.D.C., to Lieutenant-General Sir G. Willis, at Portsmouth.

If Lord Folkestone, who appears to have been anxious to give a little puff, which they do not need, but well deserve, to Messrs. Cook, had inquired of them what vessels they had, he would be saved the trouble of putting a foolish question to the Prime Minister. Messrs. Cook control the Nile navigation by steamers in virtue of a monopoly to which the only exception is afforded by the postal-boats, and those belonging to the Khedive and the local governments. Undoubtedly, the presence of steamers with sailors and soldiers and guns on board, would produce a most wholesome effect at any towns where the Mahommedans are assuming a menacing attitude towards the Copts or other Christians, as at Girgeh and the like places on the lower Nile. Above Assouan Messrs. Cook have some steamers of lighter draught, which might be usefully employed as far as Wady Halfa. Between Wady Halfa and Khartoum itself there are probably no steamers at all, till we get up to the limits of Gordon's command, and to the junction of the Blue and White Nile, where there are, according to all accounts, five or six steamers, with guns on board, hastily prepared as a flotilla, with which, no doubt, the General is harassing the Mahdi's emissaries whenever he gets the chance. With reference to Mr. Gourley's question, it may be as well to say that under no circumstances could boats be floated, as the hon. Member seems to suppose they could, over such places as the "Belly of Stone," above Wady Halfa.

We hear that the Government of India are constructing fortifications of some strength on the Khojak Pass, Chaman, our extreme outpost in which is only 70 miles from Candahar.

A correspondence has been passing between Major Graves, Adjutant of the Staffordshire Yeomanry, and the National Rifle Association on the subject of the conditions under which the Loyd-Lindsay competition is to be contested this year at Wimbledon. The contest was initiated with a view to encourage good shooting and riding in the Yeomanry Cavalry generally. There are 38 corps of Yeomanry, with an actual strength of 9,220 of all ranks, there being eight companies of Light Horse Volunteers and Mounted Rifles, the latter numbering some 45 men. The new conditions for the contest state that it is to be shot with the "rifle . . . . . . that is in use in the . . . . . . corps, or Martini-Henry rifle." Major Graves points out that the arm in use in the Yeomanry Cavalry and Light Horse Volunteers is the Snider cavalry carbine, and with it are shot off all troop, company, and regimental competitions; in fact, the whole musketry instruction of the force is carried out with this weapon. The only exception to the rule in the Snider carbine question is the Roxburgh Border Rifles, to whom are issued Martini-Henry rifles, and with which arm they carried off both first and second prizes last year. "I presume," says Major Graves, "the intention to be understood in the alteration of the conditions was to equalise matters between the 9,500 Yeomanry Cavalry, the Fife Forfar, and Lincoln Light Horse, and the Border Rifles, who alone are armed with the Martini-Henry rifles. Has the alteration done so? I would respectfully submit that it has not, for whereas the last-named shoot always with the Martini-Henry, drill with it, have the proper equipment to carry it with, receive the whole of their musketry instruction with it, and receive the usual amount of ammunition from the War Office *gratis*; the Yeomanry are not drilled with it, have only about two rifles per troop lent them by War Office, have no equipment to carry it with, and have to pay, as a special favour, 6s. 3d. per 100 rounds to practice with." Captain Mildmay, Secretary of the National Rifle Association, writes in reply to say that no alteration can be made in the present regulations for the Loyd-Lindsay competition. At the same time he states that a circular, to all Yeomanry regiments, will be issued at once, informing the Yeomanry officers that they can have on application three Martini-Henry rifles on loan per troop, and under special circumstances perhaps more. It seems to us that the complaint made by Major Graves on behalf of the Yeomanry is a most reasonable one, and though the National Rifle Association cannot alter the conditions of the competition this year, they might with advantage do so next year.

A weekly contemporary is responsible for the statement that the Duke of Cambridge, Lord Hartington, and Lord Wolseley have united in representations against the appointment of Lord Edward Somerset to the Corps of Gentlemen-at-Arms. We do not know what our contemporary means by a "distinct understanding" that vacancies were to be filled from a list of deserving officers kept by the Commander-in-Chief, if it is meant to be inferred that the officers at present in the Corps have all been found "deserving" in virtue of distinguished services. Whether there has been a sharp correspondence on the subject or not is beyond the scope of our informations but no one can take any exception on personal ground; to a young officer who has done his work so well as Lord Edward Somerset. It is not much comfort to hear that an understanding is likely to be arrived at in virtue of which the Captain of the Corps is to submit a list of officers approved by the military authorities to her Majesty, from which vacancies are to be filled, unless we can judge how the selection is to be made.

A correspondent says :—"General Gordon is almost as eccentric as he is brave and able. He reads a chapter of the Bible every morning. If the subject chances to be a peaceful one, he remains quiet at Khartoum. But if the chapter should treat of quarrelling or fighting, he goes out against his enemies, and to use his own words, 'smites them hip and thigh.'"

The Royal Irish Military Tournament held in Dublin last week was the first of a series of district tournaments initiated by the Royal Military Tournament Committee in London. Working on parallel lines with the National Rifle Association, the Royal Military Tournament Committee proposes to develop, by grants of money and bronze medals to local committees, an increased knowledge of skill in arms throughout the regular and auxiliary forces. The Dublin Committee has achieved a decided success, and a considerable profit has been realised. After a reserve fund for next year has been set aside, the surplus profits will be divided amongst military charities.

The *Times* says :—"The appointment of Assistant-Director of Artillery and Stores at the War Office, vacant by the transfer of Colonel S. J. Nicholson, Royal Artillery, to the Ordnance Committee, has been conferred upon Major C. F. Ellis, Royal Artillery, who recently held the appointment of secretary to the Ordnance Committee." The information only appeared in our columns a fortnight ago. The *Times* is gradually improving.

We see that the shako is condemned in the French Army. It is not to die a violent death, but to be allowed to terminate its existence gradually. When the stock on hand is exhausted, no more will be issued; but to replace the shako two képis will be served out.

L'Armée Française is at a loss to see why there should be Artillery manœuvres at the Camp of Châlons. It can understand Cavalry and Infantry manœuvres, as those arms can act alone, whereas Artillery never goes into action unsupported.

The Navy.

ADMIRALTY, May 16, 1884.

Engineer Richard Thomas Rundle has been promoted to the rank of Chief Engineer in her Majesty's Fleet (May 10).

ADMIRALTY, May 20, 1884.

Royal Marine Light Infantry.—The date of retirement on retired pay of Captain and Brevet Major Charles Surtees Chapman Webb is April 4, and not March 26, as stated in the *London Gazette* of April 4. Lieutenants Robert Morris Ussher and Francis Edward Watson resign their commissions (both dated May 16).

ADMIRALTY, May 21, 1884.

The Reverend Charles Le Poer Trench Heaslop has been appointed Chaplain in her Majesty's Fleet (March 29).

In accordance with the provisions of her Majesty's Order in Council of February 22, 1870, Lieutenant Francis Henry Eardley Shipton has been placed on the Retired List of his rank (May 15).

ADMIRALTY, May 22, 1884.

Royal Naval Artillery Volunteers (Liverpool Brigade).—Charles Hunter, Esq., Justice of the Peace, to be Honorary Lieutenant (May 22).

APPOINTMENTS.

Commander—A. A. C. Parr, to the Frolic.

Lieutenants—Henry C. Kingsford, to the Belleisle; Lewis D. Sampson and Arthur H. S. Elwes, to the Penelope; Thomas P. Walker, to the Defence; Charles H. Coke, to the Garnet; William H. du C. Chads, to the Northampton; John R. Jellicoe, to the Excellent; George J. S. Warrender and Francis G. de Lisle, to the Cambridge; W. S. King, to the Neptune; Charles L. Ottley and Paul W. Bush, to the Vernon; Hugh P. Williams, to the Excellent.

Navigating Lieutenant—George S. Ralph, to the Serapis.

Sub-Lieutenants—Alex. L. Duff, Ernest C. T. Trowbridge, and Edmund M. C. Key, to the Victoria and Albert; Francis H. Pollen, to the Alexandra.

Chief Engineers—William Waterfield, to the Asia; David Wilson, to the Belleisle; James A Shawyer, Edwin J. Cornley, Alexander F. McIntyre, George E. M. Keey, and William T. C. Brewer, to the Vernon.

Surgeon—Joseph H. Whelan, M.D., to the Jackal.

Engineer—William H. Grant, to the Belleisle.

Assistant-Clerk—Gilbert Graham, to the Turquoise.

Coastguard.

Surgeon and Agent—Mr. James Minniece, to Portnoo and Lochrus.

Chief Boatman—James Ozzard, Calshot Castle, to be chief boatman-in-charge, Freshwater Gates, vice Bennett, pensioned.

Alecto, Lieut. and Com. Harston, and the Stork were at Accra on April 19. The Goshawk was employed on Southern Sub-division. The Starling was on passage to Ascension; expected at Cape Coast Castle by May 25.

Arab, Com. Stopford, was at Aden on May 19.

Argus, Chief Officer Edward Barter, steam tender attached to the Valiant on the West Coast of Ireland, will be attached to the Reserve Squadron as a despatch vessel.

Audacious, Capt. Pearson, flagship of Vice-Admiral Dowell, was at Hong Kong on April 15, and would probably proceed to Amoy about May 1, thence to Foochow and Woosung. The Champion was at Hong Kong, having arrived from Shanghai on April 10; will remain, refitting. The Linnet was at Hong Kong, and would proceed on April 20 to relieve the Merlin in the Gulf of Tonquin. The Vigilant was at Hong Kong, and would take the Commander-in-Chief to Canton on April 16, returning to Hong Kong on April 19; take mails to Amoy about May 8, and remain with the flag. The Daring was at Canton on April 14. The Merlin was in the Gulf of Tonquin; at Hoihow on April 6, and to proceed to Hong Kong when relieved by the Linnet; after giving leave to the crew, she will be sent to Foochow, and be stationed there. The Swift was at Amoy on April 14, and will remain. The Foxhound was at Foochow, and was at Tamsuy, Formosa, on April 7; about to return to Foochow; will be relieved by the Merlin about the middle of May, and proceed to Singapore to take the place of the Zephyr. The Cleopatra was at Shanghai on April 14, as senior officer's ship, North China Division; will take H.M.'s Minister at Pekin to the Corea, and return with him to Shanghai. The Curacoa was at Shanghai on April 9, and was to remain at Shanghai during the absence of the Cleopatra, and conduct the duties as senior officer's ship. The Albatross was at Shanghai on April 9; was to return to one of the Yangtse ports, and will probably relieve the Espoir at Hankow. The Espoir was at Hankow on April 3; will probably be relieved by the Albatross, and be stationed either at Kinkiang or Chinkiang. The Fly was at Amoy on April 7; was about to leave for Shanghai to join North China Division, calling at Foochow, Tamsuy, and Kelung. The Midge was at Tientsin on April 3, and was to remain. The Cockchafer was at Chefoo on April 3, and left Chefoo on April 3 for the Corea with the Secretary of the Legation, Pekin. (Have heard by telegraph that the Cockchafer returned to Chefoo on May 10, and was ordered (to Jenchuan at Minister's request.) The Sapphire was at Yokohama on April 3, as senior officer's ship in Japan; would remain at Yokohama. The Pegasus was at Singapore on April 4, as senior officer's ship, Straits of Malacca; on return of Zephyr from Bangkok, to visit Labuan and North Borneo ports, and return to Singapore. The Zephyr was at Bangkok on April 4; would return to Singapore about the end of April; to proceed about the second week in June to the Gulf of Tonquin to relieve the Linnet. The Flying Fish was surveying in Haitan Straits; put into Foochow on April 4 for mails and coals, and would leave again on April 7; expected to be at Amoy about the end of April.

Banterer, Lieut. and Com. Haigh, left Cleggan on May 17 for Galway, and put back to Ballinakill through stress of weather.

Belleisle, Capt. Jones, left Kingstown on May 17 for Plymouth, passed the Lizard on the 18th, and arrived at Plymouth the same day.

Boadicea, Capt. Edmund Church, flagship of Rear-Admiral Nowell Salmon, V.C., would leave Simon's Bay on June 2 for Delagoa Bay and Port Natal.

Dragon, Com. Anson, was at Busreh on April 17, as senior officer in the Persian Gulf.

Firebrand, Lieut. and Com. Dickson, fitting out at Plymouth, will most probably have to land her Vavasseur gun-mountings, as these have been found defective.

Forward, Com. Furlonger, arrived at St. Vincent on May 20, and left on May 23 for Cape Coast Castle.

Hecla, Capt. Wilson, went into Portsmouth Harbour on May 17.

Humber, Com. Hawkins, arrived at Sheerness from Woolwich on May 20 to be docked and overhauled, preparatory to her dispatch to the Mediteranean.

Iris, Capt. Rice, left Malta for Corfu and Fiume on May 13.

Kestrel, Com. Tisdall (acting), arrived at Batavia on April 13, and would leave on April 15 for Seychelles and England.

Nelson, Comdre. Erskine, was at Sydney on May 18.

Northampton, Capt. Digby, flagship of Vice-Admiral Sir John Commerell, V.C., was at Bermuda up to May 8, and will proceed to Halifax about May 18; the Canada was at Bermuda, refitting, and will proceed to Halifax the third week in May; the Garnet is the senior officer's ship, Barbadoes division; the Tenedos left Halifax for Newfoundland on April 15; the Dido was at Bermuda on May 8, refitting, and will proceed to Halifax about the end of May; the Griffon was at Jamaica on April 18, and on being relieved by the Flamingo was to proceed to the Barbadoes division; the Flamingo left Bermuda on April 29, to relieve the Griffon at Jamaica; the Fantôme left Bermuda for Newfoundland on April 28; the Mallard left Bermuda for Newfoundland on April 22; the Foam left Bermuda on May 2 for Devonport; the Bullfrog was at Bermuda on May 8, refitting, and when ready will proceed to the Jamaica division.

Orontes, Capt. Andoe, arrived at Alexandria on May 18, and proceeded next day.

Osborne, Capt. Frank Thompson, left Portsmouth for Flushing on May 22, with the Prince of Hesse on board.

Pegasus, Capt. Bickford, was at Penang on May 20, having returned from landing stores for the crew of the Nisero, detained as hostages in Acheen.

Ranger, Com. Darwall, arrived at Aden on May 19, and was to return to Massowa next day.

Triton, Staff Com. Tizard, left Sheerness to carry out surveying duties on May 19.

Turquoise, Capt. Woodward, was commissioned on May 20.

Wye, Staff Com. Miller, arrived at Madeira on May 19, and left next day.

The New Dockyard Reorganisation Committee—Mr. C. McHardy, Mr. R. W. Awdry, and Mr. R. Main, of the Admiralty—have received instructions to visit all the Home dockyards. Portsmouth was visited last week, and Devonport and Stonehouse are now undergoing inspection. This Committee is ordered to report as to the number of writers required for the fixed establishment of the offices of the storekeeper, accountant, and cashier respectively, the number being fixed on the basis that the duties of writing, revaluing articles of stores, and keeping store ledgers, are prepared in the office of the Accountant; and that these duties remain as at present under the direction of the storekeeper. The members of the Committee are to recommend what duty, pay, and places should be allotted, it being borne in mind that this class of allowances is alone appropriated to men who have the supervision of others, or who are called upon to perform duties in advance of those expected of dockyard writers. The Committee are also inquiring into the system under which the writing staff is at present obtained, and whether it is advisable to restrict entries to men who have been brought up in the yards.

Mr. E. Preston writes :—"It was stated in the House of Commons on the 19th inst., that the Treasury had consented to hand over the accumulated 'Unclaimed Soldiers' Balances' to the Royal Patriotic Commissioners for the purpose of enabling them to provide pensions for the widows and orphans of soldiers who fell in the Soudan campaign. This is no doubt a very easy way of getting rid of the funds which have gone on accumulating since the passing of the Regimental Debts Act, 1863; but I would venture to suggest that before such confiscation takes place the Return as to these 'Unclaimed Balances' obtained by Sir Walter Barttelot last Session should be printed and extensively circulated, so that the next of kin of deceased soldiers—to whom these moneys rightly belong—may have a fair chance of making good their claims. As your readers are aware, the Lists of 'Unclaimed Balances' are published in the *London Gazette*, and the result of such scant publicity is said to have resulted in an unclaimed balance of some £4,000 a year. If newspaper publicity were substituted for *London Gazette* notification, there is little doubt that soldiers' widows and orphans would be largely benefited. I therefore crave your powerful aid towards obtaining so common-sense and useful a reform. I would only add that non-publicity as to Army prize money has resulted in upwards of £700,000 of the unclaimed shares being appropriated, pursuant to Act of Parliament, in keeping up Chelsea Hospital and grounds, &c."

Admiral Duncombe presided at the annual meeting of the Royal Naval Scripture Readers' Society on the 21st inst. The report stated that 14 readers are now employed. The cause of temperance, in connection with godliness, was constantly advocated by the readers. Although the balance-sheet showed an increase of £88 over that of last year, yet had the original number of readers been maintained there would have been a deficit of about £80. Capt. Dawson said when he compared the condition of the Navy now with its condition in 1860 he found a great improvement, which was in a large measure owing to the efforts of this society, independently of what had been done by their chaplains. He was glad that seamen were just now attracting so much attention, for he found that the funds of seamen's societies had benefited by the awakening of the public to their necessities. Admirals Sir E. G. Fanshawe, Goldsmith, and Ryder, Capt. East, and the Rev. E. Yorke also commended the work of the society.

CHOLERA ON BOARD H.M.S. CROCODILE.

Before the late outbreak of cholera on board the Crocodile is finally relegated to the regions of oblivion, it may be well to notice a few facts which have come to our knowledge, and which tend to demonstrate that the captain and officers of the ship in question received but scanty justice at the hands of the powers that be, if, indeed, they were not actually censured where praise might well have been bestowed. Before quitting Bombay, it appears some objection was raised by the captain to the number of extra passengers whom the resident transport officer proposed to accommodate on board, and, upon the refusal of the captain to accept the statement that it was "always done," as a sufficiently good reason for the infringement of regulations, the matter was referred by telegram to the Director of Transports. The reply, we imagine, judging from subsequent events—must have been of that evasive and ambiguous character for the concoction of which the officials at Whitehall are so celebrated. At any rate, the captain received an assurance that the responsibility of embarking the extra passengers was accepted by the authorities, and acted accordingly. When the cholera broke out on board, the somewhat crowded state of the ship afforded, of course, additional grounds for apprehension; however, the captain and executive officer, nothing daunted, commenced a determined battle, under these discouraging circumstances, against the common foe; entering into the most minute details, and maintaining the cleanliness and ventilation of the ship in a manner which, we have good reason to believe, excited the admiration of the military principal medical officer, and which undoubtedly contributed in no inconsiderable degree to the almost unprecedented limitation of the disease, only eleven cases occurring, with nine deaths, a proportion which goes to prove, nevertheless, that the epidemic was not of that mild and harmless type which some would have us believe. There was, not unnaturally, something like a panic among the lady passengers, and possibly among some of the men; but by dint, as we have said, of the utmost vigilance, and a good example on the part of the captain and executives, something like a serious catastrophe was, in a great measure, averted. Now for the sequel, which, if short, is not without a moral. On arriving in England, the captain, so far from receiving the commendation which would certainly not have been ill-bestowed upon him and his first lieutenant—and more especially, perhaps, upon the latter, who had most of the drudgery of details on his shoulders—was given to understand that he ought to consider himself fortunate in not being immediately superseded; and for what cause? For permitting his vessel to be over-crowded! Comment is needless.

NAVAL DISCONTENT.

[FROM A CORRESPONDENT.]

It is well known in the service that, should reforms cost money, something will be taken away to balance the account. The Government never introduce reforms in the Navy until absolutely forced to do so. When they give with the right hand, they take back with the left. But they must give at times. No one appears to consider it to be his duty to see that "poor Jack" shares in the good things that are bestowed upon his brother Tommy Atkins, or his country cousin, the bucolic Giles. Doctors, Paymasters, Assistant-Paymasters, Engineers, Lieutenants, Warrant and Petty Officers, and Schoolmasters, have had their condition improved. When Naval matters are brought before the House of Commons, so little interest do they excite, that the half-score of honourable Members who address the House speak to empty benches. And today there is scarcely a single contented branch in the service. The Executive line has just cause for complaint in the smallness of pay, when compared with the rapid rise in the cost of living within recent years. The slowness of promotion is another source of discontent. The number of Lieutenants on the Active List has been fixed by Order in Council at 1,000, but at present there are only 840. The Sub-Lieutenants only number 215, and 160 of these officers are clearly being kept back by the Admiralty in defiance of the Order in Council. And yet there is difficulty in finding Lieutenants to fill the vacancies. Lieutenants of ten years service and upwards are doing junior Lieutenant's work in many ships, while officers a long way junior to them are sent as senior Lieutenants to other vessels. The list of Royal Naval Engineer officers has gradually been reduced to the limit fixed by the Order in Council of November 30, 1882. There are now 641 Engineers on the list, as against 650 allowed. But this number is so small as to leave the Government at times in a fix, when, as in 1878, "temporary service engineers and assistant-engineers" have to be entered. Many of them probably never before held a higher appointment than fitter in a workshop. Is it right to expect gentlemen to receive these men into their mess-places on equal social terms, and at the same time maintain strict discipline on the lower deck and in the engine-room? It is in this manner that the authorities undo the work that has been in hand for such a number of years, and it requires no Solon to understand that discontent is engendered.

The Clive troopship has arrived at Malta from Bombay, bound for Portsmouth.

THE COMMITTEE ON SHIPBUILDING, &c.

The Committee to inquire into the building, &c., of ships of the Navy, presided over by the Earl of Ravensworth, President of the Institution of Naval Architects, consists, as our readers know, of Sir Daniel Gooch, Captain Codrington, Mr. Palmer, Mr. Norwood, Mr. Samuda, Mr. Ismay, and Mr. F. H. Miller, secretary, so that the Navy is only represented by one member, luckily an officer of great experience. The chairman is well known for his aversion from dockyard work, and his predeliction for private firms. In his annual address to the Institution over which he presides,—

> "His lordship congratulated the Admiralty on the fact that their new ships possessed great power and great speed, while many of them were of novel construction. Formerly they were content with 14 knots, but they had lately improved to 16 knots. What he wanted, however, was to see the Admiralty move faster. Let them look at what private yards were doing. The Government could improve their speed by availing themselves much more largely of private yards than they were doing. One of the causes of the absence of progress appeared to be due to an over-anxiety to attain unto perfection. Another cause was the mixed way in which the business was conducted in the Royal establishments. As a rule, the ships of the Royal Navy took four years to construct; the Inflexible took eight years to build. Why should any ship occupy more than two years? What he would like to see would be a grand national dockyard solely for the construction of ships, the fitting and repairing being effected elsewhere. But, above all, he would like to see private establishments more largely employed."

Notwithstanding Lord Ravensworth's partiality for private firms, the Royal Dockyards are a necessity. No Navy could be kept up without them; and it is proverbial that dockyard lasts twice as long as contract work. The representatives of the large shipbuilding firms on the Clyde have been examined as to the manner in which tenders for the repairs and building of her Majesty's ships by contract are called for, and the conditions under which the work is performed. The real question, however is, "Are the Admiralty paying too much per ton for their ships?" We have in these columns exposed the great difference in price paid by the Government and by private shipowners. The articles we published on "Our Cruisers" led, we believe, to the appointment of the present Committee, which will, we hope, do its work without fear or favour. It is to be desired that the instructions issued to this Committee will enable it to inquire into the manner in which contracts are given for the construction of torpedo-boats, as it would be interesting to know why 90 per cent. of these boats are built by one firm. There are other firms in the land able and willing to build torpedo-boats besides the one which, up to the present time, is so much favoured by the Admiralty. Foreign Governments have long recognised the skill of these firms in designing, constructing, and launching swift torpedo-boats; but for some reason or another their names are not brought prominently to the notice of the Admiralty. Kissing goes by favour, but the Admiralty will do well to see that no favour is shown in giving their orders, except when they are securing the very best article of the kind. We hope that Lord Ravensworth's Committee will take this matter up, so as to ascertain whether there is or is not any truth in the rumours heard in Naval circles.

Obituary.

Sir William Brown, C.B., formerly Accountant-General of the Army, died on Monday, at Hillside, Parkstone, Dorset, aged 71. He was son of the late Mr. R. Brown. In 1857 he was appointed assistant-accountant-general, and in 1860 was promoted accountant-general. He was nominated a C.B. in 1868, and received the honour of knighthood in 1870, on his retirement.

Lieut.-Gen. F. H. Scott, Madras S.C., and formerly of the 8th Madras Cavalry, died on the 22nd inst., in Porchester Square, in his 67th year. He entered the Army in 1834, and became lieutenant-general in 1881.

The death of Capt. T. W. Sulivan, aged 60, is announced this week. He served in the Clio at the capture of Woo-Sung and Shanghai, and in operations in the Yang-tse-Kiang, 1842. He was acting master of the Hydra on the West Coast of Africa; and when master of the Cormorant rendered important service in conducting that ship through an intricate channel, towing three large slavers while engaging the Fort of Paraguay, South America, 1850. He was mentioned in despatches, and received the thanks of the Admiralty, while in command of the Lightning, for the discovery of a shoal in Shelbourne, North Sea.

NOTICES TO CORRESPONDENTS.

Justice must be aware of the rule of the Service, with the right or wrong of which we have nothing to do just now, according to which honours and rewards are not conferred on officers, no matter how distinguished, below the grade of captain.

Aldershot.—No such order exists. There is no bonus.

The Army and Navy Gazette this week contains four pages extra.

The Naval and Military Stations are published by the Army and Navy Gazette on the first Saturday in each month.

The Army and Navy Gazette exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire; Bulletin de la Réunion des Officiers; L'Armée Française; L'Italia Militare; Rivista Europea; Rivista Militare; Memorial de Ingenieros; La France Militaire; Moniteur de la Flotte; Le Progrès Militaire; Der Veteran; Streffleur's Oesterreichische Militärische Zeitschrift; Jahrbücher für die Deutsche Armee und Marine; Militär Wochenblatt; Giornale d'Artiglieria e Genio; Organ der Militär-Wissenchaftlichen Vereine; Vedette; Deutsche Heeres Zeitung; Militärische Zeitschrift; Armeeblatt, Wien; Army and Navy Journal of New York; The American, Philadelphia; Revista Maritima Brazileira*; in addition to all the home and colonial professional periodicals and journals.

THE GRIEVANCES OF SIGNALMEN, R.N.

"A Friend to Signalmen" thus declaims upon the above theme:—"I will endeavour to point out a great flaw now existing in the signal department of the Royal Navy. We will take, for instance, two boys joining the service together; the one chooses the signal department for his profession, and the other the seaman's branch. Well, they both pass through the training establishment, and are, we will say, drafted away to a sea-going ship together. After having attained the age at which they are to be rated as men, the signal boy is rated as 3rd-class signalman, the other boy is rated as an ordinary seaman, both ratings being equivalent as regards rank and pay, but not as regards work. The 3rd-class signalman is by this time considered able to take charge of a watch, should necessity call for his so doing, and in fact, he is often sent away in charge of signals altogether, in a ship where no higher rating is carried, and his duties are highly responsible; while, on the other hand, the ordinary seaman has little or nothing extra to do more than when he was a boy. In addition to his own work, the signalman has, should he be sent to a small vessel, to perform the work of a seaman; being stationed in a part of the ship, he is expected to take his turn at the wheel, or in the chains with the lead, and on the look-out; he has to work aloft with the remainder of his topmates, his part of the ship to keep clean, and is also stationed in a boat and to a gun; he has also his own things to look after, viz., flags, lamps, &c. Thus he has double duties to perform,—signalman and seaman. But in his career in the training-ship he has simply been taught just a few simple rudiments of a seaman's duties that he may require in his own branch, yet he is expected to know all the above-mentioned duties, and be able to perform them; while, on the other hand, the ordinary seaman has nothing new coming to him, it is the same duties he has passed through, and almost continually practising every day,—therefore it comes quite natural to him, whereas, I should say, a seaman's duties were quite unnatural to a signalman. We will now pass to a grade higher. The 3rd-class signalman is now promoted to a 2nd-class signalman, but not until he has been thoroughly examined by a competent person, and found qualified in every respect, for his duties by this time are more harassing than before; he has now to take charge of a watch in a fleet, where duties are very trying, having, if he is not in the flag-ship, to keep a strict look-out on her, and report every little incident to the officer of the watch, that the Admiral's motions may be correctly followed. Should he fail to do this, neglect of duty is the result. The ordinary seaman is examined in the subjects that he has been familiar with, and is advanced to the rating of able seaman, a rank equivalent to the 2nd-class signalman, but far more advantageous, as I will endeavour to show hereafter. After being paid off from a ship, the signalman is given the option of returning to whichever receiving ship he chooses at the expiration of his leave; while the seaman enjoys the same privilege, and also another extra one which the signalman does not enjoy, viz., that of returning to the gunnery ship. After he (the seaman) has passed through his course of gunnery, he is rated as a seaman-gunner, for which he receives 4d. per day in addition to his pay as an able seaman, then he is allowed to enjoy the option of passing for a "trained torpedo man," also to qualify for a diver, receiving 1d. per day for each of these two latter subjects; thus, being only equal in rank with the 2nd-class signalman, he is far more in advance of him in pay. The signalman is not allowed the option of passing through either of these subjects; the only thing he is allowed to pass for is "trained man," for which he receives 1d. per day. Thus the seaman is in a position to get 5d. a day more than the 2nd-class signalman; yet no equivalent is made to the signalman, and all advantages are debarred from him. If the 2nd-class signalman should get promoted to a signalman, viz., have a 2nd-class rate given him, even then he is not so well off as the seaman gunner; for if the latter should get promoted, he can again improve his position by qualifying for an instructor, leaving his equal (once) in the same position and enjoying the same privileges, but leaving him far behind as regards pay. He can also go on, step by step, until he becomes a warrant officer, should his ambition lead him to such. Not so with the signalman; he may have attained the rating of chief yeoman of signals, which rating is very limited, being borne only in flagships, and consequently not rated until actually required. Perhaps were he to apply to pass for warrant rank, he might be allowed to do so; but where is the man who has been brought up to signals during the whole period of his service who thinks himself qualified, in seamanship, &c., to pass the examination required by the service for the rank of warrant officer? They are very few, I think it my right to assert. Signalmen are required to be smart and intelligent; they are supposed to be a select branch in the service, but they are not treated as such; their duty is performed aft, amongst the officers, consequently they have always to appear clean and neatly dressed when other men are in a working dress. Yet to meet these emergencies their pay has never had an increase, whilst the seaman branch is being constantly improved. The signalman has continually to be on watch at sea or in harbour, whilst the ship's company get all night in their hammocks. The signalman has the same amount of watch-keeping duties to perform as if he were at sea, and in all weathers. They are often kept on deck all day in a fleet when at steam tactics, and then have to keep a night-watch; thus making one of the most important branches of the service an object of disgust, and consequently, when short-handed and a deck-hand is required to volunteer to be taught, it is a difficult matter to obtain one without compulsion. Again, in a ship with only one signalman, should he get incapacitated from performing his duty, there is no one in the ship that could replace him; but should the signalman be required to do any duty in the ship, he must be able to do it. A depôt should be established for signalmen to return to, and signalmen alone, that they may become acquainted with any change of signalling that may take place. For instance, a "New General Signal Book" has been introduced and brought into use; they were issued to ships at home and abroad, and signalmen were expected to know as much about them as the original ones, which had been in vogue for years; and I see now the signalmen of the Royal Navy have to learn the Army code, to enable them to communicate with the latter when on active service. Surely, it is time something was done for this invaluable branch of the service."

REGIMENTAL FACINGS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—Many of your readers, I have no doubt, recollect as an important factor in the localising scheme to render the Army popular, and to encourage recruiting, the stress laid on national-coloured facings fixed on for national regiments; I wonder if they have remarked that of all the Irish regiments in the Army but one wears the national colour, which for Ireland is green. It is simply absurd; so much fuss, and such little results. I was very sorry when the facings of regiments were interfered with, because facings engender *esprit de corps*: and any one that knows soldiers well, will know their old ideas about disgracing their facings and regiments that forfeited their facings. But if colours are to be adhered to to denote territorial distinction of regiments, then let Royal regiments of Scotland and Ireland wear their national facings as well as other regiments from those kingdoms; or the Royal regiments might wear the national colour, and corps that are not Royal could, if desirable, be allotted another colour. It also seems a great pity so many regiments now have white facings, for it is most confusing; it was only the other day I saw a party of soldiers in white facings walking in a garrison town, and these I set down as belonging to a regiment in garrison which has white facings; but my astonishment was great, on a close inspection, to find they not only did not belong to the regiment, but no two belonged to the same corps.—I am, &c., Critic.

Headaches and Disordered Stomach.—"After suffering for nearly two-and-a-half years from severe headache and disordered stomach, and after trying almost everything, and spending much money without finding any benefit, I was recommended to try your Fruit Salt. Before I had finished one bottle, I found it doing me a great deal of good, and now I am restored to my usual health. Others I know that have tried it have not enjoyed such good health for years.—Yours truly, Robert Humphreys, Post Office, Barrasford." CAUTION.—Legal rights are protected in every civilised country. Examine each bottle, and see the Capsule is marked "Eno's Fruit Salt." Without it, you have been imposed upon by worthless imitations. Sold by all Chemists. Directions in Sixteen Languages,—How to Prevent Disease. Prepared only at Eno's Fruit Salt Works, Hatcham, London, S.E., by J. C. Eno's Patent.

ARMY AND NAVY HOTEL.

ESTABLISHED 1649.

THE CEDARS and MORNINGTON PARK ESTATES, near West Kensington and Addison Road (Kensington) Railway Stations, and Omnibus Routes to the City, &c.—HOUSES to be LET or SOLD. Rents from £55 to £150. Well built, of white bricks, Bath-stone dressings, admirably designed, with all modern improvements, bath-rooms, electric bells, venetian blinds, &c. These well-known and fashionable Estates afford advantages which cannot be surpassed in any of the suburbs. Within easy access of the West End by road or rail, and within the four-mile radius from Charing Cross. For Military and Naval officers and persons of moderate incomes who require good family residences, they are unequalled. Soil is a fine gravel. St. Paul's School (from St. Paul's Churchyard), now being erected on the Estate, will afford exceptional advantages to the sons of residents. Lawn-tennis and ornamental gardens on the Estate for the use of residents.—Particulars post free from GIBBS and FLEW (Limited), Cedars Estate Office, West Kensington Station, W.

GENTLEMEN'S RESIDENCES at moderate rentals at West Kensington, opposite West Kensington Station. Frequent trains to City and West End. St. Paul's Schools (from St. Paul's Churchyard), now being erected in the locality, will afford the highest educational facilities. They contain every modern improvement; fitted bath (hot and cold water); fine gravel soil; first-class sanitary arrangements; admirably suited to the requirements of gentlemen's families. Rents £6) to £100.—Apply to GIBBS and FLEW (Limited), Cedars Estate Office, West Kensington Station, W.

TO be LET FURNISHED, for one, two, or three years, or less period, a DETACHED HOUSE, with every convenience, near Kensington Gardens and Health Exhibition.—Apply, after eleven, at 12 Strathmore Gardens, Palace Gardens Terrace. Rent, 9 guineas a week; or less for the year.

EXETER, DEVONSHIRE.—To be LET (Furnished), ALBUERA, St. Leonard's Road, Exeter, for one or more years, the residence of W. S. M. D'Urban, Esq., who is leaving England, containing three reception, four bed, and one dressing-room, kitchens and offices, good garden at back. Well furnished, with every convenience. Rent moderate.—For particulars and cards to view, apply, Messrs. WARREN BROS., Auctioneers and House Agents, Mount Radford, and Queen Street, Exeter.

SUFFOLK, within one hour and forty minutes of London.—To be LET, well furnished, a most enjoyable RESIDENCE, in nice grounds, and 10 acres of rich well-timbered meadow-land. Outer and inner halls, three reception and eight bed and dressing rooms, besides servants' accommodation; stabling for six horses, cowhouse, conservatory, good gardens, orchard, &c. Healthy district, and good society. Hunting, wild-fowl shooting, and fishing. Or the Freehold of the Property, extending to about 41 acres, would be sold.—Messrs. WALTON and LEE, 20 Mount Street, London, W. (2,937.)

DEVONSHIRE.—To be SOLD or LET, PLEASURE FARM of 40 acres, near DARTMOOR, with Gentleman's Residence, greenhouse, &c. Several packs of hounds, salmon and trout fishing, and rough shooting within easy distance.—Apply to Mr. G. HIRTZEL, 12 Bedford Circus, Exeter.

FALKNER'S "REAL MALT" WHISKEY.

PURE DUBLIN DISTILLATION.

The same as supplied to the principal Clubs and Regimental Messes. Has been esteemed in Ireland for the last century as the FINEST IRISH WHISKEY procurable, being pure as distilled, and refined by age only. A stock always kept in bond ready for shipment to India and the Colonies.

—*i.e.*, 36 out of 50 sent up.

NEXT TERM, for Sandhurst, Woolwich, Militia, Staff College, and Promotion, COMMENCES APRIL 16.

ARMY EXAMINATIONS.—From 15 to 20 Pupils are received by the Rev. WALTER BAKER, M.A., Batcombe Rectory, Evercreech, Bath. A Permanent Staff of five highly qualified Instructors, all resident in the village, besides occasional Assistants, gives a guarantee of individual attention impossible where the number of Pupils is large. There are two departments under separate sets of Instructors, the one under two Graduates, Classical and Mathematical, and a Foreign Master for Candidates for Sandhurst, Woolwich, the Preliminary and Qualifying Literary Examinations; the other under two Experienced Officers for the Final Military Competitive for Lieutenants of Militia. A large per-centage, viz., nearly two-thirds of the Pupils sent up during the last 17 years have passed their respective Examinations. At the recent Military Competitive eight Lieutenants of Militia went up, and four of them who had received all their instruction at Batcombe passed among the first 40, one (Mr. W. H. Lord) taking FIRST place on the list. References are permitted to Sir John Adye, G.C.B., General Elmhirst, C.B., General Thompson (late 7th Dragoon Guards), Colonel A. H. King, R.A., A.D.C. to the Queen, the Bishop of Bedford, and many others, all parents or near relatives of former pupils.

SANDHURST, UNIVERSITIES, &c.—Mr. MORITZ LICHTENSTEIN, Barrister-at-Law, assisted by Graduates of Oxford and Cambridge, PREPARES STUDENTS for MATRICULATION, or PASS EXAMINATION for ARMY or CIVIL SERVICE, and other Examinations, at an inclusive charge.—For terms, apply personally or in writing at 46 Auriol Road, West Kensington, W.

ASHFORD SCHOOL, KENT.
HEAD MASTER—E. C. MUSSON, M.A., F.G.S., formerly Scholar and Prizeman of Queen's College, Cambridge.

Pupils can receive thorough Preparation for Woolwich, Sandhurst, &c., with Public-School training. Terms very moderate, and strictly inclusive. References permitted to Colonel Sir T. D. Baker, K.C.B., Colonel R. B. H. Blundell, Assist.-Adjt.-Gen., &c.

LADIES' SCHOOL.
BEETHOVEN HOUSE,
NORTHAMPTON.
PRINCIPAL—MRS. BROOK SAMPSON.
VISITING MASTERS, RESIDENT ENGLISH AND FOREIGN GOVERNESSES.

PIANO, ORGAN, HARP, SINGING, and HARMONY.
Mr. BROOK SAMPSON, Mus. Bac., Oxon, F.C.O., and CERTIFICATED GOVERNESSES.

The success of Mrs. Brook Sampson's Pupils at the Cambridge, Royal Academy of Music, and Trinity College Local Examinations, sufficiently attests the throughness and accuracy of instruction given at this establishment.

Entire charge of Pupils during the Holidays.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

At the six Militia Competitions which have taken place since September 1, 1881, Colonel WILKINSON and Lieutenant-Colonel SHAW have secured for their Pupils FORTY-NINE COMMISSIONS, although they have only Prepared and sent up a very Limited Number of Candidates. In the list just out for the March, 1884, Examination, out of SIXTEEN SENT UP, TEN PUPILS have succeeded; one other was two places out, and three more within a few places of being successful. Lieutenant C. J. Stanton took the SECOND PLACE at this Examination, with 2 083 marks.

At the Militia Literary Examinations held during the same period, a Number of Pupils have also passed; in this Competition the FIRST PLACE was taken in April last by Lieutenant Lord Skelmersdale, and the SECOND PLACE in the recent October Examination by the only candidate sent up, Lieutenant the Honourable Victor A. Pelham.

At the recent WOOLWICH EXAMINATION Mr. W. V. Scudamore passed SIXTEENTH on the list. This candidate made very high marks in languages.

The results of the last SANDHURST EXAMINATIONS have also added to the general score, which now amounts to NINETY-TWO SUCCESSES, obtained by Pupils since September 1, 1881.

Address, DARMSTADT, GERMANY.

NAVAL CADETS, ASSISTANT CLERKS
HOPE HOUSE SCHOOL,
SOUTHSEA.

Principals { Mr. T. H. VICKERY.
Mr. EDWARD M. BEWLAY, B.A., Univ. Coll., Lond.

AN ARMY SECTION IS NOW ADDED. PUPILS PREPARED FOR SANDHURST AND WOOLWICH.

At the late Competitive Examination in June for Assistant-Clerkships in the Royal Navy, TWO of the Five successful Competitors were Pupils of this Establishment, taking First and Third places. In June, 1882, of the five who passed, the First, Third, and Fourth were from this School, and Three qualified.

CAVENDISH COLLEGE,
CAMBRIDGE.

Four Scholarships of £30 each, tenable for three years, given, one by the Clothworkers' Company, one by his Grace the Duke of Devonshire, K.G., one by Samuel Morley, Esq., M.P., and one by E. B. Foster, Esq., will be offered for competition on August 6, 7, and 8, 1884. Candidates must be under 17 on August 6.

The usual age of entry being between 16 and 17, a Degree may be taken at 19.

The College charges for lodging, boarding (with an extra term in the Long Vacation), and, including all necessary expenses of tuition, and University fees, are £84 per annum. For further information, apply to the WARDEN, Cavendish College, Cambridge.

CHARDSTOCK COLLEGE, CHARD.

Beautiful country; remarkably healthy. Special Preparation for Army, Navy, Public Schools, Universities, &c. Terms moderate. Cricket, fives, gymnastics, &c.

JERSEY HIGH SCHOOL for GIRLS
(Limited).
PATRONS.
The Right Reverend the Lord Bishop of WINCHESTER.
His Excellency the Lieut.-Governor of JERSEY.
Head Mistress—Miss M. E. POPE.
Certificate of London University General Examination for Women, with honours, and distinction in French, Scholar of Girton College, Cambridge, and Second-Class Natural Science Tripos in the University of Cambridge.

This School has been established for the purpose of giving a high-class education, on the principles of the Church of England. The school buildings are situated in a healthy suburb of St. Helier's, near the sea. The climate of Jersey is mild and healthy. Special facilities are provided for the acquisition of the French language. Ordinary fees—board (washing included), sixteen guineas per term; tuition, four and five guineas per term. —Application for prospectuses may be made to the Secretary, R. CREWS, Esq., Wyvil House, Georgetown, Jersey.

TO OFFICERS, ANGLO-INDIANS, and OTHERS.—First-class School, established 15 years, where boys are prepared from an early age for the Army Examinations. Numerous Staff of Experienced Graduates in Honours. System pursued has resulted in 35 successes and no failures. Indian children received. Highest references.—C. V. GODBY, M.A. (Oxon.), Bute House, Petersham, S.W.

LONDON INTERNATIONAL
COLLEGE,
Spring Grove, Middlesex, W.

Inaugurated by H.R.H. the Prince of Wales, July 10, 1867. French and German (or Greek) taught to every Boy.

Amongst the successes during the year are two OPEN SCHOLARSHIPS at CAMBRIDGE, and a 13th WRANGLER.

Several FOUNDATION SCHOLARSHIPS, tenable at the School, which may be increased in amount from a Special Fund in the case of those requiring it.

Also LEAVING SCHOLARSHIPS, tenable at the UNIVERSITIES, WOOLWICH, and SANDHURST.

Apply to the SECRETARY, or to the Head Master, H. R. LADELL, M.A.

MILITIA COMPETITIVE
EXAMINATION.

Careful Preparation guaranteed in a pleasant country village, convenient for railway, with good accommodation.

Resident Principal, a Retired Field Officer, STAFF COLLEGE, GARRISON INSTRUCTOR, with excellent testimonials, and unexceptionable references; assisted by another Officer, similarly qualified.

Considerable bonâ-fide reduction on the usual fees.—Full particulars on application to "P. Q.," care of the INCUMBENT, St. Mary's, Upper Edmonton, N.

ARMY.—LINE and MILITIA.

IMPORTANT to STUDENTS.

Captain DUMARESQ DE CARTERET BISSON, M.A., Author of "Our Schools and Colleges" (graciously recognised by the Queen and H.R.H. the Commander-in-Chief), sends, free by post, a selected List of Prospectuses of all the most SUCCESSFUL ARMY TUTORS, and gives his Counsel on Military and Civil-Service Education free of Charge. References kindly permitted to the late Secretary of State for War.—Apply by letter only, No. 69 Berners Street, London, W.

ARMY,
CIVIL SERVICE, UNIVERSITIES,
PUBLIC SCHOOLS.

MESSRS. BISSON, BORMAN, and CO. send, free of charge, PROSPECTUSES of the most SUCCESSFUL TUTORS for Woolwich, Sandhurst, Military Competitive, Staff College, Home and Indian Civil Services, Universities, Public Schools, &c.—3 Berners Street, W.

MILITARY EXAMINATIONS.—Colonel LONSDALE HALE, R.E., recently Professor at the Staff College, and formerly Instructor in Fortification, R.M.C., and also Garrison Instructor, Home and S.E. Districts, and Lieutenant-Colonel C. W. FOTHERGILL, F.G.S., P.S.C., late Instructor in Military Topography, Royal Military College, prepare Officers of the Army for Promotion and for Entrance to the Staff College, LIEUTENANTS of MILITIA for the MILITARY COMPETITIVE EXAMINATION, and Officers of the Auxiliary Forces for the Examination in Tactics.

For particulars and terms, apply to Colonel LONSDALE HALE, 57 Sinclair Road, Kensington.

MILITARY COMPETITIVE
EXAMINATION.

THREE sent up in March, TWO PASSED; Hill, 4th, Cumberland, 20th. Third only just failed. Many former successes. Tuition for all Competitive Examinations.—Captain PINHEY, Spring Grove, Isleworth.

CONNAUGHT MILITARY COLLEGE,
WOOLWICH COMMON.
Principal—SAMUEL H. WINTER.

The Pupils of this Establishment have been uniformly successful. In July, 1882, Mr. F. Close was SECOND on the Woolwich List, being FIRST in Mathematics; in July, 1883, Mr. G. Close was TENTH and Mr. R. F. Edwards TWELFTH, all at their first trial. Mr. Winter has prepared more than 200 Pupils for various Military Examinations.

MILITARY EXAMINATIONS.—Lieutenant-Colonel G. M. CARDEW (passed 2nd from the Staff College), PREPARES SIX LIEUTENANTS of MILITIA for MILITARY COMPETITIVE, also Officers for Promotion and other Military Examinations.—14 Observatory Avenue, Kensington, three minutes from the High-Street Station.

MILITARY EXAMINATIONS and GENERAL EDUCATION.—AVRANCHES.—A GENTLEMAN, for many years successfully engaged in preparing Candidates for the Military Competitive Examination and Universities, wishes to RECEIVE PUPILS. Great facilities for acquiring the French language. Terms moderate. Highest references to Parents and Guardians of former Pupils, and to Clergymen and Country Gentlemen.—Apply to Captain CHAWNER, Bois-Guerin, Val-St.-Père, Avranches.

ARMY EXAMINATIONS.—Mr. J. WINDER, M.A., Cranworth House, Eastbourne, Sussex, PREPARES SEVEN PUPILS for WOOLWICH and SANDHURST. Special Masters for French, German, and Science. In 1880, of FOUR Candidates for Woolwich, ALL of whom passed, one was 6th and another 29th. In 1883, of THREE Candidates for Sandhurst, TWO were successful.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS, 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Laboratory, heated Swimming Bath, Fives Courts, &c.—Address, HEAD MASTER.

AN OFFICER in the ARMY WISHES to RECOMMEND strongly a PREPARATORY SCHOOL for YOUNG BOYS on the South Coast.—Apply to Colonel ABBOT ANDERSON, Professor of Military Topography, R.M.C., Yorktown, Farnborough.

A PRUSSIAN OFFICER of RANK resident in a pleasant little town near Berlin, wishes to RECEIVE PUPILS into his house, and to prepare them for Woolwich and Sandhurst. He is permitted to refer to the Rev. T. Teignmouth Shore, Chaplain to the Queen, 31 Montpelier Square, Rutland Gate.—Address, "J. H. D.," 41 Coleman Street, E.C.

HINDUSTANI TAUGHT, Cito, Tuto, Jucunde. Officers prepared for Examinations. Correct Idiom guaranteed. Also Persian, Arabic, and Sanscrit.—PUNDIT, 7 Beechholme Road, Clapton, E.

MAJOR WILBLEFORCE CLARKE, R.E., wishes to recommend most highly a first-rate COLLEGIATE SCHOOL on the WEST COAST.—Apply to the above, 5 Spring Grove, Bedford.

SEASIDE EDUCATION.—A LADY DESIRES the CHARGE of a FEW CHILDREN, to share the lessons and play of two little Girls under ten. Most delightful part of the Isle of Wight. Climate peculiarly suited to Indian or delicate children. Moderate terms.—Refer to the Rev. J. BALDWYN PUGH, Napton Vicarage, Rugby.

ARMY and NAVY SCHOOL,
BROMLEY, KENT.

Young BOYS PREPARED from the first on the SPECIAL LINES required for these SEVERE EXAMINATIONS.

Head Master—JOHN GIBSON, M.A., assisted by three resident Graduates, and a resident French and Drawing Master.

WELLINGTON COLLEGE.—There will be an ELECTION in October, 1884, to FIVE OPEN SCHOLARSHIPS. Candidates must be under 14 and over 12 on June 1, 1884.—For particulars, apply to the BURSAR, Wellington College, Wokingham.

EDUCATION in FRANCE.—A few ENGLISH BOARDERS are received by Mons. MICHAUD, at Dijon. Highest references in France and England. Great experience with Army Students.

ASK FOR

LIEBIG COMPANY'S EXTRACT OF MEAT.

CAUTION.—Numerous inferior and low-priced substitutes being in the market, with misleading titles, labels, and portraits of the late Baron Liebig, purchasers must insist on having the Liebig Company's Extract of Meat.

N.B.—Genuine ONLY with fac-simile of Baron Liebig's Signature in Blue Ink across Label.

The only brand warranted genuine by Baron Liebig.

⁂ In use in most Households throughout the Kingdom.

Ask for the Liebig COMPANY'S Extract, and see that no other is substituted for it.

HOP BITTERS.

If you are a man of business or labourer, weakened by the strain of your duties, avoid stimulants, and take HOP BITTERS.

If you are a man of letters, toiling over your midnight work, to restore brain and nerve waste, take HOP BITTERS.

If you are suffering from over-eating or drinking, any indiscretion or dissipation, take HOP BITTERS.

If you are married or single, old or young, rich or poor, suffering from poor health, or languishing on a bed of sickness, take HOP BITTERS.

Whenever you feel that your system needs cleansing, toning, or stimulating, without intoxicating, one bottle of HOP BITTERS will do more good than £5 in all other medicines or doctor's visits.

Have you dyspepsia, kidney complaint, disease of the stomach, blood, liver, or nerves? You will be cured if you take HOP BITTERS.

If you have flatulency, rheumatism, or gout, or are simply ailing, are weak and low-spirited, try it! Ask your chemist or druggist for HOP BITTERS.

IT MAY SAVE YOUR LIFE. IT HAS SAVED HUNDREDS.

HOLLOWAY'S PILLS.—The stomach and its troubles cause more discomfort and bring more unhappiness than is commonly supposed. The thousand ills that settle there may be prevented and dislodged by the judicious use of these purifying Pills, which act as a sure, gentle, and anti-acid aperient, without annoying the nerves of the most susceptible, or irritating the most delicate organisation. Holloway's Pills will bestow comfort and confer relief on every headachy, dyspeptic, and sickly sufferer, whose tortures make him a burden to himself and a nuisance to his friends. These Pills have long been the popular remedy for a weak stomach, for a disordered liver, or a paralysed digestion, which yield without difficulty to their regulating, purifying, and tonic qualities.

REPORT.—"I cannot speak too highly of the gold watch No. 17,179 of your make, and which I purchased from you in January, 1875. It was my constant companion during the winter 1875-1876 in the Arctic, and accompanied me sledging. It was about the best, if not the very best, in the 'Discovery,' and since my return home continues to perform equally satisfactorily."

Sole Address—3 THE HARD, PORTSEA.

THE BRITISH ARMY.

TWELVE PICTURES, drawn by R. SIMKIN, and carefully coloured by hand. Enclosed in red and gold-lettered case, post free. 15s 6d; cloth bound, gilt edges, 18s 6d; a single picture, 2s 6d.

HALFORD BROTHERS,
169 Oxford Street, W.,
Opposite the Princess's Theatre.

These are the BEST and MOST ACCURATE Representations of the Army yet produced.

SPECIAL MANUFACTORY of MUSICAL INSTRUMENTS.
For CLARIONETS, FLUTES, PICCOLOS, OBOES, BASSOONS, COR ANGLAISE, FLAGEOLETS, and SAXOPHONES.

SPECIAL SUPPLEMENT TO THE

ARMY AND NAVY GAZETTE.

JOURNAL OF THE RESERVE, AND AUXILIARY FORCES.

No. 1,270.—Vol. XXV.]

SATURDAY, MAY 24, 1884.

[REGISTERED FOR TRANSMISSION ABROAD.] GRATIS.

THE SOUDAN EXPEDITION.

A Supplement to the *London Gazette* published on Wednesday night contains the following promotions and appointments consequent upon the recent operations in the Soudan:

WAR OFFICE, Pall Mall, May 21, 1884.

The Queen has been graciously pleased to give orders for the following promotions in, and appointments to, the Most Honourable Order of the Bath:—

To be Extra Members of the Military Division of the Second Class, or Knights Commanders of the said Most Honourable Order, viz.:—Lieut.-Gen. F. C. A. Stephenson, C.B., and Col. H. Stewart, C.B., Aide-de-Camp to the Queen.

To be Ordinary Members of the Military Division of the Third Class, or Companions of the said Most Honourable Order, viz.:—Major-Gen. J. Davis; Capt. H. G. Andoe, R.N.; Cols. E. A. Wood, 10th Hussars; B. S. Robinson, Princess Victoria's (Royal Irish Fusiliers); C. F. Clery, half-pay; Brig.-Surg. E. G. McDowell, Army Medical Department; Lieut.-Cols. W. Green, the Black Watch (Royal Highlanders); W. Byam, York and Lancaster Regt.; A. G. Webster, 19th Hussars; J. C. Ardagh, C.B. (Civil), Royal Engineers; P. H. S. Barrow, C.M.G., 19th Hussars; Capt. E. N. Rolfe, R.N.; and Assist.-Comy.-Gen. R. A. Nugent, Commissariat and Transport Staff.

WAR OFFICE, Pall Mall, May 21, 1884.

The Queen has been graciously pleased to signify her intention to confer the decoration of the Victoria Cross upon the under-mentioned officers, non-commissioned officer, and private soldier, whose claims have been submitted for her Majesty's approval, for their conspicuous bravery during the recent operations in the Soudan, as recorded against their names:—

Capt. Arthur Knyvet Wilson, Royal Navy.—This officer, on the Staff of Rear-Admiral Sir William Hewett, at the battle of El Teb, on Feb. 29, attached himself during the advance to the right half battery, Naval Brigade, in the place of Lieut. Royds, R.N., mortally wounded. As the troops closed on the enemy's Krupp battery, the Arabs charged out on the corner of the square, and on the detachment who were dragging the Gardner gun. Capt. Wilson then sprang to the front, and engaged in single combat with some of the enemy, thus protecting his detachment till some men of the York and Lancaster Regt. came to his assistance with their bayonets. But for the action of this officer, Sir Redvers Buller thinks that one or more of his detachment must have been speared. Capt. Wilson was wounded, but remained with the half battery during the day.

Lieut. Percival Scrope Marling, 3rd Batn. King's Royal Rifle Corps, late Mounted Infantry.—For his conspicuous bravery at the battle of Tamai, on March 13 last, in risking his life to save that of Private Morley, Royal Sussex Regt., who, having been shot, was lifted and placed in front of Lieut. Marling on his horse. He fell off almost immediately, when Lieut. Marling dismounted, and gave up his horse for the purpose of carrying off Private Morley, the enemy pressing to close on them until they succeeded in carrying him about 80 yards to a place of comparative safety.

Qrmr.-Serjt. William Marshall, 19th Hussars.—For his conspicuous bravery during the cavalry charge at El Teb, on Feb. 29 last, in bringing Lieut.-Col. Barrow, 19th Hussars, out of action. That officer having been severely wounded, and his horse killed, was on the ground surrounded by the enemy, when Qrmr.-Serjt. Marshall, who stayed behind with him, seized his hand and dragged him through the enemy back to the regiment. Had Lieut.-Col. Barrow been left behind, he must have been killed.

Private Thomas Edwards, 1st Batn. Royal Highlanders.—For the conspicuous bravery displayed by him in defence of one of the guns of the Naval Brigade at the battle of Tamai, on March 13, 1884. This man (who was attached to the Naval Brigade as mule-driver) was beside the gun with Lieut. Almack, R.N., and a Blue-jacket. Both the latter were killed, and Edwards, after bayonetting two Arabs, and himself receiving a wound with a spear, rejoined the ranks with his mules, and subsequently did good service in remaining by his gun throughout the action.

ADMIRALTY, May 21, 1884.

Rear-Admiral Sir W. N. W. Hewett, V.C., K.C.B., K.C.S.I., to be Vice-Admiral whilst in command of her Majesty's ships and vessels employed on the East Indian station.

The following promotions have been made in her Majesty's Fleet for services rendered with the Naval Brigade forming part of the Soudan Expeditionary Force, dated May 20, 1884:—

Com. E. N. Rolfe to be Capt.; Lieuts. W. H. B. Graham and C. J. M. Conybeare to be Coms.; Sub-Lieut. P. D. M. Henderson to be Lieut.; Staff Surg. J. H. Martin to be Fleet Surg.; Surgs. H. E. F. Cross to be Staff Surg., and T. D. Gimlette will be promoted to Staff Surg. on April 1, 1885.

The following promotions have also been made for services rendered in the Red Sea in connection with the Soudan Expeditionary Force (dated May 20, 1884):—Lieuts. H. C. Bigge and W. D. Morrish to be Coms.; Navigating-Lieut. F. Hire to be Staff Com.; Chief Engineer G. T. Crook to be Inspector of Machinery; Assist.-Pymr. J. A. Bell to be Pymr.

Royal Marine Artillery.—The Lords Commissioners of the Admiralty have been pleased, under the terms of her Majesty's Order in Council of Jan. 15, 1878, to promote Capt. and Brevet Major W. G. Tucker, R.M.A., to be Major, in recognition of his meritorious service at the engagement of El Teb (May 21, 1884).

WAR OFFICE, Pall Mall, May 21, 1884.

The Queen has been graciously pleased to approve of the following promotions being conferred upon the under-mentioned officers and Warrant officer in recognition of their services during the recent operations in the Soudan (dated May 21, 1884):—

Brevet.

To be Lieutenant-General (for distinguished service in the field):—Major-Gen. Sir G. Graham, V.C., K.C.B., R.E.

To be Major-General (for distinguished service in the field):—Major and Col. Sir R. H. Buller, V.C., K.C.M.G., C.B., Aide-de-Camp to the Queen, half-pay.

To be Colonels:—Major and Brevet Lieut.-Col. C. F. Clery, half-pay, and Lieut.-Col. D. Hammill, C.B., the Gordon Highlanders.

To be Lieutenant-Colonels:—Majors F. T. Lloyd, R.A.; E. L. Fraser, the King's Royal Rifle Corps; Capt. and Brevet Major J. P. Brabazon, 10th Hussars; Majors E. H. Holley, R.A.; G. H. T. Colwell, R.M.L.I.; R. W. Dalgetty, the York and Lancaster Regt.; A. E. A. Cross, the Gordon Highlanders; H. S. Gough, 10th Hussars; E. Wood, R.E.; K. R. Todd, R.E.; C. J. Eden, the Black Watch (Royal Highlanders; A. G. Wauchope, C.M.G., the Black Watch (Royal Highlanders).

Memorandum.

Major W. Aitken, the Black Watch (Royal Highlanders), would have been recommended to her Majesty for promotion, had he not been killed in action at Tamai.

To be Majors:—Capts. T. B. Hitchcock, the King's (Shropshire L.I.); N. W. P. Brophy, the Black Watch (Royal Highlanders); A. O. Green, R.E.; W. F. Kelly, the Royal Sussex Regt.; J. Gordon, Princess Victoria's (Royal Irish Fusiliers); J. J. B. Menzies, the Gordon Highlanders; W. H. Poë, R.M.L.I.; C. B. H. Jenkins, 19th Hussars; F. G. Slade, R.A.; J. H. Wodehouse, R.A.; H. C. T. Littledale, the York and Lancaster Regt.; K. S. Baynes, the Queen's Own Cameron Highlanders; and E. W. Herbert, the King's Royal Rifle Corps.

Chaplains' Department—The Rev. R. Brindle, Chaplain to the Forces of the 3rd Class, to be Chaplain to the Forces of the 2nd Class.

Commissariat and Transport Staff—To be Assistant-Commissaries-General:—Deputy-Assist.-Commissaries-Gen. M. E. R. Rainsford and G. V. Hamilton. To be Quartermaster—Conductor of Supplies H. Hickie.

Medical Department—To be Surgeons-Major, with the relative rank of Lieutenant-Colonel:—Surgeons-Major, with relative rank of Major, W. A. Catherwood, M.D., and W. D. Wilson, M.B.

Ordnance Store Department—Assist.-Comy.-Gen. of Ordnance, with relative rank of Major, H. J. Mills, to be Assist.-Comy.-Gen. of Ordnance, with the relative rank of Lieut.-Col.

Army Pay Department—Staff Pymr. and Hon. Major R. B. Farwell to be Chief Pymr., with the hon. rank of Lieut.-Col. in the Army.

Veterinary Department—To be Vet.-Surgs., First Class, ranking with Majors, but junior of that rank, except for choice of quarters:—First Class Vet.-Surgs., ranking with Capt., C. Clayton and H. Thomson.

Honorary Rank.

To be Captains:—Qrmrs. E. Enright, Army Hospital Corps; and F. H. Mahony, the York and Lancaster Regt.

The following are the terms of the vote of thanks which Admiral Sir J. Hay proposes to move on the 17th prox:—"That the thanks of this House be given to Rear-Admiral Sir William Nathan Wrighte Hewett, K.C.B., for the distinguished skill and ability with which he conducted the naval operations in the Red Sea, and for his services at Suakim, at El Teb, and at Tamanieb; that the thanks of this House be given to Major-General Sir Gerald Graham, K.C.B., for the distinguished skill and ability with which he planned the operations at Suakim, and defeated greatly superior forces at the battles of El Teb and Tamanieb; that the thanks of this House be given to the other officers and warrant officers of the Navy, Army, and Royal Marines, for the energy and gallantry with which they executed the services they were called upon to perform; that this House doth acknowledge and highly approve the gallantry, discipline, and good conduct displayed by the petty officers, non-commissioned officers, and men, of the Navy, Army, and Royal Marines, and the cordial good feeling which animated the united forces; that the said resolutions be transmitted by Mr. Speaker to Rear-Admiral Sir William N. W. Hewett and to Major-General Sir Gerald Graham, and that they be requested to communicate the same to the several officers and men referred to therein."

The special correspondent of the *Daily News* reached Korosko on Thursday, and telegraphs thence as follows:—"I have found everything peaceful here. Capt. Eager came up with 140 men, and has been busy getting them into camp, and making them fire a few rounds from their newly issued Martini rifles. Major Kitchener has his head-quarters here, and has succeeded in establishing a chain of outposts extending to the Red Sea. No offensive movements can therefore take place northwards without Major Kitchener's receiving prompt information within a few days. A similar chain will be organised to cover the desert road from Selimah, by which Assouan might be turned. Major Kitchener has secured the services of over 2,000 Arabs, who form seven of the outposts between Egypt and the insurrection. He wishes to push on to Abou Hamed; but owing to the great risk the Government, withholds permission. Preparations are going on at Assouan for the reception of the troops under orders to take part in the advance. Two infantry battalions, one battery of artillery, and a regiment of artillery are under orders to advance to Assouan. As soon as the first detachment arrives the remaining company of the 3rd Battalion will come on here. The English officers of Gen. Wood's army are looking forward with great hope to have a brush with the enemy before the English troops can arrive. They have great confidence in the discipline of the Egyptian soldiers, but little in the native officers. The difficulties in the way of the advance of a large force to relieve Khartoum already show themselves. No subsistence can be found on the road. Troops must carry all their supplies with them. It is impossible at present to obtain sufficient camel transport, and owing to the lowness of water the Nile is not available beyond Wady Halfa until July or August. There is difficulty in bringing laden boats as far as Wady Halfa now. Com. Hammill arrived to-day, on his way to make a further report on the river. He is very reticent, but seems inclined to abandon the river in favour of a strategical railway across the desert from Korosko to Abou Hamed."

The *Standard's* correspondent at Cairo telegraphs:—"It is rumoured this evening that the Governor of Dongola has received news from Gen. Gordon, who is said to be deeply distressed at the utter want of support from the English Government. He is represented as saying that unless troops shortly arrive at Khartoum, he will renounce his position as British Envoy."

THE MARTINI-HENRY.

Sir W. Codrington's experience and position give peculiar weight to the following observations which he has sent us on the Martini-Henry rifle:—"Sir,—It is said that an alteration of the present Martini-Henry rifle is contemplated. If so, there are circumstances which require the attention not only of the "authorities," whoever these may be, but of those officers who have to arrange for the effective use of the rifle in war. Not long ago some inches were cut off from the muzzle of the rifle, either to lighten the arm, to make it more handy, or a better firing instrument. One result of this diminution of weight was understood to be, that the recoil was sharper; the amount of powder consequently was diminished, the flatness of the trajectory consequently altered. Then arose also the idea that, as the whole length of rifle and bayonet was reduced for opposition to cavalry, the bayonet ought to be increased to make up for the diminished length. If this is the fact, more than 100,000 bayonets had to be altered, and more than 100,000 scabbards to correspond. What has been the result of this rather costly and somewhat childish alteration? A longer and weaker bayonet, which could scarcely have a preponderating effect against cavalry, and which now dangles below the knee of the soldier. It induces the inquiry whether the shorter bayonet was not more than enough to kill a man, and more strong for its purpose than the longer one. But a more serious question arose and still exists. Put men in file in a shelter-trench or standing two deep, and see if the muzzle of the present shortened rifle does not endanger the hand of the front-rank man. It has been said that with breechloaders only a single rank will ever be required, the fire will be so tremendous, &c. Independent of other considerations, surely those practically concerned in the defence of posts and trenches would prefer the fire from ranks two deep to that from a single rank, and of three deep or four deep to that of single rank, when it is possible to obtain it. And that there is a possibility of such heavy fire by additional ranks was proved at the French trenches at Spicheren and the Turkish trenches at Plevna. About half the length of the present bayonet is quite enough to kill a man, without the apparent wish at present to run two at a time through the body. The danger to a front-rank man in file is one easily seen, even in peace, by simply placing men in the position referred to, even without blank-cartridge; an experiment worth trying, which I have seen tried, and which may be the means of avoiding accidents. Men of 5 ft. 3 in. or 5 ft. 4 in. might be safe, men of 5 ft. 8 in. are not.—I am, &c., W. Codrington, General.

Eaton Square, May 21.

A testimonial is about to be presented to Capt. E. Walter, in recognition of his services as founder of the Corps of Commissionaires. From a mere squad of 13 men in 1859, this corps has swelled to a regiment of over 1,200 men. When, therefore, it was suggested two years ago that some mark of acknowledgment should be made by the officers of the two services to Capt. Walter, the proposal met with general approval. A meeting, at which the Duke of Cambridge presided, was held, and a committee was formed with the object of raising subscriptions. The appeal was well responded to. A handsome candelabrum and chased plateau, designed and manufactured by Messrs. Hunt and Roskell, is to be presented to Capt. Walter in the theatre of the Royal United Service Institution on Saturday, June 14.

MILITARY SERVICE IN INDIA.

"A Long-Service Soldier" writes to us the following long letter which is, however, worth the space, and is entitled to careful perusal by those it most concerns:—

"Now that the British Army in India—the main factor in our grasp of the country (Mr. Bright and his following notwithstanding)—has become so unfavourably affected by the almost revolutionary reforms of late years that the Government has been forced into the essay to allure men to prolong their service in the country by the offer of the very handsome bounty of 120 rupees per man (£11 5s. in English money, at service computation), and so far with indifferent success, it may be of some interest to point out some of the causes that make service in India so distasteful, as it undoubtedly is, to the private soldier of the present era. Government has of late years expended large sums of money in various channels conducive to the comfort and well-being of its army in India; but that the service is thoroughly unpopular is evident from the fact that no more than 13 per cent., if so many, are availing themselves of what, from the stand-point of the soldier, should appear a very tempting bait. Last year, 50 rupees per man were tried, and found a failure. Now, 120 rupees produce little better result, and it is noticeable, by those who are in a position to know, that the men who are accepting the bounty are not, for the most part, the best and steadiest men. The fact is, that the large sums allotted by the Government for the indirect benefit of the soldier filter through such an army of officials, of all sorts and grades, and lose so much in the process, that they fail of satisfactory result. Our palatial barracks are 'jerry,' and are being continually repaired to keep them habitable; our barrack-room furniture is coarse, clumsy, and of the commonest material; locks, hinges, hasps, &c., of the worst and cheapest construction; and an amount, considerable in the aggregate, is mulcted monthly from the slender pay of the men to meet petty barrack repairs, which are mainly due to the inferior workmanship and material. Again, with regard to rations. The Government allowance is doubtless sufficient, even liberal; but it is a notorious fact that neither in quality or quantity does the soldier receive anything like fair value for the amount expended on his behalf. This is a source of constant grumbling and discontent, not of complaint,—the prudent soldier soon learns his place better than to complain; he can grumble, but if he is rash enough to commit himself to a formal complaint, he is a lost man. 'It is a far cry to Loch Awe,'—too far for Master Thomas Atkins. The cooking in India is simply filthy and abominable; the climate makes it impossible for the men to cook their own rations, and the natives who offer themselves for the work are of the most degraded class, and among the most thorough rogues and petty thieves in the country, which is saying a good deal. They steal largely of the rations, and so effectually destroy the meat (originally very inferior) in the cooking, that it would defy the digestion of an ostrich. They are filthy in their persons and habits, can all speak broken English, and if found fault with by the men, are most impertinent. Of course, the men are severely punished if they strike them, and the cooks take advantage of their knowledge of this fact to be as aggravating as they dare. I have seen one place himself, with contemptuous gesture, deliberately in front of a soldier, and say, 'Strike me, Sahib, strike me!' Of course, if 'sahib' took him at his word, he would go howling to the most convenient non-commissioned officer, and 'sahib' would go to the guard-room, and in due course have an interview with his commanding officer, which would cost him 1d. a day good-conduct pay, if he had such to lose, or (if a man who was often in trouble) would secure him a sojourn in cell for a change. The consequence of this state of things is that the steady, sober soldier expends most of his small pay in procuring something to eat which he can relish, and which is often not too good for him, but suffices to fill a vacuum. The man of opposite stamp goes to the canteen and gets drunk, if he can afford it; if not, gets as much drink as he can pay for. The soldier's pay is much smaller relatively than that of any class of European who come to India. It may be urged that he has little to do. True,—but he is most necessary, is exposed to a climate in which Europeans of all classes, he excepted, receive at least twice the pay (in many cases much more) his fellows receive at home, and must be able to undergo much physical exertion; otherwise he is useless. It is also much smaller than the soldier's pay at home—at least, in purchasing power—whether the articles purchased be necessaries of life, luxuries (they need hardly be considered in connection with private soldiers in India), amusements, or dissipation. Any man who has tried it knows that he can 'take more out of' a shilling in England than he can out of a rupee in India, and yet the soldier's pay is calculated at one rupee, 1s. 10½d.; and he, unlike all other white men in this country, receives not an extra cent on account of climate and expatriation. For years back the exchange rate has not exceeded 1s. 8d., and has very rarely reached it; how, then, can a rupee equal 1s. 10½d.? When I came out to India, about 13 years ago, a private soldier received in a 31-day month 14 rupees 8 annas 8 pie, and no Government deductions. Some time later, we were informed, with a flourish of trumpets, that the pay was increased to 16 rupees 8 annas 6 pie; so it was,—and 1 rupee 7 annas 3 pie a month were immediately deducted for 'grocery rations' (never heard of in India previously), leaving for the soldier 8 annas 7 pie a month more than he had before, not enough to procure him one half-pound of tobacco, a clay pipe, and a box of lucifers. Of course, we are told of the many advantages we have in addition to our pay. Our libraries, our recreation-rooms, our skittle and ball alleys, our cricket, our schools, our hospitals, our spare time, our pensions (now no more for most of us). We admit; but to a certain extent we support a good many of these ourselves, on the co-operative principle; and as a set-off, we are subject to the vagaries of numerous enthusiastic gentlemen with crotchets, are mollycoddled as no other class or condition of grown men are, have no private life as other men have, are treated as big children unable to control or guide ourselves; cannot walk out of our lines unless we are buttoned and belted to bursting-point, so that we may not offend the refined sensibilities of the dirty, semi-nude natives with whom we rub shoulders on our walks; cannot be permitted to get a glass of beer in any hotel or place of public entertainment,—in short, never have the bit out of our mouths, and have every thoughtless act or casual folly which does not square with Queen's Regulations and numerous subsidiary divisional, brigade, local, and regimental orders, scored to our debt, in records of character; and are continually told we should be brimful of self-respect, while we are treated as if it were out of the question that we could have any respect for either ourselves or our cloth. Civilians of no better class than ourselves will have none of us, and the natives regard us with as much hate as, and a little less fear than, they regard tigers and snakes. We are credited in their minds with the single negative virtue of personal courage, and that marred by a ferocious brutality and bumptiousness. This is what the system of 'severe restraint' entails on us, and is it wonderful, in the face of it, that the thoughtful, well-conducted soldier longs for the hour in which he can shake the dust of the country from off his feet, and that the more careless and reckless man takes every opportunity of justifying by his conduct the necessity of the restraints imposed on him,—human nature is so perverse? Of course, there are among us, as among people of higher pretensions and standing, incorrigible and worthless scoundrels; but our peculiar hardship is that our best are credited with the qualities of our very worst men, by Europeans and natives alike, and we are all alike branded with the 'mark of the beast.' A crying injustice to which the soldier is also subject over the length and breadth of the land is this pernicious system of forming mysterious 'regimental and bazaar funds' at his expense, by means of levying special taxes on all vendors of goods and necessaries of every sort within his lines. It might be supposed that his pay was small enough, without his being forced by this means to pay considerably more than other people for his necessaries. And he never knows what becomes of these funds either, nor does he derive any appreciable or known benefit from them, so that he is rather sceptical about them; indeed, except in the important fact that he indirectly pays this black-mail, the matter is no concern of his. When a man inquires from the vendor of goods why he cannot have them at current rates and of quality equal to that procurable outside cantonments, the answer invariably is,—'How can I do it, Sahib, and pay the quartermaster —— rupees for my pass every month?' There is no sorer point with the soldier than this; moreover, the impost differs very considerably in different regiments, being entirely left to the quartermasters, and regulated by their individual ideas, and its action forces the native vendors to adulterate to the fullest extent that they may appear to sell cheaply. This is surely of easy remedy. It cannot be a matter of much difficulty to start and foster into vigorous existence regimental co-operative stores, which would import direct from England all manner of goods useful to the men, and to the comparatively few families among them now, selling at the lowest remunerative prices articles of the best quality. This plan has already been tried in some regiments, and has been found to work well. Why not make it universal? Only the countenance of the military authorities is required for the trial, the requisite capital would soon be raised by the issue of shares, say, at 10 rupees, open to all men of a regiment; maximum number of shares to be allotted to one man, 20; management to be entirely in the shareholders' hands, subject, of course, to the control of the commanding officer; accounts to be systematically kept, carefully audited, and published for the information of all concerned; all sales to be strictly confined to the men of the regiment, for their *bonâ fide* use. Such institutions as above roughly outlined would be an inestimable boon to the British soldier in India. To popularise the service, let the purely military discipline be as strict as may be found advisable, but let the men be treated as decent and responsible men, and thereby encouraged to respect themselves and their cloth,—not as the semi-civilised product of a nation that boasts itself among the most cultivated on earth, objects of wonder and dread to alien and subject races. Let their superiors deal with them as with the citizens, not the serfs, of a great and free country; let them have the same social and civil rights and privileges as are accorded to other men; let such of them as are proved good men, and willing, re-engage for pensions; let their pay bear a fair ratio to that of other men of their class in India; and let them be protected from the army of parasites who now batten on them and wax fat. As army administration in India now touches the rank and file, no amount of bounty will induce the best men to remain in the ranks longer than they can help, and it must not be forgotten that the men who are yearly crowding to the Reserve from India exercise collectively an enormous and generally adverse influence on recruiting."

[We have printed this letter, long as it is, thinking that there are some points in it deserving consideration; but amongst them we certainly would include the frame of mind produced in some by the incidents of military service. Here is a man who has, according to his own account, been thirteen years in India, carrying on, we suppose, from regiment to regiment, who, nevertheless, apparently hates the country and all its ways, and is content with nothing, from the policy of Government down to the selling of beer in the bazaar. He objects, it would seem, to the payment of bounty to his own class. He considers the barrack-room furniture coarse, clumsy, and common; locks, hasps, and hinges of the cheapest construction. We should have thought, as he complains that deductions are made from his pay to meet barrack repairs, that the cheaper things that were to be replaced proved to be the better. Rations are liberal, but the soldier does not get value for what the Government pays; therefore he grumbles but will not complain. The poor fellow! Look at him! Obliged to put up with having his food cooked for him, instead of cooking it himself, and being obliged to put up with natives who, to add to their iniquities, can speak broken English! The men are not permitted to beat them without being punished! The soldiers spend their money in buying things which are not good for them, but which they can relish. His pay does not enable him to indulge as freely in amusements and dissipation as the private soldier's does in England at home! Then, again, soldiers are molly-coddled in their libraries, recreation rooms, skittle and ball alleys, cricket, and schools; have no private life, cannot walk out of the lines in elegant undress or mufti, or turn into an hotel or tavern for their beer. In the remarks about the regiment and bazaar funds there is some solid force, and we have reason to believe there is good foundation for the complaint respecting the octroi duty, so to speak, paid by the bazaar dealers to those who ought not to receive it. The suggestion respecting the introduction of regimental co-operative stores appears entitled to consideration; but it must be remembered that in India it would never do altogether to disgust the people, who insist on being considered natives of the country, and upon whom, after all, we must rely, even with the most perfect commissariat and transport, for the supplies necessary to enable us to carry on any field services.—Ed. *A. & N. G.*]

---

* It is stated that 7,000 men have re-engaged, which we do not regard as quite an indifferent success.—Ed. *A. & N. G.*

EXAMINATIONS FOR PROMOTION.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—No doubt you will receive other letters with reference to that of your correspondent, "Passed Over and Disgusted," but the real secret of all the dissatisfaction in the Army generally (excluding the Staff) is that the Regulations are framed entirely by Staff officers. I do not wish to deny in any way that Staff officers have proved themselved very efficient in their own line, but there are just as good fish in the sea as those that come out of it, and so there are just as good officers in a regiment as those that are serving away from it. Under the present system, if an officer has sufficient interest and has passed through the Staff College, he is perpetually employed on the Staff until he becomes lieutenant-colonel; then, according to the Musketry Regulations, if the rifle range is a long distance from quarters, he has to spend all his time superintending musketry as second-in-command. Surely this is not the best training for an officer commanding a regiment! If a regimental officer cannot be a good Staff officer without passing examinations at the Staff College, *vice versâ*, a Staff officer cannot be a good commanding officer without a good deal of experience of regimental duty. As to examinations for the rank of major, why have them at all? A major now only commands a company, and he qualified for that in his examination for captain's rank; but if we must have examinations, why not have them for the rank of lieutenant-colonel? Your correspondent does not sufficiently point out, I think, the absurdity of a captain who was lucky enough to be promoted major on July 1, 1881, on the increase of establishment, being allowed to pass only a trivial examination, whereas a captain who was promoted a short time after had to pass an examination which few colonels, or even generals, could pass without a good deal of cramming. The present examinations for promotion are not a fair test of the efficiency of officers. The confidential reports of commanding officers should go far more towards proving their qualification, than the mere fact of passing written examinations in military law, tactics, fortification, and topography. With regard to the law papers, questions are asked of lieutenants and captains that could not be answered by many generals without reference to books, and much less by colonels, who have hitherto been exempt from any of these examinations. In tactics, they are expected to know how to manœuvre divisions and army corps, an art which they would forget long before they ever hoped to have the command of either; in fortification, they are expected to know details and plan field-works which never would be entrusted to an Infantry officer on service; in topography, they all qualify for the Qrmr.-Gen.'s Department, if they pass. This last is no doubt a very important branch of an officer's education, for he may at any time be required to read a map of a country, and would find his knowledge of topography of great use. There are numerous cases of officers failing to pass these examinations who, if it had been put to the vote in the regiments and the commanding officers consulted, would have been safely returned as thoroughly qualified for the promotions thus denied them. Without trespassing much further on your space, let me ask,—What commanding officers would wish to destroy that *esprit de corps*, which seems to be the result of all the recent changes in the Army? Would they have abolished, as the General Order said, officers and serjeant-instructors in musketry? Thanks, however, to their representations, the appointment of serjeant-instructor is renewed from April 1. At that time the D.A.A.G.'s of Musketry took good care not to abolish themselves. What regimental officers would have framed the Allowance Regulations, in which the Staff and Departmental officers have all the "pickings" in the matters of quarters, fuel, &c., getting twice and three times as much as regimental officers of the same rank? What regimental officers, knowing the absurd weakness of battalions at home, could have framed the General Orders on military training, or could have invented that baneful system of the home battalion being constantly denuded to feed the foreign? The result is that no such thing as a Home Army exists, for it is simply a depôt, and when any large force is required for active service, the Reserve has to be called up to take the place of boys who must be left at home. It is well known that lately regiments proceeding on service have had to leave behind as many as 300 or 400 so-called men. Lord Wolseley, the other day, in an after-dinner speech, said boys, like port wine, improved by keeping; but does he keep them long enough? Does he consider six or seven years sufficient to ripen port? Though I maintain that the examinations for promotion are not a fair test, I beg to sign myself,— One who has Passed for Major.

Paymaster-serjeants who may be accepted as candidates for Staff clerkships cannot be allowed to remain with their corps when required for probation as military Staff clerks.

NOTES FROM ALDERSHOT.

[FROM OUR CORRESPONDENT.]

The companies which will commence their course of military training on June 1 were put through a course of instruction in field-works during the week by the Royal Engineers, in accordance with instructions from the Horse Guards.

The batteries were inspected during the week by Major-General Arbuthnot.

Friday was observed as a holiday, in consequence of the Military Tournament between the North and South Camps, which was a success in every respect. A sum of nearly £100 was expended in prizes. Those who have carried off the prizes at this meeting will compete at the Grand Tournament at Islington, in the third week in June.

The Eighth Grand Army Athletic Meeting will be held on July 2 and 3 next.

At a court of inquiry to report on the new valise equipment of the 3rd Battalion Rifle Brigade, skilled artificers from the Ordnance Store Department attended to give evidence. It is not improbable that the whole of this equipment will be condemned.

Captain A. B. Trew, Middlesex; Lieutenants J. T. Maclaine, Gloucestershire; J. E. C. Matthews and W. H. Ingram, Middlesex; H. L. W. Williams-Wynn, Montgomeryshire; H. Straker and M. Fenwick, Northumberland; J. H. Smith and H. Howard, Worcestershire; A. H. Meysey-Thompson, Yorkshire Hussars; E. G. Baxter, Fifeshire Light Horse Volunteers, join the Auxiliary Cavalry School on June 2.

The most successful Assembly dance of the season was held at the Officers' Club, yesterday (Friday).

The 1st Grenadier Guards, 650 officers and men, will arrive at Pirbright to-day (Saturday) from London, and there encamp for musketry and military training.

Scarlet fever at the Camp is abating.

The 57th Army Cooking Class has completed its six months' course of instruction, and returned to duty.

1st Class Veterinary-Surgeon F. Plomley, A.V.D., is posted to the Commissariat and Transport Corps.

Captain De Burgh, 1st Battalion, 17th Regiment, has joined the Garrison Class.

Lieutenant-Colonel W. Dring, Chief Paymaster, has leave of absence.

A detachment of the 22nd Middlesex R.V., with two Nordenfelt guns, will arrive at the Camp early in June, and be attached to a regiment in the 1st Brigade, for a short course of ball practice.

The Aldershot Tournament yesterday was a great success. There were a large number of entries in the officers' competitions. The winners were, sword *v.* sword (mounted), Ridingmaster Stevens, R.A.; fencing, Quartermaster McClisham, 21st Foot; singlestick, Lieutenant Talbot; tent-pegging, Lieutenant Sandbach; lemon-cutting, Ridingmaster Stevens; tilting at ring, Lieutenant Bond.

"INQUIRER" ANSWERED.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—The tombstones of Iona and the Western Isles of Scotland of our chiefs show the kilt, the Celtic helmet, the bare legs of these warriors of old, olden days. The kilt, as represented on these stones—carved in the fifteenth century, for the most part—is ample in make, having heavy folds not unlike the kilt of the German armoured knights of the fifteenth and sixteenth centuries. Some of these tombstones may be of earlier date than 1400, but most people learned in Celtic tombstone lore consider a large proportion date from the fifteenth century. On these tombs are engraved or hewn out the huge two-handed swords and the beautiful Celtic knots. If the Irish always wore the *truis* dress there would have been no need to pass an edict against excess and extravagance in the use of large quantities of cloth. Such edicts were passed in the sixteenth century. So much cloth as is named as often being used by the Irish could not possibly have been consumed in wearing only a jerkin and truis. The Irish must have worn the "fealdag," or unpleated kilt—the primitive dress of a primitive race, which was simply a large blanket wrapped round the person, with the ends gathered over the shoulder. Because breeches have been found in Irish mossy ground, that is no reason why the "fealdag" should not have been also largely worn. The kilt is represented on the stones of Nigg. Barbaric and rude though the sculpture is, the dress is unmistakeable. As to the age of this sculptured representation, it is difficult to judge. I refer "Inquirer" to Mr. Joseph Anderson, of the Antiquarian Museum, Edinburgh; Mr. Charles Stewart, of Killin, and Mr. Skene; to some ancient seals of Scottish Kings; and finally, to a work I am about to bring out, which touches on some of these points. It is a noteworthy fact that I have reason often enough to correspond with a person who saw a man who was taken prisoner by the King's troops at the battle of Culloden, and who in 1830 wore the dress he fought in at the battle. This fighting Jacobite wore a home-spun kilt, but wore a Stuart tartan jacket and a badger-head sporran. Many of Prince Charlie's men were clothed in shepherd-plaid kilts, a pattern also much worn in Spain; at least I have seen many samples in the South of Spain very much like what was turned out in Scotland and is still now largely in vogue. A little before the time of the battle it so happened a weaver invented a new process (which he kept secret some time), whereby he turned out large quantities of this shepherd-plaid tartan, and he was enabled, from the simplicity of pattern, to sell it cheap, and Prince Charlie's men bought considerable quantities of the same. Being simpler, it cost less than the clan colour or district tartans.

Coombe Hill Farm. ARCHIBALD CAMPBELL.

The Gazettes.

◆

TUESDAY EVENING.

ARMY.

WAR OFFICE, Pall Mall, May 20, 1884.

Royal Horse Guards—Lieut. E. George, Lord Skelmersdale, from the 3rd Batn. the King's Own (Royal Lancaster Regt.), to be Lieut., vice E. G. H. Atherley, promoted.

3rd Dragoon Guards—Lieut. C. S. Keith, from the South Staffordshire Regt., to be Lieut., vice W. E. Cairnes, who exchanges.

5th Dragoon Guards—Lieut. R. C. Newton, from half-pay, to be Lieut., vice the Hon. K. D. St. Lawrence, promoted.

Coldstream Guards—Lieut. F. W. Ramsden, from the 18th Hussars, to be Lieut., vice Lieut. and Capt. H. A. Wetherall, promoted.

Scots Guards—Capt. and Lieut.-Col. A. Broadwood has resigned the appointment of Regtl. Adjt. (April 30).

Line Battalions.

The Royal Scots (Lothian Regiment)—Lieut. V. G. Tippinge to be Capt., vice H. W. Tombs, retired (April 16).

The Queen's (Royal West Surrey Regiment)—Lieut. G. F. Pinkney to be Capt., vice C. A. Mott, seconded (March 10).

The Norfolk Regiment—Major A. H. Josselyn retires on retired pay, with the hon. rank of Lieut.-Col.; Lieut. J. L. Govan to be Capt., vice A. S. Vesey, retired (March 26).

The East Yorkshire Regiment—Capts. R. V. S. Riall to be Major, vice R. E. Allen, seconded for service on the Staff (May 1); D. Broughton to be Major, vice C. K. Brooke, retired (May 3); Lieuts. W. W. Ward to be Capt., vice G. C. K. P. Roupell, seconded (Jan. 25); C. F. Garnett to be Capt., vice D. Broughton (May 3); A. J. Richardson has been appointed a probationer for the Indian S.C. (March 10).

The Leicestershire Regiment—Major W. Lonsdale retires on retired pay.

The Royal Irish Regiment—Capt. A. S. Reynolds retires from the service, receiving a gratuity.

The Royal Scots Fusiliers—Lieut. J. C. Erck has been appointed a probationer for the Indian S.C. (March 5).

The Worcestershire Regiment—Lieut. A. J. Erskine to be Capt., in succession to Major G. W. F. Claremont, Adjt. 4th Batn. the Cameronians (Scottish Rifles) (Jan. 1).

The South Staffordshire Regiment—Lieuts. H. A. Raitt, Adjt., to be Capt., to complete establishment (Jan. 26); W. E. Cairnes, from the 3rd Dragoon Guards, to be Lieut., vice C. S. Keith, who exchanges; Qrmr.-Serjt. John Davis to be Qrmr., vice J. Pendery, posted to the 4th Batn.

The Oxfordshire Light Infantry—Lieut. H. R. L. Holden resigns his commission.

The Essex Regiment—Capt. T. E. Stephenson to be Major, vice E. P. Piggott, promoted (Nov. 27, 1883).

The Northamptonshire Regiment—Lieut. W. F. F. Fawcett to be Capt., vice G. F. Browne, seconded (March 25).

Princess Charlotte of Wales (Berkshire Regiment)—Capt. S. L. M. Remington to be Major, vice J. G. Ponsonby, seconded for service on the Staff (Feb. 2).

The Queen's Own (Royal West Kent Regiment)—The promotion to the rank of Capt. of Lieut. F. F. Johnson is antedated to Nov. 17, 1883, in succession to Major M. Wynyard, Adjt. 3rd and 4th Batns.; Lieuts. C. W. H. Evans to be Capt., vice F. F. Johnson, seconded for service as a Deputy-Assist.-Comy.-Gen. (Nov. 17, 1883); F. A. M. Arnold to be Capt., vice E. H. Carr, promoted (Feb. 13).

The King's (Shropshire Light Infantry)—Capt. I. W. T. S. Smythe has been seconded for service as a probationer for the Army Pay Department (May 11); Lieut. J. R. Campbell to be Capt., vice J. Spens, appointed Adjt.

The King's Royal Rifle Corps—Capts. E. H. Thurlow to be Major, vice J. N. Blackwood-Price, whose promotion has been cancelled; H. J. Edwardes to be Major, vice E. H. Thurlow, seconded for service as an Adjt. of Auxiliary Forces (both dated April 16); Lieuts. Sir G. T. Campbell, Bart., to be Capt., vice G. Astell, seconded (April 1); G. H. Shakerley, from the King's Own (Royal Lancaster Regt.), to be Lieut., vice W. Du V. Lysley, deceased (May 21); C. H. Fenwick, from the Duke of Cornwall's Light Infantry, to be Lieut., vice Sir G. T. Campbell, Bart.

The Durham Light Infantry—Capt. A. L. Woodland to be Major, vice C. Covey, deceased; Lieut. H. A. Cartwright to be Capt., vice A. L. Woodland (both dated March 23).

Princess Victoria's (Royal Irish Fusiliers)—Major H. L. Harvest has been placed on retired pay, with the hon. rank of Lieut.-Col. (May 14).

Princess Louise's (Argyll and Sutherland Highlanders)—Lieut. W. H. Middlemass to be Capt., vice A. Cameron, retired (April 23); Qrmr., with the hon. and relative rank of Capt., J. Gillies retires on retired pay, with the hon. rank of Major.

The Royal Dublin Fusiliers—Lieut.-Col. C. E. Glasse retires on half-pay.

1st West India Regiment—Lieut. J. F. W. Bredin to be Capt., vice J. R. H. Wilton, promoted (Jan. 29); Lieut. H. J. Thwaytes to be Capt., vice A. B. Ellis, promoted (Feb. 13).

Royal Malta Fencible Artillery—Lieut. (with local and temporary rank) A. Sant-Fournier to be Capt. (with local and temporary rank), vice W. Sciortino, deceased (March 25); Lieut. (with local and temporary rank) R. Casolani to be Capt. (with local and temporary rank), vice J. Speranza, seconded for service as Pymr. (April 1); Lieut. (with local and temporary rank) A. Gatt to be Capt. (with local and temporary rank), vice F. Gatt, promoted (April 16).

Ordnance Store Department—Lieuts. E. T. Stanley, the Devonshire Regt., to be Deputy-Assist.-Comy.-Gen. of Ordnance on probation, with the temporary rank of Capt. in the Army (Dec. 20, 1883); G. G. Elrington, the Dorsetshire Regt., to be Deputy-Assist.-Comy.-Gen. of Ordnance on probation, with the temporary rank of Capt. in the Army (Jan. 2).

Medical Department—Brig.-Surgs. C. M. Jessop has been placed on retired pay, with the hon. rank of Deputy-Surg.-Gen. (April 28); G. M. Slaughter to be Deputy-Surg.-Gen., vice J. Elkin, M.B., C.B., retired; Surgs.-Major H. Knaggs to be Brig.-Surg., vice G. M. Slaughter (both dated April 16); H. H. Burford is placed on retired pay.

Army Pay Department—Staff Pymr. and Hon. Major G. W. Smith has been placed on temporary half-pay, on account of ill-health (May 9); Pymr. and Hon. Capt. C. H. Sanford to have the hon. rank of Major (May 19).

Half-pay—Major G. W. Smith, from the King's (Shropshire L.I.), to be Lieut.-Col.

Memoranda.

Lieut.-Col. C. E. Glasse, half-pay, retires on retired pay, with the hon. rank of Col.

Hon. Lieut.-Col. J. J. N. Buchanan, late Major, half-pay, has been permitted to commute his retired pay (May 5).

Qrmr. J. Watson, Royal Hospital, Kilmainham, to have the hon. rank of Capt.

The under-mentioned Lieutenant-Colonels to be Colonels:—J. N. B. Hewett, Bengal S.C. (March 4); C. H. Grace, Madras S.C. (March 14); J. M. Straton, the Loyal North Lancashire Regt.; W. S. Richardson, C.B., the Duke of Cornwall's L.I. (both dated May 1); J. R. K. Tredennick, the Duke of Cambridge's Own (Middlesex Regt.) (May 8); and E. Birch, the Devonshire Regt. (May 19).

Indian Staff Corps.

The under-mentioned officers have been removed to the Unemployed Supernumerary List:—Cols. C. S. Elliot, Madras (April 14), and E. O. Leggatt, Madras.

Reserve of Officers.

Lieuts. G. W. Schofield resigns his commission; J. C. Fraser, 7th Middlesex R.V.C., to be Lieut.

INDIA OFFICE, May 20, 1884.

The Queen has approved of the following promotions among the officers of her Majesty's S.C. and Indian Military Forces:—

Bengal Staff Corps.

To be Majors:—Capts. J. F. J. Miller (March 1); G. F. Churchill and J. M. W. von Beverhoudt (both dated March 8); R. J. Waller and E. C. Elliston (both dated March 22).

To be Captains:—Lieuts. F. M. Rundall and B. Briscoe (both dated March 9); F. S. Gwatkin and G. B. Renny (both dated March 27).

Madras Staff Corps.

To be Lieutenant-Colonels:—Majors H. M. S. Magrath and E. H. Eyre (both dated March 4).

To be Majors:—Capts. C. B. Cooke (March 8), and V. L. Mathias (March 22).

Bombay Staff Corps.

To be Lieutenant-Colonel:—Major G. Simpson (March 11).

Brevet.

To be Colonels:—Lieut.-Cols. A. W. Macnaghten, Bombay Cavalry (March 4); B. R. Branfill, Bengal Cavalry (March 14); A. H. E. Campbell, Madras Cavalry (March 20).

The Queen has approved of the transfer of the under-mentioned officer to the Half-Pay List:—

Bengal Infantry—Major E. N. D. La Touche (May 19).

The Queen has also approved of the transfer of the under-mentioned officer from the Half-Pay to the Retired List:—

Bengal Staff Corps—Lieut. and Brevet Capt. C. C. Dyce (May 8).

(Where not otherwise stated, the foregoing commissions and announcements bear date May 21, and the current year must be understood.)

FRIDAY EVENING.

ARMY.

INDIA OFFICE, May 23, 1884.

The Queen has been graciously pleased to make the following appointments to the Most Exalted Order of the Star of India:—

To be a Knight Grand Commander:—His Highness Chama Rajendra Wadeir, Maharajah of Mysore.

To be a Companion:—Col. R. Murray, Bengal S.C., late Director-General of Telegraphs to the Government of India.

INDIA OFFICE, May 23, 1884.

The Queen has been graciously pleased to nominate and appoint—Capt. G. O'B. T. Carew (late Indian Navy), Deputy-Director of Indian Marine; Sheikh Shuruf-ud-din, Raees of Sheikhupur; Rai Bahadur Kanai Lal Dé; and Col. C. E. Stewart, Bengal S.C., employed on a special mission on the Perso-Afghan frontier, to be Companions of the Order of the Indian Empire.

WHITEHALL, May 22, 1884.

The Queen has been pleased to give and grant unto Lieut.-Col. G. C. Sartorius, Bombay S.C., her Royal licence and authority that he may accept and wear the Insignia of the Second Class of the Order of the Medjidieh, which his Highness the Khedive of Egypt, authorised by his Imperial Majesty the Sultan, has been pleased to confer upon him, in recognition of his services whilst actually and entirely employed by his Highness beyond her Majesty's dominions.

WHITEHALL, May 22, 1884.

The Queen has been pleased to give and grant unto Capt. and Brevet Major C. S. B. Parsons, R.A., her Royal licence and authority that he may accept and wear the Insignia of the Fourth Class of the Order of the Osmanieh, which his Highness the Khedive of Egypt, authorised by his Imperial Majesty the Sultan, has been pleased to confer upon him, in recognition of his services whilst actually and entirely employed by his Highness beyond her Majesty's dominions.

WAR OFFICE, Pall Mall, May 23, 1884.

Royal Artillery.

Lieut.-Col. and Col. M. M. Fitzgerald (late Bengal) has retired on a pension and annuity, with the hon. rank of Major-Gen. (April 27).

Major and Brevet Lieut.-Col. H. L. Ellaby retires upon retired pay, with the hon. rank of Col.

Capt. E. de V. du Boulay retires from the service, receiving a gratuity, with permission to retain his rank and wear the prescribed uniform.

Rdgmr., with the hon. and relative rank of Capt., E. Nugent retires upon retired pay, with the hon. rank of Major.

Lieuts. F. E. D. Acland to be Lieut. upon the Seconded List, for service as Second Assistant-Superintendent of Experiments at Shoeburyness (May 1); E. G. Nicolls to be Lieut. upon the Seconded List, for service with the Hyderabad Contingent (May 2).

The under-mentioned Majors to be Lieut.-Cols., supernumerary to the establishment:—Brevet Lieut.-Cols. A. Walker, upon the Seconded List, E. H. Dyke, A. Swinton, H. de G. Warter, P. B. Raikes, E. D. Elliott, F. W. Ward, G. A. Russell, M. W. Ommanney, J. A. Tillard, upon the Seconded List (all ten dated Jan. 1); Majors H. S. Clarke (Jan. 1), H. H. Murray (Jan. 16), T. J. C. A. Studdy (all thirteen late Bengal) (May 11); W. E. Lockhart, G. B. Macdonell, C. E. Reid, T. W. Roberts (all four late Madras); P. H. Greig (late Bengal); W. H. Sandham and M. C. Newall, Brevet Lieut.-Col. W. Ward, Major A. Chaldecott (all four late Bombay) (all nine dated Jan. 1).

The under-mentioned officers to be Majors:—Capt. and Adjt. J. C. Gillespie, vice Brevet Lieut.-Col. A. Swinton (late Bengal), promoted; Capt. F. Howard, upon the Seconded List; Majors G. H. Palmer, from half-pay, on the Seconded List; A. G. Walker, from half-pay, on the Seconded List; Capts. W. Hunter, on the Seconded List; J. T. Bury, on the Seconded List; Capt. and Brevet Lieut.-Col. G. T. Pretyman, on the Seconded List (all seven dated Jan. 1); Majors P. K. L. Beaver, from half-pay, vice Brevet Lieut.-Col. H. de G. Warter (late Bengal), promoted (dated Jan. 1), such antedate not to carry pay prior to May 24); N. Powlett, from half-pay, on the Seconded List; Capt. C. E. Brown, on the Seconded List; Major H. H. Costobadie, from half-pay, on the Seconded List; Capt. N. L. Walford, on the Seconded List (all four dated Jan. 1); Major J. D. Douglas, from half-pay, vice Brevet Lieut.-Col. P. B. Raikes (late Bengal), promoted (dated Jan. 1, such antedate not to carry pay prior to May 24); Capt. J. E. Josselyn, vice Brevet Lieut.-Col. E. D. Elliott (late Bengal), promoted (Jan. 1); Majors G. H. O'Malley, from half-pay, vice Brevet Lieut.-Col. F. W. Ward (late Bengal), promoted; D. W. Buckle, from half-pay, vice Brevet Lieut.-Col. M. W. Ommanney (late Bengal), promoted (both dated Jan. 1, such antedate not to carry pay prior to May 24); Capts. G. M. J. Moore, vice W. E. Lockhart (late Madras), promoted; J. J. Congdon, vice G. B. Macdonell (late Madras) promoted (both dated Jan. 1); R. de Marylski, on the Seconded List; R. W. Rainsford-Hannay, on the Seconded List; J. P. Uppleby, on the Seconded List; A. Radford, vice C. E. Reid (late Madras), promoted; Capt. and Brevet Major F. N. Innes, vice T. W. Roberts (late Madras), promoted; Capts. S. G. Smyth, vice W. H. Sandham (late Bombay), promoted (all six dated Jan. 9); H. G. Newcome, on the Seconded List; H. H. Crookenden, on the Seconded List; J. R. S. O. Hewitt, vice H. S. Clarke (late Bengal), promoted (all three dated Jan. 16); J. A. F. Nutt, vice M. C. Newall (late Bombay), promoted (March 1); A. B. Stopford, on the Seconded List; F. H. French, vice Brevet Lieut.-Col. W. Ward (late Bombay), promoted (both dated March 13); Majors H. A. Rigg, from half-pay, vice M. A. Chaldecott (late Bombay), promoted (dated March 18, such antedate not to carry pay prior to May 24); J. A. S. Colquhonn (late Bengal), from the Seconded List, vice H. H. Murray (late Bengal), promoted (March 23); T. H. Lloyd, from the Seconded List, vice T. J. C. A. Studdy (late Bengal), promoted (May 11).

The under-mentioned officers to be Captains:—Capt. J. W. Dunlop, from Supernumerary to the Establishment, vice J. C. Gillespie, promoted; Lieuts. G. F. A. Norton, vice J. E. Josselyn, promoted; T. H. E. Acton, vice G. M. J. Moore, promoted (all three dated Jan. 1); G. E. Giles, vice J. J. Congdon, promoted; R. L. Haines, vice A. Radford, promoted; H. P. Hickman, vice Brevet Major F. N. Innes, promoted (all three dated Jan. 9); A. H. P. Turner, on Seconded List; E. J. Garston, on Seconded List; W. S. Churchward, vice S. G. Smyth, promoted (all three dated Jan. 16); K. S. Dunsterville, on the Seconded List; C. E. Walker, vice J. R. S. O. Hewitt, promoted (both dated March 1); W. F. G. Moberly, vice J. A. F. Nutt, promoted (March 13); A. Tracey, vice F. H. French, promoted (March 18); and Capt. W. H. Newton, from the Seconded List, vice de C. Daniell, seconded for service on Staff (May 12).

In consequence of the foregoing, the promotions of the under-mentioned officers are antedated to Jan. 1:—Majors R. E. Mundy, W. A. Riall, A. Browne, E. Blaksley, J. P. Cundill, A. F. Fletcher, C. M. Smith, A. W. White, A. A. Newman, C. W. Kennaway, A. Broadfoot, J. M. Alves; Capts. R. E. Boothby, W. H. Darby, H. M. Aplin, W. F. L. Lindsay, R. A. Bannatine, H. C. Dunlop, J. O. Hodgson, E. R. A. Kerrison, Sir G. V. Thomas, Bart., W. F. King, C. M. T. Western, and J. W. Dunlop.

Coast Brigade—Lieut. H. Maples to be Capt., vice W. S. Sprent, retired (May 12).

MILITIA.

WAR OFFICE, Pall Mall, May 23, 1884.

Artillery.

2nd Brigade, Southern Division—Lieut. E. B. Bernard resigns his commission.

3rd Brigade, Scottish Division—William Scott, gent., to be Lieut. (May 8).

8th Brigade, North Irish Division—Capt. and Adjt. H. P. Russell, from the 2nd Brig. South Irish Division, R.A., to be Adjt., in succession to Major Sir C. Larcom, Bart., R.A., whose term of service as Adjt. has expired (May 1).

2nd Brigade, South Irish Division—Major H. A. Rigg, R.A., to be Adjt., in succession to Capt. and Adjt. H. P. Russell, transferred to the 8th Brig. North Irish Division, R.A. (May 1).

INFANTRY.

3rd Battalion, the Royal Scots (Lothian Regiment)—Charles Edward Murdoch, gent., to be Lieut.

3rd Battalion, the Royal Warwickshire Regiment—Herbert Radclyffe Vaughan, gent., to be Lieut.

4th Battalion, the Royal Fusiliers (City of London Regiment)—The under-mentioned Lieuts. resign their commissions:—A. N. Burr and V. Dunfee.

3rd and 4th Battalions, the King's (Liverpool Regiment)—Richard George Ireland Bolton, gent., to be Lieut.

4th Battalion, the Suffolk Regiment—Lieut. W. E. B. Ffolkes resigns his commission.

4th Battalion, the Princess of Wales's Own (Yorkshire Regiment)—Capt. H. Whaley resigns his commission.

3rd Battalion, the Lancashire Fusiliers—Capt. and Hon. Major T. Hale to be Major.

3rd Battalion, the Cheshire Regiment—Lieut. R. H. Coddington resigns his commission.

3rd Battalion, the Gloucestershire Regiment—Lieut. W. E. P. Burges to be Capt. (May 6).

3rd Battalion, the Border Regiment—Lieut. C. E. Prescott resigns his commission.

4th Battalion, the Border Regiment—The under-mentioned gentlemen to be Lieuts.:—George Algernon Draffen, Robert Thomas Harland, and William Melville Douglas.

3rd Battalion, the Sherwood Foresters (Derbyshire Regiment)—Arthur Basil Markham, gent., to be Lieut.

3rd and 4th Battalions, the Northamptonshire Regiment—Lord John Pakenham Cecil to be Lieut. (May 13).

4th Battalion, the King's (Shropshire Light Infantry)—Lieut.-Col. Comdt. and Hon. Col. J. Berington resigns his commission; also is permitted to retain his rank, and to wear the prescribed uniform on his retirement (May 5).

5th Battalion, the King's Royal Rifle Corps—Lieut. E. H. Thornhill to be Capt. (May 5); Lieut. C. E. S. Ball-Hughes resigns his commission.

3rd Battalion, the York and Lancaster Regiment—Capt. W. H. Thomas resigns his commission.

3rd Battalion, the Durham Light Infantry—Albert Charles Craig, gent., to be Lieut. (May 7).

3rd and 4th Battalions, the Highland Light Infantry—Lieut. E. Smallwood resigns his commission; Archibald Henry Mitford, gent., to be Lieut.

3rd Battalion, Princess Victoria's (Royal Irish Fusiliers)—Lieut. A. B. Reamsbottom resigns his commission.

5th Battalion, Princess Victoria's (Royal Irish Fusiliers)—Major and Hon. Lieut.-Col. R. Thomson to be Lieut.-Col. (April 16).

3rd Battalion, Princess Louise's (Argyll and Sutherland Highlanders)—Lieut. the Hon. R. H. F. Greville, from the 4th Batn. the East Surrey Regt., to be Lieut.

5th Battalion, the Rifle Brigade (the Prince Consort's Own)—Charles St. George Winn, gent., to be Lieut.

4th Battalion, the Prince of Wales's Leinster Regiment (Royal Canadians)—Lieut. G. W. Marsh resigns his commission.

4th Battalion, the Royal Munster Fusiliers—Lieut. J. G. Warren resigns his commission.

3rd Battalion, the Royal Dublin Fusiliers—Robert Andrews Falconer, gent., to be Lieut. (May 5).

YEOMANRY CAVALRY.

WAR OFFICE, PALL MALL, May 23, 1884.

Cheshire—William Roylance Court, gent., to be Lieut.

Hampshire—Major and Hon. Lieut.-Col. W. M. Powell resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the regt. on his retirement. Lieut. E. E. C. Wellesley to be Capt.

Royal East Kent—Capt. the Hon. W. P. Alexander, 2nd Dragoons, to be Adjt., vice Major M. C. S. Tynte, 4th Dragoon Guards, whose term of service as Adjt. has expired (June 1).

Duke of Lancaster's Own—Christopher Henry Gillibrand, gent., to be Lieut.

VOLUNTEERS.

WAR OFFICE, PALL MALL, May 24, 1884.

ARTILLERY.

3rd Durham—The under-mentioned gentlemen to be Lieuts:—Thomas Stephenson Downey and John McDowell.

1st Essex—Lieut. H. R. Oldfield resigns his commission.

1st Forfarshire—Capt. J. B. Webster resigns his commission.

2nd Lancashire—David Lockhart Chalmers, gent., to be Lieut.

4th Lancashire—Major H. Mapleson resigns his commission.

1st Midlothian (Midlothian Coast)—The under-mentioned officers resign their commissions:—Capts. G. C. Somervell and Lieut. A. Eden.

1st Norfolk—Major W. J. Foreman, the resignation of whose commission was notified in the *London Gazette* of Jan. 25, 1884, is permitted to retain his rank, and to wear the uniform of the corps on his retirement.

1st Worcester—Lieut. J. B. Taunton to be Capt.; Henry Webb, gent., to be Lieut.

1st North Riding of Yorkshire—Capt. A. C. Hill resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

ENGINEER.

1st Aberdeenshire—Capt. R. H. Anstice, 2nd Batn. the Border Regt., to be Adjt. (May 15).

2nd Lancashire—Capt. J. H. C. Coode, 2nd Batn. the Black Watch (Royal Highlanders), to be Adjt., in succession to Hon. Major P. Curry, placed on retired pay (May 31).

1st Newcastle-on-Tyne and Durham—Capt. J. Wilkinson resigns his commission.

RIFLE.

1st Volunteer Battalion, the Gordon Highlanders—Capt. A. Skene resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the battalion on his retirement.

1st Berwickshire—George Nisbet, gent., to be Lieut.

2nd Cambridgeshire (Cambridge University)—Albert Edward Scrivener, gent., to be Lieut. (supernumerary).

4th Cheshire—Capt. and Hon. Major W. Hyde to be Major; Lieut. E. Alcock resigns his commission. The under-mentioned gentlemen to be Lieuts.:—Thomas Fernley and John Herbert Alcock. Hon. Assist.-Surg. W. Bale to be Acting Surg.

1st Cinque Ports—Capt. W. D. W. Smyth resigns his commission.

1st Edinburgh (the Queen's City of Edinburgh Rifle Volunteer Brigade)—Capt. J. H. H. S. D. Hogarth, 2nd Batn. the King's Own Borderers, to be Adjt., in succession to Hon. Major D. P. Campbell, who is about to be placed on retired pay (June 2).

4th Volunteer Battalion, the Essex Regiment—Capt. G. C. Challen, from the 3rd Volunteer Batn., to be Capt.

1st Forfar (Dundee)—William Gibb, gent., to be Acting Surg.

2nd Forfar (Angus)—Capt. A. Dickson resigns his commission; Joseph Mather, gent., to be Lieut.

2nd Glamorgan—Lieut. J. A. Jones resigns his commission.

1st Isle of Man—Capt. J. Spittall is granted the hon. rank of Major.

1st Isle of Wight—Acting Surg. E. A. Rich to be Surg.

2nd Lanarkshire—Lieut. J. Anderson resigns his commission.

3rd Lanarkshire—Capt. and Hon. Major W. Mactear to be Major.

4th Lanarkshire (Glasgow 1st Northern)—Capt. W. R. Maxwell to be Major; Lieut. D. J. Smith to be Capt.

10th Lanarkshire (Glasgow Highland)—Robert Stewart Houston, gent., to be Lieut.

15th Lancashire—Lieut. W. Ireland resigns his commission.

17th Lancashire—Capt. W. Dixon resigns his commission.

20th Lancashire (2nd Manchester)—Lieut. H. Humphreys resigns his commission.

21st Lancashire—Lieut. T. Parr resigns his commission.

2nd London—The under-mentioned gentlemen to be Lieuts.:—Charles Topham Clements and Francis Henry Edward Livesay.

3rd London—Surg. C. J. Bennett, M.D., is granted the hon. rank of Surg.-Major.

6th Middlesex (St. George's)—Joel Davis, gent., to be Lieut.; Ernest Muirhead Little, gent., to be Acting Surg.

7th Middlesex (London Scottish)—Surg. W. L. Purves, M.D., resigns his commission.

14th Middlesex (Inns of Court)—Major C. R. Prideaux-Burne, 1st Batn. the Rifle Brigade (the Prince Consort's Own), to be Adjt., in succession to Hon. Major C. Borrer, who has retired on retired pay (May 1).

16th Middlesex (London Irish)—Charles Seymour Stevens, gent., to be Qrmr.

20th Middlesex (Artist's)—Willoughby Gaspard Weiss, gent., to be Lieut. (supernumerary).

21st Middlesex (the Finsbury)—Werner Herbert Veale, gent., to be Lieut. (supernumerary); Acting Chaplain the Rev. A. H. Stanton, M.A., resigns his appointment.

2nd Nottinghamshire—Acting Chaplain the Rev. G. E. Mason, M.A., resigns his appointment.

1st Oxfordshire (Oxford University)—Felix Lyde Ames, gent., to be Lieut.

1st Roxburgh and Selkirk (the Border)—Lieuts. T. B. Dove to be Capt., and J. Gibson, from 1st Volunteer Batn. the Gordon Highlanders, to be Lieut.

2nd Volunteer Battalion, the South Staffordshire Regiment)—Henry Nickols, gent., to be Lieut. (supernumerary).

5th Surrey—The under-mentioned gentlemen to be Lieuts.:—Edward Bennet Lawford and Harry Francis Giles.

1st Sussex—Lieut.-Col. H. Verrall (retired) is appointed Hon. Col. of the corps; Lieut. W. Stuckey to be Capt.

2nd Sussex—The Rev. Lloyd Batley Birkett, M.A., to be Acting Chaplain.

1st Sutherland (Highland)—Lieut. D. McDonald resigns his commission.

1st Tower Hamlets (the Tower Hamlets Rifle Volunteer Brigade)—William Clarke Gellibrand, gent., to be Lieut.; William Dakin Waterhouse, gent., to be Acting Surg.

1st Westmoreland—Robert Whinery Leeming, gent., to be Acting Surg.

1st Volunteer Battalion, the Princess of Wales's Own (Yorkshire Regiment)—Reginald Bell, Esq., late Capt. 4th Batn., to be Capt.

1st West Riding of Yorkshire—Capt. W. H. Hutchinson resigns his commission.

7th West Riding of Yorkshire (Leeds)—Lieuts. A. Ralph to be Capt.; W. T. Shaw resigns his commission.

(Where not otherwise specified, the foregoing commissions and announcements bear date May 24, and the current year must be understood.)

ROYAL MALTA FENCIBLE ARTILLERY.

The ceremony of presenting, trooping, and depositing at the Palace Armoury the colours of the Maltese Light Infantry to the Royal Malta Fencible Artillery, was performed on the 6th inst., in the presence of the Governor, who was attended by Major-Gen. Daniell and the Headquarter Staff. The sky was clouded, so that the blazing "May" sun was out of sight—a subject for congratulation. H.E. the General commanding addressed the regiment:—"Col. Portelli, officers, and soldiers of the Royal Malta Fencible Artillery,—The history of the colours which I have on this day committed to you is well known to all of you. They were the colours of the ancient Regiment of Maltese Light Infantry, which was raised in 1800. These colours were borne by the Maltese Light Infantry when, after long taking part in the blockade, they finally met their reward by marching through its gates, victorious and triumphant, together with their British allies, for whose help they had applied in the hour of trial. In the course of time the designation of the Maltese Regiment has been changed more than once, until it became the Royal Malta Fencible Artillery, the gallant corps I am now addressing. As artillery you bear no colours; I feel, however, that I cannot do better than commit to you the task of conveying to their last resting-place these memorials of the gallant deeds of your forefathers; since it has so recently been the good-fortune of many of you to prove that the Maltese troops are now—as of old—ever ready to fight side by side with their British comrades, not only in defence of their own loved island, but wherever and whenever their Queen has occasion for their services. This is the last occasion on which I shall speak to the Royal Malta Fencible Artillery. I have, therefore, to bid them farewell. And in so doing, I have to acknowledge with regret that I have not been able to do all that I had desired to do for them before leaving Malta. I had hoped that before the close of my administration I should have seen the numbers in your ranks at least doubled. But circumstances have for the present prevented my hopes from being realised. I have the satisfaction, however, to know that the expediency of my recommendations have been recognised by those who have the power to carry them into effect. I trust, therefore, that I have sown good seed, and that I may yet hear that the Royal Malta Fencible Artillery have been raised to the strength to which your efficiency, your discipline, your good services, and, above all, your steady and loyal attachment to the British Crown, appear to render so desirable." We wonder there was no special reference made to the good service done at Mex and elsewhere during the Egyptian Campaign, when the then Major Portelli was supporting Lord Charles Beresford in covering the flanks of the Army of Alexandria from the swarming Bedouins.

SOUDAN TACTICS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—With reference to remarks on the formation of Brigades at El Teb and Tamai, and the charge of the front face of the square of the Second Brigade in the last-mentioned battle, I must say I can see no reason why Brigades should not rapidly alter from defensive to offensive formations. The flank faces might have prolonged the line and joined in the charge, leaving the rear face in reserve. In such a case, it would be the several commanding officers who would direct their corps to conform to the forward movement; and this, in case of the side faces of a square, is quite simple, only requiring a change of front by wheeling companies. A great essential at the present time is ready resource, with quick adaptation of formation, aggressive and defensive, in battle. Mind, I am not advocating the cause of regiments or Generals in the Soudan campaign, but taking the matter as a general question on tactics. Whilst on the subject of tactics, I may, however, suggest our extended order formation, both in skirmishing and for attack, should be based on the principle of ranks in lines, front rank the attacking or firing line at commencement, the rear rank in support, and the section formation in all.—I am, &c.,

A FRIEND.

◆

The ROYAL ITALIAN OPERA has had its arrangements disturbed by the indisposition of some of the prominent members of the company. Madame Pauline Lucca, unable to sing at the Floral Hall concert on Saturday, had not sufficiently recovered to appear in "The Huguenots" on Monday night, and accordingly "La Traviata" was substituted, with Madame Sembrich as Violetta. On Tuesday evening "Mefistofele" was repeated, Madame Albani appearing as Marguerite and Helen, Signor Novara as the arch-tempter, and Signor Marconi as Faust. On Thursday "The Huguenots" had Madame Maria Durand and Madame Scalchi included in the cast. "Le Nozze di Figaro" is to be represented this evening (Saturday), with Madame Albani, and "Carmen" is announced for Monday, first time this season, Madame Pauline Lucca being the heroine. Twelve performances of German opera, under the direction of Herr Hermann Franke, will be given during June and July.

At the LYCEUM, Mr. Lawrence Barrett terminates his season on Friday next, May 30, when the popular American actor will make his farewell appearance as Yorick in Mr. O. Howell's tragedy of "Yorick's Love." In the meantime "Richelieu" will be repeated.

The GAIETY is now closed till the second week in June, when the season of French plays will begin with "Nitouche," supported by Madame Judic. The theatre is now undergoing a complete process of renovation.

Transferred to the GLOBE THEATRE, the farcical comedy of "The Private Secretary" is attracting good houses and creating much laughter. Mr. C. H. Hawtrey, the adapter of the German play, here impersonates the audacious Douglas Cattermole, and Mr. W. S. Penley illustrates with comical effect the woes and wrongs of the persecuted curate. Mr. W. J. Hill is once more happily placed as the senior Cattermole, Mr. Julian Cross figures as a lively representative of Sydney Gibson, the Bond-Street tailor, and the other parts are satisfactorily filled. The piece, now reduced to three acts, has been much improved by compression.

The revival of the late Mr. H. J. Byron's diverting comedy of "The Upper Crust," originally produced at TOOLE'S THEATRE in March, 1880, when the house was designated the "Folly," enables Mr. J. L. Toole to recover possession of one of his most amusing comic characters. A cordial greeting from a numerous audience welcomed the reappearance of the famous soap-boiler, Barnaby Doublechick, whose eccentricities were associated with so many merry memories, and the popular comedian seemed to have even improved on his earlier admirable embodiment.

At the CRITERION, Mr. Charles Wyndham preserves the brightness of his programme by reviving the absurdly improbable but exceedingly funny farcical comedy of "Fourteen Days," first produced here in March, 1882. The brisk dialogue with which Mr. H. J. Byron embellished his adaptation of "Le Voyage d'Agrément" is again vivaciously rendered by Mr. Charles Wyndham and his company. The only notable change in the cast is the substitution of Mr. Astley for Mr. Herbert Standing, as the amorous governor of the prison.

The PRINCE'S THEATRE has acquired a very impressive drama in "Called Back," prepared for the stage by Mr. Comyns Carr and Mr. Hugh Conway, the author of the popular story bearing the same title. Some alterations have been made in the incidents, and some fresh characters have been introduced; but the strength of the narrative is preserved in the striking situations of the play. Produced on Tuesday evening before a very representative audience, the earnest and sustained attention commanded through a prologue and three acts, involving many intervening tableaux, may be accepted as an undoubted proof of the intensity of the interest created. Prominent in the representation is the admirable embodiment by Mr. Beerbohm Tree of the political spy, Paolo Macari, and Miss Lingard as the heroine plays with greater force than the actress has hitherto exhibited. Mr. Kyrle Bellew is the blind-stricken Gilbert Vaughan, Mr. G. W. Anson the mysterious Dr. Ceneri, and Miss Tilbury and Mr. H. J. Lethcourt pleasantly fill the parts of Mary Vaughan and the young surgeon, Arthur Kenyon. The drama, carefully placed on the stage, promises to turn the fortunes of the management in a right direction.

Mr. Watts Phillips's long-neglected drama of "Amos Clark," first brought out at the Queen's Theatre, Long Acre, in October, 1872, and dealing with a domestic story connected with the Monmouth rebellion, has been revived at the HOLBORN THEATRE, where Mr. George Rignold plays his original character with all his old picturesque vigour.

At the EMPIRE THEATRE, Leicester Square, Signorina Bessone, announced as the principal danseuse from La Scala, Milan, and San Carlo, Naples, has appeared in the elaborately embellished operatic spectacle of "Chilpéric." Her capabilities are exhibited in the Spanish ballet of the second act, and her graceful movements and singular strength of limb are displayed in some astonishing pirouettes and bounding flights over the stage.

The Committee, consisting of four colonels, Royal Artillery, Professor Abel, and Major Booth, appointed to inquire into the cause of the explosion at Priddy's Hard Gunpowder Magazine, at which several lives were lost, have recommended that no more Artillerymen shall be employed in the laboratories, and that ammunition shall be no longer stored in the Gun Wharf at Portsmouth. It is proposed to construct a series of sheds for shell-filling purposes, only two men working in each.

The Army and Navy Gazette *can be obtained in Paris of our Agent,* Mr. J. W. S. NEAL, *English Stationer,* 248 *Rue de Rivoli, to whom Advertisements and Orders for the Paper may be sent.*

ALTHOUGH Sir Bartle Frere, whose death we have to deplore this week, was not a soldier by profession, he was of an essentially military spirit, admiring the profession of the soldier, and full of sympathy for the calling on which he knew so much of the greatness and power of the Empire that he loved so well greatly depended. Even the bitterest enemy of the great administrator and statesman whose death is mourned in England by all who knew him, and all over the world by those who were brought in contact with him, or who were ever in a position to judge of his admirable gifts, must have felt regret at the news of the death of so bright an example of honour, so great a master in the art of ruling, so ardent a patriot, as Sir Bartle Frere. All the papers are full of his praises now he is no more; and it is a curious illustration of the irony of what is called fate, in its dealings with the actions of men and Ministers, that the biographical article in the leading journal of yesterday, which offers some excuses for the neglect and obscurity which were allowed to cloud the latter days of Sir Bartle Frere's great career, had in parallel columns to its leader a dissertation upon the troubles in Zululand, which certainly would not have been heard of had not the pitiable and calamitous defeat, caused by the astounding incompetence of the instrument he employed, dealt a death-blow to the scheme of Imperial policy and to the dream of a South African Empire which were cherished by the Governor and Commander-in-Chief of the Cape. Well may the *Times* remark that "had he been less adventurous, and had he even been more fortunate in the instruments who were to carry out his policy, it would have been only natural that on his return from South Africa his long and honoured career should be crowned with a peerage." What he actually received we all know; for Sir Bartle Frere was of too high a temper and too pure in spirit to crouch to any statesman in order to attain any object on earth; and it may be that some of the contumelious indifference to which he was exposed on his return from the Cape was due to the dispatch in which he called upon her Majesty's Secretary of State for the Colonies to defend him against the unjust aspersions of Mr. Gladstone, then in the full swing of his oratorical crusade in Midlothian. That dispatch was never published, nor, as far as we are aware, ever printed amongst the papers relating to South Africa presented at the time to Parliament; but Sir Bartle Frere incorporated a considerable portion of the arguments and statements he adduced in his defence against the attack made on a public servant then in office by one who had been a Minister, and who, as it turned out, was soon to become one again. Had Sir Bartle Frere lived at the end of the last century, he would undoubtedly have made a name as great in the annals of India and of Anglo-Indian history as that of any of the foremost statesmen and soldiers who founded the Empire of the Queen; for his conceptions were magnificent, his execution of his ideas prompt and complete, his courage and resolution unbending, and he possessed almost to a fault the attributes of the diplomatist, leavened somewhat, in his long experience of the art, by the smoothness and insinuating graces of Oriental Courts. He, however, was too great for this age. Why, the man dreamed of wars! invasions! aggressions! He actually had projects of extending the Empire, founding new confederations of British-speaking races, and of subjecting larger spaces in the world to their rule and government! He spent money on palaces, and was profuse in public works. Few Ministers could have sympathy nowadays with such a man. He was a master in the art of government, and those who affected to rule him were soon made aware that they were led by a will and force greater than their own; but when the sword which he used to strike at what all must admit to have been a great and growing menace, broke in his hand, on him fell all the responsibility and shame of defeat, and the odium of an unhappy war; and Tories and Whigs and Liberals were in league with each other in their anxiety to disavow their association with him, or responsibility for his acts. Throughout the whole of his admirable administration of his Indian province, at the time when the great revolt which was shaking the foundations of our power,—nay, the very appearance and traces of its existence,—in India, Sir Bartle Frere maintained profound tranquillity amongst the dangerous and warlike race he governed in the North-West, and stiffened, by his counsels, the timid action which at one time threatened to frustrate all the attempts of soldiers and statesmen to save the Indian Empire. It is remarkable enough that in the reviews of his life in the papers, we have observed no allusion made to a very striking incident in Sir Bartle Frere's life. The troubles which afflict Egypt and England alike at the present moment may be said to have assumed shape and substance in 1875, when the Cave mission first brought the English Government into direct contact with the necessities of the Khedive, and led into the field over which had ranged so freely the usurers and money-lenders of Europe and the Government of Cairo the potent influence of British finance, Sir Bartle Frere,—who was, as may be remembered, chosen to act as adviser and quasi-Minister of the Prince of Wales on his Royal Highness's visit to India—was consulted by the Khedive Ismail one night, after dinner, at Cairo, as to the propriety of applying to the English Government for the help of some experienced clerk in the Treasury, or some similar officer, to investigate the real state of Egypt, so as to establish perfect confidence in her resources; and the idea is said to have been suggested by Sir Bartle Frere in a conversation with Ismail Pasha. We all know what followed. The Khedive asked for bread, and we gave him, if not a serpent, something almost as dangerous — an ex-Minister with a turn for finance and habits of investigation. Thenceforward may be traced, in growing mischievousness, the interference of the European Powers with the internal administration of the country, in the interests of the various classes in the capitals of Europe who had lent money to the Khedive, the result of which we see in every day's paper at the present time. In no part of his varied life did Sir Bartle Frere display more tact than in the apparently easy office he filled during the Prince of Wales's tour; for there were constantly cropping up dangers to be avoided, interests to be conciliated, and the most made of limited opportunities in the way of deriving substantial results from that remarkable expedition. If he were at all a man to derive satisfaction out of the troubles and complications which followed on the neglect or non-execution of his counsels, he might have rejoiced at the present precipitate action of our Government in taking measures to avert from our frontiers the danger with which India is threatened by the advances of Russia; or in the agitation and confusion arising out of the contests and rivalries of the Dutch, the English, the Kaffirs, and the Basutos, in the south of the great continent which he intended to have ruled under the flag of England. We do not believe that there is any one who knew what a man he was but will admit that Sir Bartle Frere was indeed a "brilliant example of the courageous and devoted men" who founded and maintained our Empire, and an illustrious son of the country that permitted him to sink almost into oblivion ere he passed away, surrounded by the love and affection of the widest circle of friends, amongst all who are worthy, anyone ever possessed.

THE "History of the C Battery, A Brigade (late C Troop), Royal Horse Artillery," by Colonel F. A. Whinyates, which has just been published by Messrs. Allen, of Waterloo Place, is a very admirable and interesting account of the services and fortunes of a distinguished component of the great regiment which, alone remains an integer "in the wreck of matter and crash of worlds" in our military system. Under the title of "From Coruña to Sebastopol," the author has collected from every accessible source of information any facts which could be brought to bear upon the subject of his treatise; and he may be congratulated on having well achieved his aim, which was, he tells us, to produce "a trustworthy as well as an interesting work," every statement in which rests on a sound and authentic basis. We may pass over the account of the early composition of artillery trains, and the *résumé* of the duties of artillery officers and men, with the remark that it is exceedingly well put together, very clear, and very useful; nor need we dwell at length upon the early annals of the service of the Troop after its formation. But the account of the part taken by the battery in the Coruña campaign, founded on the diary of an officer, would furnish much food for meditation of a self-satisfied sort amongst those who now have to undergo the perils of the sea in well-found transports, if they compared the lot of their ancestors in arms with their own. Take, for example, the voyage of the Troop to Portugal in 1809. On February 12, they embarked in six small craft of 200 tons each, so crowded with water and forage that the men could scarcely find room to sling their hammocks, or any place in which to put their kits and harness. It was four days ere the convoy sailed from Portsmouth for Lisbon; and when it had reached within three leagues of Mondego Bay a storm scattered the ships, disabling one of the six Troop transports, which drifted for fourteen days an ungovernable wreck, with masts by the board, boats stove in, fire breaking out in the hay, in imminent danger of foundering. This portion of the Troop was no less than ninety-four days proceeding from Portsmouth to Lisbon! In the expedition to the Crimea little better luck attended them. The transport which took them from Varna to Old Fort had been used previously to carry Turkish troops, and was alive with vermin, which fastened on to the soldiers and their clothing, and could not be got rid of for many months. The account of the landing, the affair on the Bolganak, and the advance on the Alma, is exceedingly graphic; and any old soldiers who remember the day might well refresh their memories by reading the clearly-written and exact detail of that first victory, of which the consequences might have been so supreme. Here is a little bit:—"Lord Raglan now began to take frequent observations with his field-glass, and as he had but one arm, it was necessary to pull up his horse for this purpose; and his bugler used to sound the 'halt' for the Army, and after a time the 'advance,' and so on. During one of these halts the colours of the English Army were uncased, and the men prepared to load, and there was a mighty ringing of ramrods. The French began to march considerably in advance of us on the right front. The English Army was now drawing nearer to them. One division of the French bore still further away to the right front, nearer the sea." Our allies are previously described as having moved forward with their colours uncased, the gold eagles glittering on the tops of the standards. When the Rifle Brigade skirmishers had got up near the village, from which the hills occupied by the Russians in rear were plainly visible, crested with long lines of the enemy, the Russian riflemen opened fire from the vineyards. Lord Raglan's bugler now sounded a halt, and Sir George Brown said, "What the devil are we halting for now?" Lord Raglan appears to have finally made up his mind as to the way in which he would attack, for the bugle quickly sounded the advance. The first gun was now fired at the British Army; then a second, the shot coming right over the troop; and Brandling remarked their guns were long ranging. The "halt" was again sounded, and then the whole Russian cannonade began. This battle was unlike the others which followed, inasmuch as it was begun as if at a review, there being perfect silence until the final instructions to attack were issued. In such a notice we can only take up salient points; but we cannot refrain from mentioning an incident when the C Troop had got up to the village wall, and opened upon the Russians. "The Rifles," he said, "had now got quite to the loose stone wall,—in fact, No. 6-gun was in amongst them; but Major Norcott, in charge of their left wing, and then close up, called out to them, 'Rush at it and get over it!' And they did it, helping each other up." This officer, it may be remembered, was mentioned in despatches by Lord Raglan as having "shown himself to be a promising officer of light troops." He has survived to experience the great mortification which, borne with dignity, cannot but be severe, of finding himself passed over by those who were not then so conspicuous in action:—

> "As to our infantry, the sight they presented this day could never be forgotten by those who were privileged to witness it. They moved out of bivouac soon after it was light; there was little time for cooking, and precious little food to cook, and no wood even for that. They then hung about for many hours round their piled arms, becoming both thirsty and hungry; but there was no grumbling, and if any were seen going to a doctor, there was unmistakeable illness and exhaustion in their faces. When they afterwards 'stood to arms,' they appeared quite light-hearted. The old type of infantry serjeant was there sharp to his work; and when all moved off, as they well knew, to confront the enemy, the ground was clear, and no stray articles of equipment left on it to denote slovenliness or slackness of discipline. The Divisional-General even was without a tent; the Hospital, Commissariat, comforts, and followers were almost a myth; and but very little of that sort of thing was to be seen; not that these departments broke down, as some seem to think. It was simply that, through the penuriousness of the powers at home, they had not organised them up to anything like the required standard. A man riding on the left of 'C' Troop, and looking down the companies of the Light Division, would see that the young soldiers were in the minority as to numbers, but there they were the long-service men and ten years men together, trustworthy and uncomplaining, with plenty of stamina in them, notwithstanding all the sickness they had gone through, and cholera and other evils still amongst them. One cannot help remembering the poor quality of their clothing, so inferior to that now supplied, the cloth little better than a coarse flannel, the coatee hardly meeting the waistband of the trousers, so as to hide the under-garments, the high and tight collar, made to cover the high stock, the tight sleeves, the heavy chaco and heavy belts, no leggings, and a rifle in their hand they knew little, if anything, about, because it had not long been issued to them. After ascending to the level ground beyond the Bulganak, they saw the villages far ahead were being set on fire, and when objects got clearer, beyond the burning villages through which they saw they would have to fight, were the solid shining columns of the enemy as they stood up fresh from their camps, the darker-coloured patches of ground suggestive of earth batteries, and the mighty mass of cavalry with gleaming sabres farther inland, all conveying forcibly to the mind that a stern struggle was at hand. Subsequently, when under fire, they made their deployments and advanced as if at a review—no halting or wavering, but onward, onward, persistently forcing the Russians back uphill. The rest is matter of history, but a real lover of the profession would wish the country might always have line infantry of a like quality available to march against a foe. Amongst the theories that are now started as to the right sort of man for a soldier, it seems to be forgotten, what is nevertheless the fact, that many of these good old veterans, having gone through the battles and the siege, were amongst the first to volunteer for the leading storming party against the Redan, though in so volunteering they could have expected nothing further than the credit that their company officers and comrades would accord them. Many of them were slain in the embrasures and ditches of that work. Poor fellows, they little thought it would be said of them for their long service, by some who had not been in the Crimean battles, that 'they had totally disappeared in a few months under the walls of Sevastopol.' We may ask how could men have possibly done better under the circumstances? They freely gave health and life, and the question to be considered is, could or would younger men have stood up so long?"

It cannot be objected to a memoir of this sort that there are too many details, for details are the very essence of a narrative of the kind, and the reader feels that every fact in the narrative can be relied upon. There are graphic bits throughout the book of which we hope to give a further notice presently.

The Duke of Edinburgh will rehoist his flag in the *Minotaur* on June 3. The Squadron proceeds to sea the day following for Bantry Bay, where there will be torpedo drill for a month. The Squadron will rendezvous off Portland early in July, prior to its summer cruise.

Lieutenant Arthur C. Middlemass, R.N. (1875), who has served as Transport officer in Egypt since the commencement of the campaign in 1882, has been placed on half-pay for a period of five years, with permission to accept the appointment of Chief Inspector of the Egyptian Coastguard. This position was formerly held by the late Morice Bey, whose death, while gallantly attempting to hold the rebels in check at Baker Pasha's defeat at Teb, is fresh on the minds of most of us. Lieutenant Middlemass takes up his new appointment on June 1.

A formidable cruiser, called the *Milan*, has just been launched at St. Nazaire for the account of the French Government, which, as a rule, builds all its own ships. The *Milan* is thus described:—She is built of steel, has two screws; her lines are new and bold, furnished with Belleville boilers, and ought to accomplish 18 knots. Her plans are due to M. Bertin, Naval engineer. Her dimensions are:—Length, 93 mètres; breadth, 10 mètres; draught, 3 mètres 90; displacement, 1,550 tons. The machines, constructed on the Loire, ought to give the enormous force of 4,000 horse-power. The armament of the *Milan* will consist of five 10-centimètre guns, eight machine-guns, and several torpedo-tubes. The speed and armament of this ship will make her a formidable cruiser in time of war, for she will be able to give chase to most of the packet-boats now afloat. The same yard which has just launched the *Milan* recently furnished the Government with some gunboats, which could be taken to pieces, for Tonquin; and it has now two large transports in hand, also for the Government, the *Magellan* and the *Caledonien*.

Viscount Sidmouth is to be congratulated on having elicited from the First Lord of the Admiralty the assurance that the "eleven years' rule," so much complained of by the Accountant and Engineer branches of the Navy will be modified, provided this can be done without any serious expenditure of public money. Were the whole of the time served in the junior commissioned grade allowed to count, even then the expenditure of public money on account of the reform would not be "serious;" so we may hope soon to see some modification of the existing regulation introduced.

The Admiralty have ordered torpedo-boats to be ready to accompany the Channel and Reserve Squadrons during the summer cruise, with the view of testing their sea-going qualities. None of these boats are intended for the Nile. They are totally unsuited for constant work in a hot climate.

The Austrian manœuvres, under Admiral Sterneck, which will commence on June 1, promise to be unusually interesting, and the Emperor and Crown Prince, &c., are expected to be present at the exercises, amongst which the testing of different sorts of torpedoes will hold a prominent place. The squadron consists of the *Lissa*, *Prince Eugene*, *Emperor Maximilian*, *Tegethoff*, armoured; *Hapsburg* and *Ferdinand Max*, frigates; *Trieste*, despatch-boat; and seven torpedo-boats and a torpedo store-ship, and will be manned by 90 officers and 3,200 men.

Lieutenant Pugh, Divisional Officer of Coastguard, has been appointed Nautical Assessor, in the place of Lieutenant Godfrey, commanding officer of the Coastguard, Swansea.

A French paper, of May 29, says:—The day before yesterday, in the port of Brest, in presence of a considerable crowd, the launch of the fast cruiser, the *Sfax*, was accomplished. She is built of steel, has two screws, and was laid down in December, 1882. Her principal dimensions are as follows:—Length, 88·30 mètres; breadth, 15 mètres; draught, 7·66 mètres; displacement, 4,500 tons. The hull is entirely of steel, with a wooden casing and copper lining. The vital portions, engines, boilers, &c., are protected by a plating. The vessel is divided into a large number of water-tight compartments. Then between the plated deck and the gun-deck reigns a system of longitudinal and transversal water-tight compartments, which form a kind of large raft and render the vessel insubmersible. The armament of the *Sfax* is composed of six 16-centimètre, ten 14·centimètre guns, and machine-guns. The averaged speed is reckoned at 15 knots. The *Sfax* will be able to steam 11,486 kilomètres at the rate of 10 knots,—that is to say, she will be able to go from Brest to New York and back without stopping. The total cost of the *Sfax* is estimated at 5,000,000 fr., or £200,000.

The *Globe* labours under the common delusion that the men who were defeated in the actions with the Arabs on the coast were Egyptian soldiers. The levies commanded by Moncrieff and Baker were riff-raff, undrilled and undisciplined, quite different from the soldiery under Wood and his officers in the regular Egyptian army. Colonel Duncan has been at the trouble of writing all the way from Assouan to point out the "mistake," which is, we suspect, not always made in ignorance.

Lieutenant E. L. Wright, Bengal S.C., receives the appointment of A.D.C. to Major-General T. Wright, commanding the Sirhind Division, Bengal Army.

It has been decided that the preclusion of an officer from selection for the Royal Horse Artillery, owing to his seniority in the grade in which he may happen to be a candidate, does not prejudice his claim to consideration for appointment to that branch in a higher grade of an application.

The *Daily News* is ahead of the London papers in the Abyssinian business, and has telegrams from its special correspondent with Sir W. Hewett, dated Adowa, May 13 and May 18, in the first of which it is stated that the King's son has arrived, but that his Majesty is "waiting till the Greek [we had nearly written 'Kalends'] Consul comes;" (!) and in the second, that "the Mission will probably be a success," as to which, however, we entertain doubts, as the King is said to be disappointed respecting Massowah. Any way, nothing can be done for two months on account of rains. Ras Aloula, the sanguinary Abyssinian General, is evidently burning to be let loose on Khartoum and the Soudan, and will promise anything. But will he return? We doubt that, too.

General Sir Lintorn Simmons, accompanied by Lady and Miss Simmons, will leave London on the 16th proximo for Malta, to take up the govenorship of that colony. Lieutenant Pemberton, R.E., A.D.C., will precede the General by one week to make the necessary arrangements.

A correspondent of the *Times* says:—

> "A letter from a Greek correspondent at Smyrna informs me that the flag of a Greek man-of-war, the *Miasoulis*, has, for the first time, been unfurled in that port. The enthusiasm aroused was intense; the whole Greek population turning out, cheered all over the town, and cried out again and again, 'Long live the King of the Greeks.' My correspondent adds, with perhaps pardonable hyperbole, 'Never was so great a cry heard in these parts since the days when the people shouted in the sister-city "Great is Diana of the Ephesians."' Since the rule of the unfortunate Midhat (who restored order and security there as in Syria), it has been somewhat risky to take ever so little a ramble outside the walls of Smyrna; and well may the people sigh for a change of rulers, and cheer that flag to which they fondly look for protection at some future day."

Now, this is really cool on the part of a gentleman who would be very sorry indeed, we think, to move outside the walls of some towns under "the rule of King George" for a ramble, unless he had plenty of money to pay his ransom, and who must know that the brigands who infested the vicinity of Smyrna were Greeks to a man. Smyrna never was under the rule of any King of Greece. We always thought Midhat was a Turk. Suppose a United States frigate came to Queenstown, Mr. Abram, and was "received with enthusiasm" by the mob, what would you say?

That Captain White has written a successful sequel to his brochure on the state of the service* in "*The Army and the Public*," is proved by the issue of three editions in a very short time, and in the demand for further supplies of the pamphlet. If "the patriotic" to whom the writer appeals are moved to reflect on the statements he makes, some good may be done, although we do not believe that Captain White's strenuous and earnest efforts will secure a military administration for the Army, or overthrow the system of government according to which civilians direct the Navy and the Army and all the forces of the Crown. We have for years past from time to time protested against the tendency which has acquired strength at each stage of its development to turn the Queen's Army into an army of the Parliament—that is, of the House of Commons. The very first articles in this paper, when it was started many years ago, were written in that sense, but we must admit that "the will of the sovereign people," as embodied in Liberal statesmen, has proved too strong to be withstood, and we fear that Captain White's appeal will not awaken the dead. If he succeeds and rouses the country to investigate the real state of the Army, he will earn the gratitude of the nation, and even if he fails he will have the satisfaction of knowing that he has discharged his conscience and liberated his mind in a praiseworthy attempt to dispel our easy confidence in the efficiency of our military system. We hope, however, that the gloomy forebodings of Captain White at the close of his pamphlet may not be realised, and that the day when England will have to say good-bye to her greatness is *not*, as he "almost fears" it is, "within measurable distance."

---

* *Our Military Position: a Note of Warning.* London: Cousins and Co., York Street, W.C.

In a laborious inspired article on the discontent of the Army, the *Times* professed early this week to candidly discuss the grievance alleged to exist by the officers of the Army. The writer, who is evidently well acquainted with all the details of the settlement of the purchase question, and with the financial arrangements resulting from the abolition of the system in 1870, displays a lawyer-like ability in the use of pleas of confession and avoidance; but he has not, we think, succeeded "substantially" in making good his contention, or in convincing his readers that everything that has been done has been as nearly perfect as possible, and that any faults that may have arisen in the almost divinely inspired scheme are due to the incompetency of the Horse Guards, or in plain words, to the bungling and obstinacy of the Duke of Cambridge and his advisers. In the "Tale of a Tub," Peter insists upon it that a loaf of bread is a leg of mutton, and similarly the War-Office apologist declares that the boons conferred upon the officers of the Army are real, and that what they resolve upon considering, according to its appearance, taste, and so forth, as very middling bread, is in reality a prime and succulent joint of South Down.

It was stated by the French semi-official papers that the expeditionary force in Tonquin would at once be reduced by 6,000 men, who were to reach France by the end of the month. It now appears that the reduction will be made in a much more leisurely manner, and will certainly not be completed for several months to come. The native regiments must be first organised.

Among the new C.M.G.'s is Mr. George Baden-Powell, whose articles in *Fraser*, in 1878, on "Colonial Defences," will be remembered as strongly advocating the reference of that important question to a Royal Commission. They were the precursors of Lord Carnarvon's Commission. The whole question was fully summarised by him in a paper read before the Royal Colonial Institute in June, 1882, at a crowded meeting. The nine recommendations of that paper will, we doubt not, have been endorsed by the Royal Commission on Colonial Defences should their full report ever be made public. Our readers may like to be reminded of those nine recommendations :—

"1. The development of hosts of good rifle-shots all over the Empire. 2. The organisation of local artillery and torpedo and boat corps, kept up to the standard of progressive military science by officers trained in the big establishments of the Imperial Forces, and sent out on five-year appointments. 3. The establishing a series of six or seven arsenals, commanding the various positions of the empire, as bases for the fleet and centres of defence. 4. The posting at these arsenals of powerful ironclads, specially those that become out of date in European waters, though remaining amply strong enough to demolish all cruisers that can be brought against them in distant seas. 5. The establishing 15 or 20 garrisoned stations to supply coal and refuge, and munitions of war, to English ships in time of war. 6. The organisation of a special Imperial force to garrison these arsenals and stations, and to supply trained direction, and the best materials and ammunition for local artillery and torpedo defence. 7. Provision for local defence by localities. 8. Contribution of all, Mother-country and Colonies, to the support of the general defence of the communications, or on some such proportionate basis as trade or wealth. 9. Some application of the principle of delegation to the control of this Imperial force, and of the policy of which it would be the strong arm. Colonies might for the present delegate such control to the English Parliament, in the confident trust that that Parliament will see to it that Colonial interests do not suffer.

General de Berckeim, in laying down the command of the 4th Army Corps, issued a touching order of the day. Among other other things, he said :—"Thirty years ago I was at the battle of the Alma, the first great victory gained for a long time by the French army over an enemy worthy of it. In the evening our Commander-in-Chief, although smitten with a mortal disease, rode along the ranks, and was spontaneously cheered by the troops. Even the wounded rose to hail him. That day I understood the poetry of military glory, and envied the fate of that soldier bequeathing a victory to his country." It would have been more graceful not to have entirely ignored our presence.

We congratulate the leading journal on the change which has come over the spirit of its waking life in regard to Russian advances towards the North-West frontier of India and Afghanistan. Our great contemporary has buckled to the work, which it formerly denounced as a fitting trade of the Jingoes, with enthusiasm; but it is difficult for us to reconcile ourselves to this rapid change, and to the spirited adoption of what it calls the "temperate" policy of Sir Lepel Griffin. Surely that admirable young Indian administrator has not displayed either temper or taste in his declaration, in a paper intended for all the world, that "all Russians are liars!" What! Not even ten amongst 60 or 70 millions? Of far more consequence, however, than that expression of opinion is the declaration of Sir Lepel Griffin's opinion that Sepoys are as good as the Russian regulars, if it be shared by the Government. In that opinion we do not believe that any Anglo-Indian officer who has seen the two troops, and knows their comparative value, will agree for a moment. The outcome of the scare caused by the recent movements of the Russian diplomatists and generals southward from Merv probably will be that Herat will enjoy a charmed life for some time to come; while our railway is pushed forward to Quetta, and everything is in readiness to occupy the line of the Helmund, should it be considered needful in consequence of any dangerous indications of activity from the other side.

NOTES FROM ALDERSHOT.

[FROM OUR CORRESPONDENT.]

On Monday the Infantry were exercised in the Long Valley. Commanding officers have been authorised to grant leave to enable officers to attend the Derby, Oaks, and regimental dinners. The 5th Lancashire R.V.—20 officers and 400 non-commissioned officers and men —will arrive here from Liverpool to-day, for a week's drill with the 1st Brigade. Thirty-four officers and men of the 22nd Middlesex R.V., under the command of Captain R. H. Armit, with two Nordenfelt guns, will arrive here this (Saturday) afternoon for ball-firing practice, and be attached to the 3rd Brigade.

Detachments of the 7th and 21st Companies, R.E., are held in readiness to proceed to Egypt. Portions of the pontoon troop and telegraph battalion are being prepared for active service. A detachment will march to Chobham on Tuesday next to make arrangements for the camp.

The mounted competitions of the Tournament were contested on Thursday, in the presence of a large number of spectators. Major-General Fraser, referee.

A class for Veterinary-Surgeons will commence on Monday. Officers are permitted to attend (*vide* par. 215, Veterinary Regulations, 1882).

Ten officers and 221 non-commissioned officers and men of the 4th Royal Fusiliers (Royal London Militia), will arrive here from Finsbury on Thursday next, in advance of the battalion.

Commanding officers may excuse soldiers who have completed 17 years' service from the annual military training.

Several fresh cases of scarlet-fever have occurred. Diphtheria is rife in Ash; no passes are granted. Much of the sickness is attributed to the bad quality of the water.

Indian Notes.

◆

Col. R. Barter, C.B., Bengal S.C., succeeds to the colonel's allowances.

Major-Gen. Murray, Bengal S.C., is in command of the Allahabad division, during the absence of Major-Gen. H. T. Macpherson.

The official report of the Soldiers' Industrial Exhibition at Lucknow last year is very satisfactory. Rs. 2,415 were awarded in prizes, and a balance of Rs. 3,025-3-5 was carried forward. Lieut.-Gen. Cureton says :—"From the general interest taken in the whole undertaking, I feel sure that these exhibitions are again taking the place they once held, when they were, to a certain extent, a novelty, and it is particularly gratifying to be able to observe that under the new condition of service the results have been so satisfactory. Altogether, the exhibition shows unremitting attention and exertion in all branches, and the several regiments are to be congratulated. All commanding officers took the greatest interest in the work."

The rule in Madras of allowing the next heir of a soldier to obtain a pension in the event of the death, before being brought on the pension establishment, of the nominated or nearest heir, has been extended to Bengal and Bombay.

The Government of India have sanctioned the proposal of Sir D. Stewart to attach two 7-pounder mountain guns of 150 pounds weight to the native regiments at Shillong, Kohima, and Debrooghur, and to have an officer, with a sufficient number of non-commissioned officers and men instructed in their use.

The Admiralty have approved of gunnery books being supplied gratuitously to the Divisions of Royal Marines in the following proportions annually :—To the Royal Marine Artillery, Eastney—500 copies of the "Gunnery Drill-book" and 100 copies of the "Nordenfelt Handbook;" and to the infantry divisions at Chatham, Plymouth, and Portsmouth, 125 copies of the former work and 75 copies of the latter to each division.

The Clive arrived at Portsmouth on Sunday last, after a very quick passage, with time-expired men, invalids, and drafts numbering 900.

The establishment of the British Army and Auxiliary Forces, including officers and all branches of the service, for the present financial year is :—Regular Forces—Home, 99,423; the Colonies and Egypt, 33,684; India, 61,591.—Total, 191,698. Militia—(Artillery, Engineers, and Infantry), including the Channel Islands, 141,982; Yeomanry Cavalry, 14,404; Rifle Volunteers (Artillery, Cavalry, Engineers, and Infantry), 249,413.—Grand total, 597,497.

EGYPTIAN NEWS.

(FROM OUR OWN CORRESPONDENT).

Cairo, May 12.

The one prevailing topic of conversation upon the balcony of Shepheard's, which forms the centre around which Egypt revolves, is the approaching expedition to the South. I speak of it in these definite and yet indefinite terms because, whether it is advisable or not, whether its ultimate destination be Khartoum or not, there exists no doubt that an expedition on a large scale will take place within a few months. The fact remains that, Gordon or no Gordon, there is a necessity not only to crush the force of the Mahdi before it invades Upper Egypt, but to establish some sort of a government in the Soudan, unless we desire to have upon our shoulders a permanent border warfare. Two years ago, had we chosen to employ the Indian Contingent to strike a single vigorous blow, we might have abandoned Khartoum and trusted to time to evolve out of the chaos we left behind a government too feeble to attack Egypt Proper. But we have allowed to grow into power a force which we must either crush or to which we must yield the future of Egypt. I by no means join in the general "haro!" of contempt against Sir Evelyn's experimental force, but I should be sorry to see this or any army consisting of raw recruits, insufficiently officered, sent to meet an enemy who has proved sufficiently formidable against British bayonets. If we may judge from the movements of the native regiments, it would seem that the Korosko desert route will be attempted. I would not venture to quote my own unsupported opinion against it, but at least one officer who merits hearing considers it the worst of the four.

The Mudir of Dongola appears to be an individual with some ideas of his own, and distinctly declines to obey orders, but insists instead on being supplied with more ammunition. It is a curious position altogether, not a bad type on a small scale of the whole Egyptian Administration. Note what Mr. Vincent Crummles would call the situation! In London, a Government which has declared the Soudan beyond the sphere of its operations, insisting on the abandonment of a place which few members of the Cabinet probably had ever heard of twelve months ago! In Cairo, the Government and the English officials, lent "at considerable expense" to "advise" that Government, firmly convinced that the abandonment of that place is militarily and politically a blunder! In Dongola, a Governor, dependent upon those two Governments, who distinctly declines to obey either, and who expresses a vehement desire to die fighting the Mahdi for a Government who does not want to fight! And lastly, the gravest possible doubt whether this heroic Mudir (whose name, by the way, nobody seems to know, and who recently expressed an intense desire to go to Mecca) is not really in league with the Mahdi, and anxious for ammunition only to use against his employers. The atmosphere of scepticism in Cairo is demoralising.

The Orontes sailed from Alexandria on May 19 with the following :—Lieutenant-Colonel St. Leger, Cameronians, in command, Miss St. Leger; Captains Cummings, Royal West Kent, to join depôt; Sir G. Thomas, Bart., R.A., on transfer; Leonard, East Lancashire; Verschoyle, 2nd Duke of Cornwall's Light Infantry (wife, child, and nurse). Lieutenants Hollway, 2nd Duke of Cornwall's Light Infantry, and Ryder, King's Royal Rifles, to join depôt. Brigade-Surgeon Lofthouse, on retirement. Surgeons Gardner (and wife) and Lane (and wife), on duty. Revs. J. Milne and J. Webster. Lieutenant of Ordnance T. Connor. Captain A. O. Green, R.E., Major Dalgetty, Lieutenant Ussher, South Staffordshire Regiment, Surgeons Reid, Deputy-Assistant-Commissary-General Wilson, and Surgeon Lewis, all six invalided. Nursing Sisters Cannell and Airey, on leave. Nursing Sisters Brown, Ireland, Irving, and Burleigh, and Surgeons D. Semple, H. A. de Lom, T. R. Morse, on reduction of establishment. Surgeon-Major Jeffcoat, to Gibraltar. Invalids, 55 from Suez, 113 from Alexandria. Time-expired men, 225. Prisoners, 5. Details, 110.

Captain Buckle, who has been appointed to the command of the Invincible in place of Commodore Molyneux, arrived on the 15th, and at once took command.

Lieutenant Lawson, R.E., has been transferred for duty to Alexandria.

Surgeon Davies has taken over medical charge of Staff and Departments.

Quartermaster Robinson, Commissariat, and Deputy-Assistant-Commissary-General Baker have arrived at Cairo from Suakim.

During the absence on leave of Captain Green, the duties of Brigade-Major, R.E., will be performed by Lieutenant Thomson.

Writing a few days later, our correspondent says :—The force required is estimated at from ten to twelve thousand men, and I hear upon good authority that no portion will consist of Indian troops. The General Commanding in Cairo considers, I believe, that he can only with safety spare some one to two thousand of the garrison now here, so that the number required from England is at least 10,000. The route which the expedition will take naturally depends upon the object to be attempted. Assuming that it is the relief of

Khartoum, there would appear to be four alternatives:—1. By the Nile valley to Khartoum. 2. By Nile valley to Korosko, across the Desert to Abou Hamed, and then again by river to Khartoum. 3. From Suakim to Berber, and Berber to Khartoum. 4. From Massowah to Kassala, and Kassala to Khartoum. The first has the obvious advantages of giving a good water supply during the whole way. Against it, however, is its enormous length (1,600 miles), and the difficulty to transport at the Cataracts. The second is shorter than the first by *400* miles of desert, but against this must be set the 240 miles of desert without water. Sir Samuel Baker, however, favours this route, and his views are, I believe, supported by Sir Evelyn Wood. The adoption of it, of course, implies a storing of water and other arrangements, which will delay the possibility of execution for several months. The third is advocated by many as the shortest and most direct. Had it been adopted immediately after Graham's victories, it would have been difficult to find any argument against it, but as it is it may be doubted whether the opportunity has not gone. The fourth is advocated by those who insist that the expedition should start at once, and there is no doubt that it has this advantage—that it, if any, is immediately available. The track from Massowah to Kassala commences with a steep ascent through narrow defiles that would be dangerous if opposed by any force, but with a friendly power, Abyssinia, on the flank, this difficulty would to a great extent disappear. This part of the route accomplished, the track is on a high table-land, with good climate throughout the whole year; with the exception of one stretch of 70 miles, there is a good water supply during the entire route. It is even a question whether the 70 miles without water could not be avoided by a detour south, but even if this should not prove practicable it is clear that the difficulty is much less formidable than that involved by the 240 miles' journey across the Korosko desert. Advocates of this route further insist on the advantage that would ensue from it terminating in the fertile country around Sennaar, from which Khartoum draws its main supplies. It is impossible to regard the expedition without misgivings, not so much on account of the dangers it will incur as of the future responsibilities it will imply. Experience in the Eastern Soudan has shown us that even two singularly successful and sanguinary victories are of no effect unless the successes are followed up.

The difference between the Alexandria and Cairo temperature is so great that it would be a wise measure to give each of the Cairo regiments a month's change to Alexandria during the summer. The bracing character of the air and the General in command appear to be equally invigorating. I am sorry to say that there have been a few cases of typhoid on board the *Monarch*.

Colonel Fraser left for England at the request of the British military authorities. During his absence his duties will be performed by Colonel Slade. Major Kitchener is now at Korosko. Major Stuart Wortley will strike West to establish outposts at Salima. Major Marriott has gone to follow the river.

Captain Humphreys lingered from the 6th to the 16th, carefully nursed by Colonel Hallam Parr, Lieutenant Douglas, and his servant, Private Masterman. He was buried on the 18th with full military honours, the pall-bearers being Lieutenants Marling, V.C., King's Royal Rifles, Tudway, South Staffordshire, Martyn, Duke of Cornwall's Light Infantry, and Douglas, A.D.C. Colonel Hallam Parr acted as chief mourner, and the coffin was followed by nearly every officer in Cairo, and many private friends of one whose personal popularity was as great and well deserved as his professional reputation.

On being relieved by the Rifles, the Cameron Highlanders, quartered at Ramleh, will return to the capital, leaving a detachment of 100 men at the Ramleh barracks.

Lieut.-Cols. Wynne, Slade, and Parr, Majors Stuart-Wortley and Parsons, and Capt. La Terrière, Egyptian Army, have passed the colloquial examination in Arabic.

Capt. Nott, having recovered from his recent indisposition, has resumed his duties as Pymr., 38th Regt.

Capt. A. O. Green, Brigade Major, R.E., having been invalided by a medical board, his duties will be performed by Lieut. A. G. Thomson, R.E.

Surgeon J. Maconachie, A.M.D., has proceeded to Assiout to relieve Surg. T. R. Morse, proceeding to England.

Com. Donner has applied to be relieved of his duties as Principal Transport Officer, a post which he has filled with such ability as fairly entitles his friends to hope that her Majesty's Government will recognise his services in a substantial manner.

Leave of absence has been granted to the following officers from the 19th inst. to the date following their names:—Col. Maitland, C.B., R.E., to Sept. 8; Lieut.-Col. St. Leger, 79th; Capt. Carter, 56th; Capt. Kevill Davies, 92nd, to June 30; Capt. Hitchcock, to July 18; Surg.-Major White, A.M.D., to July 22; Assist.-Comy.-Gen. Nugent, to Sept. 17; Rev. R. Brindle, to Aug. 1; Qrmr. Enright, A.H.C., to Sept. 15; Lieut.-Col. Boyes and Lieut. Burney, 92nd, to June 30; Major Aked, Pymr., 19th Hussars, to July 17, and Surg.-Major O'Dwyer, to Sept. 5.

ACTIVE SERVICE cannot wear out the teeth that are brushed night and morning with ROWLAND'S ODONTO, the purest and most fragrant dentifrice ever made. All dentists allow that neither washes nor pastes are as efficacious for polishing the teeth and keeping them sound and white as a pure and non-gritty tooth-powder; such ROWLAND'S ODONTO has always proved itself. Ask any dealer in perfumery for ROWLAND'S ODONTO, and avoid spurious imitations, theirs being the only original and genuine Odonto,

MAJOR TUCKER AND THE R.M.A.

[FROM A CORRESPONDENT.]

The promotion of Brevet Major Tucker, R.M.A., to a regimental majority over the heads of two-thirds of the officers of his rank, presents on reflection a case of such hardship to those who have been passed over, and is a matter of such importance as regards the well-being of the Royal Marine Artillery, that the circumstance most certainly deserves consideration. The case of a small seniority corps like the Royal Marine Artillery, with only one home station, where the officers serve together for the greater part of their career, is quite different to that of large bodies like the Navy and Army. Moreover, all officers who joined this corps before January 15, 1878, did so under conditions which ensured their not being superseded, unless they proved themselves unfit for their position. This is the first occasion on which the Admiralty have availed themselves of the Order in Council of the above date, to make a special promotion in the Royal Marine Artillery. By this promotion, Major Tucker goes over the heads of 18 Captains (or two-thirds of the List), some of them nine years his seniors. Eight of these officers have seen war service in one or more campaigns, several of them have been mentioned in despatches, and four have been promoted to brevet rank for such service, one of the brevets being that of Lieutenant-Colonel; four of them have passed the Staff College with distinction, and are now on staff or special employment; and three others are serving as Instructors of Gunnery and Musketry. When a body of officers showing such a list of services as the above in a small corps are passed over by a junior, whatever his services may have been, it is not surprising that a feeling of mistrust and sense of injustice should be aroused in the minds of all the officers, who now feel that, regardless of the services they have performed, and the reputations they have built up after many years' service, they may suddenly be deprived of what is legitimately their due. Major Tucker's promotion will not only retard by some years that of others to the higher ranks of the corps, but will in some cases cause officers, who otherwise might have looked forward to commanding the regiment, and afterwards enjoying an income of from £700 to £1,000 per annum for life, to be retired as Majors on £300 a year. By this sacrifice of his brother officers, Major Tucker at the present moment gains a position equal to nine years' additional service, and will probably command the corps about 18 years before he would have done so in ordinary course. It can hardly be supposed that officers require such an enormous incentive to try and achieve distinction on active service, and if Major Tucker had been promoted to Brevet Lieutenant-Colonel for his services, he would have been considered one of the most fortunate officers of the present day, and the prospects of some of his senior officers would not have been ruined. We cannot believe that the Admiralty, when making this promotion, could have considered the case in all its bearings, or have consulted the Deputy-Adjutant-General, who would have been able to have given them the above information. It would never have been anticipated that the authority given to the Admiralty by the Order in Council of January 15, 1878, would have been exercised to the detriment of officers who have done such good service; and unless some safeguard is added, it would appear necessary to abolish special substantive promotions in the corps, letting seniority, tempered by rejection, be the rule, and reserving brevet promotions and other honours for distinguished service before the enemy. If after this precedent the Order remains in full force, a demoralising effect most prejudicial to the interests of the service will result.

EXPERIMENTS AT SHOEBURYNESS.

The principal feature of the experiments on Tuesday was the trial of a new compound armour-plate constructed by Messrs. Cammell and Co. It was 10 ft. 8 in. wide by 9 ft. high, and 19 in. thick, 6⅜ in. being steel, and the remainder wrought iron. It was arranged that the 80-ton gun, with a charge of 450 lb. prism powder and a Palliser shell of 1,700 lb., should be fired at the plate at 120 yards, and that should this shot not succeed in breaking it, four other shots from an 11-in. breech-loading gun of 43 tons should be fired at the four corners of the plate. The plate was fixed by 16 bolts to a backing of 11½ in. of teak, constructed on a frame identical to that designed for Camperdown's target at the water-line. The shot struck the target with a velocity of 1,594 f.s., and with a total energy of 30,000 foot tons, penetrated about 8 in. into the plate, and was broken to atoms. The armour-plate was radially split into five different pieces, one of which was entirely detached. Behind the backing nine of the 16 bolts were found to have been broken, and the iron frames representing the ship's side were bent and torn. The fractures showed that the welding of the steel face to the iron back was perfect throughout, and was an excellent specimen of manufacture so far as soundness was concerned. Consequent upon the shattered condition of the plate, it was not possible to carry out the remaining portion of the experiments with it. Shots were fired from a Hotchkiss quick-firing gun constructed for sea forts, but owing to the manufacture of the cartridges not being very satisfactory the practice was only moderately good. Experiments with the Hotchkiss quick-firing gun for Naval service, mounted on a pedestal, were made, and it was found that the gun was capable of being fired with aim once in every 4½ sec. One hundred of these guns have been ordered for the service, as well as 100 of Nordenfelt's quick-firing 6-pounders; they are intended to be used as an auxiliary armament to ships. A 12-pounder breech-loading gun was next shown mounted on a hydraulic Woolwich field-carriage, which has been constructed in competition with one made by Messrs. Armstrong. The trail of the Woolwich carriage is lighter than Messrs. Armstrong's; the recoil averages on ordinary ground nearly 6 ft. Three of these carriages have been constructed for experiments at Okehampton, and 18 of Messrs. Armstrong's similar carriages have been ordered, and will be served out for practice. Messrs. Armstrong's 18-pounder breech-loader, which has been made to take the place of the old 16-pounder, was shown. It was mounted on an Armstrong steel field carriage, with a brake, which, however, was found not to work very satisfactorily. After luncheon, a 5-in. breech-loading sea-service gun was shown, also a 6-in. breech-loader and an 8-in. breech-loader, the former being mounted on an Armstrong carriage with friction compressor, and the latter on an Armstrong converted carriage, with a hydraulic buffer. The practice of these three guns was at 2,000 yards at 6 ft. by 6 ft. targets. The skill with which they were laid was highly creditable, and the action of the fuses was satisfactory.—Condensed from *Times*.

Mr. Wilson, chairman of Cammell and Co., writes to us to state that the breaking-up of the plate made by the company on the first round of the 80-ton gun last Monday, was "wholly due to the insufficient support given to it by the backing which constituted the target to which the plate was attached," and was acknowledged to be so by every competent authority at the trial. It has been decided to repeat the trial immediately under the same conditions of firing, but with another backing.

Captain Palliser writes to the *St. James's Gazette* to say the effect of the shot would have been greater had it been fitted with a jacket to give it more support on impact.

Reviews.

◆

SOME MAGAZINES.

The June number of the *Cornhill* is of average merit. It opens with a short tale, "Doctor Greatrex's Engagement," which requires no particular notice, unless it be that the illustrations can scarcely be worse. Some literary recollections are very interesting, and will be duly appreciated by the admirers of the late Charles Dickens. The article on "June Fishing" will suit many readers, and some who are not devoted to angling. It is a positive fact that "The Giant's Robe" is still published in magazine form. It seems a pity that it was not brought to a conclusion long ago, and many of the author's eccentricities might have been avoided. The author of "Vice Versâ" could scarcely write a bad book, but he certainly has not increased the high repute which he gained by his earlier efforts.

Blackwood for June is decidedly good. In addition to a paper on "The Votes of Censure," and "A Voice from the East on Oriental Questions," there are some other lighter tales which will please readers in general, particularly Part I. of "Magda's Cow." It is a curious title, and a curious tale altogether.

The *National Review* opens with an exhaustive article on "The Franchise Bill and the House of Lords," contributed by Earl Percy. Having discussed the question in detail, the writer offers the following suggestion:—"But even supposing the Bill to be generally acceptable to the country, I question whether the Peers, by acting upon their own judgment, would not rather raise than lower their character in the estimation of a nation who are as conspicuously distinguished by a capability of honouring firm and straightforward resolution, even while they condemn its application, as they are prone to despise vacillation and weakness, even while they reward it by subdued and half-contemptuous applause. There are multitudes of Conservatives on both sides of the Trent who think the House of Lords would lose more by indecision and timidity than by steady and consistent independence." There are several other articles in this month's number of the *National Review* which may be studied with advantage.

The *English Illustrated Magazine* is an excellent number, introduced by a high-class engraving, by Theodor Knesing, of the famous portrait painted by Gainsborough, and now in the National Gallery.

The attractions in *Longman's* for June are a story of "A Remarkable Irish Trial," by J. O'Donoghue, and "Shut Out," by the author of "Vice-Versâ."

Art gossip and fashions appear to great advantage in the *Ladies' Gazette of Fashion* for June. The illustrations are, generally speaking, excellent; but we must take exception to the first, in which the lady in blue does not appear to advantage. She certainly seems to be in a dilemma.

Several very readable stories render the new number of the *Argosy* a good one. On June 19 an extra number will be published, which will be entirely separate and distinct from and independent of the ordinary monthly number. Its great attraction will be a long and complete story by Mrs. Henry Wood, entitled "The Surgeon's Daughters."

Messrs. Goodall, Backhouse, and Co. have made a daring venture in publishing "*Boz*" at the startling price of three-halfpence, printing 250,000 copies as a first edition. The type and paper are wonderfully good.

Messrs. Cassell and Co., Limited, have issued an illustrated guide to Paris, which ought to find a nook in the courier bags of travellers. In the first part the routes from London to Paris are carefully noted; Part 2 treats of Paris, its features, characteristics, and history; Part 3 deals with facts about Paris; Part 4 gives notes, "de omnibus rebus et quibusdam aliis;" Part 5 disposes of the traveller's time; Part 6 describes the sights of Paris; and Part 7 is devoted to the suburbs.

The Dockyards were closed on Saturday last, the anniversary of the Queen's 65th birthday.

The next competitive examination of candidates for admission to the Staff College will be held at the London University on Tuesday next.

REGIMENTAL DINNERS.

The following regimental gatherings have been held in London during the week :—

The Carabiniers. At the First Avenue Hotel, on the 29th inst. Present :—Gen. Calvert Clarke, C.B., in the chair ; Lieut.-Gen. C. Sawyer ; Cols. John Fryer, C.B., and Pryse ; Lieut.-Cols. C. W. Bruce, W. T. Betty, Hon. J. D. Drummond, Morgan Saurin, and G. Salis-Schwabe ; Surg.-Gen. R. Gibborne ; Brig.-Surg. J. Landale ; Majors A. G. Fife and H. C. Montgomery ; Capts. P. H. Hewitt, T. C. Porter, F. C. Rasch, Hedworth, Williamson, and A. Weston ; Lord Greenock ; Messrs. George Baird, C. E. Byrom, M. Cradock, O'Farrell, R. G. W. Long, W. R. Phelips, F. J. Rippingall, W. Macmillan Scott, and W. P. Willson-Todd.

3rd Hussars. At the Albion, on the 26th inst. Present : —Major-Gen. H. Vyse ; Cols. A. H. Vincent, R. Blundell, and Hon. H. Monckton ; Lieut.-Col. C. S. Walker ; Deputy-Inspector-Gen. Mackenzie ; Sir A. Halkett ; Majors G. V. C. Napier, J. P. E. Jervoise, Bell, Curzon, and P. Maxwell ; Capts. T. H. Peckham, R. G. Alexander, A. J. R. Van Cortlandt, Bright-Smith, Murphy, Preston, Fawcett, Chichester, and F. G. Forsyth-Grant ; Lieuts. J. S. R. Scott, C. Oswald, H. B. Patton-Bethune, F. H. Forester, Hon. C. E. Bingham, W. B. Purefoy, and Curzon ; Messrs. S. Pearson, J. W. D. Johnson, R. H. Hicks, and G. Fleming.

9th Lancers. At the Albion, on the 26th inst. Present : —Gens. Sir A. Little and Sarel ; Lieut.-Gen. Drysdale, C.B. ; Cols. Evans, Marshall, and Rich ; Lieut.-Cols. Cave, Jones, V.C., Mahon, M'Calmont, and Hon. C. Powys ; Majors Candy, B. Gough, Moore, Stirling, and Wilkinson ; Capts. Lord Erskine, Hon. E. Willoughby, Ellis, W. H. Fife, Green, Gaskell, Hon. C. Lascelles, Hon. E. Preston, Power, Saville, Starkey, Thursby, Thonger, and Hon. E. Vesey ; Dr. Hume Spry ; and Messrs. F. Colvin, C. Bishop, C. A. Floyd, H. C. Hopkins, J. Hunter, E. P. Mackenzie, A. L. Wheeler, and M'Farlane.

11th Hussars. At Limmer's Hotel, on the 26th inst. Present :—Gen. C. C. Fraser ; Cols. W. Balfe, Annesley, Hon. J. D. Drummond, Grant, Harnett, Montague, and Ibbetson ; Majors A. C. F. Fitzgeorge, Calvert, Green, Kinchant, Mosley, H. J. Watson, Cunninghame, and Gardiner ; Capts. St. J. S. Taylor, Black, K. Borrowes, M. A. Close, Dewar, Hon. H. A. O. Gore, A. F. Peyton, Lord E. Talbot, Teevan, J. S. Stewart, Cheape, and Thompson ; Lieuts. Lord E. Hamilton, Hon. O. V. Lumley, E. H. E. Coote, Gilroy, W. Harrison, F. H. Lehmann, H. W. Swithinbank, W. W. Waring, and H. D Warburton ; Surg.-Major Crosse ; Messrs. Cuffe, H. Cumming, J. Delacour, Pellew, T. Forsyth-Forrest, and Qmstr. Frayling.

12th Lancers. At Limmer's, on the 27th inst. Present :—Gen. Cureton ; Inspector-Gen. Dr. G. Anderson ; Cols. J. S. Tait, W. Cox, and Le Quesne ; Lieut.-Col. R. J. Paley ; Majors Moore, J. F. Hornby, J. C. Orred, and J. Tary : Capts. C. E. Beck, M. H. Archdale, J. Pronger, G. J. Barry, J. M. Dowdeswell, St. L. Stephens, J. H. Banks, S. Hamilton, T. A. Hill, Hayes, G. M. Martin, and Mack ; Messrs. J. H. Learmonth, H. Melladen, M. E. Williams, R. M. Shearme, R. G. Broadwood, R. A. C. Christie, and J. R. Malone.

15th Hussars. At Limmer's Hotel, on the 26th inst. Present :—Gen. M. W. Smith, C.B. ; Lieut.-Gen. Sir F. W. J. Fitz-Wygram, Bart. ; Cols. G. Luck, C.B., and C. Steel ; Deputy-Inspector-Gen. Jee, C.B., V.C. ; Majors G. C. D'Albiac, Blackett, H. Hall, Kentish, W. White, F. H. Beck, Brown, and F. Hood-Gregory ; Capts. Gerald Walker, R. Peafold, A. Siniske, H. A. Armitage, P. Carnegy, Bullen, Sullivan, Holland, G. A. Webbe, G. S. Sconing, and J. Norton ; Lieuts. the Hon. R. Leigh, Hon. A. Manners, Gordon, C. E. Browne, R. C. Cokayne-Frith, P. W. Bewicke, and T. O. W. C. de Crespigny ; Messrs. G. N. R. Wetherall, W. J. Burke, C. G. Manners, R. Renton, H. C. Holland, T. Donovan, and G. Griffiths ; and Drs. J. Warren and A. Robinson.

18th Hussars. At the Ship and Turtle, on the 26th inst. Present : Gen. Sir T. W. M'Mahon, Bart. ; Col. J. Peyton ; Lieuts.-Cols. H. E. Malet, P. Okeden, and Sir W. Arbuthnot ; Capts. Butler, E. C. Knox, W. P. Warner, and J. Hodgkins ; and Lieut. H. T. Laming.

19th Hussars. At the Bristol, on the 27th inst. Present :—Major-Gen. Jenkins, C.B. ; Cols. Fairbrother and Coghill, C.B. ; Lieut.-Cols. Fairlie, Stapleton, and Barrow, C.B., C.M.G. ; Majors Brooks, Kynaston, Blackett, Hall, Smith, French, and Hanford Flood ; Capts. Reynolds, Cheape, and Chapman ; Messrs. Spencer Stanhope and Craven.

Grenadier Guards. At the Freemasons' Tavern, on the 26th inst. Col. Clive presided, supported by Gen. H.S.H. Prince Edward of Saxe-Weimar and Gen. Earl Howe, Gen. Sir F. W. Hamilton and Gen. Wynyard ; Lieut.-Col. Antrobus, Mr. Houston Boswell, Lieut.-Col. Sir F. Bathurst, Col. Blundell, Viscount Baring, M.P., Gen. Brownrigg, Mr. J. Bagot, Lieut.-Col. Bramston, Col. Bridges, Major Brabazon ; Lieut.-Cols. Hon. W. Carington, Cockran, Colvile, and Hon. C. F. Crichton ; Mr. H. A. Coventry, Lieut.-Gen. Lord Chelmsford, Lieut.-Col. Cotes, Major-Gen. Cameron, Hon. C. B. Colville (Master of Colville), Lieut.-Col. Clinton, Hon. R. Carington, M.P., Lieut.-Col. Clayton, Mr. A. Caulfield, Lord Alwyne Compton, Col. Davies, Mr. W. Duberley, Lieut.-Cols. Digby and Hon. C. E. Edgcumbe, Hon. C. Eliot, Lieut.-Col. Eaton, Sir H. Fletcher, Bart., M.P., Lieut.-Col. Lord F. Fitzroy, Mr. J. T. R. Lane Fox ; Lieut.-Cols. Gascoyne, Gould, Goddard, and Hatton, Mr. C. E. Harrison, Col. Hon. W. S. D. Home, Mr. B. W. Hotham, the Marquis of Hertford, Lord C. J. Hamilton, M.P., Lieut.-Gen. Higginson, Lieut.-Col. Hubbard, Mr. F. G. Higginson, Lieut.-Col. Johnstone, Major-Gen. Johnstone, Mr. J. J. Hope Johnstone, Lieut.-Col. Lord A. Gordon-Lennox, Mr. F. Lloyd, Mr. L. V. Loyd, Lieut.-Col. Hon. C. H. Lindsay, Mr. A. F. Luttrell, Viscount Lascelles, Col. Hon. E. G. P. Littleton, Mr. R. T. Lloyd, Mr. C. S. M. Montgomerie, Lieut.-Col. Mackinnon, Lieut.-Col. Murray, the Earl of March, the Hon. N. Leslie Melville, Lieut.-Col. Montresor, Lord Manners, Viscount Newark, Mr. E. C. Nugent, Mr. J. T. Oswald, Lieut.-Col. Pearson, Lord A. Percy, M.P., Mr. W. B. Phillimore, Lord G. Pratt, Mr. W. H. Pickford, Mr. R. W. Chandos Pole, Lieut.-Col. Hon. C. Pennant, Lieut.-Col. Reynardson, Lieut.-Gen. Randolph, Lieut.-Col. Ricardo, Mr. J. H. Reynolds, Mr. F. C. Ricardo, Col. Reynardson, C.B., Col. Smith, Lieut.-Col. Kenyon-Slaney, the Earl of Sefton, Viscount Stormont, Mr. G. E. Shelley, Lieut.-Col. Seymour, Col. Sturt, Lieut.-Col. Tippinge, Mr. C. B. Pearce, Lieut.-Col. A. W. Thynne, Mr. R. C. de G. Vyner, Lieut.-Col. A. C. Wellesley, and Mr. W. H. Walrond. The guests were Major-Gen. R. Gipps, Mr. T. W. Gunton, Mr. W. J. Farrer, Capt. Collins, Mr. Leeding, and Capt. Bassindale.

2nd Queen's. At Limmer's Hotel, on the 28th inst. Present :—Gen. Sir Edward Selby-Smyth, K.C.M.G., in the chair ; Major-Gen. Pye-Phillipps ; Cols. Baillie, Kelly-Kenny, Logan, Wiltshire-Lynch, Philips, Simpson, Thompson, and Woodard ; Majors Lawson and Tupper ; Capts. Adams, Tyrwhitt-Drake, Dunne, Gosset, Hamilton, Montgomery, Mott, Nourse, and Richards ; Messrs. Adams, J. Campbell, J. C. Cohen, Elias, and Maitland ; Surg-Major J. E. Clark.

5th Fusiliers. At Limmer's Hotel, on the 29th inst. Present :—Gen. the Earl of Longford, G.C.B., presided ; Gens. Milman, C.B., and Roberts ; Cols. Master, C.B., and Carden ; Lieut.-Cols. Creagh, Forsyth, and Thistlethwayte ; Major Darley ; Capts. Townshend, Dashwood, Enderly, Hargreave, Cramsie, Pearse-Hobbs, Trafford, Chancellor, Money, Lambart, Auld, Biddulph, and Malet ; Messrs. Miles, Herbert-Armstrong, Whitaker, Harding, Pilcher, White, Siteveil, and Eagar ; Brig.-Surgs. Wolseley and Tippetts ; Surg.-Major Ruttledge ; Doctors Collins and Swettenham.

13th Light Infantry. At Limmer's, on Tuesday. Present :—Gen. Lord Mark Kerr ; Inspectors-Gen. V. Gilbert and W. H. Kerr ; Cols. A. S. Adair, Melville-Browne, P. Bainbrigge, E. L. England, R. B. Montgomery, and H. C. Henley ; Lieut.-Col. D. Stewart ; Majors Adair, W. H. Evans, J. J. Ross, and B. B. Twyne ; Capts. F. B. Bradshaw, E. Boyd, J. J. P. Fox, A. W. A. Pollock, and F. W. Spencer Stanhope ; Messrs. C. N. Fitzroy, H. Gillon, H. R. Lloyd, J. J. Palmer, C. D. Radcliffe, D. G. Stewart, H. T. Schubrick, and A. G. Wilbraham.

23rd Fusiliers. At the Albion, on the 27th inst. Present : Gens. Sir A. Herbert, Brownrigg, and Drew ; Lord Romilly, Lord E. Somerset ; Col. the Hon. S. Mostyn, C.B. ; Lieut.-Cols. J. Tilley, H. Vincent, and G. H. Hutton ; Majors C. Norman, Luxford, Tyssen-Holroyd, Gosselin, and J. H. Walwyn ; Capts. A. F. Fisher, E. H. C. Taylor, C. G. A. Mayhew, Dawson, H. W. Griffiths, A. B. Brooke, W. F. J. Cowan, Willes, E. R. Evans, Bertie, and G. C. R. C. Fenwick ; Lieuts. Cooper, W. Bertie-Roberts, King, R. B. Ferman, G. F. Walker, S. B. Bright-Smith, R. W. Ethelston, and J. L. Lock ; Messrs H. H. Dare and G. Howard.

24th Regiment. At the Albion, on the 27th inst. Present :—Gens. Wodehouse, Ross, and Glyn, C.B., C.M.G. ; Cols. Macpherson, Watson, and Gurnell Tongue ; Lieuts. Brander, Farquahar, Harrisson, Paton, C.M.G., and Upcher ; Majors Harvey and Williams ; Capts. Curteis, Halliday, Spring, Sawbridge, Sugden, and Curce ; Messrs. Browricker, Dickinson, Scott Kerr, Neave, Barnett, Liebenwood, Every, Gaisford, Vesey Holt, and Woolledge.

30th Regiment. At the Freemasons' Tavern, on the 27th inst. Present :—Lieut.-Gens. Sir E. Whitmore and Pakenham ; Major-Gen. Hutton ; Cols. Sir G. Pocock, Bart., Grant, and Dillon ; Lieut.-Col. Brownlow ; Majors N. Bannatyne, J. Cooke, J. E. Goodwyn, and Hornby ; Hon. L. Powys ; Capts. Hobbs, Kemble, Watson, Piercy ; Lieuts. Lewis, Finch, and G. Cobden.

33rd Regiment. At the Ship and Turtle, on the 29th inst. Present :—Lieut.-Col. Green ; Capts. Barton and C. F. Massingberd Murray ; Surg.-Gen. Ogilvy ; Major Conor ; Lieut.-Gen. Donovan ; Col. Hon. R. H. de Montmorency ; Majors Nisbitt and Robbins ; Lieut. Smithe ; Major Fraser ; Capt. Jefferson ; Brig.-Surg. Clark ; Capt. Preston ; Major W. A. Wynter ; Capts. Curran and W. H. Parry ; Major Ball ; and Capt. Easton.

34th Regiment. At the Freemasons' Tavern, on the 27th inst. Present :—Gens. Maxwell and J. Peel, Lieut.-Gen. Robertson, Major-Gen. Harman, C.B., Col. Jordan, Lieut.-Cols. J. D. Dyson-Laurie, G. W. Puget, and Sir R. Kelly ; Majors L. Jordan, C.B., Stewart, C. C. Clayton, G. Malcolm, Shiffner, and Boyce ; Capts. H. R. Rose, Vaughan, Packe, Dowling, Savill, and G. James ; Lieuts. J. C. Wardlaw and W. F. Nash ; Mr. Baird.

43rd Light Infantry. At Willis's Rooms, on the 29th inst Present. :—Lieut.-Gen. Wilkinson ; Viscount Bangor ; Gens. the Hon. Sir A. Spencer, Primrose, Colvile, and Phillips ; Cols. A. Cole, De Morel, D. Greene, the Hon. C. H. Lindsay, C.B., Livesay, Sir H. Wilmot, Bart., and Sandford ; Majors Carter and Vesey ; Capts. Eccles, Collingsplatt, Pearson, and Stapleton Cotton ; Messrs. J. S. Kennedy, Nugent, and Maguire.

44th Regiment. At Willis's Rooms, on the 29th inst. Present :—Gen. Sir C. W. D. Staveley ; Cols. Faussett, Farwell, Gregory, Logan, Maguire, Mollan, and Walters ; Majors Bower, Foster, Halahan, Lefroy, M'Harg, Micklethwait, Nash, and Raymond ; Capts. Churchill, Cobbam, and Walter ; Messrs. Guilding and Overton.

48th Regiment. At the Albion, on the 27th inst. Present :—Gen. Chapman ; Cols. St. John Bally, Sedley, Feneran, and Lys ; Lieut.-Col. Miller ; Major Cumming ; Capts. Adam, E. G. Bennet, Goddard, Herbert, and Whieldon.

53rd Regiment. At the Marllborough Rooms, on the 27th inst. Present :—Gens. Sir C. Trollope, Dalzell, and Sir G. Logan ; Cols. R. H. Truell and Tendall ; Lieut.-Cols. Bonney, Thompson, and Terroll ; Majors H. D. Brooke, Fife, W. Rogerson, Raymond, and Cotton ; Capts. Westby, B. H. M'Clintock, and T. A. White ; Lieuts. W. J. A. Wallace, R. Jenkins, A. R. Austin, Spencer, F. G. Cavendish, Talbot, and W. R. B. Peyton ; Messrs. H. Osborn, Bockworth, Dovaston, and G. Arbuthnot-Leslie.

65th and 84th, York and Lancaster Regiment. At the Albion, on the 27th inst. Present :—Major-Gen. Blewitt ; Col. Warren ; Lieut.-Cols. Bryan, Elliot, Gore, and Haly O'Grady ; Majors Ethelston, Ellis-Lee, and Kirkpatrick ; Capts. Bax, Collins, Gilpin, Littledale, Martin, Plumer, Rosse, Rutherford, Theobald, and Tebbitt ; and Messrs. Rolt, H. Scholes, O'Dell, Lynch, Blosse, W. Breden, and Boughton.

76th Regiment. At the St. James's Hall, on the 27th inst. Present :—Sir W. Brett ; Cols. Gammell and Caldecott ; Lieut.-Cols. Allardice, Clarke, and Butler ; Brig.-Surg. Orton ; Capts. Acton and French ; Messrs. Durham, Sampson, Molyneux, Dyson, Suft, Harris, and Were.

77th Regiment. At Willis's Rooms, on the 27th inst. Present :—Majors-Gen. Kent and Rickman ; Col. Carden ; Inspector-Gen. Prendergast ; Lieut.-Cols. Jervis, White, and Hoskins ; Major Leggett ; Capts. Lyon, Thornton, and Westmacott : Surg.-Major Woodfall ; Drs. Hansman and Farr White ; Messrs. R. A. Law, Lumley, Morritt, Lempriere, Hollingworth, and Dyer.

82nd Regiment. At the Freemasons' Tavern, on the 27th inst. Present :—Gen. Newton ; Cols. Hand, P. Solly-Flood, and Walters ; Lieut.-Cols. Lock, F. E. Green, and J. L. G. O'Brien ; Majors M'Dougal and O'Leary ; Capt. Daubeny ; Lieuts. Sumner, Murphy, Wilbraham, Skirrow, and Menzies ; Messrs. A. E. Roberts, J. Johnston, A. D. Lang, and J. C. Woolacott.

96th Regiment. At the Albion, on the 29th inst. Present :—Gens. Lord Mark Kerr and Wilson ; Major-Gen. Scovell ; Cols. Briggs and Newbigging ; Lieut.-Col. Josselyn ; Major Wright ; Capts. Eardley-Wilmot, Gould, Mostyn, Scovell, and Noel-Winter ; and Mr. C. Stracey, Esq.

102nd Royal Dublin Fusiliers. At the Army and Navy Hotel, on the 27th inst. Present :—Gens. D. Brown (in the chair), Spurgin, C.B., C.S.I., Holmes, and Taylor ; Cols. Harcourt, Rogers, P. M. Brown, Scott-Elliot, and Daniell ; Major Beaumont ; Capt. Sir J. Seton, Bart. ; Lieuts. Gordon and Dale ; and Surgs.-General Williamson and Day.

1st West India Regiment. At the Criterion, on the 29th inst. Present :—Major-Gen. J. A. Smith ; Majors T. Bell, C. G. Loveridge, and J. G. Smith ; Capts. F. C. Annesley and A. G. Spratt ; Messrs. E. P. Apthorp and A. L. Simons.

STEAM TRIALS OF H.M.S. COLLINGWOOD.

The steam trials of the Collingwood, which were commenced on April 29, were brought to a close on Tuesday last. The Collingwood is, as is well known, the first of the Admiral type of barbette ships, which includes the Rodney, Benbow, Howe, Camperdown, and Anson. They resemble the Colossus type in most things, but not in the manner in which their guns are protected, the barbette tower having been copied from the French. In the Colossus type the turrets are *en échelon* amidships ; but in the Collingwood the barbette towers are built forward and aft amidships, in deference to the views of Naval officers opposed to the turret system. The Constructor's Department at the Admiralty, nevertheless, prefer the turret system *en échelon*, as they claim that when fighting "end-on" a ship so armed can bring all her guns to bear on the enemy, be he ahead or astern, and there is great weight in the contention, for the barbette ships can only fight half their guns at a time when the enemy is otherwise placed than in the broadside, or just before or abaft the beam. The barbette tower, however, has other advantages, one of its greatest being that it does not revolve, and the gun is only exposed for a very short time to the enemy's fire. The revolving turret, on the other hand, may be jambed by a shot from the enemy, and in a seaway is ever likely to ship water through its ports. The Collingwood is the smallest of the Admiral type. At her load draught of 25 ft. 9 in., the area of her midship section is 1,486 square feet, while her displacement is 9,162 tons. Next come the Rodney and Howe, with a displacement of 9,600 tons, and then the Camperdown, Benbow, and Anson, with a displacement each of 10,000 tons, with a corresponding increase in the contract powers of the engines. The Collingwood is propelled by twin-screw, vertical, compound engines of 7,000 indicated horse-power, by Messrs. Humphrys, Tennant, and Co., on their well-known three-cylinder plan. Each set of engines has one high-pressure cylinder 52 in. in diameter, and two low-pressure cylinders 74 in. in diameter, with a stroke of 3 ft. 6 in. The general design is almost identical with that of the engines of the Edinburgh, a detailed account of which has already appeared in the *Army and Navy Gazette.* There are, however, many improvements in the engines of the Collingwood, and amongst others, forced draught fittings, which do not, however, appear to have given any very great results when tried on Tuesday. Throughout the trials the ship was under the command of Capt. Colomb, of the Steam Reserve, the experimental trials being conducted by Mr. Robert H. Humphrys, of the contractors' firm, at the request of the Admiralty, the officers in attendance being Mr. Sennett, of the Admiralty, Mr. Alton, Chief Inspector of Machinery, Mr. Corner, of the Steam Department, and Mr. Boyd, chief engineer of the ship. The engines were at first tested at the comparatively low speeds of eight and ten knots—speeds which will be generally observed during a commission, except upon special occasions. The draught of the ship on this and subsequent trials was 22 ft. 9 in. forward and 24 ft. 3 in. aft, giving a mean draught of 23 ft. 6 in., with amidship section of 1,330 square feet, and a displacement of 8,060 tons. Four runs only on the measured mile in Stokes Bay were made at eight knots, but at ten knots the engines were kept continuously working for four hours. The final trials consisted of the contractors' trial, during which the ship was kept for six consecutive hours at her utmost power under natural draught, and without the use of the blast ; and a three-hours' spin with closed stokeholes and forced draught, at a pressure equal to an inch of water. The last-mentioned trial was considered of great importance, as it is intended to provide similar fittings for forced draught to all the armour-clads now in course of construction, and the following officers attended specially in consequence, viz. :—Admiral Sir G. P. Hornby, Commander-in-Chief at Portsmouth ; Rear-Admiral Herbert, Superintendent of the Dockyard ; Mr. N. Barnaby, C.B., Director of Naval Construction ; Mr. J. Wright, C.B., Engineer-in-Chief of the Navy ; Capt. Fitzroy, R.N. ; and Mr. Durston, Chief Engineer of Portsmouth Yard. So far as the contractors are concerned, everything went off most satisfactorily. The engines worked smoothly and without hitch. The mean power realised exceeded that contracted for by 1,100 horses, and with the forced draught 300 horses more were obtained than it was expected would have been the case.

Commenting on these trials, the *Times* remarks that, although "the speed realised by the ship was greater than has ever yet been realised by any similar armour-clad, and was probably greater than she will ever attain again, the experience gained from the trial will probably tend to accelerate the speed of subsequent ships of the type. There can be little doubt that the diameter of the blades of her propellers was too great, and that much of the power of the engines was wasted in consequence. The diameter is 18 ft. 6 in. ; and at the number of revolutions of the engines recorded at the final trial, the tips of the blades would cut circumferentially through the water at a rate of about a mile and a half a minute, or considerably in excess of the Flying Scotchman express. After the six hours' trial the pitch was fined from 19 ft. to 17 ft. 6 in., with a view of enabling the engines to use all the steam generated under forced draught. At the last trial, however, there was still steam passing through the safety valves which the engines could not utilise. Another circumstance which seriously handicapped the engines was the enormous waves thrown up by the ship. Although the sea was almost perfectly smooth, a solid body of water rose on each bow as high as the hawseholes, or 13 ft. in height, and then rolled over in a miniature Niagara ; and it is evident that until some change is made in the contours of the entrance, or some modification in the attachments of the ram, any addition of power developed by the engines will be largely absorbed in making and dispersing waves. On the return to Spithead the engines were worked for half an hour with the jet injection, when with 65 revolutions a power of 2,975·33 horses were obtained. At the conclusion of the run Mr. Humphrys was warmly congratulated by the officers in attendance on the success which had attended the extended series of trials." Dollond's electric anemometer was used at the last trial to indicate the speed on the bridge shown by the patent log in the water astern.

A CASE OF DISTRESS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—May I ask your kind help on behalf of a poor lady and her children, who from unavoidable circumstances are in great distress ? The lady in question is the widow of an officer in the Army, who died of consumption four years ago, leaving her with four children, three girls and one boy, aged 14, 12, 10, and 9, without any provision whatever. The eldest girl is being paid for by friends at the Princess Helena College, where she is training for a governess, and the poor mother's great anxiety is how to educate the two young girls, who must be enabled to earn their own living. The mother is partially paralysed herself, and thus unable to work for her children. Friends have up to this time contributed £75 per annum for her maintenance and that of her children, but from pecuniary losses they are unable to do so any longer. The boy, aged 16, is earning 14s. a week at the Great Northern Railway Station, and that is all the family have to depend on. It is not necessary to add any other comment to this tale of suffering and privation, except that they are now obliged to pawn their clothes, and unless some help is forthcoming the poor lady and her children must take refuge in the workhouse. It is in the hope of obviating this alternative I venture to ask for the publication of my letter. Any help will be gratefully received by Mrs. Francis Jenne, 37 Wimpole Street, or Lady Thompson, 35 Wimpole Street, to whom the facts are well known, and who will give any further particulars that may be desired.—I am, &c.,

37 Wimpole Street, W. MARY JEUNE.

DIMNESS of SIGHT.—Dimness of Sight and Blindness are often caused by the use of unsuitable Spectacles. Mr. H. LAURANCE, F.S.S., Oculist Optician, 1A Old Bond Street, scientifically adapts his improved Spectacles to strengthen and assist the weakest sights. Testimonials from Earl Lindsay, Sir Julius Benedict, F. D. Dixon Hartland, Esq., M.P., Thomas Cook, Esq., the well-known Tourist Agent, &c. Pamphlet, containing valuable suggestions, post free.

The Army.

3rd Dragoon Guards. Capt. F. Garratt, formerly of the regt., died at Hillingdon, Middlesex, on the 23rd inst., aged 69 years.

7th Dragoon Guards. Capt. Becher, and Lieuts. Ditmas and Barton, have been approved a committee of paymastership, vice Major and Paymr. Wheble, who has six months' leave. Brevet Lieut.-Col. Bibby comes home on six months' leave.

4th Hussars. The return match between teams of 12 men of the regiment and an equal number of the 1st V.B. Norfolk Regt. Saturday Club, took place on Saturday last at Norwich. The distances were 200, 500, and 600 yards. The following were the scores:—4th Hussars, 918; 1st V.B.N.R., 878; majority for the 4th Hussars, 40.

12th Lancers. Capt. Colquhoun succeeds Capt. Hill as adjt.

19th Hussars. The Cairo correspondent of the *Standard* writes:—"In reference to my recent telegram as to men purchasing their discharges, the regiment which was meant was the 19th Hussars, which has lost between 40 and 50 troopers since its return from Suakim, either by purchase or by expiration of service."

ROYAL ARTILLERY.

The Allahabad paper states that Lieut.-Col. Sir J. Campbell goes to Quetta after all, to command the Artillery, as under existing circumstances it is considered necessary to maintain the staff there complete.

Major Spring took over the duties of Inspector-Gen. of Ordnance, Bengal, on April 15, from Major Fletcher, who assumes the duties of Assist.-Inspector-Gen. of Ordnance.

We learn from India that Lieut.-Col. Smith expects to get the command of the Sirhind or Meerut Division, in the changes about to take place in the Royal Artillery.

Capt. Gordon, Assist.-Superintendent, Futtegurh, has been appointed Officiating Superintendent of the Gun Carriage Factory, Madras.

Major Smith, Commandant No. 2 Baty., Ellichpore, after a service of nearly twelve years in the Hyderabad Contingent, has vacated his command on promotion.

While J Baty. A Brig. R.H.A. was making experiments in firing at Umballa lately, a charge did not explode at the proper time, and on Lieut. Crofton approaching the muzzle to find out the cause, the shell exploded almost in his face, a splinter entering one of his eyes. It is feared the sight will be destroyed.

Col. W. Denis de Vitre, R.H.A., is returuing home from India, his period of command of an artillery division in that country having expired.

Capt. H. P. Russell, adjt., 2nd Brig., South Irish Division (West Cork Militia), has been transferred to the 8th Brig., North Irish Division (Sligo Militia) vice Major Sir C. Larcom, Bart.

Capt. A. H. Whithorne has passed the higher standard in Persian, and Lieuts. J. D. H. Waller and P. W. D. Brockman the higher standard in Hindostanee.

Rdgmr. J. Stevens has been ordered from Aldershot to Hilsea for duty with the Depôt Baty. 4th Brigade. Lieut.-Col. P. B. Raikes has been posted to the Southern Division, Sandown, I.W. Major S. G. Smyth has been posted to S-1, Bangalore. Capt. W. S. Churchward has been posted to P-2, at Aldershot. Major A. W. White has been ordered to join at Aldershot as instructor in gunnery for range-finding.

ROYAL ENGINEERS.

Lieut. H. E. Morgan Lindsay has been ordered to Bristol on duty.

The *Egyptian Gazette* says:—"Lieut. S. Thomson has been appointed on the Staff of Lieut.-Gen. Sir F. Stephenson, commanding the Army of Occupation in Egypt, as Brigade-Major of the Royal Engineers, vice Capt. A. O. Green."

Lieut. H. F. Chesney has passed the higher standard in Persian.

The *Times* says:—"The new balloon corps ordered to be formed at Chatham is now complete. The corps will be under the command of Major Elsdale, R.E., and the other officers who have been appointed to it are Major Templer, King's Royal Rifles, and Lieut. Macdonald, R.E. Other officers will also be appointed. The corps is composed of men who have been selected from the corps of Royal Engineers, and consisting of trained telegraphists, smiths, riggers, carpenters, &c., and a school of instruction will be formed at Chatham. The men will be provided with a special uniform, and the non-commissioned officers will have distinguishing ranks, such as assistant æronauts, &c."

Grenadier Guards. The 1st Batn. left Chelsea Barracks on Saturday last for Pirbright Camp, near Aldershot, for a course of musketry and military training.

3rd Buffs (East Kent Regiment). The serjeant-major and serjeants of the 2nd Batn. gave their annual ball in the recreation room and garrison theatre, Hong Kong, last month. Amongst the guests present were H.E. the Governor and the Misses Bowen, Gen. Sargent, Mrs. and the Misses Sargent, Col. and Mrs. Graves, Mrs. Backhouse, and a number of officers.

4th King's Own (Royal Lancaster) Regiment. It is understood that, on Col. Lock vacating command of the 4th Regtl. District on the 20th prox., Col. C. Eccles, at present commanding the 101st Regtl. District, will be transferred thereto. Col. Eccles has the esteem and good wishes of all under him in his present command, and during his short sojourn in Tralee has been most deservedly popular. He formerly belonged to the Royal Lancaster Regt. Col. F. D. Johnstone, late Royal Sussex Regt., is named as the probable successor of Col. Eccles to command the 101st Regtl. District.

12th Suffolk Regiment. Lieuts. Waller and Dillon, 1st Batn., have passed the higher-standard examination in Hindostanee.

14th West Yorkshire Regiment. The regimental paper of the 2nd Batn. contains the following "Notes":—"Capt. and Adjt. Kitchener has proceeded on two months' leave of absence to Simla, his duties being taken over by Lieut. Fry during his absence. Capt. Adye has reported his arrival at head-quarters, and proceeds to Umritsur to take over G Compy. Lieut. Roberts has proceeded home to England on nine months' privilege leave. Lieut. Vialls has proceeded home on medical certificate. Capt. St. George and Lieut. Cayley, in charge of the convalescents for Dalhousie, left us on the 2nd of last month to pass their hot weather in 'fresh fields and pastures new.'" Lieut.-Col. Dixon, 2nd Batn., has assumed command at Umritsur.

15th East Yorkshire Regiment. Lieut.-Col. Burnett, 2nd Batn., has been appointed officiating D.A.G. of the Bombay Army; and Major Dundas D.A.A.G. of the Bombay District, has been appointed officiating A.A.G. at Mhow.

19th Yorkshire Regiment. An inquest was held at Holyhead on the body of Major and Pymr. Elliot, who jumped overboard from the steamer Violet between Dublin and Holyhead on the night of the 26th inst. The deceased was up to a recent date serving in India, where he had an attack of sunstroke, from which, according to the statement of the medical officer of his regiment, he constantly suffered. The jury returned a verdict of temporary insanity.

18th Royal Irish Regiment. Lieut. Doran, 1st Batn., has passed the higher-standard examination in Hindostanee.

23rd Royal Welsh Fusiliers. Col. Elgee, 1st Batn., is about to obtain the acting command of a brigade in India.

25th King's Own Borderers. Col. Harvey, 1st Batn., has been appointed to the command of the Saugor District, vice Brigdr.-Gen. Murray, who comes home on six months' leave.

27th Royal Inniskilling Fusiliers. Major-Gen. Sargent, commanding at Hong Kong, inspected the regiment on April 25 at Singapore. The General expressed himself very much pleased with the cleanliness, good order, drill, and efficiency of the regiment.

33rd West Riding Regiment. Lieut. Anderson has passed the higher standard in Hindostanee.

39th Dorsetshire Regiment has been clothed with the new khaki uniform, and will wear it during the summer drills. It will be suitable for summer and winter in cool climates, a waistcoat, or jersey, being provided, to be worn underneath when required. A greatcoat of the same colour, but somewhat thicker material, is also being made, and will shortly be issued to the battalion.

40th South Lancashire Regiment left Peshawur on April 30 for Cherat, where it arrived on May 2. Lieut. Smythies has passed the higher standard in Hindostanee. Major Linton arrived in England on Thursday last, on leave from India.

ROYAL MARINES.

The following officers have been granted leave:—Capt. Burrowes, for 14 days; Lieut. Johnstone, for one month, on disembarkation; Col.-Comdt. Meade, for one month; Lieut. Swanton, for two months, on disembarkation.

53rd King's (Shropshire) Light Infantry. Brevet Major Hitchcock, brigade-major in Egypt, has special leave to England till July 18.

54th Dorsetshire Regiment. Lieut. Payne has passed the higher standard in the Persian language.

60th King's Royal Rifle Corps. Capt. Wells is ordered to join the 3rd from the 4th Batn., on promotion. Lieut. Kays, 4th Batn., has been ordered home for depôt duty.

61st Gloucestershire Regiment. Lieut. Stewart has passed the higher standard in Hindostanee.

65th York and Lancaster Regiment. We gladly comply with the request of Major-Gen. Newdigate and Lieut.-Col. Byam, and publish the following letters which they have addressed to us relative to a paragraph which appeared in the London and provincial papers last week:—"Sir,—My attention has been called to the following paragraph in your issue of the 24th inst.:—'65th York and Lancaster Regiment.—At a court-martial held at Dover on Friday, two privates were sentenced to two years' imprisonment each for cowardice on the battle-field.' I beg to inform you that no man of the regiment has been tried at Dover for any offence of the kind.—I am, Sir, yours, &c., Edward Newdigate, Major-Gen., Commanding S.E. District, Dover Castle, May 28."——"Sir,—In your issue of the 24th inst., in a paragraph relative to an 'Extraordinary Court-martial at Dover,' you say, 'It is to be regretted, we think, that no account of this particular court-martial has been, as far as we know, made public;' and you also, under regimental news, state two men, 65th, have been tried at Dover for cowardice in the field. I beg to inform you that no such court-martial has taken place at Dover, nor has any soldier of the regiment been tried by district or other court-martial for any such offence since the regiment returned from service in the Soudan. I have to request that you will be good enough to publish a statement to this effect in your next issue.—I am, Sir, yours, &c., Wm. Byam, Lieut.-Col. Commanding 1st Batn. the York and Lancaster Regt. (late 65th Foot), Army and Navy Club, Pall Mall, S.W., May 28."

70th East Surrey Regiment. Qrmr. Harrison has leave from England for 12 months, on medical certificate.

77th Middlesex Regiment. Lieut. Smart has passed the higher standard in Hindostanee.

81st Loyal North Lancashire Regiment. Lieuts. Savage and Ellison, probationers for the Staff Corps, have passed the higher standard in Hindostanee.

85th Shropshire Light Infantry. Major-Gen. Lyons inspected the ranks before the batn. left Aldershot, and reports that the creditable appearance and high character for good-conduct and efficiency gained in brigade, has been most amply justified by their smart and soldier-like bearing on departure.

87th Royal Irish Fusiliers. Lieut. Harrison is a candidate for the Indian S. C., and has been posted to the 2nd Sikh Infantry, on probation. Lieut. Blood has passed the higher standard in Hindostanee.

89th Royal Irish Fusiliers. Lieut. Jermyn has passed the higher-standard examination in Hindostanee.

95th Sherwood Foresters (Derbyshire Regiment). Major De Salis died at Jersey on the 27th inst. The deceased, who was third son of the late Major I. de Salis, joined the Army, May 1, 1859; became lieut., April 26, 1864; capt., July 21, 1875; and major, July 1, 1881.

102nd Royal Dublin Fusiliers. Major Riddell proceeds to Gibraltar shortly to rejoin head-quarters, from depôt duty. He is succeeded at the depôt by Major Holmes.

103rd Royal Dublin Fusiliers. Capt. Cooper has been appointed Adjt. of the 4th Batn., vice Major Holmes, whose period of service in the appointment expires on the 10th prox.

105th King's Own Light Infantry. Capt. Stokes, D.A.C.G., has passed in (*a*) and (*b*) subjects for promotion to the rank of Major. Capt. Milton is posted to the regiment, on promotion from the 51st L.I.

107th Royal Sussex Regiment. Lieut. Woodhouse resigns his probationary appointment for the Indian S.C., and resumes regimental duty. Lieut. Du Moulin has been appointed Superintendent of Gymnasia at Malta from May 15.

Rifle Brigade. Capt. the Hon. E. Noel, 1st Batn., has leave from India for fifteen months, on medical certificate. Lieut. Drummond, 1st Batn., has applied to retire. Major Lindsay, 3rd Batn., has been appointed Adjt. of the 9th Batn. (Westmeath Militia).

The Auxiliary Forces.

MILITIA.

Royal Irish Fusiliers. The 3rd Batn., under command of Col. Stanley, has assembled for training at Armagh. Strength—4 field officers, 4 capts., 7 lieuts., adjt., qrmr., surg., 1 warrant officer, 30 serjts., 28 corpls., 557 privates, and 8 drummers.

Royal Inniskilling Fusiliers. The 4th Batn., under command of Col. M'Clintock, now out for training at Omagh, musters 3 field officers, 9 capts., 10 lieuts., adjt., qrmr., 2 surgs., 31 serjts., and 499 rank and file.

Black Watch (Royal Highlanders). The officers of the 3rd Batn. held their annual dinner at Limmer's Hotel on Thursday evening. Present:—Lieut.-Cols Viscount Stormont and Lord C. L. Kerr; Majors Sandeman, Ogilvy, and Craigie; Capts. Dundas and Sir D. A. D. Campbell, Bart.; Lieuts. Hon. W. C. W. Rollo and Hon. A. D. Murray; Messrs. Wyllie, M'Dougal, and Brown-Morrison.

3rd Battalion, Yorkshire Regiment, under the command of Col. Gunter of Wetherby,—the state showing a total rank and file effective of 937 men, which is considerably over the present establishment,—was inspected by Gen. Willis on Tuesday last, at York. The General, at the end of the inspection, expressed himself in flattering terms respecting the state of the regiment, and desired that his remarks should be placed in the order book and read to the men. He noticed their orderly and soldierlike appearance and smartness in the streets, their general good behaviour, their grand physique, and the strength of the battalion. Col. Gunter and the officers gave an excellent ball in the mess-room in the New Infantry Barracks on Friday, the 23rd, which was largely attended, and much enjoyed by upwards of 200 guests. The dismissal of the regiment, which is most popular in York, will be much regretted.

Royal Munster Fusiliers. The 5th Batn. (Limerick County Militia) were inspected on the 22nd inst. by Col. Eccles, commanding the 101st Regimental District. The battalion was under command of Lieut.-Col. the Earl of Limerick. The number on parade was 630. The following officers were present in addition to Lord Limerick:—Col. Howley, Col. Finch; Majors Sheehy and Cradock; Capts. Conyers, Gubbins, Furlonge, Gloster, Hon. H. De E. V. Perry, and Naish; Lieuts. Reeves, M'Mahon, Green, Chute, Pelham Clay, Viscount Glentworth, Finch, O. Glynn, Wilkinson, and Fitzgerald; Surg.-Major Enright. The inspecting officer complimented the officers on the highly creditable bearing of their companies. The regiment was disbanded on Saturday.

The following is a list, in the order of merit, and with the total number of marks obtained, of the lieutenants of Militia recommended for commissions in the Army who are reported as having passed the qualifying examination held by the Civil Service Commissioners, in April, 1884:—E. G. V. Stanley, 5,517; H. H. H. Dowding, 4,012; W. E. R. Collis, 3,991; L. O. Williams, 3,619; F. C. L. Logan, 3,248; W. Goring, 3,156; R. P. M. Cochrane, 3,121; A. H. Bindloss, 3,117; F. L. de S. la Terrière, 3,061; H. R. Elmhirst, 3,041; A. P. Arnold, 2,894; C. E. Radclyffe, 2,864; G. B. M. Rawlinson, 2,795; H. W. C. Colquhoun, 2,739; H. E. Walker, 2,697; E. Howell, 2,655; V. G. Whitla, 2,643; E. C. Turner, 2,642; D. F. Loftus, 2,613; P. C. Palin, 2,606; R. L. Hartley, 2,583; the Hon. P. B. J. Petre, 2,572; W. H. W. A. Foster, 2,514; W. G. B. Browne, 2,506; E. B. Rawlins, 2,376; A. J. Mitchell, 2,324; A. F. Salmon, 2,124: S. R. L. White, 2,091; B. W. L. M'Mahon, 2,090; W. S. Brooksbank, 2,077; F. D. J. Annesley, 2,019; F. M. Sandys-Lumsdaine, 1,963; H. C. W. Hamilton, 1,943; A. V. Barrett, 1,900; C. P. L'E. Parkinson, 1,837; J. S. Jones, 1,780; W. J. Need, 1,713; S. J. Flower, 1,706; R. E. Coyte, 1,655. In addition to the above, the following candidates passed a qualifying examination in geometrical drawing:—C. F. Pinney and J. M. Wingfield.

YEOMANRY CAVALRY.

Royal East Kent Mounted Rifles. The training was brought to a close on the 23rd inst., when the regiment underwent inspection at Updown, near Margate.

Capt. Trew, Middlesex; Lieuts. Maclaine, Gloucestershire; Matthews and Ingram, Middlesex; Williams-Wynn, Montgomeryshire; Straker and Fenwick, Northumberland; Smith and Howard, Worcestershire; Meysey-Thompson, Yorkshire Hussars; and Baxter, Fifeshire Light Horse Volunteers, have been ordered to join the Auxiliary Cavalry School on the 2nd prox.

THE VOLUNTEERS.

24th Middlesex (Post Office) Volunteers were inspected by Col. Clive, Grenadier Guards, in Hyde Park, on Saturday last. The regiment, in 10 companies (933 of all ranks), paraded at St. George's Barracks, whence they marched to the park. Lieut.-Col. Du Plat Taylor was in command of the corps. Col. Clive said the movements bore evidence of their being a well-drilled and thoroughly efficient regiment. He was especially pleased with the bayonet exercise. Military men took great interest in the Post Office Corps, because many of them were not only Volunteers, but "soldiers" in the full sense of the word. From what he had seen of their newest development, the Postal Telegraph Corps, he believed that they would distinguish themselves as much as their comrades of the Postal Corps did in a recent campaign.

5th Lancashire (Liverpool Rifle Brigade). Twenty officers and 400 men will leave Liverpool for Aldershot today, for a week's training. This detachment is to be attached to the 1st Brigade (Major-Gen. Lyon), and will be quartered in the South Camp.

The following corps in the S.-E. District are allowed to form camps of instruction:—2nd Batn. East Kent Regt., up to May 31, at Lamberhurst; 1st Cinque Ports R.V., May 31 to June 7, at Lewes; 2nd Sussex R.V., June 27 to July 5, at Arundel Park; 1st Vol. Batn. East Kent Regt., July 5 to 12, at Shorncliffe; 2nd Vol. Batn. Royal West Kent Regt., July 14 to 21, at Grove Park; and 1st Vol. Batn. Royal West Kent Regt., July 28 to Aug. 2, at Eridge.

It is computed that about 40,000 Volunteers will go in a camp in the Northern District during the drill season, to vast majority for the whole period of seven days; but it is not expected the full allowance will be given to any corps. Only £18,250 has been granted by the Treasury, which is but a trifle over 9s. per man.

A meeting of the National Rifle Association was held on Tuesday at the Royal United Service Institution, Sir H. Wilmot presiding. The chairman remarked that the programmes for the forthcoming meeting at Wimbledon had been delayed by the various changes that it had been necessary to introduce into the prize-list, as well as by the alteration in the conditions of shooting, owing to the introduction of the Martini-Henry rifle. The Council had adopted a new form of dummy target, and the system of marking had also undergone revision. The Secretary of State for War had notified the Council that a further issue of Martini-Henry rifles would be made to Volunteers, and that arm would be allowed to be used in all cases where the Snider had previously been allowed except the Public Schools competition. The amount granted by the association to the money prizes would be increased this year to the extent of £1,200. The bi-diurnal competitions would be closed during the next meeting at 5.30 p.m., and a new series of competitions would be opened after that hour. Several new prizes had been offered by various firms for competition, and the Glen Albyn and Windmill prizes had been reunited. The Canadian team would again occupy their former quarters, and it was hoped that an Indian team would also be present. The meeting would commence on July 14, and the camp would be ready for occupation on the 12th of that month. He regretted to say that the association would lose the services of Major Urquhart, who had retired from the service, but an efficient successor had been found in Major Colebrook Carter, adjutant of the Berkshire Regiment. A vote of thanks to Sir Henry Wilmot closed the proceedings.

The *Standard* correspondent at Cairo telegraphs:—"In reference to questions and answers given in the House of Commons on the subject of soldiers leaving their regiments, I am enabled by the courtesy of the Head-quarter Staff to day to give some official figures of the returns of the last six weeks. The returns show that the 19th Hussars lost during that time nine men by purchase, eleven time-expired, seven by free discharge, and eleven invalids. The Royal Sussex lost four by purchase, 26 time-expired, and ten by free discharge. Amongst other regiments, I may notice that the G B. H. A., composed of about 130 men, lost four time-expired men, and twelve by free discharge. The total of time-expired men who went home by the Orontes on May 19 was 225, and free discharge was granted to 37 men, who were only allowed to purchase or take free discharges from the middle of last month, which perhaps accounts for the apparently large numbers lately lost to the service."

The Committee on Shipbuilding and Repairs—the Earl of Ravensworth (chairman), Sir Daniel Gooch, M.P., Capt. Codrington, R.N., C.B., Mr. C. M. Palmer, M.P., Mr. Norwood, M.P., Mr. Samuda, and Mr. F. H. Miller, secretary—assembled on Monday at 36 Spring Gardens to hear the views of Sir E. J. Read, Chief Constructor from 1863 to 1870.

Admiral Miot assumed command of the French forces in Madagascar on May 8. He will shortly have eleven ships at his disposal, and is on a tour round the island to see if the blockade is effectual. A battalion of Marines from Tonquin will reinforce the Admiral.

An interesting series of manœuvres was carried out on Monday at Wimbledon, under Col. Duncombe, 1st Life Guards, by E Baty. R.H.A., from St. John's Wood; 1st Life Guards, from Regent's Park; 2nd Life Guards, from Hyde Park; and 3rd Hussars, from Hounslow.

The flag of the Commander-in-Chief, on his proceeding on leave, was struck on board the Royal Adelaide, and the flag of the Admiral Superintendent transferred to that ship, on May 24.

A Delicious Cooling Drink is supplied in Rose's Lime Juice Cordial in water; effervescing in all the Mineral Waters. It is non-alcoholic, and highly medicinal, purifying the blood. Recommended by the *Lancet*, and Medical Profession. Sold everywhere. Purchasers should order Rose's Cordial. Wholesale Stores—11 Curtain Road, London; and Leith, N.B.

FRIDAY EVENING.

ARMY.

INDIA OFFICE, May 30, 1884.

The following appointments have been made to the Personal Staff in India:—Lieuts. E. R. Owen, Lancashire Fusiliers, to be Extra Aide-de-Camp to the Viceroy and Governor-General (April 13); W. A. B. Dennys, Bengal S.C., to be Aide-de-Camp to the Lieutenant-Governor of the Punjab (April 1).

The following appointments have been made to the Staff of the Army in India:—Col. M. Elliot, R.A., to be Deputy-Adjt.-Gen., R.A., in India, vice Col. T. E. Hughes, appointed Director-General of Ordnance in India (April 12); Major H. M'L. Hutchinson, West Yorkshire Regt., to be Assist.-Adjt.-Gen. for Musketry, Bengal Establishment, vice Major W. C. Mackinnon, whose tenure of appointment has expired (April 2); Lieut.-Col. D. M. Strong, Bengal Infantry, to be an Assist.-Qrmr.-Gen., Bengal Establishment, vice Col. H. A. Little, who vacates (March 26); Major W. Stainforth, Madras Infantry, to be a Deputy-Assist.-Adjt.-Gen. for Musketry, Madras Establishment, vice Lieut.-Col. E. Austin, whose tenure of appointment has expired (April 15); Lieut..Col. G. Swinley, R.A., to be an Assist.-Qrmr.-Gen., Madras Establishment, vice Major D. J. S. McLeod, whose tenure of appointment has expired (Feb. 23).

An interesting episode occurred in connection with the relinquishing of the command of the Polyphemus by Com. May, to take up an appointment as commander of the Royal yacht Victoria and Albert. On leaving the Calypso, where the Polyphemus's crew is at present hulked, in the gig, which was manned wholly by the officers of the Polyphemus, the crew gave a most flattering and energetic expression of their regard for their late commander, and were with difficulty restrained from breaking the rules of the port prohibiting cheering. The officers were only too sorry to reach the Osborne and leave their gallant and distinguished captain behind. They entertained their late captain at dinner last week, taking the opportunity through their spokesmen, Lieut. R. W. Wellings (in temporary command) and Chief Engineer J. Bannatyne, of expressing their regret at losing so good a captain and kind a friend, their only consolation being the professional advancement the step brought about.

Capt. Wilson returned to his home at Swaffham on Thursday, and met with an enthusiastic public reception. A procession, consisting of the Rifle Volunteers, pensioners, carriages of the local gentry, and school children, escorted him to the house of his mother, the band playing and the church bells being rung in his honour.

ROYAL CAMBRIDGE ASYLUM for SOLDIERS' WIDOWS.—Office, 40 Charing Cross, S.W.—The following were the SUCCESSFUL CANDIDATES for ADMISSION into the ASYLUM at the Election on May 24, 1884:—

Guaranteed Pure Soluble Cocoa, without Sugar, Spice, or any Admixture.

Specially adapted for Ships, Camps, Sportsmen, &c., being in a concentrated form, made with BOILING Water. Keeps in all climates, and palatable without milk.

Being all Cocoa, it is four times the strength of preparations mixed and therefore *weakened* with arrowroot, &c., and is in reality cheaper, a Tea-spoonful to a Breakfast Cup costing less than a halfpenny.

The Faculty pronounce it "the most nutritious, perfectly digestible Beverage for Breakfast, Luncheon, or Supper," and invaluable for Invalids and young Children. Samples per post.

Highly commended by the entire Medical Press.
Adopted as a Medical Comfort in H.M.'s Royal Navy.
In air-tight canisters at 1s 6d, 3s, 5s 6d, &c., by Chemists and Grocers.

Army & Navy Gazette.

LONDON, SATURDAY, MAY 31, 1884.

SO much attention has recently been directed towards the exertions made by the French Government to place their Navy on an equality with that of this country, that it is well worth while to compare the French "Budget des Dépenses du Ministère de la Marine et des Colonies" with our Navy Estimates, and to see for ourselves whether they do not in many respects "manage these things better in France," notwithstanding the burning light of criticism to which dockyard management especially has been and is exposed in England. We propose, then, to give a few facts and figures of comparison between the two Navies; but before doing so, we must observe that the French Estimates include not only the Artillery Naval vote, which, again, includes sums for the protection of Naval arsenals, but also the Colonial vote, which are wanting in the English Estimates. The French Estimates, too, are for the whole year 1884, and are called "Budget . . . . . . pour l'exercise, 1885;" whereas our Estimates for 1884-85 are up to the close of the financial year in March, 1885. Sir T. Symonds is, therefore, not correct in supposing that the French Estimates are a year in advance of ours, as at the present moment the provision made is only to the end of the present year, or three months less than is done by the English Estimates. The gross total to be provided stands as follows:—England, £10,680,870; France, £11,563,623; but if we deduct the purely Colonial vote, it is reduced to £9,867,822. It still, however, includes the Vote for Artillery, which must be deducted to make a fair comparison. This vote for Artillery is a large one, amounting to no less a sum than £655,421 in the ordinary Estimates; but in addition to this, there is a sum of £348,000 under "dépenses extraordinaires," which is further explained as being necessary for "les travaux qui restent à executer pour compléter au point de vue de l'artillerie, l'armement de la flotte, celui des forts destinés à protéger les rades," &c. Adding these two amounts, we arrive at the large item of £1,003,421, which must be taken as the Naval Artillery vote, though a small portion of it should be due to those batteries. Deducting this amount, the French Navy Estimates proper for comparison with ours are reduced to £8,864,401, or nearly two millions less than the figures of the English Estimates. But we have a much larger non-effective vote in England than in France, that of this country amounting in round numbers to £2,000,000, that of France to £1,500,000, and of this latter sum nearly half a million is repaid by forced contributions levied on the French Naval, Colonial, and Mercantile Marine services, for the benefit of the Caisse des Invalides. Deducting, then, the non-effective vote in both countries, the sums expended for effective services are as follows: England, £8,608,970; France, £7,396,579. Let us see how in general these sums are expended, taking the English votes as our basis of comparison, and using round numbers for the purpose of convenience. In Votes 1 and 2, for wages and victuals for a total of 56,950 officers, men, boys, and Marines, we take a vote of £3,500,000; the corresponding votes in France for 57,016 men, including 19,305 "troupes and gendarmerie," amount to £3,250,000, or a quarter of a million less for an almost exactly similar number of men, which, considering that there is no maritime conscription in England, and the greater expense of living in this country, would not point to the conclusion that our officers and men are either too well paid or too well fed as compared with the French. Turning now to the Dockyard Votes 6 and 10, we find them amounting in the aggregate to £3,750,000, while the French votes come to £2,900,000. The French are accordingly spending less in dockyard and contract work by £850,000 than we are; but leaving out of the question for the present the ironclad shipbuilding vote, our much larger number of cruisers and our foreign yards would naturally demand a greater expense. There is, however, probably another reason for the greater apparent expense in these votes in England, in that the gun fittings, which are an increasingly expensive item, are included with our naval dockyard votes, whereas they are very properly included in France with the artillery vote. This points to the necessity for including the Naval Artillery vote in the Navy in lieu of the Army Estimates, as advocated by Sir T. Brassey and others, and that all the expense of gunnery fittings should be shown under a heading distinct from shipbuilding expenses, as is done in France for "installation et la mise en place de l'armament." Let us look again at these Dockyard Votes, and see what is expended in the construction of ironclads, and what we get for our money. In England we are spending for hulls and machinery this year £1,216,000, while in France they are spending £1,025,000. In England we are building twelve ironclads; in France, they have twelve cuirassés d'Escadre, three cuirassés de stations, and eight canonnières cuirassés in hand. If we add together the amount in hundredths to be built this year in both countries, assuming each to carry out its programme, and taking four canonnières cuirassés as equivalent to one ironclad, we find that, allowing 30 for the *Benbow*, the English propose to build 2·11 ironclads this year, and the French 2·36. As we have before remarked, it is probable that the expense of gun fittings included in our Dockyard Votes, and not in the French, is the cause of the apparently greater expense of our ships. It is evident, however, that the French are building at a slightly greater rate than we are, apparently, for less money, though it is not clear whether their ships are really cheaper than ours. So far in the main items of expenditure there is no great discrepancy, and it would appear that the great advance being made by the French Navy is rather in guns and armament than in ships; but there is one Vote where the difference between the expenditure in France and in England is extraordinary. Our Admiralty-Office Vote amounts to £188,000, and it is remarkable that it has increased nearly £10,000 in the last two years. The French vote for "Traitement de Ministre et Personnel de l'Administration Centrale" and other offices for the Navy and Colonies amounts to only £51,000. This is, indeed, a difference; but as we are quite accustomed to general reductions with the addition of a few more clerks as further checks on expenditure, we cannot pretend to be surprised. It is impossible to deal in one article with all the questions of interest raised by a comparison of the two Estimates, and we hope to return to the subject shortly. To sum up our conclusions, the most striking points are the large sum, exceeding £1,000,000, voted in France for Naval artillery and gunnery fittings, with the necessity which exists for the Vote for Naval Ordnance to be transferred from our Army to Navy Estimates; and the enormous expense of our Admiralty Office, caused by centralisation and that mania for red-tape and clerical labour which constantly increases the number of clerks, resulting in calculations and paper work rather than in true efficiency.

It has been decided, we hear, to grant a medal to those who took part in the recent operations in the Soudan, with two clasps for those who were present at both engagements.

It is not pleasant to read that the English force at Pietermaritzburg under our only General in that part of the world, is inadequate to meet with some difficulty or emergency, supposed by the correspondents at Durban to exist for the employment of force to maintain order; but if the newly-crowned King of Zululand really carries out the policy which the Boers are said to have impressed upon him, there seems no great reason for us to interfere in Zululand, although it may be difficult to show what right the Boer chairman and his followers had to confer a crown on Dinizulu. It is true, indeed, that the Boers crowned Panda long ago; but the English Government interrupted the line of Panda's succession, and Sir Garnet Wolseley, by order, raised up in its place what an Irish gentleman called "a heptarchy of thirteen." But many things have happened since then,—amongst other things, the re-establishment of the Republic of South Africa, the retrocession of the Transvaal to the Boers themselves, and their entry upon a portion of Zululand which they claimed before Lord Chelmsford's campaign and Lord Wolseley's settlement. We fear, however, that King Dunn may not be inclined to accept the other king,—Dinizulu.

The appointment of Serjeant-Instructor of Musketry in battalions will cease from the date of embarkation for foreign service.

The *Times*' correspondent at Berlin sent an interesting account by telegraph of the grand inspection at Berlin of the troops by the Emperor. "Aye, every inch a King! He, indeed, is a grand old man!" Even our own War Office might fairly admit that their helmeted children could not make such a show as the Corps of Guards garrisoning Berlin, amounting to 27 battalions, 20 squadrons, and 20 batteries, exhibited on the parade, any more than they could turn out to order such a leader of men as he of whom the *Times* correspondent writes. And well might "a murmur of wonder and admiration ripple over the multitude of spectators" as the Emperor, on the sixth stroke of the eleventh hour, mounted his favourite charger, and for two hours and a half, regardless of the unkindly north-west wind, spurts of rain and unpleasant dust, triumphantly kept to the saddle, supported by the pleasure he gives and receives in inspecting his helmeted children.

From Egypt there comes, as the week closes, very little news about Gordon, but a great deal of carping about French ascendancy, and much mention of Zebehr. There is no doubt about the preparatory measures which have been for some time in a state, if we may say so, of conception, having now approached the egg form. The *Times*' correspondent has almost suddenly declared open war against his old friend, Nubar Pasha, and seems quite struck with astonishment that Mons. Barrère should be in favour rather of French than of English interests. We do not know that there is anything to be said against Mr. Egerton's fitness for the conduct of affairs, and therefore we shall not question the prudence or judgment displayed in leaving him without any counsellors at such a moment. All the strong heads appear to be away just now. Sir Evelyn Baring is in London; Mr. Clifford Lloyd is contending with agitated seas on his way home; Blum Pasha is in Europe; Tigrane Pasha, who is about to marry the daughter of Nubar Pasha, is in Paris. Probably the Government of Egypt is carried on by telegraph from Downing Street. Meanwhile, it seems to have occurred to somebody that it would be very desirable to communicate with Gordon, and easy to do it if the authorities would only use the proper instruments. What tricks fate is playing! Gordon created such an antipathy to Zebehr Pasha that it was found to be impossible for the Government to accede to Gordon's request, when, on his second visit to the Soudan, he sought, almost implored, the aid of the man who, on his first tour of government there, he denounced as the master slave-dealer, the cruel, ruthless devastator of Equatorial Africa, and whose son he shot, as Zebehr maintains, without adequate justification. Now, it is this very same Zebehr who is used by the Egyptian authorities and by the British Government to find out in what circumstances Gordon is placed at Khartoum, and to open communications which all other influence is unable to establish!

Major Hutton, Brigade-Major, is held in readiness for special service in Egypt.

It is to be regretted, we think, that two officers who have so much distinguished themselves as Sir Henry Havelock-Allan and Colonel Burnaby should not be content with washing their dirty linen in their private bath-rooms, or in whatever other suitable spot might be selected by them for the purpose. The first inherits a name of historical interest, which was illustrated by the career of a soldier whose reputation is dear to his countrymen, and he has proved that he inherited the qualities of his father, although opportunity was not given to him to exemplify them in such conspicuous fields of action as the relief of Lucknow. The other has made a name for himself by daring venture, and by what may be termed officious interference in active campaigning wherever it has been going on; and it was not his fault that he was debarred from being associated with the fortunes of the Household Cavalry in the Egyptian Campaign, for the exclusion from which he has sought to recoup himself by fighting under Baker and Graham. "It was the kettle began it." We shall not pretend to say who the kettle is; but anyhow, it would be much better if the song ceased. If they cannot kiss and make friends, let these gallant soldiers at all events resolve to save from the public eye the spectacle of their contentions, carrying on, if needs be, their paper warfare in private.

We observe with regret that the Kheyls who inhabit the country north and west of the Kohat Pass have been troublesome, and that there has also been a little agitation on the Eusofzai frontier. Small clouds in that direction should always be closely watched.

Colonel Marter, King's Dragoon Guards, becomes a paid aide-de-camp to the Queen, vice Major-General Sir Redvers Buller.

A correspondent calls our attention to the omission of several names from the *Gazette* of honours and promotions for the battles on the western coast of the Red Sea near Suakim. It may be considered that where so many officers have been rewarded it is almost invidious to leave out others who have done as good work. Colonel Burnaby was specially mentioned in despatches both for personal conduct and for valuable service in the field, and, although he was a volunteer in the first instance, the moment he was attached to the staff of the Army, objections to his share in the honours on the score that he had no official status, ceased to have effect; and there, therefore, must be other reasons for his exclusion. What shall we say of the case of the Cavalry Brigade-Major, Lieutenant-Colonel Taylor, of the 19th Hussars; or of that of Lieutenant-Colonel Gordon, of the Princess Louise's Highlanders, and of others specially mentioned in despatches, and left out in the cold?

Colonel Grenfell, King's Royal Rifle Corps, has been placed on the establishment of Queen's aides-de-camp, to fill the vacancy caused by the promotion of Sir R. Buller.

Lieutenant Israel, who is described as an officer attached to the British Army in the Ashantee War, has been placed in command of the German expedition to Angra Pequena and the Congo; and already Dr. Nachtigal, the great African traveller, who has been appointed Consul-General of Germany in that part of the world, has arrived at Gibraltar with his companions on board the German gunboat *Möwe*, on his way to take over the control of the new settlement and dominion of the Emperor on the African coast; so that we seem likely to have a good many partners in our trading concerns in the interesting continent to which so many nations are now turning their eyes.

The Navy.

ADMIRALTY, May 26, 1884.

Staff Surg. H. C. Woods, M.D., has been promoted to the rank of Fleet Surg. in her Majesty's Fleet (May 22).

In accordance with the provisions of her Majesty's Order in Council of April 1, 1881, Fleet Surg. E. H. Evans has been placed on the Retired List, with permission to assume the rank and title of Deputy Inspector-General of Hospitals and Fleets (May 26).

ADMIRALTY, May 27, 1884.

In accordance with the provisions of her Majesty's Order in Council of Feb. 22, 1870, Com. E. J. Jermain has been placed on the Retired List, with permission to assume the rank and title of Retired Capt. (May 26).

ADMIRALTY, May 28, 1884.

In accordance with the provisions of her Majesty's Order in Council of April 30, 1877, Engineer W. Wallace has been placed on the Retired List of his rank (May 28).

APPOINTMENTS.

Commanders—Crawford J. M. Conybeare, to the Vernon, additional; Edward Chichester, to the Alexandra, additional.

Lieutenants—Ernest Kinder, to the Alexandra, additional; F. H. W. Freeman, to the Belleisle, additional, for service in the Hecate; Alexander M. Gardiner, to the Cygnet, in command.

Navigating Lieutenant—Charles R. H. Robinson, to the Asia, for the Euphrates.

Midshipman—The Hon. W. G. D. Fortescue, to the Carysfort.

Fleet Surgeons—G. Mair, M.D., to the Durham; Samuel Bamfield, to the Sultan.

Staff Surgeon—Richard V. McCarthy, to the Serapis.

Chief Engineers—Peter Eckford, to the Asia, for the Euphrates; Leonard Backler, to the Euryalus.

Surgeons—Percy W. Bassett-Smith, to the Triton; Denis W. Donovan, to the Monarch; Hugh W. McNamara, to the Helicon; Henry B. Collins, to the Woodlark.

Paymaster—William W. Perry, to the Hercules, temporary, additional.

Engineers—Cornelius Pitt, to the Asia, for the Euphrates; Frederick Mitchell, to the Pembroke; Quentin W. King, to the Invincible; William T. Searle, to the Defence.

Boatswains — James Taylor, to the Asia, for the Euphrates; John Widgers, to the Northumberland; Alfred Smith, to the Indus, for the Raleigh.

Carpenters—Allen Evans, to the Asia, for the Euphrates; Cornelius J. Blaker, to the Asia, supernumerary; Charles F. Roads, to the Asia, for the Volage; George J. Alexander, to the Hibernia, additional, for the Thunderer; Robert Higham, to the Urgent, additional, for Jamaica Yard.

COASTGUARD.

Surgeon and Agent—Mr. James J. H. Jackman, at Dunmore.

Albacore, Lieut. and Com. Smythies, arrived at Suakim on May 28.

Alexandra, Capt. Rawson, arrived at Alexandria on May 26. Com. E. Chichester has been appointed (additional) for transport duties.

Arab, Com. Stopford, was at Aden on May 27.

Banterer, Lieut. and Com. Haigh, arrived at Cahiriween on May 23 from Galway.

Carysfort, Capt. Stewart, is in dock at Malta. She is to be out of hand by the end of June; in the meantime, the crew are hulked on board the Hibernia, as are also 200 men, nearly all the gunroom officers, two lieutenants, and a surgeon, of the Temeraire, there being no room for the remainder, who remain on board their ship until the Carysfort's men turn over to their own ship, which will not, however, be for some time.

Cruiser, Com. Darwin, arrived at Algiers on May 23, and would leave on May 26.

Curacoa, Capt. Anstruther, and the Albatross, Com. Hicks, were at Woosung on April 12, when a very successful athletic sport meeting was organised by the crews of the ships in harbour. In addition to the usual flat races there were a number of amusing races. A seaman named Bell, belonging to the Curaçoa, has performed an act that deserves to be recorded. A marine fell into the water. Bell plunged in after him, but only succeeded in getting hold of the marine's cap. He dived again, and caught hold of the marine, who had sunk some distance, and succeeded in bringing him up. When they got to the surface another of the crew caught hold of them and got them out of the water. Both the men were much exhausted. Some English men-of-war's men on leave on April 14 got into a row on the French Concession. One of them had his head cut in three places by a French policeman. A picket from the Albatross took the man on board.

Cygnet, Lieut. and Com. Jauncey, arrived at Malta on May 12, from Port Said, to give leave to the ship's company. She has a defect in her propeller bearings, or stern tube. Her commander's health is not good, and it is feared that he will have to give up the command.

Firebrand, Lieut. and Com. Dickson, left Devonport on May 26 for a six hours' full-power trial in the Channel. The engines were worked by the engineer officer of the ship, Mr. E. Thomas, and Mr. Read, chief engineer, watched the trial on behalf of the Steam Reserve. During the six hours' trial the mean steam in the boilers was 59.8 lb., vacuum in the condenser 20·1 inches, revolutions per minute 127.9, pressure in the cylinder (high 36.0 lb., and low 12.8 lb.), indicated horse-power (high 257, low 265), making a total of 522. The mean speed during the run was 10·5 knots. The Firebrand afterwards steamed into harbour and moored, to await sailing orders.

Foam, Lieut. and Com. G. C. Higgins, arrived at Plymouth from Bermuda on May 27.

Griffon, Com. Davies, was to leave Jamaica on May 10 for Haiti.

Hecla, Capt. Wilson, was docked at Portsmouth on May 26.

Iris, Capt. Rice, arrived at Alexandria on May 23.

Kingfisher, Com. Thomas (act.), has succeeded Com. Thornton in the command, the latter officer having been invalided.

Magpie, Com. the Hon. F. C. P. Vereker, would leave Port Said on Saturday last, homeward bound.

Monarch. Capt. Bedford has temporarily left to assume charge of the patrol-boats on the Nile. Capt. Bedford has a staff of four officers, eleven artificers, and some thirty blue-jackets, under his orders, as well as three Nile steamers, which are being armed and protected with boiler-plates.

Orontes, Capt. Andoe, sailed from Malta on May 24, and will probably arrive at Portsmouth on June 2, with the paid-off crew of the Briton and Ranger, and 3rd Batn. King's Royal Rifles.

Osborne, Capt, Thompson, arrived and went into Portsmouth Harbour on May 24.

Penelope, Capt. Robinson, was put out of dock at Chatham on May 26.

Repulse, Capt. St. John, was put out of basin at Portsmouth on May 26.

Sphinx, Com. Caffin, flying the broad pendant of Comdre. Molyneux, C.B., was at Suakim on May 11; had arrived on May 10, and hoisted broad pendant of commodore 2nd class. The Briton and the Tyne were at Suakim, and remain there for the present. The Myrmidon, cruising outside Suakim on surveying duties, arrived there on May 10. The Philomel was at Bombay on April 23, making good defects. The Dragon was Busreh on April 23, and was going to cruise in the Persian Gulf. The Arab and the Woodlark were at Aden on May 14. The Kestrel arrived at Aden on May 26, and would leave, homeward bound, on May 28.

Superb, Capt. Cleveland, arrived at Alexandria on May 23.

Swiftsure, Capt. Aitchison, flagship of Rear-Admiral Lyons, was at Callao up to April 23, and would leave on May 4 for Honolulu and Vancouver. The Constance was on passage from Honolulu to Vancouver on April 23, and has since arrived; she will relieve the Heroine, and remain as senior officer's ship until the arrival of the Commander-in-Chief at Vancouver. The Heroine was at Vancouver on April 23, and will proceed direct to Callao when relieved by the Constance. The Satellite was on the coast of Peru on April 23, and will remain as senior officer's ship on the departure of the Commander-in-Chief from Callao until the arrival of the Heroine. The Mutine was at Callao on April 22, and will accompany the flagship to Honolulu and Vancouver. The Sappho and Kingfisher were on the coast of Chili on April 23.

Temeraire, Capt. Domville, is undergoing extensive repairs at Malta. The whole of the liners in her cylinders will require to be lifted and rejointed, as they are in a very leaky condition. All her slide jackets have to come off and be rejointed, her boilers retubed, and other repairs done to them. New tops are being made, and all her upper masts and yards are having a thorough overhaul and repair. Both barbette guns have been removed, and the the tables on which they revolve lifted and thoroughly overhauled, her hull inside opened out, all her rigging and gear connected therewith thoroughly examined and refitted, and renewed where necessary. All this will probably occupy until August next.

Triton, Staff Com. Tizard, left Sheerness on May 26, on surveying duties.

Valorous, Capt. the Hon. R. Hare, sailed from Portsmouth for Devonport with the Inconstant on May 26.

Wasp left Queenstown for Innishboffin and Innishturk on the 23rd inst.

Wye, Staff Com. Miller, arrived in Plymouth Sound late on Monday night from the South-east Coast of America, calling at Ascension and Madeira, and bringing home a small draft of Marines and naval supernumeraries. The Wye, after coaling, left in the evening for Portsmouth and Sheerness.

NAVAL AND GREENWICH HOSPITAL PENSIONS.

An Order in Council, dated May 19, in last night's *Gazette*, directs alterations as follows:—"1. That the following be the numbers of pensions established for captains, commanders, lieutenants, captains, retired from the Staff Captains' List, and paymasters, in lieu of those fixed by Article 1,987 of Your Majesty's Regulations for the Navy, 1879, and Order in Council of April 1, 1881:—

	Naval Pensions.	Greenwich Hospital Pensions.	Amount of each Pension.
Captains	5	1	£80
Commanders	18	5	65
Lieutenants	42	3	50
Captains Retired from Staff Captains' List	1	2	80
Paymasters-in-Chief and Paymasters	Nil.	15	50

2. That the reapportionment, so far as relates to the above-mentioned pensions, be carried out in such a manner as may seem to us to be suitable. 3. That further provisions for appropriation of pensions lapsing under these proposals, and not hereby allotted to other classes of officers, shall be submitted by us for your Majesty's sanction. 4. That the following Greenwich Hospital Pensions of £35 a year shall be established:—Chief gunners, two pensions; chief boatswains, two pensions; chief carpenters, two pensions. These officers to cease to be eligible for the Warrant Officers' Pensions of £25 a year. The qualification in respect of service, &c., to be same as hitherto for the £25 pensions. (5.) That the Warrant Officers' Greenwich Hospital Pensions of £25 a year shall be increased in number: For gunners, from 5 to 16; for boatswains, from 6 to 16; for carpenters, from 4 to 9. (6.) That three pensions of £25 a year shall be established for pensioned chief officers of Coastguard. That pensioned chief officers of cruisers, senior mates of such vessels, and chief officers of stations shall be eligible for these pensions. The qualification of service to be subject to such modifications as may seem to us from time to time desirable, 10 years' service as chief officer of station, chief officer, senior mate, or inspecting officer of Coastguard. An officer who has received severe wounds in action or disabling hurts in actual service to be exempted from the foregoing rule as to service. An officer who has been granted civil superannuation to be ineligible for a pension."

London Amusements.

At the Royal Italian Opera, Covent Garden, Mozart's "Le Nozze di Figaro," with Madame Albani as the Countess, Madame Sembrich as Susanna, and Madame Pauline Lucca as Cherubino, has attracted the most crowded audience of the season. Madame Sembrich was suffering from hoarseness, and in consequence of her continued indisposition, Gounod's opera of "Faust" was substituted on Tuesday evening for the promised "L'Etoile du Nord," which is now postponed till next week. On Thursday night, Gounod's "Romeo e Giulietta" was represented. "L'Africaine" on Friday and "Lucrezia Borgia" this evening (Saturday) complete the programme of the week.

The poetical one-act drama of "Chatterton," in which Mr. Wilson Barrett so impressively depicts the closing scene of the life of the youthful poet, is repeated at the Princess's Theatre this (Saturday) afternoon, and will probably be associated with future morning performances till the end of the season.

At the Adelphi, "In the Ranks" reaches this week its two hundredth successive representation. At the Vaudeville, the farcical comedy of "Confusion" has now been played three hundred and fifty times.

On Thursday evening, Mr. Irving presided at the anniversary dinner of the Royal General Theatrical Fund, which was a great success, upwards of £900 having been subscribed; and this evening (Saturday) the popular actor and manager will reappear at the Lyceum with his company in Shakespeare's comedy of "Much Ado About Nothing."

With some changes of cast, M. Audran's comic opera of "La Mascotte" has been replaced in the programme of the Comedy Theatre. Miss Florence St. John is now the substitute for Miss Violet Cameron as the heroine, while Mr. Arthur Roberts, as Duke Laurent, becomes the successor to Mr. Lionel Brough. Mr. H. Walsham is Prince Fritallini, Mons. Gaillard resumes his position as Pippo, and the reproduction, very cordially welcomed, seems likely to have a renewed run.

At the Court Theatre, the adapted drama of "Devotion" has now given place to a revival of the late T. W. Robertson's comedy of "Play," first produced at the Prince of Wales's Theatre in February, 1868. The slight plot was hardly strong enough for the framework of four acts, but the brightness of the dialogue, so effectively rendered by Mr. and Mrs. Bancroft, Mr. H. J. Montague, Miss Lydia Foote, and Mr. Hare secured for the piece a successful run. The scene of the lovers in the ruined castle, which is the picturesque feature of the second act, and the realistic representation of a rouge-et-noir table in the third act, form striking portions of a pleasantly-written comedy, well worth reviving for the gratification of a younger race of playgoers. The prominent personages in the piece are now portrayed by Miss Amy Roselle, Miss M. A. Victor, Miss L. Venne, Mr. Arthur Cecil, Mr. H. B. Conway, Mr. Mackintosh, and Mr. John Clayton.

To the Avenue Theatre has been transferred "Little Cricket," Mr. James Mortimer's version of the pretty idyllic romance of "La Petite Fadette," written by Georges Sand. Miss Lydia Cowell resumes her impersonation of the fantastic heroine, first played by her at the Duke's Theatre in Holborn nearly ten years since. New songs and dances have been added. "Nita's First" at the Novelty loses none of its attractions by constant appearance in public; and "Lalla Rookh" is one of the most leggy and lightly pleasant pieces of the sort we have seen for a long time.

The Haverly Troupe of "Mastodon Minstrels" commence a summer season at Drury Lane this evening. Other theatres vary their attractions for the Whitsun holidays. Mr. David James appears with "Our Boys" at the Strand in his original character, played by him more than one thousand times. At the Prince's Theatre, Mr. W. H. Griffiths, the business manager and treasurer, revives "The Colonel" on Wednesday afternoon for his annual benefit. Mr. George Rignold supplies a new version of "Adam Bede" at the Holborn, and the Grand Theatre, Islington, will introduce to London on Monday evening the drama entitled "Through My Heart First," which has been favourably received in the provinces.

The members of the Junior United Service Club have elected Field-Marshal H.R.H. the Prince of Wales an hon. member.

The Ajax and the Conqueror, awaiting commission at Chatham, are ordered to have their boilers kept in constant readiness during the summer months.

It is reported that Rear-Admiral Lyons has appointed his flag lieutenant acting commander of the Kingfisher, Com. Thornton having been invalided. The Kingfisher was commissioned in Aug. 1880, and has therefore been nearly four years in commission.

Fleet Circular No. 13, A.G., issued by the Admiralty on May 13, makes the following alterations in the Queen's Regulations, Appendix XX., p. 728, as to the pay of the chief engineers:—"If in charge of engines of 3,000 indicated horse-power and upwards in the larger ships of modern construction, he will, in consideration of his increased responsibility, be granted rates of charge pay varying from 4s. to 9s. a day, according to the special circumstances, in lieu of these rates. An allowance of 4s. a day may, at the discretion of the Admiralty, be granted, if in charge of machinery of an exceptional ship like the Hecla, though under 3,000 indicated horse-power."

STIMULANTS and insufficient amount of exercise frequently derange the liver. Eno's Fruit Salt is peculiarly adapted for any constitutional weakness of the liver. A world of woes is avoided by those who keep and use Eno's Fruit Salt.—"All our customers for Eno's Fruit Salt would not be without it upon any consideration, they having received so much benefit from it.—Wood Brothers Chemists, Jersey, 1878." CAUTION.—Legal Rights are protected in every Civilised Country. Examine each bottle, and see the capsule is marked "Eno's Fruit Salt." Without it, you have been imposed on by worthless imitations. Sold by all Chemists. Directions in Sixteen Languages, how to Prevent Disease. Prepared only at Eno's Fruit Salt Works, Hatcham, London, S.E., by J. C. Eno's Patent.

Obituary.

Admiral Glasse died at Billacombe, near Plymouth, on May 25. The deceased entered the Navy in 1818, and passed his examination in 1825; was afterwards appointed to the coast blockade as supernumerary lieutenant of the Hyperion, and subsequently to the St. Vincent and Caledonia, flagships at Plymouth. In 1833 he was appointed to the command on the home, Lisbon, and South African stations, of the Magpie and the Rolla. He obtained the rank of com. in 1838, became capt. in 1846, rear-admiral in 1864, vice-admiral in 1871, and admiral in 1877. He served in the Burmese war in 1825, in the China war in 1841-2, in Scinde in 1843, and in the Baltic during the Russian war in 1854-5. He was nominated a C.B. in 1857. He married in 1849, Ada Maria, daughter of Mr. Henry Richard Roe, of Gnaton Hall, Devonshire.

Lieut.-Gen. E. P. Lynch, Indian Army, died on Friday, at Partree House, Ballinrobe, Mayo. He was the last surviving son of the late Major H. B. Lynch, of Partree House, was born in 1809, entered the Indian Army in 1827, was formerly in the Bombay Infantry, and served in Persia under Gen. Bethune; commanded a regiment in the battle of Kiser Chun and in the defeat of the army of the Princess of Shiraz (knight of the Order of the Lion and Sun, and a letter of thanks from the Shah of Persia). He also served politically in Afghanistan in 1840-41, and was present in several engagements. He obtained a colonelcy in 1866, became major-gen. in 1872, and was promoted to lieut.-gen. in 1878.

The Duke of Cambridge arrived at Gloucester House on Wednesday evening from Phillipsruhe, where he went to attend the nuptials of the Princess Elizabeth of Hesse.

"Health Exhibition."—"Visitors should not fail to view the fine exhibit of Messrs. Rose and Co., London, of their Lime Juice Cordial, and other Lime Juice beverages, at Stand No. 116, in main transept. The exhibit includes a fine display of the Jamaica Lime Fruit from which these delicious non-alcoholic beverages are made. Their Lime Juice Cordial supplies a most refreshing summer drink in water, effervescing in all aerated waters. No beverage has received higher recommendation from the medical profession as eminently wholesome."—See *Lancet*. No table should be without it. The Wholesale Stores are 11 Curtain Road, Finsbury.

BOOKS, Etc., RECEIVED FOR REVIEW.

What To Do and How To Do It, a Manual of the Law affecting the Housing and Sanitary Condition of Londoners (Kegan Paul, Trench, and Co.)—Dissolving Views, by Mrs. Andrew Lang, 2 vols. (Longmans, Green, and Co.)—The Military Operations of General Beauregard in the War between the States, 1861-1865, by Alfred Roman, 2 vols. (Trübner and Co.)—Magazines for June: The Cornhill Magazine (Smith, Elder, and Co.); Longman's Magazine (Longmans, Green, and Co.); Cassell's Publications (Cassell and Co., Limited); The English Illustrated Magazine (Macmillan and Co.); The Argosy (R. Bentley and Son); The Ladies' Gazette of Fashion (W. H. and C. Collingridge); Blackwood's Magazine (W. Blackwood and Sons); Colburn's United Service Magazine (Simpkin, Marshall, and Co.); Army and Navy Magazine and The National Review (W. H. Allen and Co.)

NOTICES TO CORRESPONDENTS.

H. C.—There may be truth in Sir C. Napier's views and in your ideas, but no officer would undertake to meet infantry armed with breech-loading rifles with infantry provided with smooth-bore muskets; at least, if there be one, we would rather not bet on his chances.

"E. B.," Toronto.—No such record exists. The names of an officer's parents are recorded in the application for a commission. There are people at the College of Arms, London, who might undertake the search.

Staff Officer of Pensioners.—We cannot accept the responsibility of fathering your attack on Mr. Knox as our own. The Accountant-General may be unpopular or not, but he has no power to deal with staff officers of pensioners, except such as is given him from above.

"J. B. Y."—Thanks. The book is received.

Erratum.—In letter on "District Tartans," page 382, for "Tain" read "Iain;" also for "In Laudatory's effusions," read "in laudatory effusions."—In our article last week "ce maudit galère" was printed n mistake for "cette maudite galère."

Friday night's *Gazette* contains a list of Soldiers' Unclaimed Balances.

The Naval and Military Stations are published by the Army and Navy Gazette on the first Saturday in each month.

The Army and Navy Gazette exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire; Bulletin de la Réunion des Officiers; L'Armée Française; L'Italia Militare; Rivista Europea; Rivista Militare; Memorial de Ingenieros; La France Militaire; Moniteur de la Flotte; Le Progrès Militaire; Der Veteran; Streffleur's Oesterreichische Militärische Zeitschrift; Jahrbücher für die Deutsche Armee und Marine; Militär Wochenblatt; Giornale d'Artiglieria e Genio; Organ der Militär-Wissenchaftlichen Vereine; Vedette; Deutsche Heeres Zeitung; Militärische Zeitschrift; Armeeblatt, Wien; Army and Navy Journal of New York; The American, Philadelphia; Revista Maritima Brazileira*; in addition to all the home and colonial professional periodicals and journals.

BRITISH CEMETERIES IN THE CRIMEA.

The *Daily News* correspondent at Odessa writes:—"According to telegraphic information from Sebastopol, the consecration of the British cemeteries was, by the courtesy of the Russian authorities, rendered a very imposing ceremony. The mission, consisting of the Bishop of Gibraltar, the British Consul-General, and the Rev. Mr. Ford, of Odessa, were received at Sebastopol by Governor Admiral Rudneff, Port-Admiral Poppandopulo, General Wrefsky, Post-Captain Konkevitch, as well as the French, Italian, Turkish, and Greek consular representatives, in full uniform. The military and civil authorities, with a guard of 300 soldiers and marines, attended the consecration, which took place on Friday last."

Field-Marshal Sir P. Grant, Governor of Chelsea Hospital, will inspect the Corps of Commissionaires on Sunday morning, June 15, in the grounds of the above Hospital, instead of at Westminster Hall.

DEATHS.

Baird.—On the 28th inst., at Portsmouth, Frederick Baird, Esq., late of the 6th and the 55th Regiments.

Currie.—On the 23rd inst., at his residence, St. Leonard's-on-Sea, Augustus Arthur Currie, C.B., Major-General in her Majesty's Indian Forces (retired), aged 53.

Longcroft.—On the 27th inst., at West Brighton, in his 30th year, Harry Longcroft, son of the late Major-General Thomas Craufurd Longcroft.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.

Applications from Candidates for admission to this School either by Election, by Votes at £12 per annum, or at £80 per annum without votes, should be forwarded without delay to the Secretary.

As a misapprehension appears to exist regarding the eligibility of the Daughters of certain Officers of the Army for election, the Committee desire to state in explanation that the Daughters of all Officers on the Active or Retired List in her Majesty's Army, inclusive of the Royal Marines, are eligible.

The Daughters of Officers who have severed their connection with the Army by having sold out or commuted their pensions, are eligible *only* if born before the date on which such officers quitted the service.

The Office of the School is now at 20 Charing Cross, London.

By Order,
G. W. FORSTER, Secretary.

CRIMEAN CEMETERIES.

A PUBLIC MEETING will be HELD at the UNITED SERVICE INSTITUTION, Whitehall Yard, on FRIDAY, June 6, at 12 o'clock, at which H.R.H. the DUKE of CAMBRIDGE has kindly consented to Preside, to receive the Final Report of the Executive Committee on the Completion of their Work.

The Committee beg to acknowledge the receipt of the following sums received since their last advertisement:

	£.	s.	d.
Officers serving at Nagpore	9	0	5
Major Soote, 14th Regiment	1	0	0
W. E. Evans, Esq.	1	0	0
Amount previously advertised	1,583	4	4
Total receipts	1,594	4	9

The Expenditure has been £1,445 11s 4d, which leaves a very small balance to wind up the account.

W. F. SEYMOUR,
FRANCIS HAYGARTH, } Hon. Secs.

May 31, 1884.

CORBETT'S WORCESTERSHIRE SALT.
AGENTS: WESTON and WESTALL, LONDON.

The purest and most wholesome Salt for the Table, and all Culinary and Dairy purposes, and the best for the Preservation of Fish, Meat, and Vegetables, or for any other purposes where Salt of the greatest strength, most brilliant whiteness, utmost purity, and most delicate flavour is required.

Has gained Highest Awards wherever Exhibited.

An important condiment of universal consumption like salt ought not to be purchased without thought or care, as too frequently is the case, but should be selected with the circumspection experience shows to be necessary in all articles of diet, or where intrinsic purity and absolute freedom from foreign matters are of essential importance. These conditions are completely fulfilled by CORBETT'S WORCESTERSHIRE SALT, produced not from water more or less impure, which has passed freely through fissures or otherwise to Salt deposits lying comparatively near the surface, and therefore necessarily exposed to risks of organic contamination, but made from natural brine formed in Nature's laboratory, and drawn from the purest and deepest natural brine springs in England, lying in the same district and the same geological formation which yield the famous spring water of Malvern, the purest water known.

To protect consumers, this Salt is packed for the Table, General Household, and Dairy purposes, in Jars, Bottles, Packets, and Calico Bags ,from 1lb. to 28lb. each, bearing the name and trade mark of the Proprietor. It is also supplied in squares and other forms for various uses, and for manufacturing purposes.

May be obtained of all Oilmen and Grocers throughout the World.
EXHIBITS AT THE HEALTH EXHIBITION AND CRYSTAL PALACE.
BEWARE OF IMITATIONS.

A. J. Windebank, Esq., Chanda House, Fratton Street, Portsmouth, December 22, 1883:—"Watch, chain, and ring to hand. I am very much pleased with their appearance, the watch especially looking a very strong, handsome one, and equal to many I have seen at double the money."

Mr. H. A. Illingworth, 82 Queen Street, Batley, March 7, 1884:—"After four years' trial of one of your 25s. watches, I now desire to express my thanks for the same. During all the time I have had it I have not paid one halfpenny for repairs. It is as good to-day as ever. When I have shown it to my friends, they have valued it at double and frequently at treble the money. To those who wish to possess a cheap, good, everyday watch, I especially recommend the above."

These Watches are frequently sold for treble the money. Cheques or P.O. payable to

Mr. A. PERCY, VYSE STREET, BIRMINGHAM.

On receipt of which, any watch will be registered post free to any part of the United Kingdom, and for 2s 6d per watch extra to any part of the postal world.

Our Indian Agents are Messrs. King, King, and Co., Bombay, and Messrs. King, Hamilton, and Co., Calcutta, through whom remittances and orders may be sent, and catalogues obtained.

ASK FOR

LIEBIG COMPANY'S EXTRACT OF MEAT.

CAUTION.—Numerous inferior and low-priced substitutes being in the market, with misleading titles, labels, and portraits of the late Baron Liebig, purchasers must insist on having the Liebig Company's Extract of Meat.

N.B.—Genuine ONLY with fac-simile of Baron Liebig's Signature in Blue Ink across Label.

The only brand warranted genuine by Baron Liebig.

* In use in most Households throughout the Kingdom.

Ask for the Liebig COMPANY'S Extract, and see that no other is substituted for it.

DUBLIN, 83 GRAFTON STREET.

SHAVING a PLEASURE.

EDWARD SMITH'S 1s HOLLOW-GROUND RAZOR is pronounced by all the most wonderful razor ever introduced. It has during the past two years stood every test, and thousands have been sold retail only, at No. 3 Cheapside. It never requires grinding or setting, and is complete in case for 1s 1d; post free, 1s 3d. Complete list of razors, &c., on application. N.B.—A liberal allowance to Serjeants and others taking a quantity.—EDWARD SMITH ("The City Toy Shop"), 3 Cheapside, London.

LEFT-OFF CLOTHES, Old Uniforms, Epaulettes, Books, Jewellery, Miscellaneous Property, &c. Mr. J. Norton, 5 Wych Street, Strand, continues giving the highest price in the trade for the above. The utmost value remitted by Post-Office order the same day for all Parcels forwarded. All letters punctually attended to.

N.B.—Mr. Norton has always on hand a large stock of present Regulation Uniforms, equal to new, at very low prices.

HOLLOWAY'S OINTMENT and PILLS.—These remedies are unequalled throughout the world for bad legs, wounds, foul sores, and ulcers. Used according to directions given with them there is no wound, bad leg, or ulcerous sore, however obstinate or long standing, but will yield to their healing and curative properties. Many poor sufferers who have been patients in the large hospitals under the care of eminent surgeons, and have derived little or no benefit from their treatment, have been thoroughly cured by Holloway's Ointment and Pills. For glandular swellings, tumours, scurvy, and diseases of the skin there is nothing that can be used with so much benefit. In fact, in the worst forms of diseases, dependent upon the condition of the blood, these medicines, used conjointly, are irresistible.

Gravel soil. Good drainage. Excellent train and omnibus service to the City.—Apply to GIBBS and FLEW (Limited), Cedars Estate Office, West Kensington Station, W.

TO be LET, for £40, well-built FAMILY RESIDENCE, containing ten good rooms, fitted bath-room (hot and cold water), two w.c.'s, gas, bells, venetian blinds; garden at rear, small garden in front. Near railway station and omnibus routes in West of London, and within four miles of Charing Cross. Gravel soil. Good drainage. Immediate possession.—Apply to GIBBS and FLEW (Limited), Cedars Estate Office, West Kensington Station, W.

---

15 PER CENT. GUARANTEED.

TO INVESTORS.

Send for Prospectus of the BEUNO CONSOLS COMPANY, Limited; 15 per cent. guaranteed for the first year from this date on all shares purchased through Messrs. CUNLIFFE, ENTWISLE, and CO., of 77 Bloomsbury, Oxford Street, Manchester, from whom all particulars and forms can be had on application.

£500.—INVESTMENT and OCCUPATION.—To GENTLEMEN DESIROUS of taking a VOYAGE ROUND the WORLD as PURSER, or TREASURER, a favourable opportunity presents itself. Money under own control.—Apply to Mr. FLOWER, 11 Southampton Row, London, W.C.

FOUR and FOUR-AND-A-HALF PER CENT. DEBENTURES.

THE QUEENSLAND INVESTMENT and LAND MORTGAGE COMPANY, (Limited).—Fully subscribed Capital, £1,750,000. Uncalled Capital, £1,400,000.

The Reserve Fund is separately invested in Consols, and other first-class securities.

Lenders are secured by the whole assets of the Company, at present valued at over Three Millions, while the amount of Debentures afloat can never exceed that of the Uncalled Capital.

Debentures at rates varying from 4 to 4½ per cent. will be issued on application, and may also be engaged for in advance.

Every information will be given on inquiry at the Offices of the Company, Leadenhall Buildings, London, E.C.; and Forms of Application can be had of the London and County Bank, and all its Branches. R. W. SHIRE, Secretary.

ONE-HORSE LANDAUS.—F. and R. SHANKS, finding a great want for LANDAUS of superior quality, really suited for one horse, have made arrangements to supply them, fitted with their patent for opening and closing the head, at a price they consider must meet the demand. Several can be seen building at their Factory, 70 and 71 Great Queen Street, Lincoln's Inn Fields.

MEMORY.—Physiological Art of Never Forgetting, wholly unlike mnemonics, TAUGHT thoroughly by post. Any book mastered in one reading. Prospectus post-free, giving opinions (from actual study of the system) of Mr. RICHARD A. PROCTOR, Dr. ANDREW WILSON, and others. Lectures in families of the nobility and gentry. Day and Evening Classes in Never Forgetting and for Cure of Mind Wandering.

Professor LOISETTE,

32nd	F. M. Sandys-Lumsdaine	1963

Being all sent up. There has been no failure in this examination since April, 1881.

* 1505 in advance of the second candidate.

ARMY EXAMINATIONS.—From 15 to 20 Pupils are received by the Rev. WALTER BAKER, M.A., Batcombe Rectory, Evercreech, Bath. A Permanent Staff of five highly qualified Instructors, all resident in the village, besides occasional Assistants, gives a guarantee of individual attention impossible where the number of Pupils is large. There are two departments under separate sets of Instructors, the one under two Graduates, Classical and Mathematical, and a Foreign Master for Candidates for Sandhurst, Woolwich, the Preliminary and Qualifying Literary Examinations; the other under two Experienced Officers for the Final Military Competitive for Lieutenants of Militia. A large per-centage, viz., nearly two-thirds of the Pupils sent up during the last 17 years have passed their respective Examinations. At the recent Military Competitive eight Lieutenants of Militia went up, and four of them who had received all their instruction at Batcombe passed among the first 40, one (Mr. W. H. Lord) taking FIRST place on the list. References are permitted to Sir John Adye, G.C.B., General Elmhirst, C.B., General Thompson (late 7th Dragoon Guards), Colonel A. H. King, R.A., A.D.C. to the Queen, the Bishop of Bedford, and many others, all parents or near relatives of former pupils.

ASHFORD SCHOOL, KENT. HEAD MASTER—E. C. MUSSON, M.A., F.G.S., formerly Scholar and Prizeman of Queen's College, Cambridge.

Pupils can receive thorough Preparation for Woolwich, Sandhurst, &c., with Public-School training. Terms very moderate, and strictly inclusive. References permitted to Colonel Sir T. D. Baker, K.C.B., Colonel R. B. H. Blundell, Assist.-Adjt.-Gen., &c.

ROCHESTER CATHEDRAL SCHOOL, founded A.D. 1544.

Head Master—Rev. J. LANGHORNE, M.A.
Mathematics—E. T. LITTLEWOOD, B.A, 9th Wrangler. Masters in Science, &c.

Board and tuition, £70 and £60 per annum, by age. Junior Scholarships in July. Especial Preparation for Universities and Military Academies, &c. Successes in 1883-4:—33rd (direct from School) in December Woolwich List, Open Mathematical Scholarship at Oxford, &c. School House new, well placed, with cubicles.—Apply to HEAD MASTER.

MILITIA MILITARY COMPETITIVE and PROMOTION EXAMINATIONS (Army and Auxiliary Forces).—Lieutenant-Colonel J. HAY SHAW (late Royal Inniskilling Fusiliers) and Captain CH. D'ARBOIS (late French Engineers) PREPARE for the above. Apply, Wimpole House, Wharton Road, West Kensington Park, W. Of 29 sent up for the Militia Military Competitive, 20 successful. One sent up March, 1884, Lieut. G. E. Ripley, 3rd Norfolk Regiment, passed 14th (first trial), 1,935 marks.

MILITIA COMPETITIVE EXAMINATION.—At the Examination held on the 18th and 19th of last month, Majors DE THOREN and MORGAN could not possibly have had GREATER SUCCESS, as they passed ALL the FOUR Candidates they sent up, one having only worked for FOUR MONTHS.

Mr. P. Warren .... 7th (1st attempt).
Mr. E. Malcolmson ......25th.
Mr. H. Thomas........... 33rd (1st attempt).
Mr. H. B. Murray.........67th (1st attempt).

The number of Pupils at this Establishment is limited, and the terms are very moderate.—Apply to Major DE THOREN, Bellefield, or to Major MORGAN, Douro Terrace, Jersey.

MILITIA COMPETITIVE EXAMINATIONS.—Militia Officers are prepared in all the subjects for the above Examinations by Lieutenant-Colonel N. STEEVENS (late 20th and 88th Regiments and Staff) and Colonel F. J. HUTCHISON (late 64th Regiment, seven years Garrison Instructor at Devonport, and for several months Acting Professor of Fortification at the Staff College).—For terms and list of successes, &c., apply to Lieutenant-Colonel STEEVENS, 4 Bays Hill Lawn, Cheltenham.

OFFICERS' BAGGAGE, &c.—Officers are respectfully informed that Baggage, Luggage, and all kinds of Personal Property are stored at most moderate charges at the

STORE WAREHOUSES, BAKER-STREET BAZAAR, W.

The Warehouses having been built expressly for the safe keeping of goods, are peculiarly convenient, and are kept warm at an even temperature during the winter. Removals effected.

Separate lock-up rooms for large or small quantities.

JOHN HANES, Manager.
Store Warehouses, Baker-Street Bazaar, W.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

At the six Militia Competitions which have taken place since September 1, 1881, Colonel WILKINSON and Lieutenant-Colonel SHAW have secured for their Pupils FORTY-NINE COMMISSIONS, although they have only Prepared and sent up a very Limited Number of Candidates. In the list just out for the March, 1884, Examination, out of SIXTEEN SENT UP, TEN PUPILS have succeeded; one other was two places out, and three more within a few places of being successful. Lieutenant C. J. Stanton took the SECOND PLACE at this Examination, with 2,083 marks.

At the Militia Literary Examinations held during the same period, a Number of Pupils have also passed; in this Competition the FIRST PLACE was taken in April last by Lieutenant Lord Skelmersdale, and the SECOND PLACE in the recent October Examination by the only candidate sent up, Lieutenant the Honourable Victor A. Pelham.

At the recent WOOLWICH EXAMINATION Mr. W. V. Scudamore passed SIXTEENTH on the list. This candidate made very high marks in languages.

The results of the last SANDHURST EXAMINATIONS have also added to the general score, which now amounts to NINETY-TWO SUCCESSES, obtained by Pupils since September 1, 1881.

Address, DARMSTADT, GERMANY.

NAVAL CADETS, ASSISTANT CLERKS
HOPE HOUSE SCHOOL,
SOUTHSEA.

Principals { Mr. T. H. VICKERY.
Mr. EDWARD M. BEWLAY, B.A., Univ. Coll., Lond.

AN ARMY SECTION IS NOW ADDED. PUPILS PREPARED FOR SANDHURST AND WOOLWICH.

At the late Competitive Examination in June for Assistant-Clerkships in the Royal Navy, TWO of the Five successful Competitors were Pupils of this Establishment, taking First and Third places. In June, 1882, of the five who passed, the First, Third, and Fourth were from this School, and Three qualified.

CAVENDISH COLLEGE,
CAMBRIDGE.

Four Scholarships of £30 each, tenable for three years, given, one by the Clothworkers' Company, one by his Grace the Duke of Devonshire, K.G., one by Samuel Morley, Esq., M.P., and one by E. B. Foster, Esq., will be offered for competition on August 6, 7, and 8, 1884. Candidates must be under 17 on August 6.

The usual age of entry being between 16 and 17, a Degree may be taken at 19.

The College charges for lodging, boarding (with an extra term in the Long Vacation), and, including all necessary expenses of tuition, and University fees, are £84 per annum. For further information, apply to the WARDEN, Cavendish College, Cambridge.

CHARDSTOCK COLLEGE, CHARD.

Beautiful country; remarkably healthy. Special Preparation for Army, Navy, Public Schools, Universities, &c. Terms moderate. Cricket, fives, gymnastics, &c.

JERSEY HIGH SCHOOL for GIRLS
(Limited).

PATRONS.

The Right Reverend the Lord Bishop of WINCHESTER.
His Excellency the Lieut.-Governor of JERSEY.

Head Mistress—Miss M. E. POPE.

Certificate of London University General Examination for Women, with honours, and distinction in French, Scholar of Girton College, Cambridge, and Second-Class Natural Science Tripos in the University of Cambridge.

This School has been established for the purpose of giving a high-class education, on the principles of the Church of England. The school buildings are situated in a healthy suburb of St. Helier's, near the sea. The climate of Jersey is mild and healthy. Special facilities are provided for the acquisition of the French language. Ordinary fees—board (washing included), sixteen guineas per term; tuition, four and five guineas per term.—Application for prospectuses may be made to the Secretary, R. CREWS, Esq., Wyvil House, Georgetown, Jersey.

TO OFFICERS, ANGLO-INDIANS, and OTHERS.—First-class School, established 15 years, where boys are prepared from an early age for the Army Examinations. Numerous Staff of Experienced Graduates in Honours. System pursued has resulted in 35 successes and no failures. Indian children received. Highest references.—C. V. GODBY, M.A. (Oxon.), Bute House, Petersham, S.W.

LONDON INTERNATIONAL COLLEGE,
Spring Grove, Middlesex, W.

Inaugurated by H.R.H. the Prince of Wales, July 10, 1867. French and German (or Greek) taught to every Boy.

Amongst the successes during the year are two OPEN SCHOLARSHIPS at CAMBRIDGE, and a 13th WRANGLER.

Several FOUNDATION SCHOLARSHIPS, tenable at the School, which may be increased in amount from a Special Fund in the case of those requiring it.

Also LEAVING SCHOLARSHIPS, tenable at the UNIVERSITIES, WOOLWICH, and SANDHURST.

Apply to the SECRETARY, or to the Head Master, H. R. LADELL, M.A.

MILITIA CANDIDATES for the LINE.—TUITION in MILITARY SUBJECTS for the COMPETITIVE ARMY EXAMINATION.

Lieutenant-Colonel FITZROY WILSON, late Rifle Brigade, a Graduate of the Staff College, and afterwards Garrison Instructor of the Eastern District, offers the above; also TUITION in MILITARY SUBJECTS to Officers of the Regular Army, partly by letter or otherwise.

Prospectus, with full additional particulars, may be obtained on application to Messrs. ASKIN, GABBITAS, and KILLIK, 38 Sackville Street, London, W.

ARMY.—LINE and MILITIA.

IMPORTANT to STUDENTS.

Captain DUMARESQ DE CARTERET BISSON, M.A., Author of "Our Schools and Colleges" (graciously recognised by the Queen and H.R.H. the Commander-in-Chief), sends, free by post, a selected List of Prospectuses of all the most SUCCESSFUL ARMY TUTORS, and gives his Counsel on Military and Civil-Service Education free of Charge. References kindly permitted to the late Secretary of State for War.—Apply by letter only, No. 69 Berners Street, London, W.

ARMY,
CIVIL SERVICE, UNIVERSITIES,
PUBLIC SCHOOLS.

MESSRS. BISSON, BORMAN, and CO. send, free of charge, PROSPECTUSES of the most SUCCESSFUL TUTORS for Woolwich, Sandhurst, Military Competitive, Staff College, Home and Indian Civil Services, Universities, Public Schools, &c.—3 Berners Street, W.

MILITARY EXAMINATIONS.—Colonel LONSDALE HALE, R.E., recently Professor at the Staff College, and formerly Instructor in Fortification, R.M.C., and also Garrison Instructor, Home and S.E. Districts, and Lieutenant-Colonel C. W. FOTHERGILL, F.G.S., P.S.C., late Instructor in Military Topography, Royal Military College, prepare Officers of the Army for Promotion and for Entrance to the Staff College, LIEUTENANTS of MILITIA for the MILITARY COMPETITIVE EXAMINATION, and Officers of the Auxiliary Forces for the Examination in Tactics.

For particulars and terms, apply to Colonel LONSDALE HALE, 57 Sinclair Road, Kensington.

MILITARY COMPETITIVE EXAMINATION.

THREE sent up in March, TWO PASSED; Hill, 4th, Cumberland, 20th. Third only just failed. Many former successes. Tuition for all Competitive Examinations.—Captain PINHEY, Spring Grove, Isleworth.

CONNAUGHT MILITARY COLLEGE, WOOLWICH COMMON.

Principal—SAMUEL H. WINTER.

The Pupils of this Establishment have been uniformly successful. In July, 1882, Mr. F. Close was SECOND on the Woolwich List, being FIRST in Mathematics; in July, 1883, Mr. G. Close was TENTH and Mr. R. F. Edwards TWELFTH, all at their first trial. Mr. Winter has prepared more than 200 Pupils for various Military Examinations.

MILITARY EXAMINATIONS.—Lieutenant-Colonel G. M. CARDEW (passed 2nd from the Staff College), PREPARES SIX LIEUTENANTS of MILITIA for MILITARY COMPETITIVE, also Officers for Promotion and other Military Examinations.—14 Observatory Avenue, Kensington, three minutes from the High-Street Station.

MILITARY EXAMINATIONS and GENERAL EDUCATION.—AVRANCHES.—A GENTLEMAN, for many years successfully engaged in preparing Candidates for the Military Competitive Examination and Universities, wishes to RECEIVE PUPILS. Great facilities for acquiring the French language. Terms moderate. Highest references to Parents and Guardians of former Pupils, and to Clergymen and Country Gentlemen.—Apply to Captain CHAWNER, Bois-Guerin, Val-St.-Père, Avranches.

ARMY EXAMINATIONS.—Mr. J. WINDER, M.A., Cranworth House, Eastbourne, Sussex, PREPARES SEVEN PUPILS for WOOLWICH and SANDHURST. Special Masters for French, German, and Science. In 1880, of FOUR Candidates for Woolwich, ALL of whom passed, one was 6th and another 29th. In 1883, of THREE Candidates for Sandhurst, TWO were successful.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS, 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Laboratory, heated Swimming Bath, Fives Courts, &c.—Address, HEAD MASTER.

AN OFFICER in the ARMY WISHES to RECOMMEND strongly a PREPARATORY SCHOOL for YOUNG BOYS on the South Coast.—Apply to Colonel ABBOT ANDERSON, Professor of Military Topography, R.M.C., Yorktown, Farnborough.

A PRUSSIAN OFFICER of RANK resident in a pleasant little town near Berlin, wishes to RECEIVE PUPILS into his house, and to prepare them for Woolwich and Sandhurst. He is permitted to refer to the Rev. T. Teignmouth Shore, Chaplain to the Queen, 31 Montpelier Square, Rutland Gate.—Address, "J. H. D.," 41 Coleman Street, E.C.

HINDUSTANI TAUGHT, Cito, Tuto, Jucunde. Officers prepared for Examinations. Correct Idiom guaranteed. Also Persian, Arabic, and Sanscrit.—PUNDIT, 7 Beechholme Road, Clapton, E.

ARMY and NAVY SCHOOL, BROMLEY, KENT.

Young BOYS PREPARED from the first on the SPECIAL LINES required for these SEVERE EXAMINATIONS.

Head Master—JOHN GIBSON, M.A., assisted by three resident Graduates, and a resident French and Drawing Master.

WELLINGTON COLLEGE.—There will be an ELECTION in October, 1884, to FIVE OPEN SCHOLARSHIPS. Candidates must be under 14 and over 12 on June 1, 1884.—For particulars, apply to the BURSAR, Wellington College, Wokingham.

MILITIA COMPETITIVE EXAMINATION.

The undersigned PREPARES a LIMITED NUMBER of PUPILS (Five) for the above. Successes in March, 1883,—two, one taking the second place (first try); in September, 1883—two, Fowle, 25 (first try); Moir, 27. At the March Examination, 1884, one pupil competed, A. H. Robinson, passing 1st for Cavalry, with 2,018 marks, after four months' work.

Officers prepared for the Promotion Examination. Terms moderate.—Apply, Captain H. C. KING, 13 Blomfield Street, Westbourne Terrace, W.

CLERGYMAN'S WIDOW OFFERS BOARD, HOME COMFORTS, &c., to CHILDREN attending college or day schools at ST. LEONARDS.

Home tuition if desired. Good references. "R.," Mr. Green, Norman Road East, St. Leonards-on-Sea.

DR. J. COLLIS BROWNE'S CHLORODYNE

ORIGINAL AND ONLY GENUINE.

COUGHS,
COLDS,
ASTHMA,
BRONCHITIS.

DR. J. COLLIS BROWNE'S CHLORODYNE.

Dr. J. C. BROWNE (late Army Medical Staff) discovered a remedy to denote which he coined the word CHLORODYNE. Dr. Browne is the SOLE INVENTOR, and as the composition of Chlorodyne cannot possibly be discovered by Analysis (organic substances defying elimination), and since the formula has never been published, it is evident that any statement to the effect that a compound is identical with Dr. Browne's Chlorodyne *must be false.*

Vice - Chancellor Sir W. PAGE WOOD stated publicly in Court that Dr. J. COLLIS BROWNE was undoubtedly the INVENTOR of CHLORODYNE, that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See the *Times*, July 13th, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE is the true Palliative in

NEURALGIA, GOUT, CANCER,
TOOTHACHE,
RHEUMATISM.

IS THE GREAT SPECIFIC for
CHOLERA,
DIARRHŒA, DYSENTERY.

The General Board of Health, London, report that it acts as a charm, one dose generally sufficient.

Dr. Gibbon, Army Medical Staff, Calcutta, states:—"Two doses completely cured me of Diarrhœa."

From SYMES and CO., Simla:

Dear Sir,—We congratulate you upon the wide-spread reputation this justly esteemed medicine has earned for itself all over the East. As a remedy of general utility, we much question whether a better is imported, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to say, are now relegated to the native bazaars, and, judging from their sale, we fancy their sojourn there will be but evanescent. We could multiply instances *ad infinitum* of the extraordinary efficacy of Dr. Collis Browne's Chlorodyne in Diarrhœa and Dysentery, Spasms, Cramps, Neuralgia, the Vomiting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Choleraic Diarrhœa, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's, from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of opinion that the substitution of any other than Collis Browne's is a deliberate breach of faith on the part of the chemist to prescriber and patient alike.—We are, Sir, faithfully yours, Symes and Co., Members of the Pharm. Society of Great Britain, his Excellency the Viceroy's Chemists.

DR. J. COLLIS BROWNE'S CHLORODYNE is a Liquid Medicine which assuages Pain of every kind, affords a calm, refreshing sleep without Headache, and invigorates the Nervous System when exhausted.

DR. J. COLLIS BROWNE'S CHLORODYNE rapidly cuts short all attacks of

EPILEPSY, SPASMS, COLIC, PALPITATION, HYSTERIA.

IMPORTANT CAUTION.

The immense sale of this remedy has given rise to many unscrupulous imitations. Of all Chemists, 1s 1½d, 2s 9d, and 4s 6d.

Sole Manufacturer,

MR. RICHARD JAMES WOOD,

AT THE OFFICE, 16 WELLINGTON STREET, STRAND, *and* NOT *to the* Editor *of the* Army and Navy Gazette.

The subscription to the paper is 7s. per quarter, or 28s. per annum, PAYABLE IN ADVANCE, *inclusive of postage to any part of the United Kingdom.*

To India, £1 12s. 6d. per annum.

The Army and Navy Gazette *can be obtained in Paris of our Agent,* Mr. J. W. S. NEAL, *English Stationer, 248 Rue de Rivoli, to whom Advertisements and Orders for the Paper may be sent.*

IN a recently-published number of a medical journal, the writer of a leading article asks this very portentous question,—"Do the advocates of the regimental (medical) system know what they are trying—vainly, we believe—to galvanise into life again?" He thereupon proceeds to answer the question to his own satisfaction, by referring to circumstances altogether exceptional in their nature, and quite unconnected with any system of medical organisation, whether regimental or "unified," which occurred during the first war in Burmah in 1824-26, and that in China in 1840-42. We, too, have no difficulty in giving an answer—strongly and decided in the affirmative—to the query of our professional contemporary. We can assure him that officers of all classes, many of them men of great and varied experience in war, who utterly condemn the present system, and advocate a return to the regimental, know very well what they are in hopes of seeing restored, and also what they hope, in the interest of the whole Army, to see abolished—respectively represented by the Army Medical systems past and present. By the way, is not the reference to "galvanising into life again" made use of by our contemporary a very appropriate one as applied to the "system" of which he is so zealous an advocate? An incongruous "system" dismembered—*i.e.*, of parts thrown together anyhow—unsuited for and incapable of combined action at the very time such action is most needed—first one fragment and then another giving spasmodic jerks, when, like electric currents acting on the severed limbs of Galvani's frogs, the stimulus furnished by letters from correspondents, or by commissions of inquiry, give movement for the time being to that which is in reality lifeless! But let that pass. We would go even further back in ancient history on the subject of Army medical organisation than our medical contemporary has done. We would remind him that throughout the wars in which during the latter half of last century our troops were engaged in India, regimental hospitals, as such, did not exist; medical officers were appointed to stations, not to regiments; in fact, things were as nearly as possible what they are at present. The Medical Department was "unified," if not united. For years officers on the spot had represented to the local Government the unsatisfactory working, alike in the field and in cantonments, of the Medical Department as then constituted. Government in its turn made similar representations to the India House; and at last, in 1798, under orders from the Court of Directors, the system as it then existed was abolished, and that of regimental and of station hospitals, with regimental and Staff medical officers was instituted in its place. Of the efficient and satisfactory manner in which the "double system" continued to work during a period of eight years, the medical journal takes no notice. Neither does he allude to the powerful opposition against the "unified" system of station hospitals which was raised by the older and more experienced officers, military and medical, in India,—or of the still more extraordinary circumstance that a "system" abolished as unworkable before the present century began, was forced forward in defiance of all such protests. When, in 1801, an Indian contingent of troops arrived in Egypt, each regiment from India was provided with its own regimental hospital. That portion of the force which had been sent from home had general but no regimental hospitals. A reference to the history of that short expedition will demonstrate the success with which the regimental medical system was worked on that occasion. The records of the period also tell that, so unsatisfactory were the results obtained from the "general" system, so alarming the sickness and rate of mortality in the troops who were provided only with those hospitals, that all such establishments were broken up, and the Indian plan of regimental hospitals introduced with immediate good effect. Our contemporary refers to the first war in Burmah. The meagre particulars of that expedition which are now available indicate that the troops were unprovided with suitable food, shelter, or transport; that the ordinary effects of a severe and trying climate were thus aggravated, great sickness and mortality being the result. Regimental hospitals certainly existed; but the particular train of reasoning by which our contemporary connects these establishments with conditions altogether beyond the scope of a Medical Department, whether regimental or "unified," is scarcely apparent. It may be interesting to know that, on the occasion referred to, a well-known economist and politician served in the double capacity of a medical and commissariat officer! During the second Burmese War, of 1852, the regimental medical system was alone in force; and but for the appearance of cholera and diseases of similar origin—a contingency beyond the power of any method of administration to control—the general health of the troops is reported to have been unusually good. So far, therefore, the arguments in favour of unification, as exemplified by the first Burmese War, break down. During the expedition to China in 1840-42 the losses by sickness were truly appalling. The direct disregard of recommendations submitted by regimental medical officers to their military superiors was at the time well known to have conduced to this great mortality; but to connect it in any way with the existence of regimental hospitals is to assert a conclusion based upon no data whatever. In the second China War, an attempt was made to work the hospitals on the unification plan; but the disadvantages inherent in and inseparable from that system of organisation became at once so clear, that regimental hospitals were resorted to. In India, during the campaigns in the Punjab, Gwalior, and those connected with the great Sepoy Mutiny, hospitals were worked on the regimental system, supplemented by those on the general or station plan; and it may safely be asserted that the results compared favourably with those obtained in any other campaign. As to the figures given by our contemporary with a view to indicate the improved health condition of our troops in India as compared with previous years, it is sufficient to observe that, the conditions of military service now being very different from what they formerly were, any such comparison is misleading. At the present time, what between hill stations and our line of transport ships, unless a soldier happens to die of his first attack of illness, he is sent straight away, either home or to a sanatorium. Thus a drain of non-efficiency is kept up actually in excess of what existed in the days of long service, at the same time that public expenditure on account of the Army has increased tremendously. Regimental hospitals cannot be said to have existed during the Crimean War; because for many years before that event, one parsimonious Government after another had cut down every establishment connected with the Army to such an extent that regimental hospital establishments remained only in name. Instead of setting to work to place them on an efficient footing, the authorities, in complete ignorance of war and its requirements, instituted a certain number of general hospitals, regarding which it need only be stated that they furnished strong arguments against those establishments. Coming down to the recent "military operations," as they are called, in Egypt, we have, to a certain extent, the story of 1801 over again—only with a slight difference. As at the earlier date, so at the latter, the Indian Contingent was provided with hospital establishments as nearly as possible on the regimental system; at all events, where the fighting part went, there also went its regimental hospital establishment, ready and fit to attend to the wounded of that portion of the force, and also to render valuable aid to those of the British portion. Precisely as happened eighty years previous, regiments were despatched from the westward to Egypt without hospital establishments of their own. A series of base hospitals,—the term must be admitted to have possessed some special appropriateness in Egypt,—and field hospitals were placed on board one set of ships, the troops for whom they were intended being embarked in others. The troops went to Ismailia; the base hospitals remained behind at Alexandria,—a state of things which would have been impossible had the regimental, or even a modified regimental system been in vogue. Then, again, compare the efficiency with which, under the regimental system in 1801, measures were taken against the plague, with the absolute failure of those adopted in 1883 to meet the ravages of cholera. Let the question also be answered,—Was it or was it not the case that the rate of mortality by that latter disease was greater among the patients treated in the unified hospitals than it was amongst the native Egyptians, who cannot be said to have had the benefit of Army medical treatment at all? The fact is, if we enter fully into the arguments adduced in favour of unified as against regimental hospitals, whether in war or in peace, those arguments when sifted are shown to be dross, as they really are.

THE remains of Sir Bartle Frere, honoured in death, were followed to their resting-place in the crypt of St. Paul's by all the survivors of the generation which witnessed his labours, and were benefited by his enterprise, sagacity, and courage; and the list of the assembly under the dome of the great Metropolitan Cathedral comprises a host of names in connection with glorious service in the field, in the Senate, and in the wide area of Imperial administration, which would illustrate the annals of any country. The representatives of the Queen, of the Prince of Wales, of the Duke of Connaught, of the Duchess of Cambridge, and of the Princess Mary of Teck, and the appearance of the Duke of Cambridge in person, testified to the regard in which the eminent Indian statesman was held by his Sovereign and by the Royal Family; of the Empress Eugénie, the Princess of Wales, the Natal Colonists, the officers of the 24th, Missionary Societies, native gentlemen, Mahommedans, Hindoos, Parsees, Colonial Administrators, soldiers, clergymen, the Navy, the Army, old Indians, ex-Governors—all were there to do honour to his memory; and the greatest of them all said, truly enough, "We who are following here will never see his like again." The failure of his Cape policy, which, however, ought to be attributed to others, cast a cloud over the radiance of the reputation which he had won in the darkest days of Indian history, and caused the long and beneficent career which had endeared him to the people of the North-West, and of the Bombay Presidency, to be forgotten. Lord Wolseley, Lord Chelmsford, Sir A. Herbert, Admiral Sir J. Hay, and many others, represented the services. Lord Napier of Magdala, Sir H. Green, and others were there as the representatives of the old Army of India. It need not be said that all the officers, civil and military, who ever served under Sir Bartle Frere, now within reach followed his coffin to the grave. At the request of the Prince of Wales, the members of his staff who had followed his Royal Highness in India were present as such; but there was not one of them who did not feel the personal attachment and respect which would have led them to attend on the occasion to pay the last tribute of respect; and all were there except the Duke of Sutherland, Lord C. Beresford, and Col. A. Ellis, who are absent from London. It is not indiscreet, perhaps, to state that the Heir-Apparent entertained a feeling of the profoundest regard for the deceased, and, as far as his Royal Highness could make known his feelings and his wishes, he evinced the regret with which he saw the neglect and obscurity from which Sir Bartle Frere suffered when he was recalled from the Cape in consequence of the disastrous failure of others. Indeed, so deeply did the Prince feel the injustice with which the eminent servant of the Queen, who had guided his policy during his Indian tour, had been treated, that he did not refrain from representing in forcible terms the sense he entertained of the conduct of political leaders with regard to his friend. *In cœlo quies.*

WE have for years advocated the institution of a general mess on board all ships in the Navy, but in so doing we never contemplated that our suggestions would be adopted in the rough-and-ready manner they appear to have been. What we aimed at establishing in the Navy was a mess in each ship, somewhat similar to that existing in each regiment of the Army. In the sister-service, the mess-room is always large enough to accommodate not only those who are bound to use it, but also a goodly number of guests. As a rule, military messes are large and lofty. In the Navy they are narrow and low, and in most ships utterly unsuited to the purposes to which they are put. For example, the *Heroine* and *Satellite* are sister-ships, and from what we saw of the *Heroine* before she left for the Pacific, we felt convinced that a general mess would never answer in these ships unless extensive alterations were made in their fittings. These ships were originally built as sloops, but were afterwards classed as corvettes, to enable more commands to be given to Post Captains. They measure about 1,400 tons, are 200 ft. long, and have a beam of 38 ft. The Ward-room in these ships is a small place between decks, some 20 ft. long, which is only 10 ft. broad at the after end, and 14 ft. broad at the forward end, exclusive of cabins. A large side-board, a cupboard, a ventilator to the screw alley, and a table 11 ft. long and 4 ft. wide fills up nearly the whole of this space, which is supposed to form the habitation of fourteen officers. Allowing for one officer being always away on duty, the remaining thirteen can just find place round the table at meal-time. Indeed, it would appear as if the Admiralty had designed these ships and organised their messes with the avowed intention of disproving the supposed truth of the old superstition against sitting down thirteen to table. Be that as it may, the fact remains that these messes are overcrowded, and, therefore, likely to imbue those who have to use them with feelings the reverse of friendly towards general messes, and that more especially so when they compare the comfort of the officers serving on board the *Osprey*, of only 1,130 tons, with their own discomfort. But in the *Osprey* only seven officers use the mess, while the *Heroine* and *Satellite* appear to have been originally designed to accommodate but eight officers in the ward-room and six in the gun-room. Why, therefore, should the latter be abolished without adding to the size and accommodation of the former? Even the store-rooms, pantry, live stock, and provision spaces remain the same. Then, again, we have never advocated boys being made to enter a general mess; but in the ships already named the midshipmen have been made the companions of their seniors in rank and age. Now, boys will be boys all the world over, and it is better that they should be left to themselves under proper supervision than to make them socially the equals of their seniors, even in hours of recreation. It is better to prevent, rather than to invite, their irresponsible criticism of the acts of their seniors, as boys soon become bumptious, and even precocious children are, as a rule, a nuisance. Nor does this constant intercourse with their seniors tend to instil habits of discipline into their minds. The old saying, "Familiarity breeds contempt," expresses very fairly the working of the juvenile mind on board ship. Hence their Lordships should not lose sight of the fact that, while the ward-room is but the temporary mess of such officers as may attain to command, there is still a large number of officers who have to remain in it all their lives, and whose "home on the ocean wave" it most certainly becomes. These officers, who do not pass on to the captain's cabin, have nothing beyond the ward-room to look to. When on shore, they take good care to keep their children in the nursery, and object to have that department thrust upon them when serving afloat. Hence, when, as in the case of the ships named, these old officers find their sitting and dining-room taken from them, and themselves forced to live in the nursery, is it to be wondered at that they should strongly object to being so treated. For, when thus forced to associate at all times with the young gentlemen from the gun-room, they feel that they are compelled to place great restraint upon both speech and action, having, much against their will, to perform the duty of schoolmaster or nursery governess the live-long day, and that during the whole term of their service afloat! Surely this is not right. Even the chief petty officers on the lower deck have more consideration shown them, and are not obliged to mess with boys. It cannot be denied that to allow the midshipmen to take their meals with their seniors in the ward-room is calculated to do them good, and to instil manners into young gentlemen who too often turn their own mess-table into a bear-garden. But there the general mess should end, so far as midshipmen are concerned; and in our opinion it would be far preferable not to send these young officers to sea at all except in training-ships until they have attained the rank of sub-lieutenant, and are of an age which will entitle them to associate with men. Still, if it is considered absolutely necessary to send midshipmen to sea in all classes of ships, then they should have a properly furnished retiring room of their own, in which they can receive instruction from the Naval Instructor during the hours set apart for that purpose, and enjoy themselves in a rational manner at all other times. We commend these remarks to the Admiralty, as we feel convinced that their Lordships are as much interested in the success of the general mess system as are any of its most ardent advocates afloat.

AND so the Government, somewhere or other, is doing something at last to contain the Mahdi in the Soudan! Our own belief is that the Prophet has just inspiration enough to let him know when he is well off, and that he will not risk his person and his reputation by an invasion of Nubia or Egypt Proper, though he may employ his emissaries to create tumults, and his lieutenants to lead his rabble, should there be any opening in Dongola, Berber, Nubia, or the Saaed. However, to prevent any interruption of the river communications, and to make a wholesome impression on the minds of the people, some authority or other has set to work. Captain Bedford arrived at Assouan on June 3 with two steamers armed with Gatlings, which can patrol the stream below the First Cataract as far as they please towards Cairo, but there is really no enemy to fear here, and if there were, at certain points under the bluffs these steamers would be of little use. Still, there they are. We believe the old *Gheezeh* and the *Mahmoodeeyeh* are just suited for what they have to do, instead of basking in the sun at Siout. In addition to the *Gheezeh* and the *Mahmoodeeyeh* steamers, the *Masr*, *Mehalla*, *Benisooef*, *Nile*, *Massaodeeyeh*, *Gey-Farak*, *Keneh*, *Fayoom*, *Garbieh*, *Messir*, *Teïr-Saad*, &c., are also lying at Assiout. These vessels are "remains" of the time when Ismail Pasha was the real, live Governor and Khedive of Egypt. Besides the steamships already mentioned, the authorities have collected at Assiout sixteen large lighters, each of about 250 tons burden, and thirteen sailing vessels, which are being got in readiness for immediate service. The s.s. *Tahta* has been fitted up by Messrs. Thomas Cook and Son as a floating hospital, and will be sent to the First Cataract almost immediately. The *Nassef Kheïr*, which is lying beyond the First Cataract, is also to be equipped, and will patrol the river between Assouan and Wady Halfa. The *Saïdieh* and a screw steam-tug are also on the Nile beyond the First Cataract. Taken in connection with the advance of the Egyptian Army towards the Second Cataract, these preparations indicate an intention on the part of Government to feel their way beyond Egypt, and to secure Nubia at least against attack, and if the Mudir of Dongola has not exaggerated his successes, it may be possible after all to deal with the hostile Arabs and their allies in such a way as to clear the country up to Khartoum without the assistance of British troops. But even that would not be enough. The garrisons are still to be released if the Arabs hold on to their leader. So the reports that there is no intention to prepare an expedition may be placed in the same category as those which stated that all was ready for the march to Khartoum.

A *communiqué* on Monday requested the morning papers "to state that there was no foundation for the report that the Duke of Edinburgh has applied for the command of the combined Channel and Reserve Squadrons."

During the last six weeks over eight thousand seamen and Marines have been present in the port of Portsmouth, and it is greatly to their credit that the Union Jack has never been hoisted on board the flag-ship for court-martial purposes during the whole of that time. The Naval patrol reports, we hear, are blank to all intents and purposes, and the number of men sent to Lewes Naval Prison has been exceptionally small. Fifty years ago such a report could not have been made.

Sir W. Hewett is hopeful of success in his mission. Our hope is that Sir W. Hewett may get safe out of Abyssinia as soon as possible, for we remember what seems to have been forgotten, that Gordon was kidnapped by the amiable people whose aid we are seeking, and that he had to pay his way out to liberty with "egregious ransom."

Capt Noel, R.N., suggested some years ago that an improvement could be made in the existing method of using spar torpedoes, but no notice was taken of it at the time. Since then the constant breakage of the spars used to explode the torpedoes under water from the torpedo boats, necessitated the substitution of tubular steel booms for the wooden spars. These, however, broke as easily, and were much more costly. The recent experiments at Spithead have proved, however, that Captain Noel's idea of a swinging-boom or spar, fitted in a swivel or socket, is the only practical way of overcoming the difficulty, and in future all torpedo spars will be fitted in this manner.

We are glad to hear that Colonel Tuson, C.B., R.M.A., late in command of the Royal Marines in Egypt, has arrived at Head-quarters, Eastney, having reached Gravesend by mail steamer on Tuesday last from Malta, where he had been a patient in the Royal Naval Hospital for some weeks.

Our attention has been called to a departure from the Naval Uniform Regulations, which aptly illustrates the want of attention paid in high quarters to the Queen's Regulations whenever it is convenient to ignore them. The case in point is that of an assistant-paymaster serving as secretary to a flag officer not holding a commission as Commander-in-Chief. Now, the Order in Council which empowers the Admiralty to allow assistant-paymasters to serve as secretaries to flag officers, distinctly confines such appointments to flag officers *not* Commanders-in-Chief. Consequently the uniform to which assistant-paymasters holding those posts are entitled is that laid down by Art. XXVI. of the Dress Regulations, 1879, viz., that of a paymaster of eight years' seniority; and we therefore would advise the assistant-paymaster who is at present luxuriating in three gold stripes and an embroidered peak, to dispense with the latter adornment and curtail the former, or we may soon see officers who are only entitled to a stripe and a half indulging in four, thus conferring on themselves a brevet rank equivalent to that of post-captain.

A report reaches us from Portsmouth, which we publish with all reserve, that H.R.H. the Duke of Edinburgh will haul down his flag as Senior Officer in command of the Channel Squadron in December, on the completion of twelve months' service afloat; and that the *Minotaur* will then be paid off.

Admiral Sir Geoffrey Hornby has highly complimented Commander Bromley and the officers of the *St. Vincent* on the smartness of the 800 boys under their training, and the remarkable cleanliness of the ship. We regret that the Admiralty should have again found it necessary to intermit the entry of boys for the Navy to ease the Estimates. Any number of fine healthy lads could be entered, and boys trained in the service invariably turn out the best seamen in the Fleet.

When Lord Northbrook came to the Admiralty, and refused to confirm the promise made by his predecessor, Mr. W. H. Smith, to the Prince of Leiningen, it was felt that an injustice had been done to a very gallant officer, who had done good service, although there were here and there those who are jealous of the appearance of any foreigner's name in the *Navy List*, forgetful of the associations of the Royal Family and of the great names which have from time to time illustrated the service, though not strictly of English origin. It was in vain that the highest in the land made a representation to the First Lord as to the positive injustice of his decision. For some reason or another it was determined that, contrary to precedent and custom, the promise made by the outgoing Minister should not be ratified by his successor. It is never too late to mend; and all these years remorse has been pecking away at the gentle breast of Lord Northbrook, till it has opened a hole large enough to allow of the passage of the Prince of Leiningen, cocked hat, epaulettes, and all, from the seclusion to which he was unjustly condemned after his service in command of the Royal yacht had terminated, to the command at the Nore, when Admiral Rice retires in October.

The Channel Squadron is now assembled at Spithead awaiting orders from the Admiralty; the Reserve Squadron is assembling at Portland, and will probably start on its summer cruise about June 17.

Somehow or another there is a feeling of something like shame now that the work of cutting up the Duke's statue is fairly in progress and approaching its end. It has furnished an occasion for an indignant outburst in the *National Review* from Mr. Courthope, and a lively pasquinade in the *Morning Post* from Lord Winchelsea, in his happiest style. We are told that, in deference to a generally expressed wish, the operation of dividing the statue was performed in private. Well may it be so,—

> "Imperial Cæsar, dead and turned to clay,
> May stop a hole to keep the wind away."

A starling had built in the elbow of the left arm, and hatched its young in the protection of that fostering might; while a sparrow had selected the hollow in the sword arm for its young. The head having been cut away, the body is to be sent, first, to Aldershot, some three weeks hence, by which one may estimate, not so much the weight of the mass as the difficulties we little people find in dealing with great subjects in these degenerate days of steam power, and railways, and the like. Somehow or another one recalls, when reading of the preparation of the site at Aldershot for the statue, Swift's lines on the construction of the Government store for ammunition in the Phœnix Park :—

> "Here is a proof of Irish sense,
> Here Irish wit is seen ;
> When nothing's left that's worth defence,
> They build a magazine."

With reference to the establishment of the Soldiers' Registry, a correspondent suggests that it would be a boon if the authorities of the War Office would sanction a register for civil employment for the Purchase officers compulsorily retired, who find themselves now without a career. We wish that some Captain Edward Walter would arise, to do for ex-officers of the Army what he has done for the soldier.

The *Avenir Militaire* contains two articles this week which concern us. In the first, we are chaffed for not sanctioning the Channel Tunnel; and in the second, it is declared that we have no right to close the Red Sea at Perim. According to the *Avenir*, the Great Powers should insist on the neutralisation of the Red Sea. A good deal is said about Tonquin, Madagascar, and the splendid colonial possessions of France, and then we stumble upon this,—"If France claims the territory of Cheick-Said, which belongs to her, she might retrocede the Bay of Adulis to Abyssinia. This would be a proof given to Europe that she nowhere wishes to practise the predatory policy of which our neighbours across the Channel give examples all over the world." How difficult it is to see the beam in one's own eye!

The much-abused Egyptian is looking up. Under Major Chermside, at Souakim, he has held his own against Osman Digna's attack so well that the assistance of our sailors and Marines has not been called for; and the battalions of Wood's army which have left Cairo appear to be in excellent trim, and to take the field with alacrity and cheerfulness, not one man being absent. Indeed, as one of their principal officers said of them,—"If I could only be sure of their inside as I am of their outside, I would be prepared to face any enemy in the world." We believe that the prejudice created against Egyptians, as soldiers, is very much due to bad handling, and to the composition of the bodies which were called out to serve under leaders with whom they had, and could have, no sympathy. What was Hicks to the fellah, or the fellah to Hicks? What were the ex-Indian officers and ex-Guardsmen, and Austrians and Poles, forming the Staff of the strange conglomerate which the ill-fated Pasha led out into the desert to meet his doom? Can it be supposed that a gathering of English labourers and townsfolk, compelled by force to march out under Turkish officers, for example, to encounter such a savage and terrible enemy as those who broke in upon our square at Tamasi, would have shown any great conduct or courage, or have done better than the chaotic conglomerate called Hicks's Army? The same remark will apply almost equally well to the force under Baker. But, then, what of Tel-el-Kebir? Well, Sir Archibald Alison will tell you that, for a time, there was the heaviest fire possible, and we know that one regiment at least was staggered by the front and resistance of the enemy. But the skill with which the attack was planned, and the circumstances under which it was delivered, broke down the line of defence, and once that long and weakly defended front was pierced, there certainly was not in the Egyptian Army sufficient backbone to do what even better disciplined and stronger-hearted troops might find some difficulty in effecting, namely, the defence of a pierced entrenchment and the re-establishment of it in their entire possession. Who conquered the Soudan? Mehemet Ali and his successors, was it not? Oh, yes, it will be said, but they used Turks and the like. But then, who defeated the Turks? Who were the troops, led by Ibrahim Pasha, who routed the Army of the Sultan, and who would have easily swept onwards to the very walls of Constantinople, but for the interference of the great Powers? Egyptians! Who were the troops who defended Sidon and St. Jean D'Acre with a gallantry which excited the admiration of the English Admiral and his officers? Egyptians! Who were the troops who defended Arab Tabia at Silistria? Egyptians! Who were the troops who displayed the greatest courage at Eupatoria? Egyptians! Finally, who were the men who stood serving the barbette guns at Alexandria, exposed to the most tremendous artillery of modern times, backed by incessant hail of lead? Egyptians! And now comes to the front the Mudir of Dongola, whom some of the silly newspapers of London are holding up to ridicule, but who nevertheless has succeeded in effecting a remarkable impression of a different kind amongst the population of the desert who have been showing signs of disaffection to the Khedive. We have not the least doubt that if officers speaking their own language could be found, apart from any religious feelings, to command Egyptian troops, they would vindicate the good opinion which has been entertained, of the best of them at least, by those English officers who are now with them in Egypt.

A Parliamentary Return has been published showing the total sum paid to officers of the Cavalry and Infantry by the Army Purchase Commissioners to March 31, 1883, the amount which it is calculated may be paid by the Commissioners in the future, the sum paid for pensions to officers of Cavalry and Infantry under the Pension Warrants of 1877 and 1881, and the sums which it is calculated may be paid for such pensions up to March 31, 1903, in excess of the sums payable by the Army Purchase Commissioners, and in excess of the sums chargeable for retired pay and half-pay. Under former regulations, the items show that there were paid on account of the awards of the Army Purchase Commissioners £5,373,900 7s. 3d.; on account of gratuities awarded by the War Office, £428,166 1s.; on account of retired pay under the Royal Warrants of August 14, 1877, May 1, 1878, June 25, 1881, and March 11, 1882, £653,559 17s. 1½d.—total, £6,455,616 5s. 4½d. The actuarial estimate of the non-effective votes for Cavalry and Infantry officers from the year 1883-4 to the year 1902-3 are, for half-pay and retired pay of General officers, £4,192,391; for half-pay and retired pay of regimental officers, £12,253,607; for rewards for distinguished service, £205,000; for payments under the Army Purchase Commission, £1,363,000,—total, £18,013,998.

It appears that the French, who have had some more fighting on a mild scale in Tonquin, find that it would be imprudent for the moment to weaken the expeditionary forces. At the same time, we see that a call has been made on the officers of the Army to furnish volunteers for the Marine Infantry, which corps has had very rough work for some time past.

A letter from a friend who is now at Tiflis says :—"There is not the smallest doubt in anyone's mind here but that Russia intends to make an advance to Herat whenever there appears to be a good opening for her, and all that is being done now at the other side of the Caspian is merely preparation for the 'coup.' It does not matter what Government is in power in England—Whig, Liberal, or Tory—the policy of Russia in Central Asia is immutable." What is the remedy for all this? Have we the right to stop Russia going to the Keshef Rud Valley because it is *only* 150 miles from Herat? If we have the right, how can we enforce it? The only feasible way to meet the danger is to tranquillise and content the Princes and races of India; to keep up a strong and efficient army in the North West; to push on the rail to Quetta at once; and to prepare for the occupation of the line of the Helmund at once, and for the maintenance of a base at Candahar, with a friendly Afghanistan on one flank.

Whether Gordon is living, if not exactly in clover, certainly in a good deal of heat, in the Governor's Palace at Khartoum, or is flying across the Equatorial Lakes in a Government steamer, to join Stanley on the Congo, or to pay his respects to the Sultan of Zanzibar; whether he is at the present moment assisting the Mahdi in his devotions as a True Believer, or is brushing away the Arabs from the shores of the Blue and of the White Nile with rattling salvoes from his gunboats, no man of whom we know can say. But elsewhere a paragraph from an Arab paper gives rather a favourable account of the resources, in food at all events, of the Governor of Khartoum. With some diffidence we repeat the opinion expressed some time ago that Gordon is in no military danger from any army the Mahdi can direct against him; but it would be rash to assert that he is in no danger whatever, for his garrison may be unfaithful, the dagger of a fanatic might find its way to his heart, and the climate may break down his strength. Provided he has sufficient supplies for the town and the garrison, and adequate ammunition for guns and rifles, we think he has nothing to dread from an attack of the Arabs; but the fidelity of his natives must be severely tried, and we doubt whether Gordon could, quite unassisted, maintain his control over them, and are, therefore, inclined to believe that some Egyptian or other native official of influence and character is aiding him in the difficult task of keeping his people together and resisting the blandishments of the Mahdi. Meantime, it is evident from the accounts which reach us, that the base of future operations is being formed on the Nile, and that the whole of the Egyptian Army proper, under Sir Evelyn Wood, will be thrown in échelon from Assouan to Wady Halfa. The desert route between Korosko and Abou Hamed is now intercepted by the enemy—miscalled rebels—and they are merely facilitating the declared policy of the Government in clearing the Egyptians out of the province. These bodies of the enemy interpolated between Khartoum and our advanced posts, would, no doubt, be easily disposed of by any Regular troops; but it increases the difficulties connected with the selection of the desert route, from whatever point it may be determined to move an army, to see that the wells are pounced upon, as they naturally would be by the enemy, who would have to be driven off ere any troops could occupy the posts along the line of march, and who would very probably destroy the supplies of water ere they were forced to fly.

It has been decided that the medal for the Soudan Campaign shall only be granted to those officers and men who did not serve in the Egyptian Campaign. Those who were in active service in 1882 will simply be granted a clasp, bearing the word "Suakim." It does not appear to be understood that many of those who fought at El Teb never saw Suakim at all. The clasp, therefore, will confer no distinction upon those actually engaged over those who merely stayed at the base. This decision cannot fail to produce great dissatisfaction. There is not an officer or man who would not willingly forego his claim to a gratuity in order to secure another medal and ribbon, and as the fighting in the Soudan was far more severe, whilst the losses were much greater than in Egypt, to make the one medal serve the purpose of commemorating the two campaigns will be regarded by the officers and men of General Graham's force as a slight passed upon them, which their gallantry certainly did not call for or deserve. It is to be hoped that before the General Order is promulgated sanctioning the issue of the medal, steps may be taken to represent the feelings of the Army on the subject. The Army is made up of sentiment, and to the soldier it seems inexplicable that he should on one occasion receive a medal for his services, whilst on another, when he has met a much more formidable foe, all he is given is a clasp. In these days of short service, it is the worst possible policy to entirely ignore the feelings of the rank and file.

One of our Paris contemporaries, not exactly devoted to sport, says that racing, which is employed rather as a vehicle for betting than to improve the breed of horses, has created a very important reaction in the Army. "The spirit of routine," says the writer up to the present, "would not hear of thoroughbreds for the Army. Thanks to racing, it has been found out that thoroughbreds, as troopers, are the most easy, the most sober and hardy horses." M. Frollo goes on to point out what a beautiful thing it would be to cavalry scouts mounted on thoroughbreds, and field-guns horsed with similar animals. "The day that we have some crack squadron mounted in this fashion, we may rest assured that the German Uhlans, in the event of war, will have their work cut out." And a good deal more in the same style, without a word of the probable cost of the proposed squadrons.

Miss Sarah Robinson, of the Soldiers' Institute, Portsmouth, has sent to us, in common with most of the leading London and provincial papers, an appeal for subscriptions to found an "Institute for Sailors and Soldiers at Alexandria," which we would very gladly see established in that very-much-to-be-rebuilt and reformed city, but we think the information General Dormer could give respecting the Soldiers' Reading Rooms and Club at Cairo would not encourage us to expect a very great deal from a similar establishment at Alexandria, where there are more "attractions," nevertheless, even a little would be much. No one who has ever seen the indescribable horrors of the slums between the landing-places and the town through which sailors and soldiers must pass, can doubt the utility and beneficence of any establishment which could rival in the most modest way the dreadful allurements of the drinking shops, strange to say, possess for our Christian brethren in the Fleet and Army. Miss Robinson says :—

> "In response to urgent appeals that I would do something for our men in Alexandria, I sent my manager, Mr. Tufnell, to see the state of things there. He was warmly received by both officers and men. Admiral Lord John Hay, Gen. Earle, Port Capt. Blomfield, Capt. Bedford, of H.M.S. Monarch, and Consul Cookson all concur in the opinion that an Institute for our sailors and soldiers is greatly needed. Our men have at present no resort but

the dirty drinking shops, where the most horrible compounds are sold under the names of 'English gin,' &c.; and low women sit at the doorways to entice them in. The drunkenness and bad conduct of many who frequent these dens is bringing disgrace on the name of 'Englishman.' Mr. Tufnell saw in the prison some scores of fine young fellows undergoing terms of imprisonment for offences caused by drink; others are suffering in hospital, and thus their services—so greatly needed at this time—are lost to the country. Land, in any good part of the city, fetches a high price; but Mr. Tufnell has secured an excellent site near the Grand Square, at a cost of £2,200, which must be paid within three months, and I then propose to build a good-sized house, with recreation and reading-rooms, beds, baths, and refreshment-rooms, trying to supply every possible attraction and comfort for our men and carrying on the work on the same plan as at Portsmouth, where by God's blessing it has been so successful. Meanwhile, I shall put up a large wooden building alongside, for the temporary use of soldiers and sailors until the Institute is completed. One reading-room will be set apart for English clerks and employés, for which they will gladly pay a small subscription. I earnestly ask those who care for the welfare of our soldiers and sailors, and the honour of our country, to help with liberal and speedy contributions, which may either be sent to myself or paid to account of 'Alexandria Institute,' at Grant, Gilman, and Longs, Portsmouth and Portsea Bank; London agents, Glyn and Co."

In France, the eldest sons of widows have hitherto been exempted from service on the presentation of certain papers; now, however, it will not be necessary for a mother to show that she has been married in order to obtain an exemption for her son.

In view of the fact that last November a memorial was presented to the Secretary of State for War, setting forth the disabilities under which the Army Pay Department labours, as compared with other Departments of the Army, we have abstained from reiterating the grievances from which the officers of the Department suffer. An official reply has now been made to the memorial of the officers, offering some slight improvements of their position. The only concessions are, that in future the Department is to be in the same position as other Departments, as regards honours and rewards; a corps of clerks, so long promised, is to be formed at an early date; and certain alterations in the regulations for voluntary retirement are to be issued. The question of admitting officers with less than ten years' service as candidates for the Department is now before the Treasury. As, therefore, the whole subject is still under discussion between the War Office and the Treasury, we strongly press upon their consideration the following points:—The cost thereof, very trifling, and which, if acceded to, would do much to allay the present discontent. The number of Chief Paymasters is to be increased from 15 to 20, to coincide with the number of important commands held by General officers. All Chief Paymasters to be accorded the honorary rank of Colonel, and granted forage allowance under all circumstances. That Staff Paymasters, after five years' service in the grade, have the honorary rank of Lieutenant-Colonel. As already stated, the expense would be very little, between £1,400 and £1,500 a year. Surely the most rigid economist could not object to so small an outlay, in face of the fact that, through the employment as Paymasters of combatant Captains of 20 years' service and upwards, the country is now saving over £20,000 a year on the Pension List.

The French legislators in favour of doing away with one-year volunteers in the Army formed their theory on the supposition that these volunteers are just the men capable of making good non-commissioned officers. A French military paper, *L'Armée Française*, combats this idea in these terms:—"It is erroneous to believe that our best non-commissioned officers will be recruited solely among the best educated classes. The pupils who have gained honours at the Central School, the Fine Arts, or the Conservatory, will be very bad sub-officers. Too high an education is not good for sub-officers; it makes them despise the thousand details of the service over which they must watch. The school of the soldier has very little charm for a pupil of the Normal School, familiar with the best authors of antiquity, or a pupil of the Central School, whose favourite study is the integral calculus." The writer, in fact, in spite of his Republican proclivities, makes out that a man should be raised to the rank of a serjeant or a corporal, and not degraded to it. He adds:—"With Europe everywhere arming and the future big with storm, it is not the time to try an experiment which is fraught with so many perils. The suppression of the volunteer system will certainly affect the future of our country; it will not give us the sub-officers needed by our army; it will simply deprive France of men capable of shining in the highest branches of science, literature, &c."

Colonel Turnbull, who writes to the *Times* to complain of his treatment by the War Office, may, or may not, have a well-founded grievance, but certainly he makes a point worthy of the attention of those who are in office as Secretaries of State for War when he describes the action of the so-called authorities—who very often are merely the clerical staff—in dealing with the personal representations of officers. A British officer with a grievance is, we admit, an objectionable creature, and ought to be squelched, as Mr. Carlyle would say; and squelched he often is accordingly, unless he gets into Parliament or secures the assistance of Parliamentary friends. Just imagine the audacity of a man—a lieutenant-colonel on half-pay—daring to prefer a request to speak with such a mighty man of war as the Right Hon. Hugh Childers, ex-Secretary for War and now Chancellor of the Exchequer! No wonder the Hon. Hugh was invisible to the like of him. He, a member of the Australian Government, a Commissioner of Trades and Customs of the Government of Victoria, Member for Portland in the Legislative Assembly, a Lord of the Admiralty, Financial Secretary of the Treasury, &c., &c., to be approached by a purchase officer with a grievance! Well may Colonel Turnbull say until matters are changed it is a folly to petition the War Office against itself, when the facts of a case are placed before the Secretary of State by the War Office clerks who act in his name. We speak not of those gentlemen disrespectfully, because there are in their ranks most able and devoted servants of the Crown, and in no public Department is there greater courtesy generally, and readiness to afford information; but we do speak of the barrier which the introduction of the civilian element creates between the officers of the Army and those who administer the affairs of the Army in high places, owing to a want of sympathy, and to a kind of antipathetic tendency in considering all claims, especially those in the nature of grievances—many of them, we admit, ridiculous and irritating.

An attempt is being made in France to get the Government to adopt regional recruitment as practised in Germany,—or more completely than in Germany, for in Germany the Guard is not recruited in any particular district, and the towns furnish recruits to thinly populated portions of the Empire. In France, the objections urged are, first, that it would be dangerous to have an army of Paris or an army of Lyons; and the consequence is that at present the two cities are under exceptional military legislation. Throughout the country the reserves are regional; but the Paris reservists, for example, are draughted into various army corps lying round the capital. The army of Paris contains very few Parisians. Another objection is that with regional recruitment different provinces would be liable to fight with each other,—the Gascons with the Normans, or the Burgundians with the Provençals. On the other hand, it is urged that service in the Army would be felt more lightly if men served in their native district,—if the men of Flanders were not sent to Guienne, and the men of Dauphiny to Picardy or Artois. A new argument in favour of district recruiting is that the mortality would be decreased. The French Army loses annually about 5,000 men; half these men die of typhoid fever, and the opinion of medical men is that this fever-rate is owing to change of climate, and that with district recruiting it would be reduced to next to nothing.

Lieutenant-Colonel J. B. Keith, late 39th Regiment, has returned to England from India in the *Euphrates*. Since his retirement on pension in 1881, Colonel Keith has been employed by the Government of India in conserving the great Buddhist and Hindoo monuments in Central India, such as Sanchi and Gwalior. For this he has been thanked by the Government of India, and the work has been characterised as "reflecting very great credit upon him." Colonel Keith has done a good deal for the revival of indigenous industries, and represented Central India at the Calcutta Exhibition. There he exhibited a gateway which he designed, consisting of 75 tons of carved stone, thereby proving that the workmen of Gwalior can carve as well as they did 2,000 years ago. This gateway is on its way home to South Kensington.

The French Government appear to have modified their views with regard to the Recruiting Bill, which was to reduce the time of active service to three years, and to abolish the one-year Volunteers, the second portion of the contingent, and exemptions. The equality system appeared quite lovely to the democratic mind, but, after mature reflection, the Government have come to the conclusion that it will not work. *L'Armée Française* points out that when the Bill was discussed before the Chamber, the Minister of War declared that he must have everything or nothing, and he was greatly applauded when he added that the most complete harmony reigned in the Cabinet on this subject. Now the Government have abandoned the all-or-nothing theory, and admit the necessity of exemptions. The *Débats*, in a long article on the subject, which goes to show that the Bill in question is simply electoral, and has nothing to do with the interests of the Army, says:—"In default of General Campenon, who abandons the Bill, we have his speech of April 8, in which he declared that three years' service with exemptions would be the very worst of adventures for the Army. What is now proposed? Precisely this adventure. At all events, we shall be able to say that we received due warning." It would be difficult to predict how all this will end, seeing that the French Government shifts its ground so deftly, and that a Parliamentary Committee, whose ideas are not more stable, is sitting on the Bill. One amendment which has been accepted by the Committee is curious enough; it is the effect that all youths who are unable to serve owing to physical infirmity shall pay a tax.

MILITARY BALLOONS.

The details for a camp of instruction and experiments in military ballooning, prepared by Major Elsdale, R.E., chief aeronaut at the School of Military Engineering, Chatham, are now under consideration, and also the best description of portable apparatus for the manufacture of coal gas, hydrogen made with steam and iron and with sulphuric acid and iron, carburetted or mixed gas, the transport of compressed gas, and the Montgolfier or hot-air balloons. For field operations the most important difficulty is the supply of gas, for which a light portable apparatus is indispensable. To manufacture 20,000 cubic feet of coal gas or hydrogen, the materials required will be—for coal gas, about four tons of coal; for hydrogen (steam and iron process), four tons of coal, two tons of iron; for the acid and iron process, three-and-a-half tons of sulphuric acid and three tons of iron. Carburetted hydrogen, a gas superior in lifting power to coal gas, but inferior to pure hydrogen, is recommended. Whatever method is adopted, it is evident that at a moderate estimate the weight of a light portable apparatus and material for the manufacture of 20,000 cubic feet of gas or hydrogen would not be less than ten tons. For field operations this is a serious question, but does not apply in the same degree to siege operations. Major Elsdale may, however, be able to devise means for reducing the weight. The transport of compressed gas in steel cylinders appears to possess advantages; the weight of the cylinders is the only objection. Whether gas be compressed to a moderate pressure of ten or twenty atmospheres, or whether it is compressed to sixty or eighty atmospheres, the result is nearly the same. About ¾ lb. of steel for cylinders will be required for every foot of gas carried. For signalling with captive or free small balloons 1,000 feet of gas might easily be carried with an expedition, two camels being sufficient for that purpose. For a campaign of five or six weeks' duration, from 60,000 to 80,000 cubic feet of gas would be required for a reconnoitring balloon. Where gas could not be obtained, the Montgolfier or hot-air balloon would probably be used, experiments on a small scale having been made in that direction. Should an expedition be sent to Khartoum for the rescue of General Gordon, the military war balloon would no doubt be ready, for great activity is being displayed by the authorities at Chatham.—*Globe.*

THE BOMBAY ARMY.

"Indian" writes:—"Having observed that the 45th Regt. N.I. (Rattray's Sikhs) has lately been ordered all the way from Jhelum to Quetta to reinforce the garrison at the latter-named place, one naturally feels inclined to ask the question why it is that Bombay troops are not able to protect what may be called the Candahar side of our frontier, without constantly indenting on Bengal for aid? Surely the Bengal Native Army has quite enough to do, without rushing down to assist every now and then that of Bombay. If Sikhs must be sent for to do all the fighting in the neighbourhood of Quetta, what on earth is the use of incurring so heavy an expense in keeping up the Bombay Army at all? Should this be the doing of Sir R. Sandeman (the political officer at Quetta), he pays but a sorry compliment to his many Bombay friends. If the Bombay Sepoy has so deteriorated that he cannot fight without the assistance of Sikhs, why the sooner he becomes a thing of the past the better for all parties."

ENGINEERS, R.N.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Kindly allow me to enter a mild protest against the untruthful assertion and scurrilous remarks made by your correspondent as to the social status of Engineers for temporary service who joined the Navy in 1878. Several of my compeers are personally well-known to myself, and I beg to correct your correspondent by informing him that we entered the service as bonâ-fide engineers, having been trained as such, and in possession of first and second-class diplomas of competency from the Board of Trade; and I dare say most of us have a family pedigree which even your correspondent might be proud to call his own. "Ne sutor ultra crepidam."—I am, &c.,

TEMPORARY-SERVICE ENGINEER.

[In the Merchant service, engineers holding first and second-class diplomas of competency mess by themselves, and find it convenient to do so; but if these gentlemen enter the Navy, their ideas alter.]

A Reuter's telegram, dated, Simla, June 4, says:—"It is expected that a mixed English and Russian Commission will proceed in the autumn to the northern border of Afghanistan, in order to mark out the frontier. An agreement has, it is understood, been arrived at between the British and Russian Governments, providing in general terms that the frontier shall follow the course of the Oxus so far as Khoza Saleh, whence it will proceed south and west, taking a circular course along the margin of cultivation to Phuli Khatun on the Heirud River."

In the House of Commons, on Thursday, Mr. Carbutt asked the Chancellor of the Exchequer whether there was any truth in the report that another of the 100-ton guns had burst, and whether the Government had any information on the subject. The Chancellor of the Exchequer said he had no information on the subject. Mr. Carbutt then asked if the Surveyor-General of the Ordnance could give any information about the matter. Mr. Brand said he had heard nothing regarding this matter.

Mr. Storey has done good service in calling attention to the deplorable condition of the crew of the Nisero, and in endeavouring to obtain relief for them and for their domestic families in this country. The correspondence presented to the House of Commons on the subject shows that the Government have spared neither paper nor ink to obtain the release of our fellow-countrymen kept in durance vile by an Acheenese Rajah who is at war with the Dutch. In days gone by, so much patience would not have obtained. A few British men-of-war's men would have been landed, and the men would have been brought off dead or alive. If the former, the Acheenese would have been given cause to remember English might.—*Hampshire Telegraph.*

NOTES FROM ALDERSHOT.

[FROM OUR CORRESPONDENT.]

A meeting of the Permanent Committee on Dress and Equipment was held on Monday, for the purpose of deliberating on important matters connected with recent issues of the modified equipment of 1884. The committee consists of Colonel R. Harrison, the President; Members: for Cavalry, Lieutenant-Colonel Hanning Lee and Field; for Artillery, Lieutenant-Colonel Magenis; for Engineers, Lieutenant-Colonel H. H. Jones; for Infantry, Colonel T. F. Dixon and Lieutenant-Colonel M. H. Hale; for Commissariat and Transport Corps, Assistant-Commissary-General G. J. Parkyn; for Ordnance Department, Assistant-Commissary-General H. P. Moors; for Medical Department, Surgeon-Major P. W. Stafford.

The 59th Army Signalling Class completed its course of instruction during the week, and returned to duty.

A new class (the 60th) has been formed, composed of the following officers:—Lieutenants the Hon. R. T. Lawley, 7th Hussars; H. D. Warburton, 11th Hussars; A. S. Baker, R.A.; L. G. H. D'Aguilar, 2nd Battalion, Grenadier Guards; H. S. Prichard, 1st Royal Scots; R. Bayard, 1st Battalion, East Kent; E. B. Eagar, 1st Battalion, Northumberland Fusiliers; W. Clayton, 1st Battalion, Liverpool; E. A. Ogle, 1st Battalion, East York; W. J. Todd, 2nd Battalion, Yorkshire; G. R. C. Paul, 1st Battalion, Gloucester; C. T. Cromie, 1st Battalion, Hampshire; C. R. S. Sainsbury, 1st Battalion, Dorset; J. A. Murphy, 2nd Battalion, South Lancashire; H. E. Maxwell, 2nd Battalion, Royal Highlanders; J. C. Conway-Gordon, 1st Battalion, Highland Light Infantry; Captain H. M. Carter, 1st Battalion, Wiltshire; and 25 non-commissioned officers.

A vocal and instrumental concert was given by the united bands of the 2nd Dragoon Guards and the 15th Hussars, on Wednesday and Thursday, in the Riding-school of the Queen's Bays, in aid of the funds of the Church of England Soldiers' Institute.

Two Committees have been formed here during the week—the first (Major-General the Hon. W. Feilding, president), to test the value of a scheme (the invention of a private firm) for supplying water to an army operating in the desert; and the second (Major-General Luard, president), to consider the question of the supply of ammunition to troops in action, &c.

Surgeon E. A. Roche, A.M.D., has taken over medical charge of the officers, women, and children, South Camp.

Quartermaster W. McCallum, A.H.C., has been ordered to the Cape of Good Hope for duty.

SHORT SERVICE IN FRANCE.

A French writer on military affairs, who does not approve of short service, makes some happy remarks upon the difference between soldiers and an army. He says, for example, that it is possible to make a good soldier in three years, in two years, or even in 18 months or less, when you have to deal with men of courage and patriotism. But to form a regiment is quite another affair. Should the period of service in the active army be reduced to three years, and everyone be obliged to serve, conscripts will really remain under the colours only 18 months. "Now, we repeat," says M. Jules Richard, "that a soldier can be formed in 18 months; but with soldiers of 18 months' service you cannot make regiments. This can hardly be done with soldiers of three years, so weak are the cadres in the way of non-commissioned officers and steady men. We are, therefore, going to have soldiers, but not regiments. And yet a numerous army requires better cadres than a select army; but the cadres become more inefficient as the ranks increase. We have hardly 6,000 non-commissioned officers, who have re-enlisted, to furnish cadres for 1,500,000 men." And hereupon M. Jules Richard calls the Members of Parliament, who are responsible for the state of affairs, "madmen engaged in a system, and not calm and reflecting legislators." M. Jules Richard then draws attention to a very important matter likely to escape the notice of the civil reformer, but with which military men are well and painfully acquainted,—to wit, the heavy task which will be imposed upon officers having to teach 200,000 recruits every year, "never ending, still beginning." M. Jules Richard fancies that numbers of officers, worn out with fatigue, will send in their papers, and that the new army will be worse than the old National Guard, because no one expected anything from the National Guard. M. Jules Richard cannot imagine how General Campenon has consented to preside over the destruction of the French Army, for he fought in China and at Metz. In China, says the writer, he saw how the little disciplined force of General Montauban put the Celestials to flight, and how splendidly the disciplined troops of the Army of the Rhine struggled against overwhelming numbers. M. Jules Richard then asks the gentlemen in favour of numbers how this immense host will live; "for with the reserve of the active army and the territorial army we shall have 3,000,000 men under arms. The Germans never had more than 1,350,000 men; they never had more than 936,915 men in France. We had more—1,600,000! But what men!" Altogether, M. Jules Richard takes a very gloomy view of the army, or rather the soldiers, of the future.

ROYAL MARINE ARTILLERY.

"Z" writes:—"The letter from a correspondent in your issue of the 30th ult., relative to the promotion of Major Tucker, R.M.A., must naturally give rise to some reflections on the present system of rewards for war service in the Navy, and its bearing upon those officers of long service and standing who may not be fortunate enough to be so engaged. It would be natural to suppose (taking the case of the executive officers in the late Soudan campaign, for instance) that when officers so distinguished themselves their reward would come from a grateful country; or that at least, as in the Brevet rank given in the Army, it would not be at the expense of ther brother-officers. But the real result of their promotions with the present limited lists is that, for no fault of their own, one commander and four lieutenants of long service, and with not a mark against them, now probably serving on distant stations, are irretrievably shelved. Now, this is only a repetition of what happens after every little war in which the country is engaged; and as we now seem embarked in another campaign in Egypt, we shall again see those who are, fortunately for themselves, now serving in the Mediterranean rewarded, as I contend, entirely at the expense of their brother officers. I may mention, to show how hardly the present system bears upon some ranks, that the Admiralty have only made one ordinary promotion (Capt. Burnell) from the Commanders' List since June 29 last."

It is notified in General Orders that, with a view of assisting men discharged from the Army on the expiration of their engagement, or transferred to the Army Reserve on completion of their term with the colours, in obtaining employment in civil life, it has been decided to keep, at the head-quarters of each regimental district, a register for civil employment. The register will be commenced on July 1. In it will be entered the names of those whose characters justify their recommendation for such employment, and the nature of the employment they are anxious to obtain; every assistance will be given them to obtain it in the district in which they may be about to reside.

The Field Marshal Commanding-in-Chief visited Aldershot on Wednesday, and was present at a review in the Long Valley. The various regiments of cavalry and infantry, and batteries of artillery, and the 5th Lancashire R.V., paraded at 10 o'clock. The strength of the force was 5,441 men, 1,246 horses, and 28 guns. The Duke made a close inspection of the line, and then saw a march-past. Some field movements followed, the object being to illustrate in a practical manner the new attack formation. The Volunteers worked remarkably well. The 39th Dorsetshire Regt. wore the new khaki uniform.

The Indian Government have appointed Capt. J. Brebner, late of the Indian Navy, Resident Transport Officer at Suez, vice Com. Chitty, the newly-appointed Consulting Officer for Indian Troopship Service.

A special Army Circular was issued last week, and was sent to the daily papers on Saturday. "A gratuity will be issued to the European troops engaged in the recent operations in the Soudan. Every officer, warrant officer, non commissioned officer, and private who was serving at Suakim or Trinkitat between Feb. 19 and March 26 last (both days inclusive) will be entitled to participate in the grant. The gratuity will be issued according to the rank or relative rank of the recipient, upon the following scale:—General, 400 shares; lieutenant-general, 152; major-general, 76 (with 100 shares extra if in chief command); brigadier-general, 56 (with 50 shares extra if in chief command); colonel, staff or departmental officers, or officers having the regimental rank of colonel, 40; colonel, except as defined above, 32; lieutenant-colonel, 32; major, 16; captain, 12; lieutenant, 7½; warrant officer, 4; non-commissioned officers and men, according to classification, contained in Article 1,032, Royal Warrant of March 11, 1882, *i.e.*, Class I., 3; Class II., 2½; Class III., 2; Class IV., 1½; Class V., 1. The amount of each share will be £2. The amounts due to officers will be paid to them by the agent of the corps or department to which they belong, and charged against the public in his accounts, the charges being supported by a certificate, signed by the officer commanding the corps or department, that each officer was actually in the Soudan between the dates in question. Warrant officers, non-commissioned officers, and men will be settled with by the paymaster or other officer paying the corps or battalions with which they were serving on March 26, the charge being supported by a similar certificate to that required by officers, and by proof payment. Each paymaster and other accountant will transmit to the War Office, as soon as may be practicable, a list of such warrant officers, non-commissioned officers, and men as may be entitled to the grant, but whom he is unable to settle with owing to death, discharge, transfer to the reserve, or any other cause. No payment will in any circumstances be made without War Office authority to any person whose name is included in the list sent to the War Office."

The *Melbourne Argus* says:—"The first meeting of the School of Military Instruction recently established by the defence authorities in connection with the new militia force was held at Melbourne orderly-room on April 5. The class consisted of gentlemen desirous of qualifying themselves for commissions. About 30 applicants for commissions were present. After being paraded, an hour's preliminary 'setting up' drill was given to the class, the parade being under the immediate supervision of Col. Brownrigg, Rifle Brigade, and Major Fellowes, 31st Regt. On being dismissed, the members proceeded to the model schools, where the class was addressed by Col. Disney, the commandant. Col. Brownrigg then delivered a lecture on 'The Duties of an Officer.'"

DIMNESS of SIGHT.—Dimness of Sight and Blindness are often caused by the use of unsuitable Spectacles. Mr. H. Laurance, F.S.S., Oculist Optician, 1a Old Bond Street, scientifically adapts his improved Spectacles to strengthen and assist the weakest sights. Testimonials from Earl Lindsay, Sir Julius Benedict, F. D. Dixon Hartland, Esq., M.P., Thomas Cook, Esq., the well-known Tourist Agent, &c. Pamphlet, containing valuable suggestions, post free.

MILITARY SERVICE IN INDIA.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—Having served as a regimental surgeon in Bengal, I can fully sympathise with "A Long-Service Soldier," and endorse his statements. Peculation is the rule in India in all subordinate departments, and the poor soldiers are made to pay heavy toll by all who supply them. Government, too, is robbed systematically. Every one sees and knows it must be so, when commissariat and barrack serjeants on allowances of £8 or £10 a month are seen driving smart buggies, with their wives clad in silks and other expensive articles of dress. The native contractors of all kinds pay "backsheesh" to quartermasters and such like functionaries as a matter of course, and never think of reporting or kicking against such extortion. From the nature of the climate and great extent of cantonments, passive resistance, the great weapon of the tribe, is an insuperable obstacle to getting justice done. The men complain of the meat tendered for rations in the morning, at one end probably of a huge cantonment. It is blazing hot, and for some inscrutable reason a surgeon is considered indispensable for a Board of Survey on the article, though he, probably, is quite ignorant of a butcher's trade. The first thing, then, is to hunt up the doctor, and he is interrupted while going round his hospital by an order to proceed a mile or more to a shed or store, where two "combatants" are waiting for him, with plaintiffs and defendants around. On arrival, he finds that he personally is really the Board. His opinion is decisive. Suppose he condemns the skinny carcase of a Bandy bullock that has probably foundered on the road. The next thing is to find a substitute, and that requires lots of foolscap, Board proceedings, confirmation, a requisition on the Commissariat store, if any exists, to supply salt-pork or beef (junk) for the day—nice food with the thermometer 120° or more in the sun! It is pretty well on to noon before this delicious viand reaches the barracks, and all the Europeans concerned are ready to vow that they will think twice before they ever complain of rations again. In fact, unless the corps is blessed with an energetic, conscientious commander, a man who will personally look after his men's comforts, and see that justice is done them, the quartermaster has the corps at his mercy. We had for chief the most selfish miser I ever met, a man who did not possess a single book, whose occupation on a hot day was to empty a bag of rupees and count them out into detachments of varying strength and formation, then sweep them together, and begin *de novo*. When fairly driven to read, say at night, he would select an old regimental order book, perhaps 20 years old, and read it aloud from the beginning, with a running commentary, thus,—"Dundalk, May 26, 1840" (yes, we were there then), "Sir,—I have the honour to acquaint you that a detachment" (yes, ruined by these d——d detachments), "as per margin, marched this morning for Dublin, in charge of &c., &c.—Your obedient servant, John Pipeclay, ensign and adjutant" (Pipeclay, yes; d——d fool that fellow, remember him well, not worth his salt). This worthy colonel rarely ever went to parade, never visited barracks, kept his adjutant and quartermaster from one to two hours daily at his own quarters, pottering over a quarter of an hour's work, and let them do as they liked. Consequently, the latter made every soul, even the poor dholies, pay him for admission to the barracks. He was less than three years quartermaster, when, to the great delight of the regiment, cholera carried him off, leaving the trifling sum of over £2,000 sterling, though he was a married man. Although I was well informed of his doings, I was quite helpless to aid my poor men. They used to come to me with a plate of gristly, tendonous beef, and a lot of coarse rice, coloured with turmeric, and say, "Is not that a pretty dinner for a poor fellow to march and fight upon?" Although Government bound the contractor to supply mutton rations twice or thrice a week, they were rarely ever seen, and an excuse was always available that "the Budmashes had looted the poor contractor's flock." I see, by your remarks, that you think "A Long-Service Soldier" an unjustifiable grumbler; but I entirely understand and sympathise in all he states. You do not allow for the bitter feeling of suffering injustice. My old friend "T. A." loves fair-play, and, above all, to see his accounts clearly vouched. Having been born and spent most of my life among them, I love the soldier. I think him the most valuable member of our working-classes, the mainstay of our Empire, the worst paid and most unfairly treated man among us.—I am, &c.,

M. D.

The annual Afghan War dinner took place at the First Avenue Hotel on the 30th ult. Present:—Lieut.-Gens. Sir S. J. Brown (in the chair), Sir F. Maude, and Sir J. Hills-Johnes; Major-Gens. Sir R. Bright, Sir C. Arbuthnot, and Sir C. Palliser, Cobbe, Hughes, and Williams; Sir L. Griffin; Cols. Fryer, Martin, Auchinleck, and Williams; Lieut.-Col. Bannerman; Majors Neill, Bisset, Barnard, Burton, Fife, and Colledge; Brig.-Surg. E. Footner; Surg.-Major Markey; Surg. Faulkner; Capts. Creed, Money, and Bell-Irving; and Mr. C. Rawlinson.

An Indian paper says that in all probability the three battalions going home this next trooping season—the 1st Batn. Royal Irish, 2nd Batn. East Surrey, and 1st Batn. Essex—will be replaced by their sister battalions. It is at any rate certain that two will be thus relieved. The battalions coming out, as also those which came last trooping season and the one before, will remain in this country according to the new plan of relief for 16 years—that is, the head-quarters of each battalion. No man, however, either officer, non-commissioned officer, or private, will be compelled to remain in India for more than eight years,—at least, such is the idea, as on completing that time one and all will be allowed relief, in fact, they can claim it after serving so long.

A Delicious Cooling Drink is supplied in Rose's Lime Juice Cordial in water; effervescing in all the Mineral Waters. It is non-alcoholic, and highly medicinal, purifying the blood. Recommended by the *Lancet*, and Medical Profession. Sold everywhere. Purchasers should order Rose's Cordial. Wholesale Stores—11 Curtain Road, London; and Leith, N.B.

The Army.

2nd Dragoon Guards. Capt. Gordon Mackenzie has been offered the adjutancy of the Hampshire Yeomanry.

5th Dragoon Guards. Major Hemming is to be seconded from April 21, on which date he took up duty as A.D.C. to Major-Gen. Rowlands in Madras.

9th Lancers. Brevet Major Gough has arrived home for duty with the depôt.

10th Hussars. Major Spottiswoode, A.D.C. to Lieut.-Gen. Cureton in India, has been granted leave to England.

15th Hussars. Lieut.-Col. Field has succeeded Col. Luck on the Committee on Dress and Equipment.

17th Lancers. An old Balaclava hero has just died in the Kent and Canterbury Hospital named Thomas Allen. Deceased received several severe wounds, in consequence of which he was subsequently discharged with a temporary pension. He was in the possession of the Crimean medal and four clasps. Mr. W. G. Cattermole, another Balaclava hero and a Yeoman of the Guard, has just died at the age of 64. Formerly troop serjeant-major in the 17th, he served throughout the Crimean Campaign, and was present at Bulgenac, Mackenzie Farm, and Biada, the battles of the Alma, Balaclava, and Inkerman, and the capture of Sebastopol (medal with annuity for distinguished conduct in the field, Crimean medal and four clasps, the Turkish medal, and medal for long service and good conduct).

19th Hussars. A young soldier writing to his father gives his experiences lately in the Soudan. In the course of his letter, he says:—"I must say I am proud to belong to so gallant a regiment as the 19th Hussars,—pluckier and more dashing a lot a General could never wish to command. At El Teb, in the first engagement, the cavalry charged the blacks, wild fanatics who had the smallest idea (if any) of death, which they rushed on to meet, and three times our corps cut through them before they broke and fled. They were armed with two assegais, a shield, and curved knife, longer though very like a pruning knife. This they use in hamstringing the horses, and when his horse came down the rider was at their mercy, very little of which was shown him by these black devils. One poor fellow riding at a swinging gallop with me lost his horse in this way, and the moment the poor fellow was down three or four men set upon him, and in less time than it takes me to write this he was speared through and through. I reined up and did my best to save the chap, knocking one of the ruffians over with my carbine, which, for me, I had drawn just a minute before and used as a revolver, for I found I was too closely surrounded by these fanatics. I then replaced the carbine and resorted to my sabre, but all in vain; I could not save the poor fellow, and nearly lost my horse in the attempt."

ROYAL ARTILLERY.

The following batteries will practice at Hay and Okehampton during the present season:—First Detachment—K Baty. 1st Brig., F Baty. 3rd Brig., and H Baty. 4th Brig., arrived on the 31st ult. Second Detachment—O Baty. 2nd Brig., A Baty. 3rd Brig., P Baty. 4th Brig., to arrive on the 21st inst. Okehampton—First Detachment—I Baty. A Brig. and H Baty. B Brig. arrived on the 31st ult. Second Detachment—A Baty. B Brig. and I Baty. B Brig. to arrive on June 21. Third Detachment—C Baty. 3rd Brig., J Baty. 3rd Brig., and Q Baty. 4th Brig. to arrive on July 12.

Lieut.-Col. Pretyman, Military Secretary to Sir F. Roberts, has obtained six months' leave to England, on medical certificate.

Lieut. Stone has been appointed an instructor in tactics, &c., at the Royal Military College, Sandhurst.

ROYAL ENGINEERS.

Lieut.-Gen. Sir G. Graham arrived at Chatham on the 30th ult., and was met at the railway station by Col. Gordon. On reaching the top of Barrack Hill the officers and men of the corps unhorsed the landau in which the General was seated and dragged the vehicle to the commandant's quarters amidst great cheering. Lieut.-Gen. Graham was the guest of the officers in the evening, and received an enthusiastic welcome from his comrades, who are proud of their Engineer General as modest as he is brave.

Major-Gen. Sayer has issued a complimentary order on the retirement of Col. W. L. Morrison, commanding Royal Engineer of the Western District. "Col. Morrison," he says, "assumed the appointment from which he now retires in Oct. 1881, and although the Major-General only became personally acquainted with the duties of this command in April, 1883, he, nevertheless, has had full opportunity during his tours of inspection of judging of the extent, variety, and importance of the charge. To a very high and truly conscientious conception of duty Col. Morrison added an exact and careful method of investigation, and an unsparing habit of application which made him thoroughly familiar alike with the details and the general principles of questions within his command. In now wishing Col. Morrison farewell, the Major-General desires to place upon record this expression of his high appreciation of the manner in which that officer performed the duties of Commanding Royal Engineer of the Western District."

On promotion to the rank of major-general, Major-Gen. Goodfellow has received from the Government the expression of their approbation of the services rendered to the Bombay Public Works Department during a period of 30 years, and their regret at his departure five years before the usual limit of time.

1st, or Royal Scots. Capt. Ross is ordered home from Barbadoes to join the 2nd Batn. at the Curragh. Capt. Tippinge remains with the 2nd Batn. on promotion.

4th (King's Own) Royal Lancaster Regiment. Lieut. Penrose, 2nd Batn., has resigned his probationary appointment for the Bombay S.C., and reverts to regimental duty.

12th Suffolk Regiment. Lieut. Fayrer, a probationer, attached to 40th B.N.I., is about to be admitted to Bengal S.C., from Aug. 2, 1882.

16th Bedfordshire Regiment. The band of the 1st Batn. played at the Health Exhibition on Whit Monday, led by Mr. Boehmer, and received much applause for its performance.

25th King's Own Borderers. The *Pioneer* says:—"Col. Harvey, brought on the Brigade Staff during the absence on sick-leave of Brigdr.-Gen. Murray, leaves more than one of his seniors out in the cold. Col. Harvey has long service, having entered in 1849; Col. Rowland, Northumberland Fusiliers, having joined the year before; the others above Col. Harvey are Col. Elgee, Welsh Fusiliers; Col. Rogers, Scottish Rifles; Col. Ball Acton, of the old 51st, whose appointment would have opened out a berth for Col. Farrington; Col. Sir B. Russell, 13th Hussars; and Col. Ralston, of the East Surreys, who is in England on leave."

31st East Surrey Regiment. The Gibraltar correspondent of the *Western Morning News* says:—"A sad accident occurred to Capt. Napier at Campomento, on May 19, whilst attending a meeting of the Gymkanha Club. From what I learn, Capt. Napier was playing at polo, when stooping over to strike at a ball he missed his balance, and fell on both arms and broke them. He was at once raised, and a medical gentleman from the village was promptly in attendance and dressed his arms temporarily, after which he was removed in a cab to Gibraltar, and received medical attendance." The detachment left behind at Aldershot on the departure of the battalion to the Mediterranean, is in readiness to proceed at an early date to Kingston-on-Thames.

37th Hampshire Regiment. Capt. Bashford, a probationer for the Ordnance Store Department, has been appointed to Portsmouth Gun-wharf for duty.

40th South Lancashire Regiment. Lieut. McSwiney, a probationer, attached to the 6th Hyderabrd Infantry, is about to be admitted to the Bengal S.C., from July 6, 1882.

48th Northamptonshire Regiment. Capt. E. G. Bennet has this week vacated the appointment of Acting-Assistant-Inspector of Army Signalling at Aldershot, which he has held for the past twelvemonth, during the severe illness of Capt. Davidson, 60th King's Royal Rifle Corps, who has now resumed this duty.

ROYAL MARINES.

The following detachment of R.M.L.I. will embark in the ss. Dana at Gravesend on the 11th inst., for Port Said:—1 captain, 2 lieutenants, 3 serjeants, 4 corporals, 1 bugler, and 65 privates.

The under-mentioned officers have been granted leave of absence, viz.:—Capt. H. de la P. Beresford, R.M.A., two months, on disembarkation; Major M. H. Farquharson, R.M.L.I., one month, on disembarkation; Major and Pymr. H. H. Kelly, R.M.A., three weeks; Major and Brevet Lieut.-Col. J. W. Scott 14 days.

Warrant Officer James Waters, R.M.L.I., superintending clerk on the General Staff, Royal Marine Office, died on the 2nd inst.

51st King's Own Light Infantry. The *Pioneer Mail* says:—"The return of Col. Farrington from leave will increase the lieutenant-colonels of the 1st South Yorkshire (late 51st) to three, thus the battalion giving a plurality of senior officers for whom duty can hardly be found. Col. Farrington cannot be brought back from the supernumerary list until the command of the battalion is vacant, which will not be till next March, when he will be appointed to the vacancy, holding the command until July 1, 1887, on which date he will complete his six years as a regimental lieutenant-colonel. On the same day Lieut.-Col. Burnaby will also be retired to half-pay, after serving his full time, without holding command for a single day. The future of Majors Graeme and Wynne could not be better, as the former, provided no one is brought in from another regiment, will jump to the command from senior major, whilst the latter, who is now third senior, will become a lieutenant-colonel on the same day, Major Chatfield having been provided for by promotion elsewhere, or retired under the half-century age clause."

53rd King's (Shropshire Light Infantry). Capt. and Qrmr. Marshall, on the Retired List, has been awarded a good-service pension of £50 per annum. He served with the regiment in the Sutlej Campaign of 1845-46 (medal and clasp); in the Punjab Campaign of 1848-49 (medal and clasp); in the campaign of 1851-52, on the Peshawur Frontier; and in the Indian campaign of 1857-59 (medal and two clasps).

58th Northamptonshire Regiment. Capt. Lys joins the 48th at the Curragh, on promotion.

60th King's Royal Rifle Corps. Major Hutton, Brig.-Major, 1st Brigade, Aldershot, has accepted the command of the Mounted Infantry in Egypt, vacant by the death of Capt. Humphries, Welsh Regt., and leaves England at once for Cairo. Major Hutton commanded a squadron of Mounted Infantry in the Boer campaign of 1881, and more recently at Alexandria he raised, organised, and for some time commanded, the Mounted Infantry in the earlier stages of the Egyptian campaign of 1882, under Sir A. Alison. Major Hutton only returned from Egypt in July last, his appointment as military secretary to Sir Archibald Alison, Bart., K.C.B., having ceased. Lieut. (Capt.) Davidson, having recovered from the injuries he sustained last year by an accidental fall, has rejoined at Aldershot, and resumed his duties as Assist.-Instructor of Army Signalling.

63rd Manchester Regiment. Lieut. Reid, a probationer, wing-officer 27th N.I., is about to be admitted to the Bengal S.C., from Feb. 28, 1883.

65th York and Lancaster Regiment was entertained at a banquet in the Town Hall, Dover, on Saturday evening. The chair was taken by the Mayor, Mr. Rees, who was supported by Major-Gen. Newdigate, Col. Goodenough, Col. Byam, and a large number of officers from the district. The men marched through the town to the hall at 5 o'clock, and were given a cordial reception as they passed through the streets. The committee decided to curtail the speeches and to devote the evening to harmony. The loyal toasts having been received upstanding, the Mayor gave the toast of the evening, "The York and Lancaster Regiment," which was received with loud cheers. Referring to the circumstances under which the regiment took part in the campaign, he said it was ordered when on the way home, after being on foreign service, to take the field against a semi-barbarous and fanatical but valiant foe. By their deeds of heroism and valour they vanquished their assailants and covered themselves and their arms with victory. Many of their comrades fell in the furious onslaught which the 65th received and so hotly repulsed; and for them they could only cast back in memory their appreciative regard for duty well performed, and lament their fall. At the same time they were truly thankful that so many of them had returned to their native country, and were then assembled to receive the expression of their admiration and thanks, thus conveying, as he believed he did, the common sentiments of the country at large. The toast was drunk amid loud cheers. Major-Gen. Newdigate afterwards briefly congratulated the men on their return, and subsequently Col. Byam gave the toast of "The Mayor and Corporation and those who had entertained the regiment."

75th Gordon Highlanders. A handsome granite monument in the form of a Scotch cross, 15 ft. in height, was erected on Thursday in Duthie Park, Aberdeen, to commemorate the gallant conduct of the regiment in the Egyptian Campaign. The monument bears the following inscription:—"Erected by the officers, non-commissioned officers, and men of the 1st Batn. Gordon Highlanders to the memory of their comrades who were killed in action or who died of wounds or disease contracted during the Egyptian Campaign, 1882." On the back of the cross are the names of the officers and men as follows:—"Egypt, 1882.—Lieut. H. G. Brooks, Lance-Serjt. Patrick Fitzgerald, Lance-Corpl. William Munro, Ptes. Thomas Smith, William Wilson, Thomas Bartlet, William Martin, Henry Hodges, and Robert Dyer." "Soudan, 1884.—Corpl. Kenneth M'Kenzie, Ptes. John Lebreth, Charles Ryder, John Payne, and James M'Leod."

78th Seaforth Highlanders. Lieut. Mackenzie has been appointed Acting A.D.C. to Lieut.-Gen. Cureton in India.

82nd South Lancashire Regiment. The *Western Daily Mercury* says:—"The Horse Guards have chosen Serjt.-Major R. McCoy, of the 2nd Batn. of this regiment, now stationed at Raglan Barracks, Devonport, to be qrmr. of the battalion in the place of the late Capt. Slade. Mr. McCoy deserves well of a grateful country if ever anyone has done. He, to the South Lancashire, or the old 82nd, may be correctly described as 'the child of the regt.,' being born among its very old members, and having worked his own way from the humblest position to that of warrant rank. As serjt.-major Mr. McCoy has displayed remarkable abilities."

97th Royal West Kent Regiment. Capt. Lousada is about to retire.

98th North Staffordshire Regiment. A telegram, dated Simla, June 2, says:—"Lieut. Dupuis recently left Quetta on a shooting excursion, and had not since been heard of. His body has now been found, and there is no doubt that he was murdered by Pathans." The deceased entered the Army Aug. 11, 1880, and became lieut. July 1, 1881.

Rifle Brigade. Lieut.-Col. Slade has been posted to the 2nd Batn. at the Curragh. Lieut.-Col. H. C. G. Dugdale has been ordered home from India, and posted to the 3rd Batn. at Aldershot.

Ordnance Store Department. Assist.-Comy.-Gen. F. Pridham has been posted to Priddy's Hard, vice Assist.-Comy.-Gen. Booth, appointed to Nova Scotia; Dy.-Assist.-Commissaries-Gen. Kernaghan, to Barbadoes; Warren, to Jamaica; Capt. Archdale, to Portsmouth, vice Warren.

The Auxiliary Forces.

MILITIA.

Southern Division, Royal Artillery. The *Hampshire Telegraph* announces that "Major Cowell (Hants Artillery Militia) met with a serious accident. He had been on a visit to Mr. Bonham Carter, of Little Green, Alverstoke, on the 25th ult., and left at 10 o'clock for Fort Grange, where his regiment is undergoing training. He had crossed the moat, which is now filled in and is used as a tennis-court, and, with a view of making a short cut to his quarters, ascended the slope of the fort, intending to enter by the billiard-room window. Early the following morning he was found lying in an unconscious condition at the bottom of the slope." Major Cowell has since been making satisfactory progress, and hopes are entertained of his recovery.

Lancashire Division, Royal Artillery. The 2nd Brig. has just completed a most successful training in camp at Southport, on the termination of which it was inspected by Col. Tyler, commanding Auxiliary Artillery, Northern District. There were on parade 461 rank and file, and the following officers:—Lieut.-Col. Brown, Major Stanley Arnold, Major and Adjt. Uppleby, Capts. Walker, Batson, Caister, Drury, Fosbroke, and Fergusson, Lieut. Blessig, Capt. and Qrmr. Wishart, and Brig.-Surg. Riordan. Col. Tyler said they had turned out remarkably well. They had been very steady on parade. Their time was nearly up now, and he was glad to hear there had been no complaint as to misconduct either in town or as to their behaviour in the camp. That was highly creditable both to the officers and men.

South Irish Division, Royal Artillery. The 7th Brig. (Clare Artillery), who have undergone their annual training at Gosport, embarked on board the Assistance at Portsmouth on Tuesday for Queenstown, *en route* to Ennis, where the brigade will be dismissed.

3rd East Surrey Regiment will occupy the West Infantry Barracks at Aldershot, and be attached to the 2nd Brigade during their training.

4th Oxfordshire Light Infantry. The 4th Batn. will occupy the new brick huts in the North Camp, Aldershot, and be attached to the 3rd Brigade during their training at Aldershot, from June 9 to July 5, instead of being placed under canvas as previously arranged.

Royal Fusiliers. About 10 officers and 221 non-commissioned officers and men arrived at Aldershot on Thursday, and are encamped on Rushmoor Hill for musketry practice. This detachment is in advance of the battalion, which will arrive for training on the 16th, and be encamped on Rushmoor Hill.

Royal Dublin Fusiliers. The 4th Batn. returned to Dublin on Wednesday from the Curragh, on completion of its training. The Colonel Commanding has issued the following battalion order, which was read to the men on parade :—"This training of the regiment being the last at which Major W. P. Holmes will appear as adjutant, in which capacity he has acted for upwards of five years, the commanding officer cannot allow the regiment to break up without letting them know the satisfaction that he (the commanding officer) has always felt at the manner in which the duties were performed by Major Holmes, and he takes this opportunity to express his approbation, and to return thanks on his own part and that of all the officers of the regiment to Major Holmes for his general attention to the interests of the regiment, and for the good feeling and kindness which he has always shown to those with whom he has been so long connected. We wish him every happiness and prosperity in his future career."

Welsh Regiment. The 3rd Batn., under command of Col. Heyworth, was inspected by Col. Barnes, commanding the 41st Regtl. District at Cardiff, on the 29th ult. Before the regiment left the parade, Col. Barnes, in a brief speech, congratulated Col. Heyworth on the great improvement the regiment had made since he inspected it last year, both in drill and general efficiency. This is chiefly to be attributed to the exertions of Major Wade-Dalton their adjutant, who is untiring in his efforts to promote the efficiency of all ranks. The officers present at the inspection were Col. Heyworth, Majors Colquhoun, Reade, and Perkins, Capts. Calland, Morris, Thurston, and Story, Lieuts. Gilbert, Edwardes, Jones, and Baker, Major and Adjt. Wade-Dalton, Surg.-Major Taylor, and Qrmr. Wiltshire. The following officers were attached to the regiment for the training :—Major Brindley, Capt. and Hon. Majors Mansergh and Read, Capts. Outhwaite, Morrison, and R. Story, Lieuts. Nicholson, Duncan, and Hon. W. Chetwynd. The conduct of all ranks throughout the training was extremely good, and the regiment has won golden opinions in Cardiff. As this regiment has been under canvas ever since 1873, it is now quite time some arrangement should be made as to placing it occasionally in barracks or billets, for the continual wet weather of South Wales causes great discomfort both to officers and men.

Argyll and Sutherland Highlanders. The officers of the 3rd Batn. (Highland Borderers) held their annual dinner at the Ship and Turtle, on the 30th ult. Present : Col. Findlay, Majors Tait and Horrocks, Capts. Keith Maitland, and J. Russell, and Lieut. C. Stirling.

4th Battalion, the Bedfordshire Regiment. This battalion assembled at Hertford on the 12th ult. for its annual training, under the command of Col. Bruce Fellows. The men, although quartered in billets, have behaved remarkably well, and their conduct throughout the training has been good. The battalion was inspected on Tuesday, the 3rd inst., by Major-Gen. White, C.B., commanding the Eastern District, who expressed himself well pleased, both with the cleanliness of the men on parade and also their steadiness under arms. The annual inspection took place on the following day under Col. Apsley Cherry, commanding 16th Regtl. District, who expressed great satisfaction with all he had seen, and in the evening the officers entertained their friends at a dance in the Town Hall. The men will be dismissed to-day (Saturday).

The under-mentioned battalions of Militia will arrive at Aldershot on Monday next for their annual training :—5th Royal Fusiliers (Royal South Middlesex Militia), 20 officers and 680 men, from Feltham ; 3rd East Surrey (1st Royal Surrey Militia), 17 officers and 800 men, from Kingston ; 4th Oxfordshire L.I. (Oxford Militia), 20 officers and 500 men, from Oxford. The 5th Royal Fusiliers, encamped on Rushmoor, 1st Brigade; 3rd East Surrey, West Infantry Barracks, 2nd Brigade; 4th Oxford L.I., North Camp, 3rd Brigade.

YEOMANRY CAVALRY.

The Royal North Devon Hussars were inspected on Wednesday at Barnstaple by Col. Mussenden. The inspector expressed himself as highly pleased with the manner they had acquitted themselves. Their regiment stood at the head of the other yeomanry regiments in the country in repect to their few absentees, but he was sorry there were not more officers. He hoped some of the country gentlemen would before another year join the regiment. The total strength is 357, and of these 316 were on parade. The annual ball took place in the evening.

THE VOLUNTEERS.

22nd Middlesex, R.V.C. (Central London Rangers). The Nordenfelt machine-gun detachment of this corps, numbering 2 officers, 5 sergeants, and 37 men, proceeded by rail last Saturday to Aldershot, and were met at the town station by Major Patterson, Brigade-Major of the 2nd Brigade, and the band of the 39th, the Dorset Regiment, which played the detachment into camp. Guard was mounted on Sunday, and the detachment attended the Church Parade of the Dorset Regiment, marching in rear of that battalion to church. On Monday the guns were taken to the L and K ranges under Cæsar's Camp, when the detachment was inspected by Sir Archibald Alison ; Major-Gens. Luard and Fielding, and their respective staffs, besides a great number of regimental officers remaining to watch the practice made by the detachment at ranges varying from 500 to 1,000 yards. Considering that most of the men had never fired these machine-guns before, and only a few of them once before, the practice made was good. The simplicity and utility of the carriages on which the guns were mounted, an invention of Col. Alt, who commands the Rangers, were admitted by all the officers present, who expressed their opinion that machine-guns would at no distant date have to be added to the establishment of every Line regiment. Col. Gildea, commanding the 21st Scots Fusiliers, is, we understand, of opinion that the band of each battalion could with advantage be set to work these guns in action, limbering them up to a baggage waggon when on the line of march.

REGIMENTAL DINNERS.

The following regimental gatherings have been held in London during the week :—

1st Life Guards. At the Albion, on the 31st ult. Present:—Lord Delamere (in the chair), Mr. C. du Pre Alexander, Major-Gen. Bateson, Major Hon. C. Byng, Lord A. Butler, Mr. L. E. Barry, Hon. Le D. Boscawen, Capt. T. Cox, the Earl of Clonmel, Mr. T. G. P. Calley, Mr. G. Carter, Col. C. W. Duncombe, Capt. C. Duncombe, Sir W. Fraser, Bart., Col. Fraser, Capt. W. H. Fellowes, Lord Greville, Mr. O. W. George, Viscount Grimston, Mr. J. Godier, Hon. R. Grosvenor, Mr. C. W. Harvey, Mr. G. E. Holford, Mr. J. M'Garel-Hogg, Mr. G. R. Homfray, Mr. S. G. Hamilton, Mr. F. Lovell, Sir Simon Lockhart, Bart., Mr. H. G. Leigh, Mr. F. D. Lyon, Mr. Martin Mence, Mr. C. A. Scott-Murray, Capt. C. N. Miles, Col. Needham, Lord North, Lord Ormathwaite, the Marquis of Ormonde, Viscount Parker, Mr. D. V. Pirie, Lord Rodney, Major J. S. Reid, Mr. R. H. Rawson, Col. H. Streatfield, Capt. J. E. P. Spicer, Capt. A. F. L. Smith, Col. Hon. R. Talbot, Capt. C. Thorold, Capt. Hon. A. W. Hill Trevor, Capt. R. C. Turnor, Capt. St. John Taylor, Mr. G. H. Thornton, the Marquis of Waterford, and Mr. F. Walker. The band of the regiment was in attendance, and played at intervals throughout the evening.

Royal Horse Guards. At Lord Carrington's house, 8 Whitehall Yard, on Thursday. Present :—Lord Carrington (in the chrir), Marquis of Worcester, Lord De L'Isle and Dudley, Lord Fitzhardinge, Hon. T. W. Fitzwilliam, Hon. C. W. Fitzwilliam, Gens. D. Baillie and C. Ives ; Hon. C. Lascelles ; Majors G. Stirling and M'Alpine ; Lieut.-Col. J. W. Baillie ; Capts. Whitmore, Slingsby, H. Wombwell, Miller, Trelawny, and Gascoyne ; Messrs. P. Perseval, J. A. Bloxam, F. S. Stanley, G. Woodroffe, H. Short, H. Vyse, and C. G. Logie ; and the following officers now serving in the regiment :—Field-Marshal Lord Strathnairn, G.C.B., Cols. F. Burnaby and Milne Home ; Lord Kilmarnock, Lord Arthur Somerset, Viscount Dalrymple ; Major G. Wickham ; Capts. Wynne Finch, Brocklehurst, and Atherley ; Hon. L. Byng ; Mr. C. Selwyn, Mr. F. H. Constable, Mr. C. Combe, Mr. V. Ferguson, Mr. J. Burns, Lord Skelmersdale, Mr. W. Drake, Mr. M. Collins, and Mr. J. Harpley.

2nd Dragoon Guards. At the Albion, on Wednesday. Present :—Lieut.-Gens. Sir C. P. B. Walker, K.C.B., Hutchinson, and Seymour ; Majors Aubertin and Carnegy ; Captain Clerk ; Messrs. C. P. Dawson, G. P. Douglas, and J. E. Dewar ; Capt. Elliott ; Messrs. W. Flood and T. P. Gudgin ; Capt. Gould ; Major Hall ; Messrs. L. Hibbert and R. F. Hibbert ; Capt. L. Kay ; Col. R. Keene ; Mr. W. Kirk ; Capt. Lambert ; Lieut.-Col. W. H. Lee ; Mr. E. Leigh ; Lieut.-Col. O'Brien ; Capt. Ormsby ; Mr. G. B. Preston : Cols. Sneyd and Steward ; Mr. G. J. Scott ; Capt. Tattersall ; Messrs. J. F. Wiseman and F. E. Wollaston.

3rd Dragoon Guards. At the Albion, on the 31st ult. Present : — Lieut.-Gen. Seymour, C.B., Major-Gen. Chaplin, Cols. Murray and Blenkinsop ; Lieut.-Col. Arthur ; Majors Burney and Grace ; Surg.-Major Robinson, Capts. Pryse and Arthur ; Lieuts. Farquharson, Alexander, Mercer, Keith, and Williams.

5th Dragoon Guards. At the Freemasons' Tavern on Monday. Present :—Gen. Sir T. McMahon ; Lieut.-Cols. Jee and Bolton ; Major M. Bowers ; Capts. H. Atherton, Gist, J. F. Green, Hamilton, Halford, Hegan, Marsland, Mills, Robson, Otway, and St. J. Paulet ; Messrs. St. J. C. Gore, G. F. Hayworth, Dudley Beaumont, and J. G. De Burgh.

4th Hussars. On Tuesday, at Limmer's Hotel. Present :—Cols. Phillips and M. Moore ; Lord E. Vane Tempest ; Lieut.-Cols. Hutchins and Bibby ; Majors Sergison, Underwood, Adlington, Nevinson, and Edmonstone ; Capts. Lord Howard de Walden, Soames, T. Gist, Follet, Pearson, Ade C. Brooke, Farmer, and De la Cherois ; Lieuts. Blacker, Hon. F. E. de Moleyns, Cunninghame, Richardson, K. Smith, Dewhurst, and W. Todd ; and Mr. H. Sewell.

6th Inniskilling Dragoons. At the Albion, on the 30th ult. Present :—Gen. Shute and Sir F. FitzWygram ; Cols. Evans, G. Luck, the Hon. C. W. Thesiger, and Lieut.-Col. Mahon ; Sir T. T. Grove, Bart. ; Major A. F. Stewart ; Dr. L. Armstrong ; Capts. W. H. Brown, C. Johnstone Douglas, H. Ellis. Frederick, O'Neal, Sutton, A. G. Thompson, P. J. Waldron ; and Mr. V. T Eyre, Esq.

14th Hussars. At Limmer's Hotel, on the 29th ult. Present :—Gens. C. W. Thompson and Ainslie ; Col. Baskerville, Lieut.-Col. Russell ; Majors Hon. H. G. Gough, T. E. S. Hickman, and Kentish ; Capts. Hon. F. Amherst, Ashton, Digby-Boycott, Blair, Henry Hill, Tuthill, and W. R. Wynter ; Messrs. A. Brassey, W. E. Buller, C. S. Hemery, A. E. King, G. C. Ricards, G. B. Yarborough, G. S. M. Palmis, and W. L. M'Call.

Royal Engineers. At the Freemasons' Tavern, on Thursday ; the Duke of Cambridge in the chair. Lieut.-Gen. Sir G. Graham was specially invited as the guest. Sandford, Major-Gen. Thekleton, Col. A. Blunt, Major L. Battiscombe, Col. Beamish, Col. Stevenson, Col. G. Napier, Col. T. M. Harris, Major-Gen. Crowe, Major-Gen. Malcolmson, C.B., Col. G. Twiss, Capt. Heathorne, Col. A. R. Hoskins, Dr. O. Sturges, Col. G. Ritchie, Major C. H. Strutt, Col. Harcourt, Lieut.-Col. Leishman, Lieut.-Col. Theobald, Lieut.-Col. Basevi, Lieut.-Col. W. J. Finch, Lieut.-Col. W. H. Sandham, Major Newall, Capt. Graham Edwardes, Lieut.-Col. F. Lodge, Lieut.-Col. Montefiore, Brig. Surg. J. Lumsdaine, and Brig. Surg. Cruickshank, Major-Gen. Fuller, Major-Gen. Hailes, and Major-Gen Morse.

HOW TO AVOID THE INJURIOUS EFFECTS OF STIMULANTS.—The present system of living—partaking of too rich foods, as pastry, saccharine and fatty substances, alcoholic drinks, and an insufficient amount of exercise—frequently deranges the liver. I would advise all bilious people, unless they are careful to keep the liver acting freely, to exercise great care in the use of alcoholic drinks, avoid sugar, and always dilute largely with water. Experience shows that porter, mild ales, port wine, dark sherries, sweet champagne, liqueurs, and brandies, are all very apt to disagree ; while light white wines, and gin or old whisky largely diluted with soda water, will be found the least objectionable. Eno's Fruit Salt is peculiarly adapted for any constitutional weakness of the liver ; it possesses the powers of reparation when digestion has been disturbed or lost, and places the invalid on the right track to health. A world of woes is avoided by those who keep and use Eno's Fruit Salt, therefore no family should ever be without it. CAUTION.—Legal Rights are protected in every Civilised Country. Examine each bottle, and see the Capsule is marked "Eno's Fruit Salt." Without it, you have been imposed on by worthless imitations. Sold by all Chemists. Directions, in Sixteen Languages, how to Prevent Disease. Prepared only at Eno's Fruit Salt Works, Hatcham, London, S.E., by J. C. Eno's Patent.

ROYAL CAMBRIDGE ASYLUM for SOLDIERS' WIDOWS, KINGSTON-ON-THAMES.

Supported by Voluntary Contributions.
LADY-PRESIDENT.
H.R.H. the DUCHESS of CAMBRIDGE.
PRESIDENT.
H.R.H. the DUKE of CAMBRIDGE, K.G.
CHAIRMAN OF COMMITTEE.
General H.S.H. Prince EDWARD of SAXE-WEIMAR, K.C.B.
OFFICE—40 CHARING CROSS, S.W.

This Asylum was opened in February, 1854, to provide a home for the widows of non-commissioned officers and privates of the Army of not less than 50 years of age.

There are 65 widows in the Asylum.

Each widow has a furnished room, and receives seven shillings weekly, besides a monthly allowance of two shillings and sixpence for coals.

The House is capable of containing 70 widows, and the Committee appeal to the public for funds to enable them to admit the additional number, the present subscriptions being insufficient.

The funded income of the charity yields only £930, with an additional £50 from the Princess Mary's Fund for Nurses, to meet an estimated expenditure of £3,000 per annum.

An annual subscription of half-a-guinea, or a donation of five guineas, entitles to one vote at each election, with the right of nominating a candidate.

J. A. STEWART, Colonel, Secretary.

IMPORTANT to NAVAL and MILITARY MEN.

THE MUTUAL LIFE ASSURANCE SOCIETY.

(*Established* 1834.)

No **EXTRA PREMIUM** for Climate or War Risk is Charged after the Policy has been Five Years in force, and the Life Assured is aged Thirty.

Army & Navy Gazette.

LONDON, SATURDAY, JUNE 7, 1884.

IT may be remembered that Lord Hartington, in reply to a question in the House, stated that an account in the *Army and Navy Gazette* of the destruction of ordnance and torpedoes at Alexandria was—well—"untrue." Lord Hartington silenced the honourable Member who believed our report, and he afterwards furnished certain data to justify his contradiction. He very probably satisfied those who were interested in the matter that the statement was untrue, and he certainly astounded the writer in the *Army and Navy Gazette*, who reported things which he has seen. Well, now, weeks after the authoritative denial, there comes to hand the admirable official "Report of the British Naval and Military Operations in Egypt," issued by the United States Government from the Navy Department, and in that official report we find the following passage for Lord Hartington's digestion :—

> "Immediately after the bombardment, the work of destroying the offensive capacity of the fortifications bearing on the sea was begun. Parties of men, mainly from the *Hecla* (torpedo-supply ship) and the *Condor*, destroyed the ammunition in the forts, throwing the powder and shell into the sea. Torpedo detachments from various ships wrecked the guns, all of which were thoroughly spiked. The light guns (6½-in. S.B.) were hove off their carriages and the rifled guns treated with gun-cotton. If the various plates giving views of these guns are studied, it will be seen that every one of the latter exhibits a slight bulge near the muzzle. The official report on this subject is, unfortunately, a confidential document, but it is believed that no gun resisted the detonation of a pound of gun-cotton placed about 18 in. inside of the bore. The result is a distortion sufficient to prevent the introduction of the shell, while the external appearance is only altered to the eye of the close professional observer. A much larger charge than usual must have been employed in the 8-in. gun at Oom-el-Kabebe, whose muzzle is absolutely blown off. Hundreds of tons of gunpowder were ruined, and scores of valuable guns rendered useless. The object or necessity of this destruction is hardly evident. The torpedo stores at Mex received a similar treatment. The cases were punctured freely with pick-axes."

Of course, that may be wrong, too. But who will believe it? As to the burning of Alexandria, the United States' Report says :—

> "In anticipation of the necessity of landing an armed force on Egyptian soil, the British Government had previously embarked the infantry and marine battalions, whose arrival at Alexandria has been already noted, and had sent the vessels conveying them to Cyprus, where they were to be held as a reserve in case of emergency. These troops had been summoned by Admiral Seymour to Alexandria shortly after the bombardment of the fortifications and the occupation of the town by the seamen and marines of the fleet. That they were not on hand to take possession of the place on the morning of July 12 is to be regretted. Had they, or indeed almost any number of men, greater than a mere handful, been landed at that time, the burning of the city, one of the greatest diasters of the age, would have been averted. It is so easy, however, to judge after the fact, that to many persons it is hard to understand that such an occurrence could have scarcely been foreseen, as a necessary consequence of the successful engagement of the forts, and therefore as necessitating preparation on his part for the immediate disembarkation of armed men. Nor, in fact, does the discussion of the question properly belong to a report of this nature. Nevertheless, viewed in the light of subsequent events, it conveys the lesson that, under similar circumstances, in the future, such prevision and preparation will be obligatory on the side of the attack to properly defend the interests of neutrals against the ravages of a semi-civilised enemy smarting under the sense of defeat."

We shall return to this review of our operations next week.

H.R.H. the Field-Marshal Commanding-in-Chief will hold a Levée at 1 o'clock, on Thursday, June 19, at the Horse Guards, Whitehall, the number being limited to 150. Applications to attend should be addressed to the Military Secretary.

The 100-ton gun at Gibraltar has not "burst," we are glad to say; but a Palliser shell burst in the tube and scarred it, not so severely, however, but that the file may be able, as it is hoped and believed, to make it all right.

When at Aldershot, on Wednesday, the Duke of Cambridge and Staff inspected the proposed site for the Duke of Wellington's statue. As at present arranged the Iron Duke will be placed on an eminence overlooking Camp and town, between the Head-quarter Huts and the Cambridge Hospital.

Colonel C. M. Clarke, C.B., A.A.G. of the Aldershot Division, will shortly be transferred to the Horse Guards Staff, in succession to Sir Redvers H. Buller, promoted. Colonel Clarke possesses qualities which eminently fit him for the position of Assistant-Adjutant-General at our great tactical camp and training-ground; and it almost to be regretted that it should be found necessary, in the interests of the service, to remove this valuable officer to a position of perhaps greater honour, but certainly of less responsibility than that which he holds at present.

We look forward with interest to the publication of Lord Archibald Campbell's work—mentioned in a letter which he addressed to us lately—on the history of national dress of the Scottish Highlanders, from "feather hat to hose, garters, and buckled shoon." The compilation of such a work is a task which Lord Archibald Campbell is well qualified to undertake, and a reliable book of reference on this subject has long been needed. We trust Lord Archibald Campbell will not take it amiss if we venture to express the hope that he will not omit to give his readers the authority on which he bases his arguments or assertions in support of any statement open to question on a matter so dear to all Scotchmen as the origin of their national dress, for by this means only will the sceptics be silenced. Lord Archibald Campbell, in response to a recent challenge, asks very pertinently—"What is the origin of the Bedouin's striped vestment?" He might with still greater force and precision ask the origin of the "grey" of the "coat," and the garment of many and divers colours treated of in Holy Writ. There is undoubtedly a common idea abroad amongst Southrons and Sassenachs that at all events portions of the dress of the Scottish Highlander, as worn in the Victorian age, are of comparatively recent date.

Captain A. W. Anstruther, R.A., has been appointed to the Department of the Director of Artillery, vice Captain F. W. Campbell.

Ratib Pasha, who defended the ex-Khedive Ismail against the assaults of the Levantine in Paris the other day, was Minister of War and Commander-in-Chief of the Egyptian Army in the palmy days of his master. When the evil days of exile fell upon the house, Ratib, unlike most of his fellows, followed Ismail, and he and Sefer Pasha, who was Chief of the Staff to Omar Pasha in the Crimea, and greatly distinguished himself at the battle of Eupatoria which gave the Czar his death-blow, among the faithless still were faithful found. But Ratib is a Turk and Sefer is a Pole, and these people are not sensible about their own interests.

Lieutenant W. C. Savile, R.A., has been appointed to the Staff of the Royal Gunpowder Factory, Waltham Abbey.

Lieutenant-Colonel F. H. Le Mesurier, R.E., makes an appeal for help to perpetuate the memory of over a hundred Englishmen who gave up their lives in the Transvaal in the service of their Queen and country. "In that distant land," he says, "at the time cut off from all communication with England, they fought and fell unheeded and unknown. Their comrades, the Regulars and the Volunteers, who with them formed the garrisons of the towns, have subscribed about £400 for the purpose of erecting a memorial. The sum is not sufficient to provide a suitable monument in London, but it is thought that many who are aware of the gallant and successful defence made by these small isolated bands of their countrymen will be glad to contribute towards the carrying-out of the project." Subscriptions will be received at the Standard Bank of British South Africa, 10 Clement's Lane, E.C.

Major-Generals H. H. Crealock and H. Marshall become liable to retirement under the Five Years' Clause, unless employed by next month.

When we remember the fate of the frontier line drawn by Stanton Gordon, &c., after the war of 1854-56, and learn that a mixed Commission of Russian and English officers is about to draw a Rubicon for the Czar between the Turcoman-Persian territory and Afghanistan, we do not feel perfect confidence that the line of demarcation will keep out the tide or check the Cossack, unless there be some very substantial appearance of a stronger barrier in rear of it.

The command of the Lancaster Regimental District becomes vacant on the 21st inst. by the retirement of Colonel A. C. K. Lock.

"England cannot allow any interference in Egypt." That seems to be settled. The sooner Lord Northbrook and Lord Hartington prepare to carry out this dictum, and to enable England to resist an attempt to interfere the better, for that the attempt will be made there can be no manner of doubt. The canard from Vienna respecting the appearance of the unspeakable Turk as the Saviour of the Christian hero, Gordon, is too monstrous for acceptance.

The appointment of Lord Chelmsford to the Lieutenantcy of the Tower saves him from retirement on account of non-employment, as his five years would have expired next month.

Under the new scheme for the Ordnance Department in India, the powers and authority of the Director-General will be largely increased. Each section will have its own Inspector-General. The Consolidated Department will be divided into three circles of superintendence and supply. The officers and Warrant officers will be placed on one list, we believe, as in the case of the Military Accounts Department, and it will be possible for the Director-General to remove them without reference to presidential limits, and to utilise them as expedient. Although he will not be concerned with details, the general direction of work in each factory will rest with the Director-General, who will also be responsible for the supply and distribution of ordnance stores and for the annual estimates, as well as indents for stores from England. The scheme still has to be tried, but it certainly at first sight seems to possess the elements of success. The fundamental principle is to bring subordinates under one head, to promote economy and efficiency. But whether the new arrangement works well or not, it is a great advance on the system which it replaces.

Baker Pasha left London to join his family at Baveno on Thursday. There is a very ugly gash in his right cheek, some three inches deep, which the modern appliances of the chemist and surgeon have hidden with a clever coat, and have bridged over, so to speak, with a false skin.

We announced lately that Major Graves, 20th Hussars, Adjutant of the Staffordshire Yeomanry, had represented to the Council of the National Rifle Association the necessity for a reconsideration of the terms upon which the Loyd-Lindsay competition is conducted. In consequence of Major Graves' representations, the Association have resolved "That the aggregate value of the prizes in the Loyd-Lindsay competition be increased from £120 to £130, and divided as follows:—For Martini-Henry Rifles—1st prize, £40; 2nd, £20; £60. For Snider Carbines—1st prize, £40; 2nd, £20; 3rd, £10; £70; five prizes, £130. The sections to declare at the time of entering what arm they elect to shoot with."

Major Hallam Parr, who arrived in town on Wednesday, was present at the funeral of his old chief, Sir Bartle Frere, on Thursday,—in fact, not one of the Staff officers who served under him in India and Africa, now in the country, was absent, for he gained the affection as he commanded the respect of all who knew him.

The Government of the Colony of Victoria has raised a regiment of Dragoons, and has added to its establishment a battery of six Nordenfelt ten-barrel Martini-Henry calibre machine-guns, each drawn by two horses. This is the first machine-gun battery attached to any cavalry force in the world. The sole infantry battalion possessing this arm is the 22nd Middlesex R.V.C. (the Central London Rangers).

Captain A. H. C. Phillpotts has been appointed Adjutant of the Royal Horse Artillery Depôt at Woolwich, vice Captain J. Gillespie.

The following selections have been made for Horse Artillery jackets :—Brevet Lieutenant-Colonel P. T. H. Taylor, to command C Battery, A Brigade, at St. John's Wood; Brevet Lieutenant-Colonel F. S. Le Grice, to command F Battery, B Brigade, at Canterbury; Major H. Pipon, to command D Battery, B Brigade, at Kirkee; Major R. Alexander, to command K Battery, B Brigade, at Rawul Pindee; Major A. Swinton, to command M Battery, B Brigade, at Secunderabad; Captain F. W. Campbell, to A Battery, A Brigade, at Newbridge; Captain J. Hotham, to J Battery, B Brigade, at Exeter; Lieutenant A. H. Gordon, to D Battery, A Brigade, at Sealkote; and Lieutenants H. K. Jackson and J. S. Douglas, to L Battery, A Brigade, at Umballa.

It is with regret that we announce that so worthy an institution as the Royal United Service has this year experienced a great falling-off in members and a corresponding reduction in its income. It is to be hoped that officers who take an interest in their profession, and who have not yet joined the institution, will not delay doing so, as it is in every way deserving of their support.

The accident which led to the death of the son of Colonel Bryne, in the cricket-field, has called forth the expression of much sympathy from the many friends of the gallant officer in and out of the service.

It is interesting to observe the science of "the contemplative man's recreation" as is practised in the House of Commons by Mr. Ashmead-Bartlett, Sir D. Wolff, and other professors of the gentle art of tickling a Minister. They generally bait with a telegram, but sometimes they spin a piece of Blue-book or a newspaper cutting for their scaly prey. The wily old trout are seldom caught by Mr. Ashmead-Bartlett, but he occasionally hooks a grayling of the Fitzmaurice sort. Sir D. Wolff has had some splendid runs with his fishy opponents, but they generally break away owing to want of notice, and when Sir Drummond appears on the bank next time they dodge the fly. Mr. Lowther, Colonel Tottenham, Lord A. Churchill, and others, with bait-cans and fly-hooks, are always on the alert for any chance of a good rise; but Mr. A. Bartlett's want of discrimination in casting and repeated flogging of the waters scares many fish away, and prevents craftsmen having a chance, and hinders judicious "netting."

We learn that Colonel Chenevix-Trench, Military Attaché to the Embassy to the Court of the Czar is on his way back to St. Petersburg, after an extended tour in the Caucasus, &c.

The *Sunday Times* makes a good suggestion :—"The *London Gazette*," it says, "is seen by a comparatively small number of persons. Why are not the lists of 'Soldiers' Unclaimed Balances' published in such daily papers as circulate in military and industrial circles? I wish some military Member would force this question on the attention of the House." We quite endorse what our contemporary says. If there is one paper more than another that the public at large never by any chance have an opportunity of seeing, it is the *London Gazette*; and yet this is the medium through which alone the relatives of deceased soldiers can obtain information as to whether there is any money due to them from the estates of the deceased.

The Navy.

ADMIRALTY, June 2, 1884.

In accordance with the provisions of her Majesty's Order in Council of April 1, 1881, Inspector-Gen. of Hospitals and Fleets A. Irwin, C.B., B.A., M.D., has been placed on the Retired List of his rank (June 2).

Engineer H. G. Johnston has been promoted to the rank of Chief Engineer in her Majesty's Fleet (May 19).

ADMIRALTY, June 5, 1884.

In accordance with the provisions of her Majesty's Order in Council of July 21, 1876, the under-mentioned Commanders, having attained fifteen years' seniority as Commander, have been authorised to assume the rank and title of Retired Captain:—H. M. Carré and T. P. Gurdon (both dated June 1).

APPOINTMENTS.

Commander—Crauford J. M. Conybeare, to the Vernon, additional.

Lieutenants—Robert H. S. Stokes, to the Penelope, additional, for the summer cruise; Claude H. Millett, to the Defence, additional, for service in the Dwarf, in command.

Midshipmen—Frank E. C. Ryan, to the Neptune; Stuart E. Forster and Charles D. Granville, to the Northumberland; Vernon B. Webb, to the Euryalus.

Chaplains—Rev. John M. Morton, to the Jumna; John Cavanagh, to the Repulse.

Inspector-General of Hospitals and Fleets—James N. Dick, to Haslar Hospital.

Chief Engineers—Charles Platt, to the Indus, for the Inconstant; George Thompson, to the Asia, for the Edinburgh; John Moysey, to the Indus, for the Wild Swan.

Surgeons—John E. Penn, to the Woodlark; Edmund Corcoran, to the Orwell; Henry J. Madders, M.D., to the Duke of Wellington; John L. Thomas, to the Hector; Francis M. Puddicombe, to the Neptune; Henry J. Gordon, to the Shannon; John H. Thomas, to the Excellent; James L. Smith, M.B., to the Asia; Frederick J. Lilly, to the Indus; John Dowson, to the Revenge; George F. Dean, to the Royal Adelaide; George Welch, to the Pembroke.

Paymaster—Thomas Winterbottom, to the Asia, for the Euphrates.

Assistant-Paymasters—Walter Parnell, to the Impregnable; George V. Rashleigh, to the Himalaya; Cecil Vivian, to the Valorous, additional; George Whitcroft, to the Minotaur, additional; Arthur K. Tuson, to the Serapis; Francis C. Alton, to the Hercules (lent).

Engineers—Edward Norrington, to the Asia, supernumerary; John McCarthy, to the Sultan; Edward L. Carte, to the Defence, additional, for the Dwarf.

Assistant-Engineers—William Snell, to the Valiant; Francis J. West, to the Sultan.

Clerk—Alfred J. Le Sage, to the Royal Adelaide.

Boatswains—William C. Rowe, to the Agincourt; James Brownback, to the Sultan.

Carpenters—Richard Taylor, to the Pembroke, for the Severn; Robert F. Newcombe, to the Pembroke; Thomas H. Hooper, to the Indus, for the Inconstant.

Coastguard.

Surgeon and Agent—Mr. John F. Thompson, at Elie, N.B.

Achilles, Capt. Buller, was in Plymouth Sound on June 3, when an accident occurred after drill. After having "prepared for action aloft" the ships' company had gone to "general quarters," and afterwards the gear which had been removed in preparing for action was being replaced, and on the forecastle the bowsprit was being run out. While the men stationed there were so employed, the leading block of the bowsprit pennant broke, injuring four men, named John Dunne, second captain of the quarter-deck; John Browning, captain of the forecastle; Charles Cliff, chief captain of the forecastle; and Tobin, a maintopman. Dunne had received a double compound fracture of his right leg. His leg was placed in splints, and he was sent in the launch to the Royal Naval Hospital. Browning, who was badly bruised, was sent to the sick-bay on board the Achilles. Cliff and Tobin were able to return to their duty.

Agincourt, Capt. Mead, flagship of Rear-Admiral Whyte, moved into the Sound on June 2.

Amethyst, Capt. Harry Brent, senior officer on S.E. Coast of America, was at Colonia on May 3 with the Rifleman and Algerine. The Wrangler was at Monte Video, and would proceed to Colonia after arrival of mail due May 5, and remain.

Arab, Com. Stopford, was at Aden on May 22.

Banterer, Lieut. and Com. Haigh, arrived at Galway on May 28.

Boadicea, Capt. Church, flagship of Rear-Admiral Salmon, arrived at Natal on June 2. The Sylvia was at Simon's Bay on May 14, refitting. The Frolic was at Simon's Bay on May 14, refitting; she will probably remain there two months. The Opal was on West Coast of Africa, senior officer; she left Simon's Bay April 21 for the Coast; will assemble the ships for a cruise in July, August, and September, if practicable.

Canada, Capt. Durrant, having on board Prince George of Wales, arrived at Halifax on May 13.

Defence, Capt. Pollard, was taken into the basin at Keyham on June 3, for trial of machinery.

Dragon, Com. C. V. Anson, was at Bushire on June 1.

Euphrates, Capt. Garforth, was paid off on May 31.

Firebrand, Lieut. and Com. Dickson, left Plymouth for the China station on May 30.

Foam, Com. Higgins, arrived at Sheerness on Sunday, to pay off.

Grappler, Lieut. and Com. Cochrane, will leave Gibraltar for Malaga on June 6.

Hercules, Capt. R. O'B. FitzRoy, flagship of Rear-Admiral Hoskins, went out of Portsmouth Harbour on June 2, and anchored at Spithead.

Magpie, Com. the Hon. Foley Vereker, arrived at Malta from China on May 31.

Minotaur, Capt. Britten (flag). The Duke of Edinburgh returned from leave on June 3, and rehoisted his flag as senior officer in command of the Channel Squadron on Wednesday morning.

Northampton, Capt. Digby, flagship of Sir J. Commerell, was at Bermuda up to May 19; has since arrived at Halifax, and was there on June 5. The Tenedos was at Newfoundland on April 30. The Mallard left Halifax for Newfoundland on May 2.

Northumberland, Capt. Robinson, went into Plymouth Sound on June 3.

Orontes, Capt. Andoe, arrived at Portsmouth on Tuesday from Suakim, Alexandria, and Malta, bringing home the wounded officers and men who fought at the battle of Tamasi.

Orwell, Lieut. and Com. the Hon. R. Bingham, left Galway on May 29 for Queenstown, and arrived next day.

Osborne, Capt. Thompson, arrived at Sheerness on May 30, and left for Cronstadt on June 2, touching at Copenhagen on June 4 for coal.

Osprey, Com. Dowding, was at Zanzibar; about to cruise off Quiloa and Lindi, on the coast of Africa.

Penelope, Capt. Robinson, left Sheerness for Portland to join the Reserve Squadron on Wednesday.

Philomel, Com. H. B. Lang, was at Bombay on June 1.

Ranger, Com. W. E. Darwall, left on May 20 for Massowah.

St. Vincent, Com. Bromley, was inspected on Thursday by Admiral Hornby, and found in creditable condition. There are upwards of 800 boys in training.

Tourmaline, Capt. Boyle, was at Mauritius on May 12; was to leave on May 15 for Tamatave and ports on coast of Madagascar.

Valiant, Capt. Knowles, moved into Plymouth Sound on June 4.

Wasp, Lieut. and Com. Nicholls, left Westport on May 29 for Blacksod Bay, and returned on May 31.

Woodlark, Com. A. Kingscote, left Aden on May 14 for Maculla and Kism.

PRESENTATION OF THE VICTORIA CROSS.

Admiral Hornby presented the Victoria Cross to Capt. Wilson on Wednesday afternoon, on Southsea Common, in the presence of the Naval and Marine officers, seamen, and Marines at Portsmouth. Sir William Hewett strongly supported Sir Redvers Buller in his recommendation that this decoration be conferred upon Capt. Wilson, who, during the battle of El Teb, acted as Aide-de-Camp to Admiral Hewett, and was sent to bring the right-half battery of machine-guns into action after its leader, the late Lieut. Royds, had been mortally wounded. Before the guns had time to unlimber, Capt. Wilson was attacked by Arabs, whom he succeeded, single-handed, in holding at bay with his sword until it broke, and afterwards with his fists, until the guns had been got round, when some men of the York and Lancaster Regt. came to his rescue. Capt. Wilson was wounded, but remained with his men. The sword which broke at El Teb has since been replaced by one presented to Capt. Wilson by Capt. Markham and the officers of the Vernon. The blade of this sword is of finely tempered steel, and bears the following inscription:—"To Capt. A. K. Wilson, R.N., from the captain and torpedo officers of H.M.S. Vernon, in admiration of his gallantry at the battle of El Teb, Feb. 29, 1884." On the reverse side of the blade is the crest of the Vernon,—a torpedo-boat, with its torpedo in position, with the motto above, "Magna pericla laten;" and below, "Vernon semper viret." After the seamen and Marines on parade had been reviewed, Admiral Hornby said that the Admiralty "having received the Queen's commands with respect to this decoration, and having instructed the Commander-in-Chief to take the earliest opportunity to present it to Capt. Wilson in the name of her Majesty, in such a public and formal manner as he might consider best adapted to evince her Majesty's sense of the daring displayed by him on the occasion, and to testify her will that a decoration, which officers and men equally share, may be highly prized and eagerly sought after by all, or whatever rank or degree, in her Majesty's Naval and Military service; and especially desire that in the discharge of this duty nothing is to be omitted which will tend to redound to the honour of this officer, and to enhance the value of the decoration." Admiral Hornby, therefore, ordered a Naval review. The seamen formed a Naval Brigade, under the command of Capt. FitzRoy, of the Hercules, supported by the battalions of Royal Marines, under the command of Col. Brydges. The Naval Brigade consisted of a battery of field-pieces from the Excellent, and two battalions of seamen landed from the ships of the Channel and Reserve Squadrons in port and at Spithead. The officers and men of the Hecla and the seamen of the ships in port left the dockyard at 2 p.m., under the command of Capt. Wilson, of the Hecla, and marched to Southsea Common, where they were received by the battalions formed by the ships at Spithead, namely, one, under the command of Com. Pattisson, of the Neptune, composed of two companies each from the Minotaur, Sultan, and Neptune; the other, under Com. Eustace Rooke, of the Lord Warden, consisting of one company each from the Hector, Hercules, Repulse, and Lord Warden, with two companies added from the Excellent. The 4th Dragoon Guards and 2nd Royal Irish Fusiliers kept the ground. On the arrival of the brigades on the ground, they were formed up facing the sea, in the following order from the right, viz.:—Field battery, brigade of seamen, Royal Marine Artillery, and Royal Marine Light Infantry on the left. The crew of the Hecla fell in right and left of the saluting-point facing the saluting-base. Among the officers present as spectators were Mr. Israel Harding, V.C., who won the cross at the bombardment of Alexandria, and Mr. Robarts, who received it from the hands of her Majesty in Hyde Park at the first distribution of the decoration after the Crimean War, for his gallantry in the Sea of Azov. He also received the Legion of Honour for further distinguished services in the field at that time. Within the enclosure were many Naval captains, commanders, lieutenants, and other officers in full uniform; but few military officers were present, most of them being at this time on leave of absence. Among those present were to be seen Admirals Chads and Wodehouse, Rear-Admiral Herbert, Superintendent of the Yard, Gen. the Hon. Somerset J. S. Calthorpe, Col. Sir William Owen Lanyon, Col. Henry, Major Pigott, and Capt. Auld, of the Staff. Gen. Sir G. Willis, commanding the district was absent in London. The Commander-in-Chief, accompanied by Vice-Admiral H.R.H. the Duke of Edinburgh, and Lady Hornby, drove on to the ground at 3 p.m., and were received with a general salute by the line, which extended the whole length of the Common. A march-past then ensued, Capt. FitzRoy marching at the head of the Naval Brigade, the field-guns of the Excellent leading. The marching of both the seamen and the Marines was exceedingly good, the wall-like appearance of the companies of the Marines eliciting marked applause, all distances and dressing being well kept. At the conclusion of the march-past the Naval Brigade, guns in front, marched to the centre of the review ground, and, with the Marines, formed three sides of a square, with officers in front, the men being brought to the shoulder. The Commander-in-Chief, accompanied by H.R.H. the Duke of Edinburgh, the Admiral Superintendent, and their respective Staffs, then advanced, and, calling Capt. Wilson to the front, Sir Geoffrey Hornby, in pinning the Victoria Cross on his breast, said:—"Capt. Wilson, the Queen has been pleased to confer on you the decoration of the V.C., in commemoration of an act of gallantry performed by you at the battle of El Teb on Feb. 29 last, and I am desired by the Lords Commissioners of the Admiralty to present it to you in her Majesty's name, in such public and formal manner as may best evince her Majesty's sense of the daring you displayed on that occasion. In furtherance of that desire his Royal Highness the Duke of Edinburgh has been graciously pleased to come to attend this parade, and with him are gathered here many other distinguished officers and many gallant and decorated men of lower rank, and I feel sure I express the feelings of each and all of them, when I say that the prompt, bold, and efficient manner in which you discharged your duty at a critical moment of the day in question, adds lustre even to the high repute with which the deeds of our predecessors have endowed the great professions of which we are humble members. We congratulate you heartily on the way in which you have won so signal a mark of her Majesty's approval; and we know that if another opportunity should occur you will show how highly you appreciate that approval, and that those who may have the good-fortune to serve under or with you, will be incited by your example so to do their duty that perchance they may attain that highly-prized and eagerly-sought-after decoration, which you have so well won." Capt. Wilson then thanked the Commander-in-Chief, when Vice-Admiral H.R.H. the Duke of Edinburgh stepped forward, and, shaking him by the hand, congratulated him, amidst the cheers of the spectators, upon his well-won decoration. Then a surprise awaited Capt. Wilson. His mother, being unable to stand the fatigue of a journey to Portsmouth, Miss Wilson, his sister, had been invited to attend the ceremony unknown to her brother, to whom she was now presented, as well as to H.R.H. the Duke of Edinburgh. A proud moment that for both brother and sister, worthy representatives of a good old English stock. A general salute was now given, and as the flagship fired a Royal salute the massed bands of the Marines and Dockyard struck up the National Anthem. The ceremony was over. The brigades were marched off the ground, and returned to their ships and barracks, while H.R.H. the Duke of Edinburgh drove back with Sir Geoffrey and Lady Hornby to the Dockyard. In the evening a dinner was given by the old 'Sultans' at the Royal Naval Club, at which the Duke presided.

THE MEDITERRANEAN SQUADRON.

The Helicon, Com. Winsloe, flag of Lord John Hay, Alexandra, Superb, Monarch, Invincible, and Iris, were at Alexandria up to May 28; the Superb has since gone to Suda Bay for six days. The Condor was at Port Said. The Express was *en route* to El Arish; would return to Alexandria, calling at Port Said. The Temeraire, Carysfort, and Cygnet were at Malta. The Inflexible was at Corfu. The Falcon was cruising; mails to Gibraltar. The Cruiser was cruising. The Bittern was at Constantinople. The Cockatrice was at Galatz. The Albacore was at Suakim.

Capt. Luxmoore, C.B., has been awarded a pension for wounds of £100 a year for three years.

A picture containing the portraits of about 200 members of the Royal Thames Yacht Club is rapidly approaching completion at the studios of Messrs. Bonning and Small, Baker Street, the artist being Mr. Henry J. Brooks. H.R.H. the Prince of Wales occupies the centre of the picture, as commodore, and round him are grouped the committee and the sailing committee. It is understood that the picture, when completed and coloured in oils, is destined for the club-house of the Royal Thames Yacht Club in Albemarle Street.

The Duke of Edinburgh dined on Wednesday at the Royal Naval Club, Portsmouth, with those old shipmates who served under his Royal Highness's command on board the Sultan, during her former commission in the Mediterranean.

Admiral Ryder dined on Friday with the officers who served under him in China on board the Audacious, his flagship.

"Health Exhibition."—"Visitors should not fail to view the fine exhibit of Messrs. Rose and Co., London, of their Lime Juice Cordial, and other Lime Juice beverages, at Stand No. 116, in main transept. The exhibit includes a fine display of the Jamaica Lime Fruit from which these delicious non-alcoholic beverages are made. Their Lime Juice Cordial supplies a most refreshing summer drink in water, effervescing in all aerated waters. No beverage has received higher recommendation from the medical profession as eminently wholesome."—See *Lancet*. No table should be without it. The Wholesale Stores are 11 Curtain Road, Finsbury.

London Amusements.

The Royal Italian Opera, Covent Garden, has been prominent among the Whitsuntide attractions. On Saturday evening, after an interval of four years, "Lucrezia Borgia" was represented with Madame Durand as Lucrezia, and Madame Scalchi as Orsini obtained the usual encore for the ever-popular brindisi. On Tuesday evening the opera was "Il Trovatore," for the last time this season, and in which Madame Pauline Lucca appeared. On Thursday night Madame Sembrich was associated with "L'Etoile du Nord," and this evening (Saturday) "Romeo e Giulietta" is to be repeated. On Wednesday evening was given "Die Meistersinger," the first of a series of twelve performances of operas in the German language, under the direction of Herr Hermann Franke. The band is that of the Royal Italian opera, a German choir of 100 voices has been engaged, Carl Armbruster is director of the chorus, and Herr Hans Richter is conductor of the orchestra. The repertory includes six operas by German composers.

Those who were among the vast audience assembled at the Lyceum Theatre on Saturday night will not soon forget the shout of welcome which greeted Mr. Henry Irving on his reappearance as Benedick in "Much Ado About Nothing," Miss Ellen Terry, as Beatrice, largely sharing the enthusiastic congratulations so freely distributed during the evening. The comedy, which has been repeated through the week to crowded houses, has never been more admirably rendered. Mr. Terriss is still the soldierly Don Pedro, and Mr. Mead the sonorous Friar Francis. For Mr. Fernandez and Mr. Howe as Leonato and Antonio are now substituted Mr. Wenman and Mr. Harbury, the services of Mr. Howe being found more valuable in the part of Dogberry, which, characteristically played, is well supported by Mr. Calhaem as Verges. Mr. Norman Forbes now succeeds Mr. Forbes Robertson as Claudio. In a speech which was the inevitable consequence of such a notable reception, Mr. Henry Irving stated that after his next American tour he should return to the Lyceum, and that his only revival during the present brief season will be the comedy of "Twelfth Night," with Miss Ellen Terry as Viola. Mr. Irving will represent Malvolio.

Drury Lane is now occupied by Haverly's "Mastodon Minstrels," nearly one hundred in number. They give a huge variety entertainment, presenting the usual features of what is known as "nigger" minstrelsy on the most elaborate scale. There are some good voices among the vocalists, and some humour in the antics of the "corner men," who are frequently changed in the course of the concert portion of the programme; but much cannot be said in praise of the words or melody of the songs. Many of the anecdotal recitals have, besides, a musty odour of antiquity about them. The most original performer is Mr. Frank McNish, who, representing a frolicsome young nigger rejoicing in the absence of his master, gives a very amusing pantomime and acrobatic sketch called "Silence and Fun," illustrated by bodily contortions and evolutions of the most humorous and surprising character.

"Called Back" gathers force and finish at each repetition, and attracts crowded houses at the Prince's. Mr. Bellew's acting is very good, and there are few better representations on the boards now than Miss Lingard's Pauline, and Mr. Tree's finished ruffian Macari.

The Strand Theatre has been brightened by the reappearance of Mr. David James, who has returned to the boards where he made his earliest successes twenty years ago. In the revival of Mr. H. J. Byron's popular comedy of "Our Boys," Mr. David James resumes his original character of the retired cheesemonger, Perkyn Middlewick, which he has played some fifteen hundred times, and now acts better than ever. Miss Cicely Richards advantageously retains her part of the lodging-house servant, but in other respects the former cast is considerably changed. Mr. Reeves Smith is Charles Middlewick, Mr. Frank Archer Sir Geoffrey Champneys, and Mr. Charles Sugden his son Talbot. Miss Lucy Buckstone as the heiress, Violet Melrose, and Miss Fortescue, as the poor cousin, Mary Melrose, might have advantageously changed characters.

At the Criterion the adapted farcical comedy of "The Great Divorce Case," produced here in April, 1876, has been revived, after a long interval, with Mr. Charles Wyndham in his original character of the embarrassed barrister, Geoffrey Gordon, whose anxiety to free himself from the restraint of a tyrannical mother-in-law involves him in a series of humorous perplexities. Mr. Blakely, as his sympathising friend, Samuel Pilkie, sharing in the responsibilities of the social rebellion, Mrs. E. Phelps, as the suspicious and sharp-tongued mother of Mrs. Gordon, prettily personated by Miss R. Norreys, and Miss Rose Saker and Miss Kate Rorke as the fascinating Mrs. Graham and the pert and pretty domestic Parker, furnished a very satisfactory cast.

A dramatic version of George Eliot's novel of "Adam Bede" has been produced at the Holborn, Mr. George Rignold effectively playing the character identified with the title. A previous adaptation of the story, by Mr. J. E. Carpenter, was brought out at the Surrey in 1862.

With this week the last nights are announced of the Olympic and the Royalty Theatres for the present season. At the Olympic on Friday Mr. George Keogh's benefit matinée was associated with the representation of Mr. H. Hamilton's drama of "Moths."

On Monday next will commence the season of French plays at the Gaiety, with Madame Judic and company in "Nitouche."

SHIPS' STEWARDS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—The reply of the Secretary of the Admiralty to the honourable Member for Devonport, with reference to the ships' stewards of the Royal Navy (in the debate on the Navy Estimates) has caused very great surprise, not only to the ships' stewards, but to many others who are interesting themselves on their behalf, the reply being "that plenty of respectable men could be obtained for the situation." As no person is advanced to the rating of ship's steward unless he has joined the service as a boy and passed through the grade of an assistant, promotion to the rating of a ships' steward being made by seniority, a roster being kept at the Admiralty for that purpose, evidently the Secretary of the Admiralty mistook the men on whose behalf Capt. Price appealed—there being ships' stewards for general mess in the service, whose duties are very different to that of the class the honourable gentleman referred to. But, Sir, one thing may be said, and it is that the respectable men are the ones who are desirous of obtaining an alteration in the existing state of affairs. Attached is a list of some of the disadvantages the class labour under, and I respectfully solicit your assistance in ventilating the same, as it is generally admitted that the pay and position of the ships' stewards is not such as it should be, especially that of the 1st class:—1. As chief petty officers, we are the only men of that rating who are deprived of a monetary allowance when awaiting disposal, ship's stewards of the 1st, 2nd, and 3rd classes being deprived of £50, £45, and £27 per annum respectively, so that advancement from a lower to a higher class means a considerable reduction in our daily allowance in consequence of our being placed as disposable supernumeraries as a result of such advancement, when all store allowance ceases during the time we are awaiting disposal, which is frequently for long periods. 2. We are not awarded pay for good-conduct badges, nor do we receive pay for re-engaging for a second period, nor is our pension secured to us after 20 years' service, although it is to the executive branch. 3. As chief petty officers, having important public duties to perform, we are only pensioned as 1st class petty officers, nor is there any difference made in the scale of pension for a 1st, 2nd, or 3rd class steward. 4. The important duties which we as a class have to perform may be seen from the sum annually voted under the head of victuals and clothing in the Naval Estimates, as the whole of the material represented by this sum passes through the hands of the ships' stewards. 5. The ships' stewards, assistants, and boys labour under a great disadvantage with respect to pay and advancement, the former receiving 1s. 4d. per day for at least 6 years, the latter only receiving 7d., which is barely sufficient to keep him in clothing.

NOTICES TO CORRESPONDENTS.

Glendouglie.—A most refreshing blast of a "hurricane," indeed but, ah! it came too late!

"One Interested."—The delay did not arise from any of the causes suggested in your letter. The information can be obtained by all candidates at the Admiralty.

"Gunner's Creed."—Thanks to General M. It is very clever, but we fear some of our readers might be shocked, although St. Athanasius was certainly not divine, and a parody on his "crede" cannot be considered blasphemous. However, we will "shame the rogues" and print it presently.

The Army and Navy Gazette this week contains eight pages extra.

The Army and Navy Gazette exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire*; *Bulletin de la Réunion des Officiers*; *L'Armée Française*; *L'Italia Militare*; *Rivista Europea*; *Rivista Militare*; *Memorial de Ingenieros*; *La France Militaire*; *Moniteur de la Flotte*; *Le Progrès Militaire*; *Der Veteran*; *Streffleur's Oesterreichische Militärische Zeitschrift*; *Jahrbücher für die Deutsche Armee und Marine*; *Militär Wochenblatt*; *Giornale d'Artiglieria e Genio*; *Organ der Militär-Wissenchaftlichen Vereine*; *Vedette*; *Deutsche Heeres Zeitung*; *Militärische Zeitschrift*; *Armeeblatt, Wien*; *Army and Navy Journal of New York*; *The American, Philadelphia*; *Revista Maritima Brazileira*; in addition to all the home and colonial professional periodicals and journals.

Some interesting communications, reviews and letters, &c., are unavoidably omitted, owing to want of space, this week.

THE EAST INDIA SQUADRON.

The Audacious, Capt. Pearson, flagship of Vice-Admiral Dowell, was at Hong Kong up to April 25, and at Shanghai on June 2, having visited Amoy, Foochow, Woosung, and Chinkiang. The Champion was at Hong Kong on April 25. The Vigilant was at Hong Kong on April 25; joined flag at Amoy. The Flying Fish was at Foochow on April 4, surveying Haitan Straits; she will probably be at Amoy about the end of April. The Daring was at Canton on April 23, and remains. The Swift was at Amoy on April 14, and remains. The Linnet was in the Gulf of Tonquin, and left Hong Kong on April 20 to relieve the Merlin; she will remain in Gulf of Tonquin until the arrival of the Zephyr, and then proceed to Hong Kong. The Foxhound was at Foochow on April 14, and remains; she will be relieved by the Merlin in the middle of May, and will proceed to Hong Kong and thence to Singapore to replace the Zephyr. The Merlin was in the Gulf of Tonquin, and was at Pakhoi on April 19; on the arrival of the Linnet she will proceed to Hong Kong, and will relieve the Foxhound at Foochow about the middle of May. The Cleopatra left Shanghai on April 21 for the Corea; will eventually return to Shanghai, and resume the duties of senior officer's ship. The Curaçoa was at Shanghai on April 24; remains as senior officer's ship in the absence of the Cleopatra; was at Woosung on April 24. The Midge was in the Gulf of Pechili; was at Tientsin on April 12, and would remain. The Fly was at Shanghai on April 24; arrived at Shanghai on April 24; will visit Ningpo, and then be available for general service. The Albatross left Shanghai on April 24; under orders to visit Chinkiang, Wuhu, Kinkiang, and Hankow; ordered to remain at the latter port, relieving the Espoir. The Cockchafer was in the Gulf of Pechili; was at Chefoo on April 12; about to leave for Newchang; was ordered to return to Chefoo. The Espoir was at Hankow on April 21; to be relieved by the Albatross. The Sapphire, senior officer's ship in Japan, was at Yokohama on April 3, and would remain in the neighbourhood. The Pegasus was in the Straits of Malacca; at Singapore on April 15, and on the return of the Zephyr from Bangkok would visit Labuan and North Borneo ports, returning to Singapore early in June. The Zephyr was in the Straits of Malacca; at Bangkok on April 4, and ordered to return to Singapore about the end of April, and to proceed about the second week in June to the Gulf of Tonquin to relieve the Linnet.

A telegram from Cairo says:—"Col. Slade will resign his commission in the Egyptian Army in about three weeks' time, to take up his appointment as Brigade-Major of the English Artillery at Cairo."

Active Service cannot wear out the teeth that are brushed night and morning with Rowland's Odonto, the purest and most fragrant dentifrice ever made. All dentists allow that neither washes nor pastes are as efficacious for polishing the teeth and keeping them sound and white as a pure and non-gritty tooth-powder; such Rowland's Odonto has always proved itself. Ask any dealer in perfumery for Rowland's Odonto, and avoid spurious imitations, theirs being the only original and genuine Odonto.

ADMIRALTY,
MEDICAL DEPARTMENT OF THE NAVY,
44 Spring Gardens, S.W.
May 31, 1884.

AN EXAMINATION of CANDIDATES for COMMISSIONS, to fill TWENTY-FOUR VACANCIES in the MEDICAL DEPARTMENT of the ROYAL NAVY, will be HELD at the UNIVERSITY of LONDON, Burlington Gardens, by permission of the Senate, on MONDAY, August 11, 1884, and following days, at 10 o'clock. The Forms to be filled up by Candidates will be supplied on application to this Department.

JOHN W. REID, M.D.,
Director-General.

INDIAN MEDICAL SERVICE.

INDIA OFFICE, May 30, 1884.

An EXAMINATION for FIVE APPOINTMENTS as SURGEON in her Majesty's Indian Medical Service will be held in LONDON on August 11, 1884, and following days.

Copies of the Regulations for the Examination, together with information regarding the pay and retiring allowances, &c., of Indian Medical Officers, may be obtained from the Military Department, India Office, London, S.W.

The necessary certificates must be sent so as to reach the Military Secretary at least a fortnight before the date of the Examination.

ALLEN JOHNSON, Major-General,
Military Secretary.

ROYAL UNITED SERVICE INSTITUTION.

WEDNESDAY, June 11. The Chair will be taken at 3 o'clock. A discussion will be taken on the subject of the Naval Prize Essay, viz., "On an Outbreak of War, what is the best Organisation for Distributing the Personnel of the Navy and of the Reserves among the available War Vessels and among a Proportion of Merchant Vessels as an Auxiliary to the Navy?"

A paper containing points for discussion will be forwarded to Members on application.

LECTURE, FRIDAY, June 13. The Chair will be taken at 3 o'clock. Admiral A. P. RYDER, on "Fog Collisions."

To be followed by a Discussion.

By Order of the Council.

BOUGHEY BURGESS, Captain,
Secretary.

TO OFFICERS and MESS COMMITTEES.—Miss THOMPSON'S (Mrs. Butler's) PICTURES.—For SALE, a SET of ARTIST'S PROOFS of the following PICTURES, by Miss Thompson (Mrs. Butler):—"The Roll Call," "Quatre Bras," "Balaclava," "Inkerman," and "Remnants of an Army;" also "Scotland for Ever," in photogravure. All in superb condition, and uniformly framed in massive oak and gold frames. Subscribers' copies, and will be sold very much under published prices.—Address, T. A. STODART, 6 South Circular Road, Portobello, Dublin.

"FOR THE BLOOD IS THE LIFE."

CLARKE'S

WORLD-FAMED

BLOOD MIXTURE.

THE GREAT BLOOD PURIFIER AND RESTORER.

For cleansing and clearing the blood from all impurities, it cannot be too highly recommended.

For Scrofula, Scurvy, Skin Diseases, and Sores of all kinds, it is a never-failing and permanent cure.

It Cures Old Sores.
Cures Ulcerated Sores on the Neck.
Cures Ulcerated Sore Legs.
Cures Blackheads, or Pimples on the Face.
Cures Scurvy Sores.
Cures Cancerous Ulcers.
Cures Blood and Skin Diseases.
Cures Glandular Swellings.
Clears the Blood from all impure matter,
From whatever cause arising.

As this mixture is pleasant to the taste, and warranted free from anything injurious to the most delicate constitution of either sex, the Proprietor solicits sufferers to give it a trial, to test its value.

Thousands of Testimonials from all Parts.

Sold in Bottles, 2s 6d each; and in cases, containing six times the quantity 11s each—sufficient to effect a permanent cure in the great majority of long standing cases—BY ALL CHEMISTS and PATENT MEDICINE VENDORS throughout the world, or sent on receipt of 30 or 132 stamps by The LINCOLN and MIDLAND COUNTIES DRUG CO., Lincoln.

Trade Mark—"BLOOD MIXTURE."

LAMPLOUGH'S

PYRETIC SALINE.

HAVE IT IN YOUR HOUSES AND TRAVELS, USING NO OTHER. This is the true antidote in Fevers, Eruptive Affections, Sea or Bilious Sickness having peculiar and exclusive merits. *Officers and others proceeding to Egypt, India, and the Colonies should not fail to take a supply with them, it being also an anti-Choleraic and pr ventive of Dysentery.*

EKOWE (with Col. Pearson).—"There was great demand for Lamplough's Pyretic Saline."—See *Blackwood's Magazine.*

LETTER FROM RAWUL PINDEE.—"Your Pyretic Saline will do more to prevent *fever* than all the quinine can cure."

Observe the GENUINE has my NAME and TRADE-MARK on a BUFF-COLOURED WRAPPER.

113 HOLBORN HILL, LONDON.

HOLLOWAY'S PILLS.—TEACHINGS OF EXPERIENCE.—The united testimony of thousands, extending over more than forty years, most strongly recommends these Pills as the best purifiers, the mildest aperients, and the surest restoratives. They never prove delusive, or give merely temporary relief, but attack all ailments of the stomach, lungs, heart, head, and bowels in the only safe and legitimate way, by depurating the blood, and so eradicating those impurities which are the source and constituent of almost every disease. Their medicinal efficacy is wonderful in renovating enfeebled constitutions. Their action embraces all that is desirable in a household medicine. They expel every noxious and effete matter; and thus the strength is nurtured and the energies stimulated.

15 PER CENT. GUARANTEED.

TO INVESTORS.

Send for Prospectus of the BEUNO CONSOLS COMPANY, Limited; 15 per cent. guaranteed for the first year from this date on all shares purchased through Messrs. CUNLIFFE, ENTWISLE, and CO., of 77 Bloomsbury, Oxford Street, Manchester, from whom all particulars and forms can be had on application.

FOUR and FOUR-AND-A-HALF PER CENT. DEBENTURES.

THE QUEENSLAND INVESTMENT and LAND MORTGAGE COMPANY, (Limited).—Fully subscribed Capital, £1,750,000. Uncalled Capital, £1,400,000.

The Reserve Fund is separately invested in Consols, and other first-class securities.

Lenders are secured by the whole assets of the Company, at present valued at over Three Millions, while the amount of Debentures afloat can never exceed that of the Uncalled Capital.

Debentures at rates varying from 4 to 4½ per cent. will be issued on application, and may also be engaged for in advance.

Every information will be given on inquiry at the Offices of the Company, Leadenhall Buildings, London, E.C.; and Forms of Application can be had of the London and County Bank, and all its Branches. R. W. SHIRE, Secretary.

ONE-HORSE LANDAUS.—F. and R. SHANKS, finding a great want for LANDAUS of superior quality, really suited for one horse, have made arrangements to supply them, fitted with their patent for opening and c'osing the head, at a price they consider must meet the demand. Several can be seen building at their Factory, 70 and 71 Great Queen Street, Lincoln's Inn Fields.

MEMORY.—Physiological Art of Never Forgetting, wholly unlike mnemonics, TAUGHT thoroughly by post. Any book mastered in one reading. Prospectus post-free, giving opinions (from actual study of the system) of Mr. RICHARD A. PROCTOR, Dr. ANDREW WILSON, and others. Lectures in families of the nobility and gentry. Day and Evening Classes in Never Forgetting and for Cure of Mind Wandering.

Professor LOISETTE,
37 New Oxford Street (opposite Mudie's).

LANE'S PRIVATE HOTEL (Nos. 1, 2, and 3 ST. ALBAN'S PLACE, CHARLES STREET, St. James's, S.W.), for Officers in the Army and Navy, Members of Clubs, and others. Most eligibly situated in the immediate vicinity of the principal Club Houses. Gentlemen requiring sleeping accommodation only, are respectfully informed every attention will be paid to their comfort and convenience. A trustworthy porter in attendance all night.

OFFICERS' BAGGAGE, &c.—Officers are respectfully informed that Baggage, Luggage, and all kinds of Personal Property are stored at most moderate charges at the

STORE WAREHOUSES, BAKER-STREET BAZAAR, W.

The Warehouses having been built expressly for the safe keeping of goods, are peculiarly convenient, and are kept warm at an even temperature during the winter. Removals effected.

29th	W. L. M,Mahon	2090
32nd	F. M. Sandys-Lumsdaine	1963

Being all sent up. There has been no failure in this examination since April, 1881.

* 1505 in advance of the second candidate.

ARMY EXAMINATIONS.—From 15 to 20 Pupils are received by the Rev. WALTER BAKER, M.A., Batcombe Rectory, Evercreech, Bath. A Permanent Staff of five highly qualified Instructors, all resident in the village, besides occasional Assistants, gives a guarantee of individual attention impossible where the number of Pupils is large. There are two departments under separate sets of Instructors, the one under two Graduates, Classical and Mathematical, and a Foreign Master for Candidates for Sandhurst, Woolwich, the Preliminary and Qualifying Literary Examinations; the other under two Experienced Officers for the Final Military Competitive for Lieutenants of Militia. A large per-centage, viz., nearly two-thirds of the Pupils sent up during the last 17 years have passed their respective Examinations. At the recent Military Competitive eight Lieutenants of Militia went up, and four of them who had received all their instruction at Batcombe passed among the first 40, one (Mr. W. H. Lord) taking FIRST place on the list. References are permitted to Sir John Adye, G.C.B., General Elmhirst, C.B., General Thompson (late 7th Dragoon Guards), Colonel A. H. King, R.A., A.D.C. to the Queen, the Bishop of Bedford, and many others, all parents or near relatives of former pupils.

ASHFORD SCHOOL, KENT. HEAD MASTER—E. C. MUSSON, M.A., F.G.S., formerly Scholar and Prizeman of Queen's College, Cambridge.

Pupils can receive thorough Preparation for Woolwich, Sandhurst, &c., with Public-School training. Terms very moderate, and strictly inclusive. References permitted to Colonel Sir T. D. Baker, K.C.B., Colonel R. B. H. Blundell, Assist.-Adjt.-Gen., &c.

ROCHESTER CATHEDRAL SCHOOL,
founded A.D. 1544.
Head Master—Rev. J. LANGHORNE, M.A.
Mathematics—E. T. LITTLEWOOD, B.A, 9th Wrangler. Masters in Science, &c.

Board and tuition, £70 and £60 per annum, by age. Junior Scholarships in July. Especial Preparation for Universities and Military Academies, &c. Successes in 1883-4:—33rd (direct from School) in December Woolwich List, Open Mathematical Scholarship at Oxford, &c. School House new, well placed, with cubicles.—Apply to HEAD MASTER.

MILITIA MILITARY COMPETITIVE and PROMOTION EXAMINATIONS (Army and Auxiliary Forces).—Lieutenant-Colonel J. HAY SHAW (late Royal Inniskilling Fusiliers) and Captain CH. D'ARBOIS (late French Engineers) PREPARE for the above. Apply, Wimpole House, Wharton Road, West Kensington Park, W. Of 29 sent up for the Militia Military Competitive, 20 successful. One sent up March, 1884, Lieut. G. E. Ripley, 3rd Norfolk Regiment, passed 14th (first trial), 1,935 marks.

MILITIA COMPETITIVE EXAMINATION.—At the Examination held on the 18th and 19th of last month, Majors DE THOREN and MORGAN could not possibly have had GREATER SUCCESS, as they passed ALL the FOUR Candidates they sent up, one having only worked for FOUR MONTHS.

Mr. P. Warren .... 7th (1st attempt).
Mr. E. Malcolmson ......25th.
Mr. H. Thomas........... 33rd (1st attempt).
Mr. H. B. Murray.........67th (1st attempt).

The number of Pupils at this Establishment is limited, and the terms are very moderate.—Apply to Major DE THOREN, Bellefield, or to Major MORGAN, Douro Terrace, Jersey.

CAPT. A. C. HILL, Mr. W. H. BLYTHE, M.A.

Among SUCCESSES for 1883 and 1884 are:—
Military Competitive on FIRST TRIAL.
Four Sandhurst Cadetships on FIRST TRIAL.
Royal Marine Artillery on FIRST TRIAL.
R.I.C. Cadetship on FIRST TRIAL.
Royal Indian Engineering College (3) on FIRST TRIAL.
Sandhurst Preliminary on FIRST TRIAL.

SEVENTY-FIVE PER CENT. of all Pupils sent up have been successful.

9 and 11 Sinclair Road, Addison Road, London, W.

FALKNER'S "REAL MALT" WHISKEY.
PURE DUBLIN DISTILLATION.

The same as supplied to the principal Clubs and Regimental Messes. Has been esteemed in Ireland for the last century as the FINEST IRISH WHISKEY procurable, being pure as distilled, and refined by age only. A stock always kept in bond ready for shipment to India and the Colonies.

LONDON, 40 CHARING CROSS.
DUBLIN, 83 GRAFTON STREET.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

At the six Militia Competitions which have taken place since September 1, 1881, Colonel WILKINSON and Lieutenant-Colonel SHAW have secured for their Pupils FORTY-NINE COMMISSIONS, although they have only Prepared and sent up a very Limited Number of Candidates. In the list just out for the March, 1884, Examination, out of SIXTEEN SENT UP, TEN PUPILS have succeeded; one other was two places out, and three more within a few places of being successful. Lieutenant C. J. Stanton took the SECOND PLACE at this Examination, with 2,083 marks.

At the Militia Literary Examinations held during the same period, a Number of Pupils have also passed; in this Competition the FIRST PLACE was taken in April last by Lieutenant Lord Skelmersdale, and the SECOND PLACE in the recent October Examination by the only candidate sent up, Lieutenant the Honourable Victor A. Pelham.

At the recent WOOLWICH EXAMINATION Mr. W. V. Scudamore passed SIXTEENTH on the list. This candidate made very high marks in languages.

The results of the last SANDHURST EXAMINATIONS have also added to the general score, which now amounts to NINETY-TWO SUCCESSES, obtained by Pupils since September 1, 1881.

Address, DARMSTADT, GERMANY.

NAVAL CADETS, ASSISTANT CLERKS
HOPE HOUSE SCHOOL,
SOUTHSEA.

Principals { Mr. T. H. VICKERY.
Mr. EDWARD M. BEWLAY, B.A., Univ. Coll., Lond.

AN ARMY SECTION IS NOW ADDED. PUPILS PREPARED FOR SANDHURST AND WOOLWICH.

At the late Competitive Examination in June for Assistant-Clerkships in the Royal Navy, TWO of the Five successful Competitors were Pupils of this Establishment, taking First and Third places. In June, 1882, of the five who passed, the First, Third, and Fourth were from this School, and Three qualified.

CAVENDISH COLLEGE, CAMBRIDGE.

Four Scholarships of £30 each, tenable for three years, given, one by the Clothworkers' Company, one by his Grace the Duke of Devonshire, K.G., one by Samuel Morley, Esq., M.P., and one by E. B. Foster, Esq., will be offered for competition on August 6, 7, and 8, 1884. Candidates must be under 17 on August 6.

The usual age of entry being between 16 and 17, a Degree may be taken at 19.

The College charges for lodging, boarding (with an extra term in the Long Vacation), and, including all necessary expenses of tuition, and University fees, are £84 per annum. For further information, apply to the WARDEN, Cavendish College, Cambridge.

CHARDSTOCK COLLEGE, CHARD.

Beautiful country; remarkably healthy. Special Preparation for Army, Navy, Public Schools, Universities, &c. Terms moderate. Cricket, fives, gymnastics, &c.

JERSEY HIGH SCHOOL for GIRLS
(Limited).
PATRONS.
The Right Reverend the Lord Bishop of WINCHESTER.
His Excellency the Lieut.-Governor of JERSEY.
Head Mistress—Miss M. E. POPE.

Certificate of London University General Examination for Women, with honours, and distinction in French, Scholar of Girton College, Cambridge, and Second-Class Natural Science Tripos in the University of Cambridge.

This School has been established for the purpose of giving a high-class education, on the principles of the Church of England. The school buildings are situated in a healthy suburb of St. Helier's, near the sea. The climate of Jersey is mild and healthy. Special facilities are provided for the acquisition of the French language. Ordinary fees—board (washing included), sixteen guineas per term; tuition, four and five guineas per term.—Application for prospectuses may be made to the Secretary, R. CREWS, Esq., Wyvil House, Georgetown, Jersey.

TO OFFICERS, ANGLO-INDIANS, and OTHERS.—First-class School, established 15 years, where boys are prepared from an early age for the Army Examinations. Numerous Staff of Experienced Graduates in Honours. System pursued has resulted in 35 successes and no failures. Indian children received. Highest references.—C. V. GODBY, M.A. (Oxon.), Bute House, Petersham, S.W.

LONDON INTERNATIONAL COLLEGE,
Spring Grove, Middlesex, W.

Inaugurated by H.R.H. the Prince of Wales, July 10, 1867. French and German (or Greek) taught to every Boy.

Amongst the successes during the year are two OPEN SCHOLARSHIPS at CAMBRIDGE, and a 13th WRANGLER.

Several FOUNDATION SCHOLARSHIPS, tenable at the School, which may be increased in amount from a Special Fund in the case of those requiring it.

Also LEAVING SCHOLARSHIPS, tenable at the UNIVERSITIES, WOOLWICH, and SANDHURST.

Apply to the SECRETARY, or to the Head Master, H. R. LADELL, M.A.

MILITARY EDUCATION in FRANCE. E. S. CARBERY, Esq., Barrister-at-Law, Doctor of Law of the University of Heidelberg, and Captain C. NORMAN, assisted by Graduates of English and French Universities, PREPARE PUPILS for all Military Examinations as well as for Law and Universities. Closest attention to French and German, strict discipline, Classes small. A Special Class for Militia Officers.—For terms, address E. S. CARBERY, Esq., or Captain C. NORMAN, Les Buttes, Dinan, France.

ARMY.—LINE and MILITIA.

IMPORTANT to STUDENTS.

Districts, and Lieutenant-Colonel C. W. FOTHERGILL, F.G.S., P.S.C., late Instructor in Military Topography, Royal Military College, prepare Officers of the Army for Promotion and for Entrance to the Staff College, LIEUTENANTS of MILITIA for the MILITARY COMPETITIVE EXAMINATION, and Officers of the Auxiliary Forces for the Examination in Tactics.

For particulars and terms, apply to Colonel LONSDALE HALE, 57 Sinclair Road, Kensington.

MILITARY COMPETITIVE EXAMINATION.

THREE sent up in March, TWO PASSED; Hill, 4th, Cumberland, 20th. Third only just failed. Many former successes. Tuition for all Competitive Examinations.—Captain PINHEY, Spring Grove, Isleworth.

CONNAUGHT MILITARY COLLEGE,
WOOLWICH COMMON.
Principal—SAMUEL H. WINTER.

The Pupils of this Establishment have been uniformly successful. In July, 1882, Mr. F. Close was SECOND on the Woolwich List, being FIRST in Mathematics; in July, 1883, Mr. G. Close was TENTH and Mr. R. F. Edwards TWELFTH, all at their first trial. Mr. Winter has prepared more than 200 Pupils for various Military Examinations.

MILITARY EXAMINATIONS.—Lieutenant-Colonel G. M. CARDEW (passed 2nd from the Staff College), PREPARES SIX LIEUTENANTS of MILITIA for MILITARY COMPETITIVE, also Officers for Promotion and other Military Examinations.—14 Observatory Avenue, Kensington, three minutes from the High-Street Station.

MILITARY EXAMINATIONS and GENERAL EDUCATION.—AVRANCHES.—A GENTLEMAN, for many years successfully engaged in preparing Candidates for the Military Competitive Examination and Universities, wishes to RECEIVE PUPILS. Great facilities for acquiring the French language. Terms moderate. Highest references to Parents and Guardians of former Pupils, and to Clergymen and Country Gentlemen.—Apply to Captain CHAWNER, Bois-Guerin, Val-St.-Père, Avranches.

ARMY EXAMINATIONS.—Mr. J. WINDER, M.A., Cranworth House, Eastbourne, Sussex, PREPARES SEVEN PUPILS for WOOLWICH and SANDHURST. Special Masters for French, German, and Science. In 1880, of FOUR Candidates for Woolwich, ALL of whom passed, one was 6th and another 29th. In 1883, of THREE Candidates for Sandhurst, TWO were successful.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS, 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Laboratory, heated Swimming Bath, Fives Courts, &c.—Address, HEAD MASTER.

AN OFFICER in the ARMY WISHES to RECOMMEND strongly a PREPARATORY SCHOOL for YOUNG BOYS on the South Coast.—Apply to Colonel ABBOT ANDERSON, Professor of Military Topography, R.M.C., Yorktown, Farnborough.

A PRUSSIAN OFFICER of RANK resident in a pleasant little town near Berlin, wishes to RECEIVE PUPILS into his house, and to prepare them for Woolwich and Sandhurst. He is permitted to refer to the Rev. T. Teignmouth Shore, Chaplain to the Queen, 31 Montpelier Square, Rutland Gate.—Address, "J. H. D.," 41 Coleman Street, E.C.

HINDUSTANI TAUGHT, Cito, Tuto, Jucunde. Officers prepared for Examinations. Correct Idiom guaranteed. Also Persian, Arabic, and Sanscrit.—PUNDIT, 7 Beechholme Road, Clapton, E.

ARMY and NAVY SCHOOL,
BROMLEY, KENT.

Young BOYS PREPARED from the first on the SPECIAL LINES required for these SEVERE EXAMINATIONS.

Head Master—JOHN GIBSON, M.A., assisted by three resident Graduates, and a resident French and Drawing Master.

WELLINGTON COLLEGE.—There will be an ELECTION in October, 1884, to FIVE OPEN SCHOLARSHIPS. Candidates must be under 14 and over 12 on June 1, 1884.—For particulars, apply to the BURSAR, Wellington College, Wokingham.

EDUCATION in FRANCE.—A few ENGLISH BOARDERS are received by Mons. MICHAUD, at Dijon. Highest references in France and England. Great experience with Army Students.

MILITIA CANDIDATES for the LINE.—TUITION in MILITARY SUBJECTS for the COMPETITIVE ARMY EXAMINATION.

Lieutenant-Colonel FITZROY WILSON, late Rifle Brigade, a Graduate of the Staff College, and afterwards Garrison Instructor of the Eastern District, offers the above; also TUITION in MILITARY SUBJECTS to Officers of the Regular Army, partly by letter or otherwise.

Prospectus, with full additional particulars, may be obtained on application to Messrs. ASKIN, GABBITAS, and KILLIK, 38 Sackville Street, London, W.

COUSINS and CO., 3 York Street, Covent Garden.

Also, by the SAME AUTHOR.
Price 6d; post free, 7d.

OUR MILITARY POSITION

A NOTE OF WARNING.

Sixth Edition.

London:
W. MITCHELL and CO., 39 Charing Cross, S.W.

"Captain White's pamphlet, 'Our Military Position: a Note of Warning,' struck a keynote which gained for its author an expression of the approbation of the most eminent military authorities; and now he has given us another, 'The Army and the Public: an Appeal to the Patriotic.' Captain White, in an able and exhaustive manner, appeals to the good sense and better judgment of his fellow-countrymen of all classes to give more thought and attention to questions affecting the well-being of the Army."—*Weekly Despatch*.

"It is to be hoped that the extended circulation of Captain White's excellent brochures may induce the British taxpayer to reflect on how his money is misspent, and that the age of meddle and muddle may end and give way to some practical administration of the Army."—*United Service Gazette*.

"In a very spirited argument, 'The Army and the Public,' Captain White holds up a warning finger that points straight to the great danger there is now ahead, which may at any moment burst over the country."—*Public Opinion*.

"Having his subject at his fingers' ends, and with a perfectly impartial mind as regards the old and the new systems of military organisation, Captain White writes with a degree of authority which gives immense weight to his criticism."—*People*.

TERMS, CASH WITH ORDER, AND GOODS EXCHANGED IF NOT APPROVED.

E. WHISTLER AND CO.,
11 STRAND, LONDON.
(Three doors left from Charing Cross Terminus.)

THE MOUNTED SERVICE BOOT.—PATENT.

As adopted by the Volunteer Mounted Infantry.

A COMPLETELY NEW and USEFUL INVENTION. By a CAVALRY OFFICER.

It is equally suitable for riding or walking, and consists of an upper and lower part, which, when adjusted by the peculiar arrangement of the spur, forms a complete riding boot, and at the same time the comfort of a boot and gaiter for walking is ensured. The lower part can be worn also as an ordinary walking boot. ECONOMY, COMFORT, and PORTABILITY.

Specially recommended to all Officers and Sportsmen going Abroad.

HENRY DUNKLEY,
MILITARY, HUNTING, SHOOTING, and FISHING BOOTMAKER, and
SOLE MANUFACTURER OF THE MOUNTED SERVICE BOOT,
13 and 15 BUCKINGHAM PALACE ROAD, S.W. (Opposite the Royal Stables).

SPECIAL NOTICE.

THE ROYAL SCOTCH WAREHOUSE,

115 and 115a **REGENT STREET, LONDON.**

SCOTT ADIE, having made considerable improvements in the interior of his premises, and adopted the modern system of small profits for cash, is now PREPARED to SUPPLY his patrons and the public in general with goods of a Superior Class (specially manufactured), which for quality and price will bear favourable comparison with any other house.

PATTERNS FREE.

SCOTT ADIE,
115 REGENT STREET.

KINAHAN'S LL WHISKY.

Gold Medal Paris Exhibition, 1878.

"THE CREAM OF OLD IRISH WHISKIES."

PURE, MILD, AND MELLOW. DELICIOUS AND VERY WHOLESOME.

The Gold Medal Dublin Exhibition, 1865.

20 GREAT TITCHFIELD STREET, LONDON, W.

IN CONSEQUENCE OF IMITATIONS OF

LEA AND PERRINS' SAUCE,

Which are calculated to deceive the Public,

LEA and PERRINS beg to draw attention to the fact that each Bottle of the Original and Genuine

WORCESTERSHIRE SAUCE

Bears their Autograph Signature,

LEA and PERRINS'.

☞ Sold Wholesale by the Proprietors, Worcester; CROSSE and BLACKWELL, London; and Export Oilmen generally. Retail by dealers in Sauces throughout the world.

DINNEFORD'S MAGNESIA.

For over Forty Years the Medical Profession have approved of this pure Solution as the best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion; and as the safest aperient for delicate Constitutions, Ladies, Children, and Infants.

Sold by Chemists throughout the World.

CAUTION.—See that "DINNEFORD and CO." is on every Bottle and Label.

PEARS' SOAP.

A SPECIALITY FOR THE COMPLEXION.

Miss MARY ANDERSON, our beautiful American Cousin, writes:—"I have used Pears' Soap for two years with the greatest satisfaction, for I find it the very best."

Pears' Soap has obtained Fifteen International Awards as a Complexion Soap.

EVERYBODY SELLS IT.

EGYPTIAN NEWS.

(FROM OUR OWN CORRESPONDENT).

Cairo, May 27.

Now that Mr. Gladstone has arrived at the conclusion that the tribes in the Soudan are "rightly struggling to be free," it will surprise no one to hear that the Government has decided to recompense the troops who have slain some three thousand of them, and to take measures for slaying more.

There is considerable dissatisfaction as regards the clasp which is to be added to the Egyptian medal, and granted to those who took part in the Suakim expedition. It is argued that the battles of Teb and Tamasi (by the way, there never was a battle of Tamanieb) were equally deserving a clasp; and that to include the two in one clasp, "Suakim," gives equal reward to those who fought and those who remained where there was no fighting at all. The victory of September 13 has left no more permanent results than the short campaign of General Graham. If a Soudan campaign is to be, it would surely be better to grant a Soudan medal, and make Teb and Tamasi the first clasps.

Three Nile steamers, manned by about 60 Bluejackets, who left Alexandria yesterday, are to be fitted with Gardners. One commanded by Lieutenant Ede and Sub-Lieutenant Munro will have charge of the river from Assiout and Assouan; another, under Lieutenant Poore and Sub-Lieutenant Hardy, will patrol from Assouan to Wady Halfa; the third, under Lieutenant Reid and Sub-Lieutenant Barton, will probably form head-quarters at Assouan. Dr. Bell, of the Helicon, and Dr. McIver will have medical charge.

The following complete list of English officers employed with the Egyptian Army may be of interest:—

EGYPTIAN NOTES.

Lieut.-Col Ardagh left Cairo on May 29 for England on special service by the Messageries Maritimes mail steamer.

"A messenger from Berber who had been ten days on the road was captured only a short distance outside Suakim by Osman Digna's followers, but his companions succeeded in escaping, and from their report it would appear that Berber is not so closely invested as we had been led to suppose, for it is only threatened by local tribes, and not besieged by any regular army. It is also stated that, with a view of preventing hostilities and useless loss of life, Hussein Pasha Khalifa has come to an arrangement with the rebels to surrender Berber as soon as Khartoum falls." —*Egyptian Gazette*, May 27.

The *Wakayeh-el-Masreeyeh*, the native official organ, contradicts the statements that the country between Wady Halfa and Korosko is disturbed, or that four emissaries of the Mahdi, disguised as dervishes, have reached Minieh, although it is perfectly true that dervishes have reached Assouan, and the presence of dervishes in other parts of Egypt on similar missions is suspected. The 1,000 rifles asked for by the Mudir of Dongola have been despatched; he has expressed his thanks for them, and requests the horses he applied for to be sent to him without delay. Twenty men of the Dongola garrison arrived on May 26 at Wady Halfa to take over the rifles and ammunition placed at the disposal of the Mudir. Com. Hammill and Flag-Lieut. Hon. Hugh Tyrwhitt have orders to go to Dongola. A special train left the Gabarri Wharf, Alexandria, on May 26, with Lieut. Ede, of Invincible, Surg. Bell, and Sub-Lieut. Munro, of Helicon, Sub-Lieut. Barton, of Monarch, Sub-Lieut. Barton, of Invincible, and 47 petty officers, seamen, and marines. The party took three Gardner guns, and the train was timed to arrive at Hamrah, near Assiout, on May 27, at 11 o'clock.

THE ARMY IN INDIA.

[FROM OUR CORRESPONDENT.]

May 12.

We are getting well into the hot weather now, and, so far, in Upper India are enjoying very pleasant weather. With the Aka expedition brought to a successful conclusion, and the descent on the Kakar Pathans still in abeyance, there are very few wars and rumours of wars going the rounds just at present. The last-named tribe, however, have been getting very troublesome of late; and Sir Robert Sandeman, our Political at Quettah, is credited with a desire to have them chastised at once, and severely. They are, I believe, the same tribe who, under the generic name of the Mairis, gave a deal of trouble at the end of the Afghan war, and in particular cut up the workmen and signallers attached to the Candahar State Railway, then under construction on the Hurnai route. They have begun their annoyances again now, having apparently quite recovered from the scare they got when, on return from their raids after the battle of Maiwand, a portion of General Roberts' force was marched through their country. A distinguished officer whom I met the other day assures me that in the opinion of many competent judges it will take at least 5,000 men to do the thing properly; and it is just possible that the authorities are hesitating about sending so many men up the Bolan at this season of the year. So far, only the 45th (Rattray's) Sikhs have been dispatched from Jhelum to Quettah, and a wing of the Gloucester Regiment (29th) at Kurrachee ordered to hold themselves in readiness to relieve the Staffordshire (98th), while the detachments from Quettah have been withdrawn from Sibi and replaced by troops from Jacobabad. I expect that we shall hear more in the course of the next fortnight. The Hurnai Road, or Railway, whichever you like to call it, is progressing very satisfactorily, but the work in the Chappar Rift is very heavy, and may take three or four years to complete. Every effort, however, is being made to press on the railway up to its mouth, and it is said that from that point a military road is to be made to Chaman, *viâ* Quettah. The breaking-off of the railway works in 1881 has not been such a very great misfortune, I hear, after all, as the railway beyond Sibi was to have been on the metre gauge, and it is awful to think what a terrible delay and trouble would have been caused at that station if every man and maund of goods had had to be transhipped during a rush to the front. As usual in the hot weather, a certain number of people have gone on leave, and acting appointments been made to fill the vacancies. Among others, General Murray, C.B., who gave up the Rohilkund District on promotion in April, 1882, is officiating for Sir Herbert Macpherson at Allahabad, as he did before during the Egyptian expedition. People are asking when permanent employment is to be found for this excellent officer, who, in addition to being a first-rate soldier, is personally one of the most popular in India. People talk about the Pay Code and certain other qualifications, but it is also rumoured that he is a candidate for a very high staff appointment shortly to be vacant, and has been given this step to put him more on a level with his rival. I do not think myself that there is much chance of his getting any higher just at present; but I see that one of the disappointed (Colonel Harvey) has since been appointed to officiate at Saugor for General Murray, which seems to say that his disqualifications, at all events, were not absolute. Sir Hugh Gough, who lately gave up the command of the 12th Bengal Cavalry, has been appointed to officiate on the Brigade Staff (North-Eastern Frontier District) during the Brigadier's absence on leave. Umballa is suffering from a water famine, and some of the troops have had to be moved. This year's Industrial Exhibition is to be held at Meean Meer. I see Calcutta is prepared to dispute the rule by which these exhibitions are held alternately at Lucknow and Meean Meer; but I do not see why. The two stations are very centrally situated in the upper and lower halves of the command, and the theory that the articles would command a better sale at the Presidency does not go for much. I fancy the competitors look more to the prizes than to the sale of their goods as a reward for their trouble. Colonel Chapman, the Military Secretary to the Commander-in-Chief, is going to lecture at Simla on the 22nd inst. on the last year's German Autumn Manœuvres, for the benefit of the United Service Institution. This year's reliefs (which were published, by-the-by, very early) have not succeeded in pleasing many of those concerned. People never know when they are well off; and I heard an officer of a distinguished regiment, which is under orders for a favourite hill station, complaining of having to go there. I hear, too, that the 2nd Seaforth Highlanders have got their move changed from Ranikhet to Bareilly, which will leave the former station, about one of the best in India, vacant for a regiment from England.

GORDON'S RESOURCES.

According to *El-Zaman*, Gen. Gordon has at his disposal in Khartoum 1,500,000 okes of biscuits, 4,000,000 okes of Indian corn, in addition to the private stores of the inhabitants. His forces consist of 6,000 men, and he can supply a rifle to every able-bodied inhabitant. Although the forts are old, they are sufficiently strong to resist any attack which could be made on them by the rebels, and as Gen. Gordon is universally beloved by the inhabitants, they will not readily consent to a surrender. *El-Zaman* states that the provisions in the town will be sufficient to enable it to hold out for eight months.

EGYPTIAN DEVOTION.

"An Arab," says the *Egyptian Gazette*, "who left Berber on the 1st inst., reports that a nephew of Hussein Pasha Khalifa was captured along with Mr. Cuzzi, whom he was accompanying. They offered to liberate Hussein Pasha Khalifa's nephew, an Egyptian, but stated that they must put Mr. Cuzzi to death. He refused to accept his liberty on these conditions, and decided on staying with his friend Cuzzi, and said that his captors would have to put him to death first."

THE DOVER DENIALS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—Gen. Newdigate and Col. Byam, I think, beg the question, which is this really:—Did or did not any man or men of the 65th York and Lancaster Regt. come home in the troopship Jumna as a prisoner or prisoners under court-martial sentence or for trial for cowardice in Egypt? Silence may be misconstrued.—I am, &c., A Reader.

[We may remark here that the report which was contradicted came from a press paragraph which went the round of the papers.—Ed. *A. & N. G.*]

In these days, when so much is expected of officers, any attempt to facilitate their professional work is to be commended. Major Gunter, garrison-instructor at Dover, has devised a field-sketching hold-all for use by officers. Being made of pliable, though stout, solid leather, it can be carried on the person buttoned, and loops to either coat or waistcoat buttons. It contains a separate place for each pencil, black and coloured, for protractor, ruler, ink-eraser, and rubber-stump, and a small ink-bottle for coloured ink. Each article can thus be taken out when required and returned to its place, and fumbling in the pockets is avoided. The idea is a very good one, and Major Gunter is to be complimented on having supplied a want. The hold-all is obtainable at a small cost at the Army and Navy Stores, Victoria Street.

NAVAL MOBILISATION.

Naval mobilisation, a question we have so often brought forward in these columns, will be debated on Wednesday next at the Royal United Service Institution. Then the Naval Prize Essay, written by Captain Johnstone, late of the *Dryad*, will be discussed. And not a moment too soon will this all-important subject be thus prominently brought before the country. It includes many points well worthy of discussion. The requirements of the Empire in time of peace and in war will have to be compared. The question whether our vessels are of the most approved type or not, whether "end-on" or "broadside" tactics should be considered in their construction, or both, should, in a manner, be authoritatively settled. That the country is in a dangerously unprepared state is known to but a few, comparatively speaking. What steps can be taken to convince the British public of the fact? These should be decided upon. Should service be made compulsory? Some people, no doubt, will say No; others will say, only in time of extreme peril; while there are men of experience who consider that for coast defence purposes service should be made compulsory. To man the Navy, various expedients have been adopted in times past, and the most frequent has been to offer bounties. Would it not be preferable to enter a greater number of boys annually for the Navy, and to train them for the service? We think so. The question now uppermost in the Naval mind is,—Where are the men to come from to man our ships for a great war, supposing that the force of ships will be as assumed by our Naval legislators? It is well known in Naval circles that, supposing it were necessary on an emergency to commission every available ship on the *Navy List*, even with the Reserves there would be an insufficiency of men to man them. As to postal and telegraph services, we have no such organisations in the Navy, and yet they ought to exist. Could not the Naval pensioners be formed into such corps? No doubt the Royal Naval Reserve and Artillery Volunteers would be of some use, but to what extent is it possible to depend on the estimated number of men likely to come forward in time of war, and what will their real efficiency be? Assuredly far below the standard set up by the Parliamentary Secretaries of the Admiralty in the House of Commons. Then again, the question of dockyard management will have to be considered. We have invariably advocated the reestablishment of Captains as superintendents of victualling and refitting yards abroad, but the craving after patronage has for many years past thrown these establishments into the hands of civilians, and a Civilian Government is fast ruining the Navy. We have now to consider a Naval war from a far different standpoint than that from which it was regarded in the days of Nelson. We have new ships, new guns, new arms, and new inventions of all kinds, and all of them are, so to speak, untried. We have no coast defence torpedo corps. No one, except the Royal Engineers, has even made any experiments in this direction, and Naval officers know little or nothing of the work expected from such an organisation. The coasts of our Colonies, as well as those of the mother-country, must be defended; but no decision has as yet been arrived at as to whether the Colonial forces should act merely locally, or under direct Imperial control. We doubt very much whether the question has ever been seriously discussed by those whose duty it is to see to the safety of the Empire, for, as we have so often pointed out, we have no organisation, no mobilisation scheme, in this country, though foreign nations have. Even the possibility of training and employing our colonists for coast defence work abroad, and the best mode of employing them, has never been discussed; and although the *Navy List* is crammed with the names of retired officers, no attempt has ever been made to utilise their services by forming a Reserve similar to that of the Army. Then, again, in the event of a Naval war, something besides seamen and Marines would be required for our modern armour-clads, with their intricate machinery and scientific inventions of all kinds. Naval artificers would be required; but where would they be obtained? Could they be trained in our Dockyards and Steam Reserves, with a view to creating a Reserve of Artificers for service at sea in time of war? Would it be possible to form a sea Militia force, to supplement the Royal Marines, or would it be better to create a Royal Marine Reserve? It is evident that, considering the possible combinations of enemies we may have to face, our present arrangements for the supply of personnel and matériel to the Navy cannot be considered as satisfactory; nevertheless, nothing is done to improve those arrangements. There they remain, the same, or nearly so, as they were half a century ago. A great Naval battle might result in the destruction of all our most powerful ironclads; a well-directed torpedo apiece would suffice to do the work. Nevertheless, such a contingency has never been foreseen, and there is no systematic way of providing crews for new ships, supposing the regular Reserves to have been all called out, and the ordinary voluntary methods of enlisting men to have failed. Even the position of our Mercantile Marine, supposing a grave calamity to overtake the Navy, has never been considered, and it is unknown whether it would be possible or otherwise to so equip merchant ships with torpedo fittings and armament as to enable them to stand a chance of defending themselves against the attacks of the enemy. At present, the country is dependent on the merchant service for the transport of its troops and stores in time of war, and many a valuable freight has been entrusted by the Admiralty to ships "not fit to send a cat to sea in," as was proved by evidence given in a recent arbitration case. Can there be any advantage in retaining such ships for continued troop service, or as store-ships, as is often done now-a-days? Surely the French are far ahead of us with their large fleet of Government transports, ready at a moment's notice to carry an army to the uttermost corners of the earth. The employment of the personnel of the Navy also requires grave consideration. The complements of ships remain to this day approximately the same as they were, class for class, in the days of England's old wooden walls; and yet times have changed, and many beneficial reforms might have been introduced, even in the employment of the crews of ships in times of peace. Much more, for example, could be done with the personnel of the Navy were the complements of ships revised, and Lieutenants, Warrant and junior officers, seamen, and Marines appointed to them in proportion to the real work to be done now-a-days, and not with reference to work that had to be done in days gone by, in ships of a totally different build, rig, and armament. We now have torpedo-boats of various classes, but nothing has been decided as to who shall man them in time of war. These will require both officers and men. They will have to act either singly or in flotillas. The latter will have to be under the command of a flag or superior officer. But where are the officers and the men to come from? How will the Admiralty meet the deficiency in the numbers of Lieutenants, Sub-Lieutenants, and Navigating officers? Some will say by extending the duties of Gunners and Boatswains, and by increasing the numbers of these officers. Others will advise the employment of retired officers. Opinions certainly differ on the subject, and, so far, no decision has been arrived at by the Admiralty, for the task of Naval mobilisation has always appeared so gigantic to our Naval rulers in Whitehall, that it has invariably been shirked, and left for those who follow after to tackle. But no Board, Liberal or Conservative, has ever had the courage to take it in hand, and there the matter remains, and will remain, in a chaotic state, until the weight of public opinion forces Parliament to take it in hand, or a national disaster awakens the country to the fact that Britannia is no longer mistress of the seas, and a crushing war-indemnity grinds the taxpayers down into the very dust. Then, and not till then, may we hope to see steps taken to introduce reforms, long needed but long neglected, into the Navy.

Foreign Military Literature.

Deutsche Heeres-Zeitung, Nos. 41-43. In an article on "The English Army in 1883," our Army reforms and their results are considered from a German point of view. The writer says that the reforms initiated by Mr. Childers in 1880, and the chief object of which was to organise and despatch an expeditionary corps within the shortest possible time, were concluded during the past year. The result of the territorial division and the restriction of regiments to certain recruiting districts has been a greater blending of the Militia with the Regular troops. A probable consequence will also be the closer union of the Volunteer Force with the Regular Army. Respecting our recruiting system, the writer observes that the want of recruits has become a chronic calamity with the English Army, owing to the growing demand of labour for industrial purposes. As an increase of pay would make the already unpopular Army Budget still more so, there remained nothing but to reduce the standard of bodily height and strength, and to introduce short service. The result, although numerically favourable, has been below existing requirements. Lord Wolseley may have stated in his optimist speeches that the numerical strength of the British is sufficient; but experience has shown that a small expeditionary corps, even if Indian troops are drawn upon, cannot be despatched from England without completing regiments by calling in the Army Reserve, nothwithstanding that the latter are ostensibly meant only for the defence of the country. The Militia cannot undertake operations, because it is not sufficiently trained; and it is neither provided with vehicles nor equipped for the field. As a matter of fact, the Volunteers could not keep the field for more than 48 hours; for but few corps are provided with great-coats, and not all of them have knapsacks, water-bottles, &c. But there appears to be some prospect of improvement in this respect. "After the many vital changes in the organisation of the English Army, which have followed each other rapidly during recent years, a certain hesitation and restlessness have recently shown themselves. The army reforms aimed at by Lord Cardwell, Colonel Stanley, and Mr. Childers, which are more or less the reflections of the Liberal Ministry of Mr. Gladstone, do not present actual successes worth mentioning. It is to be expected that the more Conservative leaning of Lord Hartington, who has succeeded Mr. Childers at the War Office, will exert a beneficial influence, and give the Army the needed leisure to pay greater attention to improved arming and better training, in which respects the English Army has been outstripped by the armies of the Continental Powers."

Ahoi! Zeitschrift für deutsche Segler. Edited by G. von Glassenapp. Nos. 1 and 2. (Berlin: 9 Kurfürstenstrasse, W.)

A monthly for German yachtsmen, whether they sail in a 100-tonner or a modest open 12-foot boat, the *Ahoi!* is desirous of entering into communication with yachtsmen of all nations; for, the new journal says, "there is a common tie encompassing all yachtsmen—the beautiful blue water and the white foaming waves, the merry and fearless heart." Verily, our new contemporary is enthusiastic. But the *Ahoi!* has also a sympathetic word for professional fellow-sailors, the fishermen. It promises to be to them an active, useful friend. The *Ahoi!* will further deal with matters having reference to the Imperial and Merchant Navy, as well as with German colonisation, and report on the activity of the German Lifeboat Institution. Steaming, canoeing, rowing, angling, swimming, skating, and athletics, will be treated for general information. The programme of our new contemporary is a wide one, and the two first numbers received bear evidence of it in their bulk. If future issues are as international in character as those to hand, no doubt the career of the *Ahoi!* will be a prosperous one.

Militär-Wochenblatt, May 14, contains an article on "The French Marines," of which force we spoke last week. The average strength of the French Marines is 17,589 men, with (of higher officers) eight Generals, 15 Colonels, 20 Lieutenant-Colonels, and 62 Commanders of Battalions. The Infantry numbers at present four regiments, each of 45 companies, together 180 companies; the Artillery, a regiment with 29 batteries. The present organisation is of comparatively recent date, 1854, the original Marine Infantry having been established in 1761. The Marines are under the orders of the Minister of Marine. According to the law of July 27, 1872, the Marines serve actively only for five years, and two years in the Reserve, after which they enter the Territorial Army. A large number of men are volunteers; but in case they are not forthcoming in sufficient numbers, the War Minister furnishes the required contingent, consisting on the average of 4,000 men for the Infantry, and 900 men for the Artillery. Experience has shown that the available 180 companies of Marine Infantry, even if they are at their full strength of 100 men each, are not sufficient, the want of officers being especially pressing. The recent Tonquin expedition is an illustration.

Lothringer Zeitung, May 15, contains an interesting article on "The Garrison Slaughterhouse at Metz." It appears that 31 pfennigs (4d.) per head and day covers the expense for breakfast, dinner, and supper of the men. Mess contractors supply the various articles of food required, each battalion, cavalry regiment, and artillery section generally having its own contractor. The slaughter-house supplies meat, sausage, and other requisites. The various messes, as well as the families of married men, draw their supply of meat from the slaughter-house as they want it from day to day, but orders are given once a week. The new arrangement is said to be working extremely well. The live beasts are supplied by contract, renewed once a quarter, and only the best stock are purchased. During the first year, from April 1, 1883, to March 31, 1884, there were purchased and slaughtered 475 head of cattle (332 oxen and 143 cows), of a total weight of meat of 142,969 kilogrammes; 950 pigs, of a total weight of 97,348 kilogrammes; 284 sheep, of a total weight of 5,791 kilogrammes; 92 calves, of a weight of meat of 5,348 kilogrammes; the total amount expended in their purchase being 350,394 marks. The net gain on the year—4,051 marks—went towards defraying the preliminary expenses of the establishment. The price of meat was 1 mark 44 pfennigs per kilogramme (8¾d. per lb.).

Organisation der Elektrischen Telegraphie in Deutschland für die Zwecke des Krieges. Von v. Chauvin, General-Major z. D. und des Deutschen Reiches General-Telegraphen-Direktor a. D. Berlin: E. S. Mittler and Sohn. 1884.

The author of this work, formerly Director-General of Telegraphs of the German Empire, in order to demonstrate the share which telegraphy had in the great successes of the Franco-German war, and to assign its due place in the history of the war of 1870-71, has given us a description of the German Telegraph Department in that war, an account of which was still wanting. At the same time, he utilises the experience gained by him in three campaigns by examining the means by which military telegraphy may be improved and developed during peace to fit it for the requirements of war. The value of this work is enhanced by a map of the telegraphs (existing and field telegraph lines), within the scene of operations in France during the war.

THE SOUDAN CAMPAIGN.

"Tactics" states, in reference to the belief that the fighting in the Soudan was done by our young soldiers, that the exact length of the service of men of the 65th was of killed at El Teb 14 years 5 months; wounded at El Teb, 11 years 2¼ months; average of killed and wounded, 11 years 9 months; average service of killed at Tamanieb, 12 years 4½ months; wounded at Tamanieb, 11 years 6¼ months; killed and wounded, 11 years 11 months; average service of all men of the York and Lancaster Regiment, killed and wounded, 11 years 10¾ months."

Reviews.

General Beauregard. By Alfred Roman, formerly Colonel of the 18th Louisiana Volunteers, &c. (New York: Harper Brothers. London: Trübner and Co.)

Two very bulky volumes relating to military operations, and full of document and narrative, but unprovided with maps or plans, can only be read with profit by an earnest student, who might, if there were charms of style and easiness of method to lure him on from page to page till he had arrived at "finis," apply himself to ascertain the positions of the military operations from such works as the admirable history of the Count of Paris. But the author of this work, an ex-A.D.C. and Inspector-General on the Staff of Pierre Gustave Toutant Beauregard certainly appeals to the patience rather than the taste of his readers in the ponderous mass of matter from which he forms a temple in honour to a very excellent soldier, whose name is entitled to a high place in the annals of the great war which the Americans *chez eux* like to forget, and which on this side of the Atlantic is almost forgotten. Beauregard is, it seems, in reality a Welsh-Italian. In 1290 or thereabouts, a chieftain of the Cymry named "Tider the Young," at the early age of 18, headed a revolt against Edward I. He did not succeed in his opposition to the ruthless King, but he was more fortunate in his attack on the heart of "Mademoiselle de Lafayette, maid of honour to Mdme. Marguerite, sister of Philip IV., surnamed the Fair," at whose court he was cordially welcomed. From him and from "a daughter of the houses of the Dukes of Reggio and Modena of the House of Este" sprang the Confederate General who is now President of two important railway companies and Adjutant-General of the State of Louisiana! It is rather difficult to understand how Tider managed to propitiate Edward I., the ruthless King, to whom "his name was distasteful," by changing it to "Toutank," even if it be easy to see how the letter "k" was gradually dropped and the letter "t" substituted in its place, thus transforming the old Celtic Toutank into the Gallic Toutant (p. 2).

(*To be continued.*)

Under the title *Localisation to the End*, Captain and Adjutant N. A. Bray, 108th Fusiliers, advocates in a small pamphlet the formation of our military forces of Regulars, Reserves, Militia, and Volunteers into permanent army corps, divisions, and brigades. Captain Bray points out that at present, in case of grave national emergency, we have no means of suddenly utilising our resources. If our head-quarters were lost, the whole empire would be paralysed. By an organisation into army corps, complete in every respect, it is maintained that each district would have to fall in succession before the country would be conquered. No change is necessary in existing localisation or numbers according to the scheme, whilst the difficulty caused by our large amount of foreign service is also dealt with. There has been so much chopping and changing lately that any idea which secures improvement without worrying regiments is worthy of notice, and as Captain Bray's proposals leave corps pretty much as they are, at the same time that it renders the Army more mobile as a defensive organisation for home service, it deserves at least to be considered.

In the June number of *Colburn's United Service Magazine*, Lieutenant-Colonel Knollys opens fire on Lord Hartington, with the avowed purpose of "waking him up." But we think his lordship is cased in armour quite impenetrable to paper bullets, unless they be fired by one of the constitutional machine-guns called a Parliamentary majority. The first point the writer tickles my lord with is in enforcing the necessity of securing the return of Reserve men to their own corps, which could be done, he suggests, by—(1), a real instead of a sham localisation; and (2), sending a Reserve man from his residence to his regiment, wherever it may be. But all these suggestions are like the recommendations to a Government to adopt "a firm and resolute policy." Many critics, however, merely criticise, whereas Colonel Knollys suggests amendments; but in making the latter, he generally seems to suppose that the War-Office authorities can do as they please, whereas they are under orders and control. The argument *ad terrorem*—that wars are sudden, sharp, and short now-a-days—really loses some of its force owing to the insular position which makes our first and main line of defence the Navy. There is an immense difference between the conditions under which a Continental Power exists in relation to its neighbours and those which England has to regard; and the ability to equip an expedition to engage in a great war, necessarily with allies, would be useless unless we had command of the sea. To be ready to send forth an expedition to meet an emergency in one of our dependencies beyond the seas is what England ought always to be; but Ministers may well shrink from the cost of having everything ready for a mobilisation such as a declaration of war would at once entail on France, Germany, Austria, or Russia. In fact, it is the assurance that England cannot be exposed to the calamities of invasion till many things have happened which renders all the appeals of "alarmists," as they are called, of no avail. Of course, mounted infantry and machine-guns caper over the field in a paper of this kind, and the usual arguments and suggestions figure in support of the writer's urgent request for the immediate formation of a regiment of Mounted Infantry, and for "something to be done" about machine-guns, of which the "lethargy, stupidity, and prejudice" of the authorities delay the introduction. A really valuable paper is contributed by Lieutenant-Colonel R. J. Higgins, on "The Reorganisation of the War Office." The writer strikes his key-note at once:—

> "That dingy-looking pile of Government buildings which disfigures one side of Pall Mall has not been meddled with in the memory of man. No new broom has ever attempted to sweep it clean, though its dusky dove-cots have been fluttered lately by a vulture hovering over them in the shape of an age clause for retirement. The very appearance of the place inside is enough to dim the brightest intellect and damp the most ardent zeal. The privilege of non-interference which the War Office has hitherto enjoyed at the hands of the reformer may perhaps be attributed to that peculiarity in our nature which makes us go far afield for objects of consideration when many are to be found at our very doors. It is this peculiarity of our race which makes the philanthropist travel to far-off lands to find objects for his benevolence, while around him at home lie misery and want."

Having set out in detail from the Estimates the cost of the clerical staff at the War Office, he goes to his point at once. He says:—

> "If the average annual cost of the clerks in the civilian establishment of the War Office be added together it will be found to amount to £112,340, while the estimated cost for the present year is £109,857, and the amount of pensions to which the country is liable under the present system is £97,374. . . . . . . I propose to replace the present civilian establishment at the War Office by a military secretariat, to be composed entirely of non-commissioned officers, of not less than seven years' service. . . . . . (*a*) Instead of having 21 principal civilian clerks, as at present, I would have 21 chief clerks, with a minimum pay of £350, an increment of £20, and a maximum pay of £500. This would give an average of £425, and an annual cost of £8,925. Pensions, £250; total pensions under this head, £5,250. These 21 chief clerks should have the status of quartermasters, with the honorary rank attached thereto. (*b*) 45 senior clerks, with a minimum pay of £250, an increment of £15, and a maximum of £350. This gives an average of £300. The average annual cost would be £13,500. Pensions, £200 a year; total pensions under this head, £9,000. These 45 senior clerks should have the status and rank of warrant officers, first class. (*c*) I would have 60 superintending clerks, with a minimum pay of £200, an increment of £10, and a maximum pay of £250. This would give an average of £225, and an annual average cost of £13,500. Pensions, £120; total pensions under this head, £7,200. These 60 superintending clerks should have the status and rank of warrant officers, second class. (*d*) 251 military staff clerks, with a minimum pay of £100, an increment of £5, and a maximum pay of £150. This would give an average of £125, and an annual average cost of £31,375. Pension, £80; total pensions under this head, £20,080. These 251 clerks to be called staff clerks, with the status of quartermaster-serjeants. The average annual pay of the military secretariat would be £67,300, as against a present average annual cost of £112,340, or a saving to the country in pay alone of £45,040. The total amount of pensions for which the country would be liable under a military secretariat would be £41,530, as against £97,374, or a saving to the pension list of £55,844."

As to pensions he remarks:—

> "I think it will be generally admitted that the present rate of pensions, if not of pay, of the civilian clerks at the War Office is far too high, and out of proportion with the work done. The colonel of a regiment only gets £420 a year on his retirement, and his life has been far harder than that of a War Office official, for perhaps he has been through three or four campaigns, and epidemics of cholera more severe than that which recently raged in Egypt, while his responsibilities have been very great, while, as I have already stated, he only gets £420 a year, whereas the principal clerks at the War Office get a pension of £600 a year each. A very great deal of War Office work is mere routine, and requires rather care and steadiness than any very great ability, while there is no risk to life or health. I think I have clearly demonstrated that a military secretariat would be very much less expensive, both as regards pay and pensions than our present system; but it is not in this respect that I think the country would derive the chief advantage, but from the stimulus it will give to recruiting, and the inducement it would hold out to men of good character and ability to enter the Army."

There is something to be said on the other side of the question, but it is not for us to say it.

The Latin Hand-book. By W. T. Chetwode Crawley, LL.D. (Longmans and Co.)—This handbook is intended principally for the requirements of candidates for the great open competitions. It contains all important passages set for many years back at the examinations held by the Civil Service Commissioners. What is more important still, is the introduction of a considerable number of those passages which have been obtained from private sources and appear for the first time in this handbook, never having been published by the Civil Service Commissioners. Its speciality is that all its passages, 300 in number, possess the merit of having been selected and adapted by the examiners themselves, and have in many cases been set over and over again. This handbook is divided into three parts:—No. 1 supplies a complete specimen of the Latin papers given at each of the more important examinations; No. 2 contains 180 passages set at these examinations; No. 3, by far the most important, consists of a series of 50 examination papers for Army candidates, and includes materials for translation into Latin as well as into English, together with grammatical questions which have been drawn up with special reference to Army entrance examinations. This little volume contains a Praxis of examination papers specially arranged for Army candidates, by W. K. Dalgleish, B.A.

The Guide to Nice. By James Nash. (Kirby and Endean.)—This little manual will be found a most desirable companion to all who frequent Nice and at the same time wish to educate themselves in its history, dating from before the Christian era, and brought down to the present season in that charming place of sojourn either for the pleasure-seeker or the invalid. The reader may very naturally feel startled at the amount of knowledge that can be acquired by a study of this useful handbook, while at the same time useful knowledge of another kind can be found in abundance. All that relates to public amusements or medical treatment for invalids is carefully noted. At the latter portion of the manual the author introduces the evidence of Dr. Meyhoffer—an eminent physician who has resided at Nice for 27 years—to explain to his readers the use and abuse of its climate. Mr. Nash's manual is entertaining and instructive.

By Sheer Pluck. By G. A. Henty. (Blackie and Sons.)—Everything from the pen of this author may be calculated on as certain to receive a favourable reception, especially from juveniles. The books by which he is best known are "The Young Buglers," "Under Drake's Flag," "The Cornet of Horse," and "Facing Death;" and he now contributes to their amusement a stirring tale of the Ashantee war. The volume is embellished with eight full-page illustrations by Gordon Browne, the first of which forms the frontispiece, and depicts with considerable skill the cautious steps and watchful attitude of those "out with the scouts." Next comes several sketches entitled "Blown out to Sea, "Alone in the World," "Lost in the Forest," followed by the wonderful escape of Sam from the man-hunters. Altogether, these stories are quite worthy of Mr. Henty's reputation; they are told without any undue straining after effect, and are all more or less interesting.

What to Do, and How to Do It. (Kegan Paul, Trench, and Co.)—A great deal of valuable information may be acquired by reading and carefully noting Messrs. Kegan Paul's "Manual of the Law affecting the Housing and Sanitary Condition of Londoners," with special reference to the dwellings of the poor. The manual has been framed and issued by the Sanitary Laws Enforcement Society, and has, we understand, already proved of great value.

Art.

MINOR EXHIBITIONS.

The Nineteenth Century Art Society.—The Summer Exhibition of this Society opened on May 26. There are not many works in this gallery that call for any lengthy notice, though, as a whole, the Exhibition is a better one this year than last. Mr. Wyke Bayliss has a picture of Louvain Cathedral. It is an interior, and is painted with the poetic feeling which this artist usually displays. The play of light coming through the coloured windows and falling on the white stone columns of the cathedral is admirably treated. Mr. Kennington sends a clever picture called "Variety." "The Mill Pond," by Mr. Snell, is also a very artistic and harmonious work. Mr. Lindstrom has two snow scenes of considerable merit. Mr. J. Burr's "The Toilet" is a charming bit of delicate colouring. Miss Maria Brooks, Mr. Henry, and Mr. G. S. Walters also contribute good work. In the water-colour room, Mr. Alfred Powell's "A Hazy Morning, Surrey," is a well-executed and charming drawing, and is as good as anything in the gallery. Mr. Mottram has a bold sketch, entitled "Running Ashore," the drawing is very good and the colour strong and brilliant. Miss Foster has a good study of boats, and Mr. Polidori's "Off Guard" is brilliant in treatment.

The Fine Art Society's engraving from De Neuville's picture of Tel el Kebir is a very fine work,—an excellent reproduction of the striking effects of a painting in which a French artist has caught the character of the British soldier at his best, in a way which only one English artist we know of, Miss Thompson (Mrs. Butler), could emulate, or even approach. We say this without disparagement to Mr. Woodville's picture of Kassassin, in which there is immense power and life. The regiments which were engaged in the Egyptian Campaign with Lord Wolseley cannot find more appropriate or beautiful engravings than those which have been issued by the Society in Bond Street to decorate the walls of their mess and anti-rooms, and Mr. Wyllie's very remarkable sea piece, Alexandria, will doubtless be, as it deserves to be, popular with the Navy.

Obituary.

Major-Gen. St. G. M. Nugent died on the 29th ult. He entered the 29th Regt. in 1842, and served in the Sutlej campaign in 1845, including Ferozeshah, Moodkee, and Sobraon (medal and clasp). Some time afterwards Capt. Nugent exchanged into the 96th, and returning home joined the Staff College. In 1858 he was appointed brigade-major at Aldershot; in 1861 was appointed assist.-qrmr.-gen. in North America; in 1867 was appointed assist.-qrmr.-gen. Dublin District, from which he was transferred to be assist.-qrmr.-gen., Ireland. He was promoted to the rank of col. in 1875. His next appointment was as deputy-adjt.-gen. and qrmr.-gen. at Malta. Col. Nugent was compelled by ill-health to relinquish his post in 1878. Recovering somewhat, he was appointed deputy-adjt.-gen. of the North British District, which continued ill-health compelled him to resign in 1879. In 1881 he retired from the Army on a pension, with the hon. rank of major-gen.

The Gazettes.

TUESDAY EVENING.

ARMY.

WAR OFFICE, Pall Mall, June 3, 1884.

The Duke of Edinburgh's (Wiltshire Regiment)—Lieut.-Gen. C. L. B. Maitland, C.B., Lieutenant of the Tower of London, to be Col., vice Gen. J. A. Ewart, C.B., transferred to the Gordon Highlanders (March 12).

The Gordon Highlanders—Gen. J. A. Ewart, C.B., from the Duke of Edinburgh's (Wiltshire Regt.), to be Col., vice Gen. M. K. Atherley, deceased (March 12).

12th Lancers—Capt. W. Colquhoun to be Adjt., vice Capt. T. A. Hill, who resigns the appointment (March 24).

Regimental District.

Lieut.-Col. and Col. T. Phillips, from half-pay, to be Lieut.-Col., to command the 14th Regtl. District (the Prince of Wales's Own, West Yorkshire Regt.), vice Col. R. B. Chichester, C.B., retired (May 9).

Line Battalions.

The Royal Scots (Lothian Regiment)—Lieut. A. C. Baldwin, from the Princess of Wales's Own (Yorkshire Regt.), to be Lieut., vice V. G. Tippinge, promoted.

The Devonshire Regiment—Lieuts. H. Bower has been appointed a probationer for the Indian S.C. (Feb. 2); G. J. FitzM. Soady, from the Sherwood Foresters (Derbyshire Regt.), to be Lieut., vice E. T. Stanley, seconded.

The Royal Irish Regiment—Lieut. G. H. Bretherton has been appointed a probationer for the Indian S.C. (Feb. 15).

The Royal Scots Fusiliers—Supernumerary Lieut. C. F. Lindsell to be Lieut., vice J. C. Erck, appointed a probationer for the Indian S.C.

The Cheshire Regiment—Lieut. A. G. B. Lang has been appointed a probationer for the Indian S.C. (Feb. 14).

The Black Watch (Royal Highlanders)—Capt. J. H. C. Coode has been seconded for service as an Adjt. of Auxiliary Forces (May 31).

The Oxfordshire Light Infantry—The second Christian name of Qrmr. G. A. Hirst is *Allen*, and not *Alfred*, as stated in the *Gazette* of June 26, 1883.

The Essex Regiment—Major T. E. Stephenson has been seconded for service on the Staff (Nov. 27, 1883).

Princess Charlotte of Wales's (Berkshire Regiment)—Major S. L. M. Remmington has been seconded for service as a Deputy-Assist.-Comy.-Gen. (Feb. 2).

The King's Own Light Infantry (South Yorkshire Regiment)—Lieut. P. F. F. Leicester, from the Royal Dublin Fusiliers, to be Lieut., vice P. W. A. A. Milton, promoted.

The Duke of Cambridge's Own (Middlesex Regiment)—Lieut. J. J. Cronin has been appointed a probationer for the Indian S.C. (Feb. 16).

Royal Malta Fencible Artillery—Capt. (with local and temporary rank) A. Gatt to be Adjt., vice Capt. (with local and temporary rank) R. Casolani, who has resigned the appointment (May 15).

Garrison Staff—Lieut.-Gen. Frederick Augustus, Lord Chelmsford, G.C.B., to be Lieut. of the Tower of London, vice Lieut.-Gen. C. L. B. Maitland, C.B., resigned.

Staff.

Major and Brevet Lieut.-Col. G. W. A. FitzGeorge, half-pay, to be Aide-de-Camp to his Royal Highness the Duke of Cambridge, K.G., Field-Marshal Commanding-in-Chief, vice Major-Gen. R. Bateson, who vacated that appointment on promotion.

Capt. and Lieut.-Col. W. H. Mackinnon, Grenadier Guards, to b Assist. Military Secretary to Gen. Sir J. L. A. Simmons, G.C.B., R.E., appointed to command the troops in Malta (June 8).

Capts. the Hon. F. W. J. Shore, R.A., to be Aide-de-Camp to Major-Gen. Sir C. G. Arbuthnot, K.C.B., R.A., Inspector-Gen. of Artillery (Feb. 18); J. W. Murray, R.A., to be a Deputy-Assist.-Adjt. and Qrmr.-Gen., vice Lieut.-Col. G. W. Smith, half-pay, who has vacated on promotion (June 1).

Lieut. A. E. Codrington, Coldstream Guards, to be Aide-de-Camp to Lieut.-Gen. Sir G. H. S. Willis, K.C.B., commanding the troops in the Southern District (May 1).

The rank of Col. R. Warren, R.E., appointed Col. on the Staff, Western District, in the *Gazette* of May 6, should have been described as Col., and not as therein stated.

Discharge Depôt—Lieut.-Col. W. Livesay, from half-pay, to be Lieut.-Col., to command the Discharge Depôt at Fort Brockhurst, vice Major B. J. A. Monsell, who has vacated that appointment (June 1).

School of Military Engineering—Major W. J. Galwey, R.E., to be Brig.-Major and Secretary, vice Major G. Harris, R.E., who resigns that appointment.

Chaplains' Department—The Rev. F. J. de Vie Beamish to be Chaplain to the Forces of the Fourth Class (dated May 19, such antedate not to carry back allowances).

Army Pay Department—The under-mentioned Paymasters and Hon. Majors to be Staff Pymrs.:—R. McI. Nott (April 16); F. N. I. Taylor (May 9); and J. H. Jackson (May 24). Assist.-Pymr. in the Army C. F. H. Beardmore to be Pymr., with the hon. rank of Capt. in the Army (April 1).

Veterinary Department—Vet.-Surg. A. Baird resigns his commission.

Half-Pay—Capt. J. Croker, from the Royal Scots Fusiliers, to be Major (June 3).

Memoranda.

Hon. Major-Gen. E. L. Dillon, late Lieut.-Col., half-pay, has been permitted to commute his retired pay (May 20).

Capts. A. Hunt, retired pay, retires from the service, receiving the value of his commission; and C. V. Trotter, half-pay, has been removed from the Army on account of ill-health (March 18).

Deputy-Comy. and Hon. Capt. W. Wild, Bombay Establishment, to have the hon. rank of Major on retirement (Feb. 18).

Assist.-Comy. and Hon. Lieut. W. Crawford, Bengal Establishment, to have the hon. rank of Capt. on retirement (Feb. 1).

Deputy-Comy. and Hon. Lieut. T. Pearson, Bombay Establishment, to have the hon. rank of Capt. (Feb. 18).

Deputy-Assist.-Commissaries G. Chooet, Madras Establishment, to have the hon. rank of Lieut. (March 22, 1883); W. P. Carson, Madras Establishment, to have the hon. rank of Lieut. (Feb. 19).

Apothecary R. S. Dawson, Subordinate Medical Department, Madras Establishment, to have the hon. rank of Surg.

Reserve of Officers.

Capt. H. W. Kemble, 2nd Batn. the Queen's Own Cameron Highlanders, to be Capt.

INDIA OFFICE, June 3, 1884.

The Queen has approved of the following admissions to the Staff Corps in India:—

Bengal Staff Corps.

To be Captain:—Capt. A. W. Brooke, from the York and Lancaster Regt. (dated July 11, 1882, but to rank from May 29, 1882).

To be Lieutenants:—Lieuts. H. A. Carleton, from the Royal Artillery (dated July 5, 1882, but to rank from Oct. 9, 1877); F. W. Repton, from the Leinster Regt. (dated July 25, 1882, but to rank from Feb. 12, 1881); G. F. D. Hamilton, from the East Surrey Regt. (dated July 5, 1882, but to rank from July 1, 1881).

Madras Staff Corps.

To be Lieutenant:—2nd Lieut. F. Wyllie, from the Argyll and Sutherland Highlanders (Dec. 27, 1880).

Bombay Staff Corps.

To be Lieutenant:—Lieut. R. P. Colomb, from the West Riding Regt. (dated July 6, 1882, but to rank from July 1, 1881).

(Where not otherwise stated, the foregoing commissions and announcements bear date June 4, and the current year must be understood.)

FRIDAY EVENING.

ARMY.

INDIA OFFICE, June 6, 1884.

The Queen has approved of the following promotions among the officers of the Staff Corps and Indian Military Forces made by the Governments in India:—

Bengal Staff Corps.

2nd Volunteer Battalion, the Duke of Wellington's (West Riding Regiment)—Capt. A. J. Preston, 1st Batn., to be Adjt., in succession to Major A. G. J. Robbins, who has resigned that appointment (May 12).

(Where not otherwise specified, the foregoing commissions and announcements bear date June 7, and the current year must be understood.)

"The reason why the Ajax and Agamemnon have not been placed in commission, although they are both apparently quite ready for sea, is," says the *Western Morning News*, "that neither of these vessels will answer her helm, and that, accordingly, to send them to sea would not only be a danger to themselves, but to every other vessel they might encounter. The defects in these ships apparently is of such a radical description as to be quite irremediable, seeing they have been under construction just eight years, and have cost the British taxpayer something like three-quarters of a million sterling. The announcement of these facts, which have been hitherto carefully concealed, will surely be satisfactory. No doubt, although the vessels are not fit to go to sea, they will for many years to come figure in statistics in the House of Commons among our most effective ironclads. It is to be hoped that some Member of Parliament will endeavour to elucidate who is responsible for the facts just described in connection with the ships."

Practical work in first-class torpedo-boats is, says the *Western Morning News*, to form an important feature in the forthcoming exercises of the Channel Squadron in Bantry Bay, and subsequently at Portland, at which latter place all the ships of the squadron will specially proceed to sea for an organised torpedo attack. A first-class torpedo-boat has been assigned to each ship, to be manned from its own ship, to be hoisted in board if necessary, and to be under the command of a lieutenant taken from the ship. These lieutenants are under orders to proceed to Portsmouth to commence on Monday next on board the Vernon a short course in torpedo instruction. At the expiration of this course they will take over their torpedo-boats and navigate them across to Bantry Bay to join the Channel Squadron. Lieut. Bremer, of the Agincourt, and Lieut. Carus Wilson, of the Achilles, have been appointed to command the torpedo-boats to be attached to their respective ships.

The forthcoming cruise of the Reserve Squadron, if the current rumours are correct, does not promise to be very interesting. Heligoland, it is said, is to be the first port at which a call will be made. Thence up the east coast of England and Scotland to Kirkwall in the Orkneys, and on to Stornoway, in the Outer Hebrides. Blacksod, Galway, and Bantry Bay will afterwards be visited, all on the west coast of Ireland, and the squadron will disperse.

Post captains in the Navy, says the *Hampshire Telegraph*, have a happy knack at times of making their ships uncomfortable. For example, a captain with plenty of spare sleeping accommodation in his cabin invites a friend to accompany him on a cruise. To give up one of his own spare cabins would never enter his head. Instead, he displaces a lieutenant who has been located in a poop cabin, and sends him down into the cockpit, where darkness reigns supreme and fresh air is unknown. This has just happened at Portsmouth, and of course, is being freely discussed in Naval circles. Why do the Admiralty continue to leave it within the power of commanding officers to so treat their subordinates?

Printed and Published for the Proprietors, at the Office, No. 16 Wellington Street, Strand, London.—Saturday, June 7, 1884. Letters on Business and Remittances should be sent to Mr. Richard James Wood.

CORRECTED UP TO JUNE 7.]

STATIONS OF HER MAJESTY'S SHIPS IN COMMISSION.

[WITH THE DATES AND PORTS OF COMMISSION.]

Name.	Guns.	Men.	Class.	Commanding Officer.	When and Where Commissioned.	Station.

MR. RICHARD JAMES WOOD,

AT THE OFFICE, 16 WELLINGTON STREET, STRAND, *and* not *to the* Editor *of the* Army and Navy Gazette.

The subscription to the paper is 7s. per quarter, or 28s. per annum, payable in advance, *inclusive of postage to any part of the United Kingdom.*

To India, £1 12s. 6d. per annum.

The Army and Navy Gazette *can be obtained in Paris of our Agent,* Mr. J. W. S. NEAL, *English Stationer,* 248 *Rue de Rivoli, to whom Advertisements and Orders for the Paper may be sent.*

ONE of the most interesting portions of "The History of the C Battery, A Brigade," R.H.A., from "Coruña to Sebastopol," compiled by Colonel Whinyates, to the merits of which we recently called attention, is the exact, elaborate, and curiously detailed account of the Cavalry combats and charges of October 25, 1854, in connection with the action of the battery in support. In describing the opening of the drama, the writer, whose identity can be traced very clearly, after remarking that when the Battery turned out from camp on the news that Balaclava was attacked, the men, who had just returned from the usual patrol with the guns in the direction of Inkerman an hour before dawn, had had nothing to eat or drink, says :—

> "It was Brandling's custom on all alarms to take the first one or two guns that were hooked-in and be off with them. An old 'C' Troop driver, named Stacey, who had served with distinction under Sir de Lacey Evans in the Spanish wars, acted as bâtman. This man bridled up the charger, and Brandling had merely to kick off a pair of shoes, which he wore about the lines, pull on his hessians, and mount; so he was invariably amongst the first out. Those who happened to be last in turning out on an alarm generally heard something further on that particular subject. It is worthy of remark here, as illustrative of the kindness of Sir de Lacey to old soldiers who had served under him, that he continually inquired after this man, and when in Bulgaria spoke in glowing terms of his soldierly qualities to Major Levinge. He even asked him to call at his tent whenever opportunities offered, and tell him how he was getting on. Everything was in such a state of readiness that the Troop was hooked-in, mounted, and trotting away in a few minutes through the tents, on towards the Woronzoff Road, intending to reach Balaclava by that route."

The Russians had just carried the furthest Turkish redoubt, and were crossing the end of the valley in masses. Maude had been wounded. The Chasseurs d'Afrique were still on the plateau as the Battery, diverted from the Woronzoff Road by the enemy, began to go down over the Col, and descended into the plain, where there appeared to be no infantry but the 93rd in line before Kadikoi. The Heavy Cavalry were formed up in the centre of the plain, and the guns and the Chasseurs d'Afrique proceeded in this direction, the latter continuing their course towards the Light Brigade in advance, nearer the line of the redoubts. The gunners just caught a sight of the Russian General and his Staff on the ridge behind which the Cavalry were coming on at the time at a rapid trot :—

> "When well over and fully in view (*i.e.*, when the rear-most ranks had just passed the crest), they were found to be a very considerable force, in either close or quarter-distance column. . . . . . The front had the appearance of three large squadrons, and the depth from front to rear when halted, as they were in a moment or two afterwards, was about the same as the extent of front; so that at the halt and closed up they had the appearance of a nearly equilateral figure. . . . . . Any one with experience in *bonâ fide* mustering of Cavalry by actually counting the men (and not trusting to the states) will know that squadrons of 80 men are not on parade every day, and that to manœuvre 25 of such squadrons in one close or quarter-distance column, at a rattling good pace such as these men were moved at that day, is all but impossible, as the men in the centre are crushed out of all shape and dressing. . . . . . . At any rate, when three English squadrons were engaged on the Russian front, as they were in a few moments after this, the Russians rather overlapped the English."

Having described the arrival of the Troop within 300 yards of the left rear of our Cavalry, where Adye (now Sir John) gave orders from General Strangways to Brandling to take up a position to act against the Russian horse, the writer says :—

> "At this moment the Russian Cavalry halted, and, whether from unwieldiness or bad timing of the orders, it so happened that their central officers or leaders in front pulled up before those on the flank, but only to the extent of from ten to twelve yards. The flanks, however, did not curve round, but kept tolerably parallel with the central line. There was no such thing as prolonging the front ranks of the column, though it might have such an appearance from other parts of the field; indeed, there was no time for it. It was simply that the officer in chief command of those who were to go on in the attack seemed undecided for a minute as to how he would proceed. It was, however, but momentary, for they instantly moved on, only not so fast, and the dressing in front was not corrected. The first attacking squadron of the Greys now moved out (not very fast—it was said there were some obstacles immediately in front of the Greys). After a moment the Russians halted again, and there were some pistol or carbine shots discharged from their central squadron at the first squadron of the Greys. Then the Russians moved on, but their pace was so slow that it could hardly be called a trot. The first squadron of the Greys had now quickened their pace, and in a moment or two had passed into the space where the central squadron of the Russians had hung back. The first squadron of the Greys got in partly between the files, dismounting some of the Russians, and partly at the angles formed by the Russian centre checking. They then spread out something like a fan, going through the distances between the Russian ranks, which at the moment were not quite closed up, owing to the before-mentioned tailing-off. The course taken by this squadron of the Greys could be easily observed by their red coats and grey horses. The Russians, as far as they could be seen in this particular body, had black horses, wore a black oilskin cover, over a very broad-topped old-fashioned shako, and a dark grey overcoat. They were altogether a black-looking mass."

The Troop moved off to come into action, and by the time it had halted :—

> "The whole Russian Cavalry may be said to have halted, for the tussle was going on along its whole front with the other squadrons of Heavy Cavalry that had been already formed up, when they (the Russians) came over the ridge; but a squadron of Heavy Cavalry, which had in some way been detached to the right, now passed at a good distance in front of 'C' Troop, and at a splendid pace, the men sitting well down, and in good dressing; in this form they tore in on the left flank of the Russians, and catching them, as they did obliquely, and on the bridle arm, unhorsed whole troops of them."

Before this "black-looking lot," whose strength the writer puts "at 2,000 at the very outside, probably less," had been disposed of by our red-coated Heavies, another column of Russian cavalry had moved towards Balaclava,—certainly not more than 400 sabres in all. Here is what occurred :—

> "They moved on at the trot towards the 93rd Highlanders, then in line, and at a considerable distance to the right rear of the line of the Heavy Cavalry: that is, they were covering the entrance to the gorge of Balaclava. Barker's Battery was close to the 93rd, and fired some rounds. The 93rd also fired a volley. There appeared to be no saddle emptied or any confusion whatever in the Russian Cavalry, who however did not approach much nearer, but wheeled by fours or troops, and went straight away for a long distance in the direction of their own left."

This is the famous "charge" on the 93rd in line which seemed so close and dangerous to the spectators, with Lord Raglan on the edge of the plateau, and which has been "immortalised" in song and story, and picture and engraving, and of which Mr. Kinglake draws a spirited picture, too, on five pages of paper. As to the effect of the Heavy Cavalry charge on the Russians, the gunner says :—

> "They (the Russians) began to retire. In doing so they seemed to go by fours or sections to their left, and then at once in a direction that took them left about three-quarters from that in which they stood when fronting the Heavy Cavalry. They were accompanied by all this lot of loose horses and men on foot. Many of the latter had now secured horses, and were mounting, but there was a formidable body of them (certainly one-half) that had never been reached or touched by our people; for when all the squadrons of the Heavies had executed the charge at the front, and partially on the flanks near the front, their strength may be said to have been expended. It was stated that they could make no impression on the Russians, owing to the thick overcoat they wore; but it is believed our men's swords were not sufficiently sharp, and as for those of the Russians no attempt whatever had been made to sharpen theirs. The few picked up on the ground were as blunt as they could be. The very formation of the Russians (bad generalship though it was) helped to consolidate them, make them support each other, and keep our Dragoons out. . . . . . There did not seem to be an upheaval, that is, the untouched Russians in the centre and rear neither reined back nor went about; when the untouched retired, they did so in as regular a way as could be expected considering the number of loose horses and dismounted men; had there been more Heavy Cavalry, the Russians could have been followed for about 500 yards with advantage."

We now come to the charge of the Light Brigade, the beginning of which our historian did not witness; but as to the cause of it, and the results, he speaks with confidence. The troop was halted near the Heavy Cavalry, when Brandling called on them to "mount," as the Light Cavalry had began to advance on the other side of the ridge :—

> "When they halted and came into action, they were so placed, that those at the left gun had a clear view into the outer plain, and could see the 4th Light Dragoons at a considerable distance down to the left front, near the foot of the hills on the other side of the plain; and straggling parties of men chiefly of the 13th Light Dragoons and 17th Lancers, returning up the plain and making for the ridge; some of them were dismounted and leading their wounded horses, some were on foot whose horses had been destroyed, others riding back with various sorts of wounds. The 8th Hussars at this time could not be seen owing to a bend in the hills. The Heavy Cavalry were near the Troop, but not all in one line. . . . . . The Heavy Cavalry kept manœuvring and shifting about, but still they suffered numerous casualties here; they and 'C' Troop retired independently of each other, keeping to the crest of the ridge, upon which they afterwards halted: the 4th Light Dragoons and 11th Hussars came obliquely across the outer plain, and passed to the rear, where they and all the other remnants of regiments were mustered. The 8th Hussars came back by the line of the ridge, but on the outer side. . . . . . Numbers of badly wounded also came slowly up to this place, and passed on towards the rear, reeling in their saddles, some calling out, 'Lads, look at my poor broken arm or leg,' as the case may be, &c. Capt. Brandling and the other officers of the Troop held their flasks to these men's mouths as long as the contents lasted. Many of the head-dresses were smashed and torn by shell and grape shot. Capt. Morris, who commanded the 17th Lancers, was terribly wounded about the head, and was carried past the front of the Troop towards Kadikoi, calling out loudly, 'Lord have mercy on my soul.' . . . . . Brandling had heard that Captain Nolan, of the 15th Hussars, who was on the Quartermaster-General's Staff, had been killed, and he looked about on the outer side of the ridge for the body. Having found it, he came back and took with him Bombardier Ormes (afterwards Riding-Master O. Orme), and four limber gunners with spades to bury it. The bombardier, on his return, said that the poor fellow's chest had been quite broken away, and the gold lace and cloth of his jacket very much burnt by the shell which killed him, and which must have burst close by; also that there was only one officer present, who appeared to be a friend, and was much affected, and who took off his watch and sword. . . . . . When Lord Lucan was told that Nolan was buried, his lordship said, 'Ah, I wish we could get poor Charteris' body.' The latter officer was his relative. . . . . . Soon after this Lord Raglan visited the plain, and complimented Gen. Scarlett, in the hearing of 'C' Troop. His lordship spoke in this way to Scarlett, 'Now tell me all about yourself.' Scarlett replied, 'When the Russian column were moving down on me, Sir, I began by sending first a squadron of the Greys at them, and'—— but at the word 'and' his lordship struck in, saying, 'And

they knocked them over like the devil.' He then turned his horse away, as if he did not need to hear any more. He seemed very much annoyed and bowed down over the loss of the Light Brigade, and was pointing out with his arm the ground over which he intended the advance should have been made. He and Scarlett were only ten yards in front of 'C' Troop at the time, no divisional staff being present.'

As to one point, much discussed at the time and since, the writer says :—

> "It is not so certain that Cardigan could, as some think, have safely pursued the Russian Cavalry after their retreat from the charge of the Heavies. They (the Russians) at first retreated fairly left about three-quarters, from the way they fronted at the attack, a few of our Dragoons, as easily seen by their red coats, being mixed with the rear-most. They then halted, tried to rally and re-form, at some short distance down the Balaclava side of the ridge, when 'C' Troop opened fire upon them. After this, instead of at once retiring over the ridge, they went rather parallel with it for a little way, still on the Balaclava side, and left the inner plain at a point fully three-quarters of a mile below where they entered it. Be it remembered that all this time the crest of the ridge in advance of No. 2 Redoubt was clear for the Russian artillery to have operated upon any pursuit by our Light Brigade."

A long and very close analysis of Kinglake's account of the battle, with very damaging results to the accuracy of the historian of Lord Raglan's command, fills a whole chapter, under the title of "Remarks on and Further Recollections of the Battle of Balaclava," and there is a very strong case made out in favour of Lord Cardigan, and serious accusations against the correctness of the statement made by Lord George Paget. The writer says (p. 159), in regard to the orders given by Lord Lucan to Lord Cardigan, and the circumstances under which they were given—most of the actors in the fight and the combatants in the battle of words which followed it are no more. Lord Lucan, indeed, remains alert, keen, and perceptive as ever, but Cardigan, Paget, Douglas, Shewell, Mayow, &c., are gone, and we do not intend to aid in reviving a controversy among the survivors as to the facts, of which we have a strong impression. Here is an account of Cardigan as he rode up to C Troop, which previously had seen a great many wounded and disabled pass them :—

> "Lord Cardigan was in the full-dress pelisse (buttoned) and uniform of the 11th, generally, and he rode a chestnut horse very distinctly marked, and of grand appearance: no officer in the Cavalry Division at all resembled him in face, figure, or seat on horseback. The horse seemed to have had enough of it, and his lordship appeared to have been knocked about, but was cool and collected. He returned his sword, undid a little of the front of his dress, and pulled down his under-clothing under his waist-belt (military men who have even had a simple set-to at single-stick, mounted, with a sword-belt on, will easily understand this). He then, in a quiet way, as if rather talking to himself, said, 'I tell you what it is—those instruments of theirs,' alluding to the Russian weapons, 'are deuced blunt; they tickle up one's ribs!' Having refastened his uniform, he pulled his revolver out of his saddle-holster as if the thought had only just struck him, and said, 'And here's this d——d thing I have never thought of till now.' He then replaced it, drew his sword, and said, 'Well, we've done our share of the work;' and pointing up towards the Chasseurs d'Afrique, in our left rear, added, 'It is time they gave those dappled gentry a chance'—this had reference to the colour of their horses. After this, he asked, 'Has any one seen my regiment?' and the men, thinking it was the regiment dressed, like himself, in the crimson overalls, answered, 'No, sir.' The men inferred from the question that he knew nothing as to the position of the 11th. The thing did not occupy a minute and a half or two minutes. He then turned his horse and went further back by the outer side of the ridge in the direction in which some of his men, wounded and others, had retired before he came to the gun at all."

A few minutes after he left, the 4th Light Dragoons came close to the Troop, with the 11th Hussars contiguous to them :—

> "While the latter regiment passed on, Lord George Paget, its colonel, rode over to No. 6 gun, and it so happened that he halted on the very spot of ground Cardigan had been on. Lord George looked like a man who had ridden hard for a mile or two, and was heated and excited. He said, in rather a loud tone, 'It is a d——d shame; there we had a lot of their guns and carriages taken and received no support, and yet there is all this infantry about—it is a shame.' It was quite true there was a very large sprinkling of English infantry at this time adjacent to that end of the ridge. Meantime, Cardigan had come back, and was close behind Lord George while he was speaking, without the latter knowing it. Lord Cardigan stopped Lord George talking further by calling out his name, and, on the latter turning round, said to him in an undertone, 'I am surprised,' and, tossing his head into the air, added some other remark which was not heard. Lord George lowered his sword to the salute, and, without saying *anything*, turned his horse and rode on after his men. Lord Cardigan then went forward along the ridge in the direction of the enemy, met the 8th Hussars, and returned with them. In passing the Heavies the latter cheered. Lord Cardigan acknowledged it with his sword, and so passed on to the rear by the left of the Troop. From the time that Lord Cardigan first came to No. 6 gun till he had finished speaking to Lord George Paget and passed on in the direction of the enemy to meet the 8th, not more than four or five minutes at the outside had elapsed. This is a faithful account of what was seen and heard by the detachment at No. 6 gun at this momentous period of the battle, about which so much has been said and written. The detachment never thought otherwise than that both these distinguished officers had bravely done their duty."

We must here close our extracts, referring the reader who wishes to form an independent opinion from a close and trustworthy witness, and from a careful analysis of the incidents of the charge, to a volume full of interest for soldiers, whether gunners or not, and replete with matter for the consideration of those who have accepted the "graphic and sensational" records of Mr. Kinglake as established history.

LORD NORTHBROOK'S statement in the House of Lords on Monday night, in answer to Lord Sidmouth, relative to the ironclad ship-building policy of the present Board of Admiralty, has at least the merit of clearness. Unfortunately, Lord Northbrook apparently forgot, and no one appears to have remembered, that, after the late Mr. Ward Hunt became First Lord of the Admiralty, he found bequeathed to him "Phantom ships and a paper Fleet;" nor his concluding statement on bringing forward the Naval Estimates in April, 1874, that "as long as he should remain at the Admiralty, it must be understood that he did not mean to have a Fleet on paper; that whatever ships appeared as forming part of the strength of the Navy must be real and effective ships, and not *dummies*." How came it that Mr. Ward Hunt was able to make such a statement to the House? The *Army and Navy Gazette* at that time wrote:—"We want to make no party question of the great interests of the Navy. Let each feature of the subject be taken on its merits, and let Mr. Ward Hunt show us in detail what the Navy has suffered from a false economy." This we now repeat, with this difference,—Let Lord Northbrook show clearly that the Navy was in a good state and condition when the Fleet was handed over to Mr. Ward Hunt in 1874. Let him prove that the motion of Sir John Hay for a Select Committee on the state of the Navy was unnecessary. Why was this notice of motion ever given? Because, as stated by the late Mr. Ward Hunt at the time, our armour-clad fleet had been allowed to deteriorate from want of proper repairs. We wrote when that assertion was made that "the public would scarcely be prepared for the statement that our ironclads are of such a nature that they may soon swallow up in repairs more than even their original cost, and still not be fit for more than coast duty." And they did swallow up the money. How, then, without launching out into a spasmodic fit of shipbuilding which might have frightened foreign Governments, could the late Administration have done more than it did to increase the strength of the Navy? Did not the present First Lord, on relieving him at the Admiralty in 1880, compliment his predecessor, Mr. W. H. Smith, on the marked improvement in the state and condition of our armour-clads during the five years of Conservative administration? And was not Lord Salisbury well within his rights when he took credit at Devonport for what he and his party had done for the Navy during the time he was in office? Lord Northbrook evades the question at issue, which is, shortly—"Is our Navy so strong as to give us an undoubted and unquestionable superiority over that of our neighbour?" We recently compared the English and French Naval Estimates, making allowances for the different systems of accounts, for the Naval Artillery Vote being included in the Army Estimates in England, for the greater non-effective Vote in our Navy, and other points of difference; and we found that though there was no great discrepancy between the cost of the personnel of the two navies, we were spending in the Dockyard Votes for material £850,000 more than was being spent in France. We ought, accordingly, to have a considerably larger fleet, and to have more ships building; and though we have more ships in commission, and more wear and tear, there should be a good margin available for repairs. Let us look, then, at our Naval material, and see if it is as it should be,—whether, as the first maritime Power in the world, our Naval superiority is unassailable, as represented by official Naval administrators, or if the allegation of Sir T. Symonds and other Naval officers is substantially true, that the French Navy is practically as strong as that of this country. Should the latter prove to be the case, civilian administration will be necessarily discredited; for, as we have shown, it costs between three and four times as much as the French military supervision, and it would stand convicted of "the fault of the Dutch," in being able to effect so little while asking so much. In order to ascertain exactly how the comparison stands, we rely almost entirely on the "Budget des Dépenses," which includes a useful nominal list of all ships in the French Navy, with their value, on our own Navy Estimates, and on an important return called "Navy (Fighting and Sea-going Ships)," presented to the House of Commons in March last by order of the Admiralty. Our object is to give a general view, which shall be as impartial as the official documents on which it is based. We shall not attempt to compare ship against ship; but, taking the respective navies in three classes,—ironclads; unarmoured ships; torpedo vessels,—we propose to survey our position :—

Table of Comparison.

	ENGLISH.			FRENCH.		
	Complete.	Building and Fitting.	Total.	Complete.	Building and Fitting.	Total.
IRONCLADS.	*50	†12	62	*46	†22	68
UNARMOURED SHIPS.	*196	†25	221	*176	†31	207
Total English ships all classes			283			
Total French ships all classes						275

English Ironclads:
* Including 4 waiting repair—Warrior, Black Prince, Resistance, and Waterwitch; also Scorpion, Wyvern, Vixen, Viper, and Hydra class.
† All new powerful ships, building or completing.
N.B.—All iron or steel except 2—Lord Warden and Repulse.

French Ironclads:
* Including 6 floating batteries of small tonnage.
† Including 8 canonnières cuirassés.
N.B.—Of the total number, no less than 28 are of wood.

English Unarmoured Ships:
* Of this number, 33 are cruisers and 14 sloops; only 12 are troop or store ships. 21 are waiting repair.
† Including 11 completing, 5 of which are fine cruisers of the Phaeton class.

French Unarmoured Ships:
* Including 26 croiseurs à barbette and 21 éclaireurs d'escadre, 44 transports and store-ships.
† Including 4 torpilleurs éclaireurs, 8 torpilleurs avisos, and 7 transports.

We find, then, that we possess just 8 ships of all classes more than our neighbours; but it is fair to remark, that being less able than ourselves to depend upon their mercantile marine, they have 44 transports to our 12. In torpedo-boats we have 19 first-class boats and 4 building, 48 second-class boats, and 7 wooden boats. The French have 18 first-class boats, 40 second-class boats, and 9 torpilleurs vedettes. Of ships in commission we have 150 to the French 122,—necessarily entailing greater expense for repairs, but also representing the incalculable advantage of more sea-going experience to our officers and men. If we turn to our unarmoured fleet, there is little to reassure us. We have 14 ships more than the French, while we have an exactly similar number of cruisers, excepting troop-ships and gunboats, in both Navies. In special torpedo-ships we have 4, including the *Scout*, against 12 similar vessels in the French Navy; while, as we have seen, we have no advantage in number of torpedo-boats, which are now built as well at Havre as on the Thames or Yarrow. A careful analysis of the above facts is far from reassuring. Speaking generally, we have no superiority at all in ironclads,—except in one respect, which has become a cuckoo-cry among those who will not awake to the true state of affairs. We allude to the 28 French ironclads which have wooden hulls; but, though it is true that many of the French ironclads, such as the *Alma*, *Provence*, and *Reine Blanche*, are in bad condition, yet they are scarcely more obsolete than the *Warrior* and other of our older ships which it is not thought necessary to provide with new boilers. All the largest and most modern French ironclads are built of iron and steel. This is, however, our sole advantage; and we must make the most of it. We cannot certainly affirm that our new constructions are larger and more powerful than those of the French. Our largest building are the *Benbow*, *Anson*, and *Camperdown*, of 10,000 tons; while the French have on the stocks the *Amiral Baudin* and *Formidable*, of 11,400 tons each, and the *Hoche* and *Neptune*, of 10,600 tons. In first-class ironclads now afloat and completed we are rather superior to the French; but this will not be the case in two or three years' time. We need not, then, adopt the pessimist views of Sir T. Symonds on our new constructions to acquiesce in his assertion that when the ships now on the stocks in both countries are launched, we shall have an ironclad navy decidedly second to that of our neighbours. We cannot enter into the question of whether we have been wise or the reverse in the adoption of barbettes from the French; but there is little doubt that had our constructors been allowed the displacement of the French ships, the armour-plating would have been carried right forward, as in the *Conqueror*, *Hero*, and in the French larger ironclads. But was it impossible to give our ships strong bows under this restriction? We think not. The fact is, our constructors had nothing but broadside fighting in view. We have quoted stubborn facts, and endeavoured to make our position clear. If these facts cannot be refuted—and they are founded on official documents—on what do we rely? We shall be answered, perhaps,—on the providence of God and the valour of our officers and men; and we believe heartily that in all times and in all places the Navy of England will do its duty as of old. But we have no right to neglect the means necessary to attain the end which we have in view.

The Duke of Edinburgh, in the *Minotaur*, with the remaining ships of the Channel Squadron in company, arrived at Castletown Berehaven on June 11.

As the *Valiant* and *Defence* are vessels of an antiquated type, with worn-out boilers, and only patched-up hulls, we fail to see either the utility or economy of, at this advanced stage of their decay, fitting them with machine-guns and outrigger torpedoes. It is a physical impossibility, even were it otherwise desirable, for these two vessels to last for more than another couple of years without having new boilers and undergoing repairs of an extensive and costly nature. The considerable sums expended in their new fittings might, therefore, have been spent in some more judicious manner,—a not very difficult feat, considering how "tight" money at present is at the Admiralty. The object of fitting the *Valiant* with machine-guns will be all the less apparent when we state that that vessel has no Gunnery Lieutenant, or other officer competent to instruct either her crew or the Coastguardsmen who come up for drill with these new weapons.

The *Morning Post* has reason to believe that the projected relief expedition to Khartoum by the aid of small Nile vessels has been abandoned by her Majesty's Government, and that the tenders for marine engines have been withdrawn. We should like to have some more positive assurances ere we recommend the statement to our readers as what Indians call "pukka."

The French Minister of Marine has just written a letter to the Prefect of Police, asking him, by means of his agents, to try and uproot the idea that the Naval schools at Brest and Toulon are houses of correction. The Admiral says that he receives frequent demands for admission on the part of parents who do not know what to do with their boys, and who think that a life on the ocean wave and a home on the rolling deep would be of benefit to them. The Admiral adds that nearly all the lads in the Naval schools are the children of men who have served the State, and that a certificate of good conduct is necessary for admission. A Paris contemporary mentioning this letter launches out into wonderful eulogies of the French *mousses;* but they can boast of no such line of descent as that noticed by Macaulay in speaking of our Navy—how a cabin-boy became Sir Christopher Mings, his cabin-boy Sir John Narborough, and Sir John's cabin-boy Sir Cloudesly Shovel.

We hear that the Royal Marines who have been left to garrison Suakim do not quite find that port a Garden of Eden. They are certainly quartered afloat, but then they have to spend half their time on shore; and the officers have to rough it, two in a cabin when afloat. As the thermometer is considerably over a hundred in the shade (save the mark!), and is daily rising, the prospect is not invigorating. Why the Marines should always be selected to perform the roughest and most disagreeable work, no man knoweth.

Admiral Sir Alfred Ryder read a most valuable and interesting paper on "Collisions of Ships in Fogs" yesterday afternoon at the Royal United Service Institution, which we shall notice at greater length next week. The discussion that followed the reading of the paper was—well, mediocre. Captain Bryne made some useful suggestions; but Captain Colomb was, or appeared to be, very much mixed, what with lights and fogs, speeds and lengths. The gentleman with the model of an apparatus to be worked by the helm made a fiasco. The apparatus would not work. White lights burnt instead of green ones, and red ones instead of both; and at last a white light lit a red one by accident. An officer present had also to ask the nature of the colour of the light at one time burning, so indistinct or negative, not to say neutral, was its hue.

The French Minister of Marine has just received a box containing ten flags captured at Bacninh. One of these is the standard of the Chinese Generalissimo; it is of yellow silk, with a violet border; the staff is of bamboo, and is more than five mètres in length. Another flag is black, with white letters. All these trophies are going to be sent to the Invalides.

We hear that one of the Admiralty Surgeons and Agents in Ireland has had occasion to represent the great hardships to which the men of the Coastguard, their wives, and families, are exposed through being removed in sailing cruisers during the winter months. serious illness frequently, fatal consequences sometimes, being the direct results of this. There is positively no accommodation whatever for either the women or children on board these sailing cutters; they are obliged to huddle together on the upper deck, are often detained on board for days owing to light or contrary winds, when they are landed more dead than alive. All this is positive cruelty, and it might easily be obviated by abolishing sailing cruisers *in toto,* and having gunboats to perform their duties. Even when the Coastguardmen come up for annual drill or to embark for the cruise, they are frequently huddled together on board the cutters for a week or ten days, exposed to all the inclemency of the weather, and with no means of "slinging their hammock."

It is a subject for sincere congratulation that Sir W. Hewett has arrived in safety from his mission to Abyssinia, and it is gratifying to learn that he has concluded a treaty with Johannes which is satisfactory in relation to the objects in view. Naval officers are excellent diplomatists, especially when landed under their guns; but Admiral Hewett obtained his terms far away from salt water.

It is reported from Berlin that the ironclad corvettes *Ting Yuen* and *Ehen Yuen,* built at Stettin for the Chinese Government, will soon leave to fit out at Kiel, where they will sail under the German flag for China, to be added to the Chinese navy. The French Admiral Lespès appears to have arranged matters satisfactorily with the Chinese Foreign Office during his recent visit to Pekin, aad left for Chefoo last Wednesday, after an exchange of banquets with the Ministers at the capital.

The question, "What steps can be taken to convince the country of its present dangerously unprepared state?" was set down on Wednesday last in a paper containing questions "not intended to restrict the discussion of the essay, either as to subjects or persons, but the various points are grouped under different headings for the convenience of those gentlemen who wish to confine their remarks to special matters." The Committee, however, vetoed the discussion, whereby officers who "wished to confine their remarks to special matters" included in the tabooed questions were unable to do so. One officer, however, tendered the following advice:—"Let Naval men take the matter in hand themselves, and if afraid to let their voices be heard, let them write, write, write, and never cease writing to the Press of the country." Facts which would otherwise remain unknown can be stated under a *nom de plume.* Therefore, gentlemen, take up your pens and enlighten the public, as the only means of "convincing the country of its present dangerously unprepared state."

We referred last week to the losses sustained by the French Marine Infantry, which does all the ordinary and some of the extraordinary colonial work. We now see by the *Progrès Militaire* that the Minister of Marine has demanded from his colleague, the Minister of War, 10 captains, 20 lieutenants, and 70 sub-lieutenants, to fill up the vacancies and furnish officers for the native regiments.

At one time it was the fashion in all smart ships to have coloured men as bowmen in the ship's boats, but times are changed, and the Admiralty have issued instructions directing that in future no black or coloured men or boys are to be entered for service in the Navy without special sanction.

Viscount Lewisham will, on the Army Estimates coming on in the House of Commons (Fortification Vote), call attention to the advantages of employing Marine Forces as garrisons for sea forts and coaling stations, both as regards economy and efficiency. We imagine one objection to this otherwise very practicable idea is that the sea defences of all our arsenals and sea ports are in the hands of the War Office, unlike the organisation of France, where these defences are placed under the Ministry of Marine.

It is well known that the European language in vogue in Egypt is French. Sir Evelyn Wood dates his orders from the *Ministère de la Guerre,* and official correspondence must be conducted in French. A worthy officer, addressing an artillery corps after a day's practice, said:—

> "C'est assez pour aujourd'hui,
> Demain nous aimerons plus loin."

General Count von Blumenthal, Chief of the Staff to the Crown Prince of Germany in the wars of 1866 and 1870, and now commanding the Magdeburg district, is on a visit to London, and is the object of much attention from his old friends.

The correspondence which has been recently carried on about "tartans" and "Highland regiments" shows that what are called the "old" kilted regiments look with jealous disfavour upon the addition to their numbers. It is not very easy to understand, except for the sake of uniformity in the Territorial Scheme, why any "new" kilted regiments should have been made; for there was always a difficulty in filling the ranks of the old ones, and that can only be done now by poaching upon the Lowlands. This gives such regiments as the Royal Scots, the King's Own Borderers, and the Cameronians the doublet and trews, which is looked upon, in the Army at least, as the distinctive dress of the Lowlands, and it was reasonable enough, for the connection of these regiments with Scotland is as old and as close as that of the Highland regiments themselves; but should it be found necessary to denationalise any of the so-called Scotch regiments, those which have been recently made should be taken, and not those which are thoroughly Scotch by creation and tradition, and whose connection with the country has lasted for nearly two centuries. The Lowland regiments have apparently no difficulty in getting men. In proof of what we say, turn to the Report of the Inspector-General of Recruiting. Here we find that the 1st Regimental District supplied last year 599 men, yet of these only 176 were posted to the Royal Scots. This District, if used for its legitimate purpose, namely, furnishing recruits for the Lowland regiments—could easily support two territorial regiments. The Recruiting Report also shows that the 72nd and 79th Districts combined only produced 162 men to meet the requirements of their battalions. Where did the balance come from? The Territorial Scheme is a sham, and men are shifted from one district to another as occasion demands; but it is quite as absurd to enlist Seaforth Highlanders in Dunbar or Kelso, as it is to enlist Royal Scots in Manchester or Birmingham.

It is said that the Hampshire, Wiltshire, and York and Lancaster Regiments of Militia are overflowing with recruits. Why, then, are the second battalions of these regiments not raised at once? Without them, the Territorial scheme is incomplete in the districts from which these regiments are recruited.

A French company called the "Forges et Chantiers" has just cast a monster gun, which our Parisian contemporaries say "exceeds all known types by the considerable results which it realises, and also by the superior manner in which it utilises the force placed at its disposal. This gun measures 5·80 mètres in length (the mètre being 3 ft. 3 in.), it weighs 6,000 kilogrammes (2 lb. 3 oz. each), the projectile which it fires weighs 60 kilos, and the charge used is 32. The initial velocity is 632 mètres. This powerful engine pierces at a short distance an iron plate of 35 centimètres (2⅓ to the inch). It is mounted on an improved carriage, which limits the duration of the recoil to 24 centimètres per second, and the entire recoil to 70 centimètres; this is done by means of an hydraulic break very ingeniously arranged; thanks to this break the piece regains its primitive position. This is the first time, says General Faire, that French industry has produced such a weapon for the foreigner."

What will be the immediate effect of the new regulations as to voluntary retirement, just promulgated, is not altogether apparent at first glance. Those first to take fright will be the regimental Majors and Captains, who had been contemplating voluntary retirement on retired pay or gratuity. Those who have most to fear are, it seems to us, regimental senior Captains with less than eighteen years' service, and senior Lieutenants with less than nine years' service. There are plenty of Captains in the Army at present with over eighteen years' service, and when these fail there will generally be found a supply of half-pay Majors anxious for full pay. There will also for a time be found a good supply of Lieutenants of over nine years' service, though there are seldom many Captains on the Half-pay List. Thus it will be seen that so long as there are any officers throughout the Army fulfilling the above conditions, voluntary retirement can take place in any regiments, whether the seniors in the regiments in the rank below that of the retiring officer are eligible for promotion or not. By this means one more blow will be struck at regimental *esprit de corps.* The suppression of regimental officers caused by the introduction of the linking system, and the final amalgamation in 1881, has been indeed hard to bear; but just as the officers concerned were becoming to a certain extent resigned to their fate, the ever restless "authorities" have, by the exercise of one of the subtlest forms of their ingenuity, promulgated this new circular, which is evidently a first step towards the abolition of regimental promotion altogether.

The French Chamber is very busy with Army reform, and among other matters has been discussing the state of Algeria in a military point of view. It is now proposed that the colonists shall be required to serve one year in the Army, and to remain at the disposal of the War Minister as long as they remain fit for service. In the event of the Continental troops being withdrawn, the Colonial Army will be called on to defend Algeria. The Algerian Deputies have urged the necessity of this measure. At present, Algeria is protected by the 19th Army Corps. The representatives of the colony say that the Algerians have no wish to shirk their military obligations, but that if they were obliged to serve three years, colonisation by the French would be impossible. There are 180,000 foreigners and 3,000,000 Mussulmans in Algeria, and while the colonists were soldiering they would take their places. It is proposed to mobilise the colonists only in the event of a general war.

It appears that Gibraltar is not the only place where big guns come to grief. On the 4th of the month, an accident, which might have had very serious results, happened at Havre during some artillery trials conducted in the presence of General Lavocat, Director of Artillery. A gun of 24 centimètres, from which four rounds had just been fired satisfactorily, burst at the fifth round. The charge was 55 kilos., and the range of the gun is set down at 11 kilomètres. "Fortunately," says the *Progrès Militaire,* "by an excess of caution the gunners, instead of remaining at their posts round the gun, retired to some distance to the rear, and the man who fired the gun used a cord three mètres long. The gun had just been pointed for the fifth time, and the officers were chatting together, when a formidable explosion took place; the breech of the gun was blown backward, and buried itself in the earthwork, while another portion of the gun, weighing 4,000 kilogrammes, was projected 50 mètres forward. As for the gunner, Graillot, who fired the piece, he was suddenly surrounded with flames, and owed his safety to the immediate intervention and presence of mind of Captain Orcel; the burns he received will have no serious consequence. An inquiry showed that the tube had been broken low down, and that the hoops at that place had become loose, and had fallen off." The accident is explained by the fact that the gun was cast in 1874, when steel was first employed, and was not as good as it is now. This mishap seems to have created the greatest excitement and alarm at Havre. A 24-centimètre gun would be called by us a 9⅜-in. or 15½-ton gun.

A circular-letter has recently been sent to commanding officers, inviting Paymaster-Serjeants to become candidates for Military Staff Clerkships in the Army Pay Department, and many of these have been transferred on probation to district pay offices; the Regimental Paymaster being left to get through the work, as best he may, with the aid of an acting substitute having no previous acquaintance with pay-office duties. In some instances, too, an infinite jest has been had at Peter's expense after he has been robbed to pay Paul. For, the transfer being ordered immediately after Peter has proceeded on leave of absence, he is forthwith wired back to his station to take in hand the training of the Acting Paymaster-Serjeant, with the prospect of seeing this latter hereafter in his turn, on becoming efficient, translated to an extra-regimental sphere. Whether this latest happy thought of the Pall Mall scribe will tend to popularise the Department remains to be seen.

L'Avenir Militaire of this week contains an article on the Railway Military Corps, which, it says, is to have some practical training. This being the case, it recommends that the corps in question should construct the projected line between Rheims and Châlons, a single line already exists between the two military points, but this would not be sufficient in time of war. In a second article, the *Avenir* calls attention to the coast defences, which, it insists, should be placed in the hands of the Naval authorities, and asks what has become of the 85,000,000 fr. lately voted for these defences. The writer, who supposes that the employment of this money can hardly be kept a State secret, strongly advocates the substitution of torpedoes and torpedo-boats for land works, which are not nearly as efficient and very costly. The *Avenir* gives a small bit of its mind to the Government, which it says wants to economise on the Military and Navy Estimates, but it owns that it is obliged to argue in the dark, as the Ministers of War and of the Marine kept their intentions secret. The same paper mentions that the torpedo officers on leaving the school of submarine defences will henceforward be sent on board the *Japon* to improve their instruction by the study of Whitehead torpedoes.

THE BISMARCK CUIRASSIERS.

The band of one of the most celebrated Prussian Cuirassier regiments is at present delighting thousands of the inhabitants of London every evening at the Health Exhibition. The 7th Magdeburg, or, as it is more often called, the Bismarck Cuirassiers, played an important part in the celebrated battle of Mars-la-Tour on August 14, 1870, when Prince Frederick Charles sacrificed his cavalry to save his infantry. On that memorable day, the Brandenberg division formed the left of the German Army, and was thrown forward to overlap the advance guard of Marshal Bazaine's army on the Verdun road. For a long while, it was as much as this division could do to hold its own. Suddenly, on its right flank, a French battery galloped into position, and opened fire on its already decimated ranks. Then, from under the cover of a small hamlet called La Ferme, wheeled the 7th Bismarck Cuirassiers, in column of squadrons, and headed by Count von Schmetto charged up the incline at the battery half a mile away. Beside the Count rode a young Scotch lieutenant, who had entered the German Army, and won his commission on the field of Sadowa, named Campbell. The squadrons reached the guns and captured them, cutting down the gunners and striking the horses as the guns were being limbered up. But at that moment the Cuirassiers received a most galling fire from two regiments of French infantry, until then invisible, who had formed square in the fields beyond the Verdun road. Without a moment's hesitation, Count von Schmetto led his squadrons at these squares. The Frenchmen threw down their arms, and cried "Pardon!" throwing themselves prone on the ground as the cavalry rode over them. Then on either flank of the Bismarck Cuirassiers appeared a regiment of French cavalry. Wheeling to the right and left in splendid style, the German regiment charged at both their opponents, to the right the 7th French Cuirassiers, to the left the 4th Chasseurs d'Afrique, and drove both helter-skelter back into the woods beyond, on the edge of which were stationed the French Montigny mitrailleurs, whose gunners, fortunately for the Germans, did not know how to use their new arms. The Bismarck Cuirassiers then reformed, and were trotting back, when they observed that the two French infantry regiments had reformed, and were pouring volley after volley into their squadrons. At the infantry went Count von Schmetto again, this time punishing both battalions fearfully. Lieut. Campbell was carrying at this time the colours of the French Cuirassiers, which he had captured. In the melée that ensued a French infantry officer seized the staff of these colours, and placing a revolver to Lieutenant Campbell's hand, sent a bullet clean through it, thus forcing him to drop his prize. The Frenchman did not live long to tell the tale. The Bismarck Cuirassiers went into this charge nearly 800 strong, and came out of it numbering but some 250 officers and men. Lieutenant Campbell received the Iron Cross from the hands of the Crown Prince of Germany, the Order of Saxe-Coburg and Gotha, and was further made Baron Craignish, in recognition of his gallant conduct throughout the war, and was subsequently promoted. Captain Campbell, Baron von Craignish, Equerry to H.R.H. the Duke of Saxe-Coburg and Gotha, Honorary Colonel of the 7th Magdeburg Cuirassiers, is now in London, having been sent to this country by permission of the Emperor of Germany, in charge of the band of his famous old regiment, and although serving in a foreign army, we feel convinced that his own countrymen will feel no less proud of him than they would were he serving his own Queen and country.

Reviews.

"John Bigelow, Jr., First Lieutenant, Tenth Cavalry U.S.A.," has contributed a trenchant chapter on the "Egyptian Question" to the very well conducted and interesting American magazine, *The United Service*, published by Hamersly and Co., Philadelphia, in which our terrible subaltern of horse shows, he thinks, that Great Britain's guiding principle is Egypt for the British, that the end of her policy is the security of India; and that in the carrying-out of these ends "she will not scruple to damage the interests of any and of every other nation." We dare say this John Bigelow "is a very thoughtful young man," and that he has resolved in his own mind that any other rightly-minded country—say, the United States—would act in quite a different way. It may be admitted with sorrow that so far as there is a policy patent in Egypt, it seems to be based on selfishness and timidity. There is in the same number a very pleasant, graphic, and truthful sketch of Sir Gerald Graham's career, by an old comrade, who writes very sympathetically, and who was with Graham when the Summer Palace was burnt (poor Bowlby is christened "De Bulby"). We must quote one passage, as it relates to a remarkable episode and a hair's-breadth escape. Having told how the small party started from our lines for the Chinese army, and how our people waited, he says :—

> "It soon burst forth in the shape of a single horseman coming into the gap, surrounded by men on horse and foot, who appeared to us to be trying to impede his progress by thrusting at him with spear and sword while he himself was laying about him right lustily. It was a treat to see how he cut them down on all sides; it was first cut one at cavalry, and then cut one at infantry, until he got clear, and then he came away at a hand-gallop amidst the most infernal din of all arms, from an iron 70-pounder down to a 4-ounce matchlock. The balls tore up the ground in front and rear and on every side of him, but he seemed to bear a charmed life, for he still kept on and on, making straight for the head-quarters' party, where he arrived at last; but such a sight! He was covered with blood and dust, as was his horse,—it was Colonel Walker. He said he owed his life to his powerful horse; but had he not been a splendid swordsman, and mighty besides, he could never have cut his way through that horde of devils. He was and is the beau-ideal of a heavy cavalryman, over six feet in height, and made in proportion, and acknowledged to be one of the finest cavalry officers in the service (now Sir B. P. Walker, lieutenant-general). He went on to say that while Mr. Parkes was haranguing the mandarin in command, he (Walker) noticed that by degrees his party were being surrounded by small and afterwards by larger bodies of the enemy; then a gun was fired, which appeared to be a signal to close, some getting so close as to endeavour to seize the bridle of Walker's charger. He took in the situation at a glance; he drew his sword, and calling on his men to follow, he drove his horse into the mass to his right front, at the same time again shouting, 'Cut your way through, men!'"

Of Graham, the writer, who gives no name, but dates his article "Willet's Point, April, 1884," says :—

> "He is very tall,—something like six feet three inches in his stockings, with a slight stoop, and lisps when speaking. If he has not what is called strictly a handsome face, it is one that will always attract your attention, so open and candid is the expression, with light-brown hair and moustache (for he wears neither beard nor whiskers), and he is, I suppose, about the most quiet, modest, unassuming man you ever met with, so gentle, and yet withal so brave,—that cool sort of bravery that will carry a fellow at a walk across a hot spot where others run across. . . . . We were in the same company of Royal Engineers (23rd, which he commanded), and stationed at Shorncliffe Camp when the 'Trent affair' took place, in December, 1861. We both volunteered for the expeditionary force which was then ordered to reinforce the Canadian command. I obtained an exchange with a married man, but Graham failed; and well I remember the morning the transfer arrived from the Horse Guards, and the look of touching disappointment on his fine face as he shook me by the hand, wishing me joy on my luck, while he, poor fellow! was doomed to stay behind and ding-dong the old thing over again at Shorncliffe. That was the last time I saw Graham, so you may imagine with what glee I read the telegrams with the name of my old friend and comrade chosen for a command in the army of Egypt under Lord Wolseley."

Foreign Military Literature.

Militärische Briefe.—I. Ueber Kavallerie. Von Kraft Prinz zu Hohenlohe-Ingelfingen, General der Infanterie à la suite der Armée, General-Adjutant Seiner Majestät des Kaisers und Königs. Berlin: E. S. Mittler and Sohn. 1884.

The author of these "Military Letters" is not unknown as a writer, and his views derive authority from the important positions which he has filled both in peace and war during a service in the Army extending over 35 years. He has had a large share in the development of the artillery tactics of the German Army, in fitting it for the requirements of modern times and improved arms; for, if we are not mistaken, it was principally owing to Prince Hohenlohe, after the war of 1866, that a more energetic and daring employment of field artillery was decided upon. The results obtained in 1870-71 prove that the changes introduced were correct. In giving to the public his experience, the author has chosen to do so in the form of letters, a proceeding which imparts freshness, and permits of a freer expression of opinion. In the part of his work under consideration he deals with the cavalry, and the views he holds are open to criticism. But even assuming that he is wrong in his views of the functions of cavalry—which we by no means desire to intimate—his work will give rise to a discussion which will ultimately have but one result,—that of benefiting that branch of the service. We commend Prince Hohenlohe's "Letters," which almost approach the nature of memoirs in their chatty, unrestrained style, to the military reader. Whilst gathering information on a most important branch of modern warfare, he will at the same time be entertained by the perusal of a volume containing many passages of personal experiences, expressed in language as refreshing as it is candid.

Jahresberichte über die Veränderungen und Fortschritte im Militärwesen. Tenth year, 1883. By H. von Löbell, Oberst Z.D. Berlin: E. S. Mittler and Sohn. 1884.

At the beginning of the second half of the nineteenth century a comfortable quietude reigned in the military affairs of almost every European country; how different it is to-day. The successive editions of the *Jahresberichte* bear eloquent witness to the almost feverish activity by which that sluggishness has been replaced. When, in 1851, the author of these "Annual Reports" invited co-operation in their publication, his appeal fell flat, and it was with some misgivings that he ventured upon their issue for the first time, on his own account, in 1875. The result has shown that, after all, the reports were wanted, and the judicious additions which have been made from time to time have made their issue almost a necessity to the military student and critic. From year to year their publication is awaited with ever-growing interest, especially as their scope has been gradually extended until the volume has attained a size far beyond the original intention of the author. The *Berichte* for the year 1883 (a volume of nearly 550 pages) contain the usual accounts of the progress made by the armies of nearly every State—European and extra-European—claiming to be a factor in matters military They form the first part of the work. The second section comprises reports on the progress and changes made in the tactics of the infantry, cavalry, and artillery, as well as accounts on improvements in small-arms, and ordnance, and military telegraphy. It is beyond the scope of a brief notice like this to do more than draw attention to the salient feature of a work of this nature. But the third part of the volume, giving an account of military operations in 1883, contains matter of such close interest to us, that we may be permitted to make a few remarks upon it. The activity of the French in Madagascar, Senegambia, and Tonquin, whatever a certain section in this country may say to the contrary, concerns us more nearly than they are willing to admit. Notwithstanding the treaty of 1868, by which France renounced all claims to the protectorate over the coast districts of Madjunga, Murunsang, and Passandava, and recognised the kingdom of Madagascar, the French Republic commenced hostilities against the Hovas, without declaration of war. The French expeditions to the Senegal in 1883 need only be referred to here in order to point out that, after spending millions of money and a heavy loss of life in the contest with the natives and a murderous climate, not a step forward has been gained in bringing the territories aimed at under French influence. The complete victory obtained by France in Tonquin and the subsequent defeat of Chinese diplomacy are matters of history, but their consequences will be widely felt. The description of the operations in the Soudan from 1881 to 1883, operations which we shall have to continue in 1884 ourselves, is well written. That account concludes by stating that, with the armed intervention of England against the movement originating with the Mahdi, the conflict has entered a new stage. "It seems as if the movement had found an opponent who will confine it within prescribed limits, although he will not entirely suppress it." That opinion very accurately describes our action in the Soudan. In taking leave of Colonel von Löbell's *Jahresberichte*, which has fully earned for itself the title of a standard work of reference, we may be permitted to express a wish that it will receive the full attention of military men also in this country, which it so well deserves.

"THE LIEUTENANT OF THE TOWER."

Lieut.-Col. Durnford begs us to perform an act of justice by the insertion of a letter, in which he desires "to record a protest against an action which, in its approval of Lord Chelmsford, amounts to a positive injustice to the memory of a good soldier who willingly gave up his life in his country's service. It will be remembered by many," he says, "that Lord Chelmsford made a deliberate and uncalled-for attack on the late Col. Durnford, R.E., with a view to place upon him the responsibility for the disaster at Isandhlwana, Jan. 22, 1879. Lord Chelmsford stated:—1. 'At the same time a letter was written to Col. Durnford to move up to Isandhlwana Camp, and take command of it.' 2. That the following statement 'expressed plainly what his views were,' viz., 'that he (Lord Chelmsford) had an interview with Col. Pulleine, and in reply to his question as to any orders he might have to give to him, that he had said, "defend the camp, and do not leave it."' 3. That Col. Durnford took over this order to 'defend the camp,' and, Lord Chelmsford says, 'that order was, I maintain, as binding upon Col. Durnford as those which a soldier takes over from the sentry he relieves on a post.' 4. That Col. Durnford, therefore, in quitting the camp to reconnoitre, 'had departed from the orders which he had received.' Now it is quite unnecessary for me to enter upon Lord Chelmsford's further misstatements, or upon the actual facts which directly led to the disaster, for Lord Chelmsford himself limits the position, as between him and the late Col. Durnford, to 'neglect of orders.' He writes on Dec. 12, 1879,—'The question . . . . . . whether there could have been any neglect of orders at Isandhlwana, covers the whole ground of controversy. . . . . . The order given was to "defend the camp."' Controversy there can be none, from the simple facts:—1. That Col. Durnford was not ordered to take command of the camp. 2. That Lord Chelmsford gave no orders whatever respecting the camp or its defence. 3. That, therefore, there were no such orders which were or could have been departed from.' The proofs of what I say are beyond question. 1. On May 18, 1882, I received from Col. Crealock (Lord Chelmsford's Military Secretary in 1879) what he states to be a 'true copy of the last entry in Lieut.-Col. Crealock's note-book, left in his tent on Jan. 22, 1879. This was a copy of the order sent to Col. Durnford at daybreak by the hand of Lieut. Smith-Dorrien.' (Col. Crealock says, 'The note-book was recovered from the field of Sandlwana, and sent me in England, in 1879.') The entry in the note-book is:—'22. Wednesday. 2 a.m. The following order sent to Col. Durnford:—"You are to march to this camp *at once* with all the force you have with you of No. 2 Column. Major Bengough's battalion is to move to Rorke's Drift, as ordered yesterday. 2/24. Artillery and mounted men, with the General and Col. Glyn, move off at once to attack a Zulu force about 10 miles distant.—(Sd.) J. N. C. If Bengough's battalion has crossed the river at Eland's Kraal it is to move up here. (Nangwana Valley.)"' And here it will be convenient to note what instructions Col. Durnford had previously received. Lord Chelmsford writes on Jan. 16:—'No. 3 Column will first advance to a position near the Isandhlwana Hill, and from there, assisted by a portion of No. 2 Column, will clear the Equideni Forest, or induce the chiefs, &c., to submit. This work completed, the portion of No. 2 Column, under Lieut.-Col. Durnford, will move towards the Mission Station, near the Empand-leni Hill, whilst No. 3 Column advances to a fresh position near the Isipezi Hill, detaching, if necessary, part of its force to support No. 2 Column.' (C. 2,252, p. 63.) And again he writes, Jan. 19:—'One of Col. Durnford's regiments will cross the river from the Sandsprint Valley, whilst his mounted natives will co-operate with us from Rorke's Drift, where they will be to-morrow (20th).' (C. 2,260, p. 16.) Col. Durnford, writing on Jan. 21, thus epitomises his instructions,—'My movements are to operate against the two Matyanas.' And, on receiving the order of the 22nd, Col. Durnford's remark was, 'Ah! just what I expected; we are to go on at once. The General has gone out to attack an impi.' It was into Matyana's country, close to the Equideni Forest, that Lord Chelmsford advanced on Jan. 22. 2. In a memoir of my brother which I have published, I state (p. 224):—'A captain of the 24th Regt., who marched out with the General's force, distinctly says that neither Lord Chelmsford nor his Staff left any orders, but that, when miles away from the camp, Lord Chelmsford asked what orders had been left for Col. Pulleine.' In May, 1883, I received a remarkable confirmation of this statement from the editor of the *Natal Witness*, who, on Jan. 27, 1879, wrote to Col. Crealock for information on various points, and, amongst others, as to orders given by the General at Isandhlwana on Jan. 22. Col. Crealock's written reply was:—'No written or spoken orders by General were issued. Col. Glyn gave his own orders.' What these orders were, appears in C. 2,260, p. 81, and they contain no special instructions 'to defend the camp.' It would be rather strange if they did, as Lord Chemsford had just pooh-poohed Col. Glyn's suggestion to form a laager. And, further, these orders define the period of Col. Pulleine's command—'you will be in command of the camp during the absence of Col. Glyn.' The situation at the camp is made perfectly clear by the statement from Major Cochrane, the survivor of the interview between Cols. Durnford and Pulleine, that, when Col. Pulleine said, 'I'm sorry you have come, as you are senior to me, and will of course take command,' Col. Durnford replied, 'I'm not going to interfere with you, I'm not going to remain in camp.' Esteeming it to be my duty to clear my brother's memory from unjust reproach, I have from time to time urged the case upon the notice of the authorities—H.R.H. the Field-Marshal Commanding-in-Chief and the Secretary of State for War—with the only result that I have been informed that it is not considered 'desirable to reopen the question of the responsibility of the late Col. Durnford, Royal Engineers, in connection with the disaster at Isandhlwana.' The situation then is this:—An officer living brings a charge against another officer, who is dead, which charge is proved to be entirely without foundation. The authorities decline to consider the matter, and therefore deny to the dead officer that justice which he, if alive, could and would have demanded. As long as the living officer was permitted to remain unemployed, one could in some manner comprehend the line the authorities have taken; but now that a valuable appointment is conferred upon the living officer, what can the inference be but that his conduct is approved, and thus the injustice to the memory of the dead is bitterly emphasised."

SHIPS' STEWARDS, R.N.

A correspondent writes that, in his opinion—"It is certainly time something was done for the ships' stewards, R.N. Suppose we take the case of a third-class ship's steward just promoted from ship's steward's assistant; he will most likely be a couple of years in the guard-ship as supernumerary before his name comes round on the roster to commission a ship, and all that time he is getting the sum of 2s. per day. A ship's steward, third class, when in receipt of store allowance, gets 3s. 6d. per day; but from the time he pays a ship off till the time he gets another (and it is about the time I have mentioned above), he loses the store allowance,—1s. 6d. a day. Now, Sir, that is a serious item for a poor man to lose, especially if he is a married man and has a family. I think no chief petty officer should have less than 3s. per diem at any time, and I don't think any other C.P.O. has less than that sum."

ARTILLERY PROMOTION.

"A Major of the Old List" says:—"You would greatly oblige many majors, R.A., and with them captains and subalterns, if you would throw some light on artillery promotion as at present existing. It was understood that the new schemes would not seriously injure our promotion, and that although the (full) colonels' list was to be abolished, yet the total number of colonels and lieutenant-colonels would remain the same,—that is, that instead of lieutenant-colonels being promoted regimental colonels after a certain date, and a major in each place promoted lieutenant-colonel as heretofore, that the lieutenant-colonels would not be promoted but the major would be, thus keeping up the total of colonels and lieutenant-colonels to the same strength, or, in other words, increasing the lieutenant-colonels in proportion as the colonels were diminished; but taking the regimental lists of Dec., 1882, and 1883, it appears that in Dec., 1882, the number of colonels was 38; lieutenant-colonels, 77—total, 105; Dec. 1883, colonels, 34; lieutenant-colonels, 76—total, 100,—showing a loss of five steps to the majors, captains, and subalterns in one year. If the promotion of majors is to be entirely dependent on the shunting of lieutenant-colonels after five years in that rank, only 75 or 76 majors will be promoted in five years; and every major after that, as well as some before, must be, sooner or later, placed on half-pay,—a nice look-out for us all! Perhaps some of your correspondents will kindly state exactly how the matter of promotion now stands, and so enlighten a puzzled gunner about 10,000 miles from headquarters."

INTERNATIONAL COURTESIES.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Again this year two foreign military bands have been performing at the Health Exhibition,—viz., the Belgian Guides and the 7th German Cuirassiers, and other bands are promised later on in the season. The War Office naturally takes these bands under its official protection, and provides them with quarters at our barracks, and also sends non-commissioned officers of the Guards as interpreters, &c., but it sends *cavalry* bands to *infantry* barracks. Now, foreign cavalry bands ought to go to cavalry barracks, and infantry bands to infantry barracks. Surely, the Life Guards or the Blues would give a befitting reception to Bismarck's Cuirassiers. And are there no French or German-speaking non-commissioned officers among the Household Cavalry? Why all the bands should go to Chelsea Barracks, I cannot understand. Knightsbridge Barracks are much nearer. Whatever may be the reason, I am very glad they came over; but I think any foreign band, and more particularly a cavalry band, is unfairly handicapped in playing at the same time as the band of the Grenadiers. If the authorities would arrange matters so that we might hear other fine bands such as the Artillery or the Engineers', or that of the Marines oftener, it would be fairer.—

C. R. T.

The *Whitehall Review* points out that "as his share of the 'batta' for the Soudan campaign, Gen. Graham will receive a cheque for £342. Somewhat different this from the £25,000 awarded to Lord Wolseley. Were it not that money is always acceptable, Sir Gerald Graham might feel tempted to follow the example of the recipient of Digby Grant's generosity, and frame his 'little cheque' in grateful recognition of a country's bounty."

A correspondent informs the *Standard* that a large camp of exercise is to assemble at a place forty miles from Peshawur. A similar camp of exercise was formed in the same vicinity in the month immediately preceding the last Afghan war, and it is supposed that this force is being assembled in order to give support to the British members of the Commission about to undertake the task of marking out, in conjunction with Russian officers, the northern boundary of Afghanistan.

Service Questions in Parliament.

The Lords, who might have enjoyed a week's longer *villeggiatúra* had Mr. Gladstone "uttered" more freely before they rose for the Recess, and given assurances respecting the Conference, &c., which would have set their minds at rest, resumed on Monday with an important discussion on the Navy, and a statement by Lord Northbrook of very great importance, with which we have dealt at length elsewhere.

In the Commons, after the usual "questioning" and "answering" about Egypt and Gordon, there was a variety of service topics dealt with on Monday. The Russian Staff map of Central Asia, March, 1884, was secured for the inspection of the honourable gentlemen who wish to get up their geography on a Muscovite basis in consequence of Lord John Manners's inquiries, and is now in the Library of the House. (Query, "f. f. s.!") Lord E. Fitzmaurice, indeed, guarded himself against being in any way understood to admit the accuracy of the map, which places the frontier of Russia within 50 miles of Herat, and the Czar's lieutenant will note the fact, and no doubt instruct the officers in the forthcoming Commission of Delimitation to pay due heed to the reserves of our Foreign Under-Secretary, who would not give Mr. Stanhope much information respecting the negotiations with the Russian Government, nor satisfy Mr. Macfarlane's curiosity respecting the participation of the Ameer of Afghanistan in the Commission, the labours of which touch him so nearly. Nay, his lordship gained respite of Mr. Ashmead-Bartlett for one night, to get up an answer as to that terrible "Old Sarakhs" question.

In reply to Mr. J. Stewart, the Marquis of Hartington said that the report of the Committee on the defences of mercantile ports, presided over by Lord Morley, was referred for detailed consideration to the departments concerned. He believed these detailed reports were now practically completed. They have not, however, yet been submitted to him, and he was not in a position to state what action is proposed to be taken by the Government. We hope the ports will have a peaceful time of it *ad interim*.

Sir John Hay will move his vote of thanks to the troops in the Soudan when the Supplementary Estimate for the medals, &c., is placed on the table, as he informed Lord Hartington, so that we may have the whole question reopened, and Tokar, Sinkat, Berber, El Teb, &c., will flourish once more in the reports of the debate.

Lord Hartington would not tell Sir. H. Maxwell what was the strength of the Suakim garrison lest Osman Digna's special correspondent here should "wire it out," but he diplomatically said it was considerable.

Col. Milne-Holme asked the Financial Secretary to the War Office if any arrangements had been made for granting Government relief to widows and orphans of soldiers who were killed during the Soudan Campaign or who had died of illness then contracted; and if so, on what scale the relief would be given.

Lord H. Lennox asked a similar question on behalf of the Naval Brigade and Marines.

Sir A. Hayter said soldiers' widows would receive 3s. 6d. a week, with 1s. 6d. for each child. This would be granted also to the widows of soldiers dying in future campaigns.

Mr. Campbell-Bannerman stated (in answer to Lord H. Lennox's question) that the Admiralty had power, under an act passed last session, to make allowances to the widows and children of men killed in the service, and no doubt advantage would be taken of that act as a matter of course. He could not at present state the scale.

Gen. Borton, accompanied by his wife and son, embarked at Malta on board the Bastia, for Genoa, on Saturday. A guard of honour was drawn up on the quay, and a salute was fired on the departure of the ex-Governor, but there does not seem to have been any expression of public feeling or any great show of grief at the loss of Sir A. Borton at the close of his six years of office in the Island.

The annual British Burma dinner took place at Willis's Rooms, St. James's, on Wednesday evening. Gen. Sir A. P. Phayre, G.C.M.G., was president, supported by Hon. Sir A. Eden, Sir Joseph Fayrer, K.C.S.I., Bishop Bigandell; Gens. Ford, Ardagh, Leckie, Spilsbury, H. W. Blake, M'Mahon, Duncan, and Alexander Fraser, C.B.; Cols. Magrath, Saunders, Munro, Twynan, Duff, and Furlong; Major Watson; Capts. Wells and Sevenoaks; Doctors Lethbridge and Kelly; Messrs. E. Garnetman, Marin, J. Thompson, J. A. Steel, R. Stewart, A. Hatson, D. Clarke, J. Jardine, G. Stewart, Hewitt, C. F. Egerton-Allen, R. W. Smythe, J. Underwood, Thom, W. Hill, W. S. Steel, R. Phayre, J. W. Olive, Moung Bah Ohn, G. Christopher, J. Halliday, John Halliday, and M'Iver.

The *Standard* says:—"The Marquis of Hartington has informed the Duke of Somerset, President of the Devonshire Volunteer Association, that although he cannot at present issue Martini-Henry rifles for the Volunteer Force, he has arranged to issue twelve per cent. on the total number of arms allowed. As to the charge for ammunition, the Secretary of State intimates that 6s. 3d. per hundred represents the actual cost of manufacture."

Capt. Hopkins, Director of Naval Ordnance, inspected, on Saturday last, in Gray's Inn Square, the machine-gun magazine carriages invented by Lieut.-Col. Alt, commanding the Central London Rangers, and expressed himself well satisfied with the invention. The carriage is mounted on two wheels, and is capable of containing 5,000 rounds of ball cartridges, distributor, spare hoppers, and all necessary spare gear. It has a trail with two yokes, which are manned by four men, besides drag-ropes on the axles, which are manned by eight men. Each carriage has a rack on both sides, and in these carries in all six rifles. A spade, axe, pick, and saw are also slung to the trail; while the whole is protected by a bullet-proof shield in front. The total weight of the carriage with Nordenfeldt machine-gun mounted on a naval cone, and the ammunition, is only ten cwt.

Capt. Stewart was appointed to the Hecla, additional, on Saturday.

The Army.

1st King's Dragoon Guards. Lieut. Pennell has resigned his probationary appointment in the 2nd Central India Horse, and reverts to regimental duty. Lieut. J. H. Plunkett, late of the regiment, died on the 29th ult. at Marney, Manitoba, aged 27.

3rd Dragoon Guards will march for Colchester by squadrons on the 17th, 18th, and 19th inst. The squadron of this regiment now stationed at Birmingham will be relieved on the 26th inst. by a squadron of the 4th Hussars from Norwich. Major and Brevet-Col. Sir H. Stewart resumes duty as Assist.-Adjt. and Qrmr.-Gen. at Dover on return from the Soudan.

4th Dragoon Guards. The regiment moves from Brighton to York in August.

5th Dragoon Guards. A squadron (B and H Troops), under the command of Capt. W. J. Mackeson, marched on the 12th inst. from York, *viâ* Tadcaster and Wetherley, *en route* for Manchester, where it will arrive on the 17th inst. Lieut.-Col. Carden, eldest son of Sir R. Carden, is spoken of as a probable Conservative candidate for Salisbury, in conjunction with Mr. Kennard, M.P.

7th Dragoon Guards. Lieut. Thompson has leave from India for six months on medical certificate.

3rd Hussars. The will of Gen. Sir G. H. Lockwood, late hon. col., has been proved under £19,000 personalty.

5th Lancers. Col. Carden, late of the regiment, of Hargrove, East Woodhay, Hampshire, is spoken of as a probable Conservative candidate for Salisbury, in conjunction with Mr. Kennard. Col. Carden is the eldest son of Sir R. Carden.

11th Hussars. The detachment of this regiment now stationed at Liverpool will be relieved by a squadron of the 5th Dragoon Guards on the former moving to Ireland next month.

15th Hussars will remain at Aldershot until August.

17th Lancers. Col. Boulderson has been granted three months' leave from India.

18th Hussars. The death is announced of Col. Wickham Freeman, the last survivor of the old 18th Hussars. Col. Freeman died at Bath on the 9th inst., aged 90 years.

19th Hussars. Lieut.-Col. Barrow is fast recovering from the effects of the wounds received in the Soudan.

20th Hussars will be stationed at York, in relief of the 5th Dragoon Guards.

ROYAL ARTILLERY.

Major Younger has been appointed to the command of B Baty. Depôt, at Woolwich, vice Major Studdy.

Lieut.-Col. Warter (late Bengal) has been appointed to B Brig. on promotion.

Capt. Bannatine has been selected for an adjutancy, and posted to Woolwich.

Lieut.-Col. Geary, has been posted to Woolwich for duty, on vacating his Staff appointment at the Horse Guards.

Lieut.-Col. Swinton, on promotion from N Baty. 1st Brig. at Hyderabad, takes up duty at Woolwich.

Lieut.-Col. Ward, on promotion from D Baty. B Brig. at Kirkee, has been appointed to the command at Jersey.

Lieut.-Col. Ward, promoted from F Baty. B Brig. at Canterbury, takes up duty at Gibraltar.

Lieut.-Col. Dyke, from the command of P Baty. 3rd Brig. in India, joins the Staff at Dover, on promotion.

Lieut.-Col. Sandham is transferred from Colchester to Portsmouth.

Lieut.-Col. Shea succeeds Lieut.-Col. Hobart in command at the Cape.

Lieut.-Col. Wardell has been transferred from Belfast to Londonderry, and Lieut.-Col. Rice from Kinsale to Dover.

Lieut.-Col. Studdy remains at Woolwich, on promotion.

Lieut.-Col. Newall assumes artillery command at Kinsale, vice Col. Rice.

Last week, Lieut.-Col. Carter, commanding 3rd Brig. Scottish Division, Royal Artillery, received orders from Col. Keate to undertake the "station practice," which must be carried out every second year to test the guns, gearing, &c., with battering charges of 70 lb. of pebble powder and with Palliser shot weighing 400 lb., at Inchkeith. The concussion is considered a sufficient test that the "work" is in proper order. With the trifling exception of some glass broken within the southern battery, the works, guns, carriages, gearing, &c., stood the test admirably. Targets were placed at a distance of two or three miles from the island, the ranges being ascertained by a Watkin's finder. On the last day (Saturday), Col. Keate, accompanied by Capt. Preston, visited the island to see the practice. Lieut.-Col. Carter was in command of the practice, assisted by Major Costobadie and Qrmr. Walker. Major Colquhoun and Capt. Peploe were in charge of the range boat. Lieuts. Bower and Scott had charge of the gun detachments. Col. Keate expressed his satisfaction with the practice.

No. 1 Baty. 1st Brig., London Division, has been placed under orders to proceed to India, during the relief season 1884-5.

Capt. J. W. Murray has taken up the appointment of D.A.A. and Q.M.G. at Edinburgh.

H Baty. B Brig., and I Baty. A Brig., R.H.A., will leave Okehampton on the 21st inst. for Aldershot. H Baty. 4th Brig., R.A., on the 28th, F Baty. 3rd Brig., R.A., on the 30th, and K Baty. 1st Brig., R.A., on the 1st of July, will march from Hay to Aldershot.

ROYAL ENGINEERS.

Major G. Harris, succeeded as brig.-major at Chatham by Major Galwey, is attached at Woolwich. Major G. T. Plunkett has joined the School from Dover, and Capt. P. G. Von Donop from Bristol.

Lieut.-Col. Lambert has been appointed Examiner, Public Works Accounts, Bombay.

Lieut. Pollen has been appointed Assist.-Superintendent of the Survey.

Exchanges between officers of the Royal Engineers who are actually serving in India, and who have completed, or are about to complete, a tour of Indian service, and officers who are under orders for duty in India, will be permitted, where an officer of the former class would bind himself to complete a further seven years in India without relief, on the understanding that in the case of those officers who are serving in the civil and military branches of the Public Works Department, the application will be made with the approval of the Government under which the officer is serving.

A Reuter's telegram from Malta, dated June 13, says:—"Gen. Sir J. Lintorn Simmons, the new Governor of Malta, accompanied by his wife and daughter, has arrived here from England on board the Peninsular and Oriental Company's steamship Mirzapore, and met with a cordial reception from the inhabitants. A guard of honour was drawn up on the quay, and a salute was fired when his Excellency landed. The new Governor immediately proceeded to the palace at Valetta, where, after receiving an address of welcome, his Excellency took the oath of office as Governor and Commander-in-Chief."

Grenadier Guards. Col. Crichton having relinquished the appointment of Military Secretary at Malta, will be succeeded this week by Col. Mackinnon. Lieut.-Col. Crichton has been permitted to assume the name of Makgill-Crichton-Maitland. Referring to his departure from Malta, the *Malta Standard* says:—"The gallant officer arrived here with his Excellency in June, 1878, and during the period of six years he has been the Governor's right-hand man, not only in military, but also in all civil affairs of any importance. The confidence placed in this distinguished officer by his Excellency the Governor has been fully justified by the intelligence, zeal, and energy which he has at all times displayed in the performance of all the duties entrusted to him. In Col. Crichton the Malta Government, both civil and military, loses an able, straightforward, and most energetic adviser, whose excellent qualities both of head and heart may, perhaps, be equalled, but cannot be surpassed by any officer that may be on the new Governor's staff. The officers of the Royal Malta Fencible Artillery in particular will long remember him with feelings of gratitude, for, in conjunction with his Excellency, he has done his utmost for the augmentation of that gallant corps." Lieut. Trollope is to be specially employed with the new Balloon Corps.

3rd, the Buffs (East Kent Regiment). Lieut.-Gen. Green, major-gen. on the Retired List, and formerly of the regiment, died on the 31st ult. at Hampton Wick, aged 64. He was the eldest son of the late Mr. Green, of Broom Hall, Teddington, and entered the Army, April 7, 1838; retired, with the rank of lieut.-gen., July 1, 1881.

17th Leicestershire Regiment. Col. Tompson will be placed on retired pay (£420 a year) on July 15.

18th Royal Irish Regiment. Lieut. Blood, 1st Batn., having passed the higher-standard examination in Hindostanee, has been appointed interpreter.

20th Lancashire Fusiliers. Col. O'Neill completed his five years in command of the 2nd Batn. on Monday last, and is *en route* to England from India. Capt. Marshall, 1st Batn., has been appointed a garrison instructor at Halifax, N.S.

23rd Royal Welsh Fusiliers. Capt. H. H. Edwardes, 2nd Batn., has been selected for the adjutancy of the 9th Batn. King's Royal Rifle Corps, and will assume his new duties on the 1st prox.

24th South Wales Borderers. Pte. Brine, 2nd Batn., on Saturday fired twice at Capt. and Adjt. Clements at Secunderabad. Having missed both times, he shot himself dead.

27th Royal Inniskilling Fusiliers. The following battalion after-order was issued on the 9th inst. by Lieut.-Col. G. B. Stokes, dated Belfast, June 9:—"It is with the deepest regret that the commanding officer has to-day received confirmation of the death of Capt. Humphreys, late serjt.-major of this regiment, which occurred at Cairo on May 16, from the effects of an accident. After serving 13 years with us, he was recommended for his commission, and obtained it in the Welsh Regt. on March 23, 1881. He commanded the Mounted Infantry in the recent campaign in the Soudan with the greatest distinction, being several times mentioned in despatches by Gen. Sir Gerald Graham, G.C.B. His sudden death will be deeply regretted by all ranks who knew him. He was a gallant soldier, and his unselfish, cheerful, and manly nature endeared him to officers and men. His short but exceptionally brilliant career is a great incentive to every one in the regiment who has seen a comrade rise by sheer merit from the rank of private to a position which would be an enviable one to nearly every officer in the Army. As a mark of respect to his memory, the commanding officer wishes officers to wear the prescribed mourning till June 16.—By order, N. A. Bray, capt., adjt. 2nd Batn. Royal Inniskilling Fusiliers."

35th Royal Sussex Regiment. Lieut. Du Moulen has been appointed Superintendent of Gymnasia at Malta.

39th Dorsetshire Regiment. Leave has been granted to Capt. Fenwick, to complete six months' service with the Egyptian Gendarmerie. Col. Dixon will be placed on retired pay (£420 a year) on July 2.

44th Essex Regiment. Lieut. Kempster is about to retire.

ROYAL MARINES.

The under-mentioned officers have been granted leave of absence, viz.:—Capt. T. R. Swinburne, R.M.A., two months; Lieut. E. P. Brittan, R.M.L.I., three months, for the benefit of his health; Major Edwin Poole, R.M.L.I., one month's extension, for the benefit of his health; Lieut. E. G. Wilkinson, R.M.L.I., one month.

A detachment of the Royal Marines left Gravesend on Wednesday for Egypt, on board the Deca, chartered troopship. The contingent was commanded by Lieut. Lalor, and numbered 60 men of all ranks.

50th Queen's Own (Royal West Kent Regiment). Col. the Hon. J. P. Maxwell, late of the regiment, has succeeded to a peerage by the death of his brother, Lord Farnham. He served with the regiment in the Eastern Campaign up to Nov. 3, 1854, including the battle of Alma and siege of Sebastopol (severely wounded in the head by a round of shot, medal with two clasps, brevet of lieut.-col., 5th Class of the Medjidie, and Turkish medal). Capt. Cummings has arrived from Egypt, to join the depôt.

53rd King's (Shropshire Light Infantry). Lieut. C. C. Turner, who died at Cairo last week whilst employed as major with the Egyptian Army, distinguished himself by his unselfish devotion to the native soldiers during the cholera epidemic. He was selected to command the Camel Corps, and rendered great services during the Suakim expedition. He was sent recently up country to purchase camels in order to increase his corps for use in the intended expedition. While bathing in the river Nile at Keneh, he suddenly disappeared, only a native watchman being present. Capt. Bedford searched for the body, which was found below Keneh. The Khedive and Nubar Pasha have expressed their personal regret for his loss to Gen. Wood. Lieut. Turner served with the regiment in the Egyptian Campaign of 1882, and was present at the surrender of Kafr Dowar and Damietta (medal and Khedive's star). He joined the Army Nov. 20, 1875.

54th Dorsetshire Regiment. Lieut. Rogers died of sunstroke on the 24th ult. whilst shooting in Central India. The deceased, who was 25 years of age, entered the Army May 1, 1878, and became lieut. Nov. 2, 1879.

60th King's Royal Rifle Corps. Information has been received by telegraph from Egypt of the death of Lieut. Ross, 3rd Batn., who was only in his 23rd year, eldest son of Mr. Ross, M.P., which occurred on Saturday last at Ramleh, of typhoid fever, contracted at Suakim. The young officer obtained his commission in Sept., 1883.

65th York and Lancaster Regiment. Brevet Lieut.-Col. Dalgety, who was wounded in the Soudan and arrived home from Egypt last week, is now making satisfactory progress. Lieut. Eaton died at Dover on the 7th inst. The deceased, who was son of Major-Gen. Eaton, late R.A., joined the Army on Jan. 30 last.

72nd Seaforth Highlanders. Stirling, Dumbarton, Clackmannan, and Kinross have marked their appreciation of the services of the regt. during the Afghan campaign of 1878-80 by presenting to the officers' mess a valuable centre-piece and a loving cup for the non-commissioned officers' mess, and the officers of the Highland Borderers Light Infantry Militia have added a clock. The centre piece is decorated with four panels showing the four principal engagements for which clasps were awarded, viz., Peiwar Kotal, Charasia, Cabul, Candahar." On this stand four finely-modelled figures, at either end an officer and private of the regiment, and at front and back a portrait mould of the pipe-major. From the centre rises a square structure, bearing in the front an elaborate panel or trophy of arms, surmounted by the badge of the regiment, the stag's head, with the motto, "Cabar Feidh." Surmounting the whole is an equestrian portrait-statuette of the late Duke of Albany, the hon. colonel of the regiment, who superintended the execution of this work, the likeness being very happily caught. The minor decorations consist of the thistle and rose, with thistle leaves and ornamental mouldings. The cup for the non-commissioned officers' mess is oval in form, with two richly-decorated handles. The front of the body has a trophy of flags, &c., in relief, forming a background to the Victoria Cross. The clock is of ebonised wood with silver decorations. The base bears a silver panel with names of the donors. The work was entrusted to Messrs. Hunt and Roskell. The presentation at Willis's Rooms on the 5th inst., was made by Col. Findlay, hon. col. of the Highland Borderers.

75th Gordon Highlanders. Capt. Barron-Stanton is about to retire upon half-pay, with a view to joining the 3rd Batn. Royal Irish Fusiliers.

77th Middlesex Regiment. Capt. Fellowes, formerly of the regiment, and of Broom Hall, Honsell, died at Chobham, Surrey, on the 30th ult. He was the eldest son of the late Sir J. Fellowes, M.D., who was knighted by George III. in 1810, for his services, especially at Gibraltar, during the pestilential fever in 1804-5. The deceased entered the 45th Foot May 31, 1839, and became capt. of the 77th, April 7, 1848. He retired in 1850.

79th Queen's Own Cameron Highlanders. Lieut.-Col. St. Leger has arrived from Egypt on leave.

85th King's, Shropshire Light Infantry. Lieut.-Col. Smith has vacated his Staff appointment as A.A. and Q.M.G. at Edinburgh on promotion to an unattached lieut.-colonelcy.

86th Royal Irish Rifles. Major Wyndham, who has been acting A.A.G. and Q.M.G. during the absence of Sir H. Stewart in the Soudan, returns to regimental duties.

87th Royal Irish Fusiliers. Captain Milner completes his period of staff service as garrison instructor at Halifax, N.S., on August 4, when he returns to regimental duty.

95th Sherwood Foresters (Derbyshire Regiment). The remains of Major de Salis, who died from disease contracted while in command of the Mex Forts, after the bombardment of Alexandria, were interred at Almorah Cemetery, Jersey, with military honours, on the 30th ult. The firing party and band were furnished by the 36th Regt. under command of Lieut.-Col. Beamish. Assist.-Comy.-Gen. of Ordnance Pease, Capts. Monckton and Stevens, R.A., Capts. Brown and Leckie, 36th Regt., acted as pall-bearers. The burial service was performed by the Vice-Dean of Jersey. The deceased was gazetted ensign to the Cape Mounted Rifles May 13, 1859; obtained his lieutenancy April 26, 1864; was transferred to the Military Train, and subsequently exchanged into the 95th, in which he was adjt. till promoted capt. Aug. 7, 1875. He was adjt. of the 1st Derbyshire Militia from Nov., 1875, till Nov., 1880.

98th North Staffordshire Regiment. One man and two boys were convicted at Quetta on June 3 of the actual murder of Lieut. Dupuis. The man was hanged the next morning, the body being afterwards burnt. The boys were transported for life. Several others were sentenced to imprisonment for concealing the murder. They belong to the Yassingai Pathans, who occupy the villages between Khusdil Khan Kilu and Karbula.

99th Wiltshire Regiment. Capt. Rowden is officiating as a D.A.A.G. in India.

104th Royal Munster Fusiliers. Major F. J. W. Davies, 3rd Batn., will rejoin for duty on the 17th inst., having completed five years' service as Adjt. 9th King's Royal Rifle Corps on May 5 last, but was permitted to retain the appointment until the termination of the training of the battalion.

Rifle Brigade. The Governorship of Military Prison at Malta is vacant by the death on the 30th ult. of Mr. Kerr, late of the Brigade. Deceased, who was 43 years of age, was third son of the late Rev. Lord H. Kerr. He joined on Aug. 31, 1858, and became lieut. on Sept. 22, 1863. On July 14, 1869, he was appointed adjt. of the 2nd Batn., which position he held until his retirement, on becoming Governor. The will of Gen. Sir G. Buller, late col.-comdt., has been proved under £81,000.

1st West India Regiment. Lieut. Bourke has been appointed acting A.D.C. to Mr. H. A. Blake, Governor of Bahamas.

2nd West India Regiment. Lieut. Macfarlane has been appointed Fort Adjt. at Sierra Leone, vice Lieut. Northcote.

Commissariat and Transport Corps. A school of instruction has been formed at Aldershot for training officers of the Commissariat and Transport Staff. Assist.-Comy.-Gen. Young has been appointed Chief Instructor,—a very good selection. Capt. Ogle, Deputy-Assist. Comy.-Gen., has been ordered to Belfast.

Pay Department. During the past month, the following changes of station, retirements, promotions, and appointments have taken place in the Pay Department. Changes of station:—Chief Pymrs.—Lieut.-Cols. Morris, from Cape to England; Davidson, England to the Cape; Murray, China to England; Cattell, England to China; Farwell, Suakim to England. Staff Pymrs.—Majors Hignett, 81st Regt., to 18th Regtl. District, Clonmel; Anson, from 83rd Regtl. District to Unattached List; Kaye, from 101st Regtl. District, Tralee, to R.A., Dublin. Pymrs.—Majors Brereton, to 83rd Regtl. District, Belfast; Healy, from R.A., Dublin, to 101st Regtl. District, Tralee; Capts. Lloyd, from 2nd Batn. 60th to Unattached List; and Gaussen, to 86th Regt. Retirements:—Chief Pymr. and Lieut.-Col. Lukin, from April 16; Staff Pymr. and Major Baird, from May 24; Staff Pymr. and Major G. W. Smith, on temporary half-pay. Promotions:—Major R. B. Farwell to be chief pymr., with the hon. rank of lieut.-col., for services during the recent operations in the Soudan, dated May 21, 1884; Major Mortimer to be staff pymr., March 22; Capt. Sanford to have the hon. rank of major, May 19; Capt. Moore-Lane to have the hon. rank of major from May 26. Appointment:—Capt. Gaussen, antedated to July 10, 1883. Deaths officially reported:—Major J. L. Anderson, April 25; Capt. G. F. Harris, May 19; and Major G. A. Eliott, May 26.

The Auxiliary Forces.

MILITIA.

Eastern Division, Royal Artillery. The men of the 3rd Brigade assembled at Ipswich on Monday last, and proceeded thence by rail to Harwich, there to be encamped for their annual month's training. They are a strong, likely-looking, and exceptionally well-conducted body of men, not the refuse of the towns, but principally agricultural labourers, and it is all the more to be regretted on this account, that there are so few of them. Last year the Brigade was far below its strength; this year it is still further. Recruits will not come forward for reasons that are patent to every one but the authorities. "The Militia is the back-bone of the service," so we are told by "our only General," not that we didn't know it before. All we've got to say on the subject is that the service has a particularly weak back-bone just at present.

Welsh Division, Royal Artillery. Col. Lloyd-Philipps, of Mabws, Cardiganshire, and Dale Castle, Pembrokeshire, died on the 5th inst. He was the eldest son of Major Lloyd-Philipps, of Dale Castle, and was born in 1824. He was a magistrate and deputy-lieutenant for Pembroke and Cardigan, and lieut.-col. of the 5th Brig. He formerly held a commission in the 82nd Foot.

The Buffs (East Kent Regiment). The official inspection of the 3rd and 4th Batns. took place at Shorncliffe Camp on the 31st ult. The following extract from Regimental Orders was published in the evening:—"Col. Degacher desires to express to Cols. Howell, Beales, and officers, non-commissioned officers and men, his entire satisfaction with the cleanliness and smart appearance of all ranks at the marching order parade, the steadiness at drill, the cleanliness of the barrack-rooms, and the general conduct of the men at the annual inspection made by him on this date."

South Wales Borderers. New colours were presented to the 3rd Batn. at Brecon on the 3rd inst. The battalion (eight companies) was drawn up in line, and received Lord Ormathwaite, Lord-Lieutenant of Radnorshire and hon. col. of the battalion, with a general salute. The battalion then formed three sides of a square. The service having been read by the Rev. H. Williams, vicar of Brecon, the Queen's colour was handed by Major Morgan to Lady Ormathwaite, who gave it to Lieut. Gwynne. The regimental colour was given to Lady Ormathwaite by Major James, who gave it to Lieut. the Hon. C. E. Walsh. Lady Ormathwaite, in making the presentation, said:—"You are the 3rd Batn. of a regiment whose traditions are surpassed by none in the British Army. From the days of Marlborough to the very latest wars, your regiment has taken part in nearly every fight; and though it may have sometimes met with disaster, it has never met with disgrace. In placing these colours in your hands, I feel sure that you will be mindful of its glorious traditions, and that should occasion offer, you will emulate your predecessors in achieving fresh triumphs under them, and that whether in peace or war, you will set an example to all by doing your duty to your Queen and to your country." Col. Jones-Thomas said:—"Perhaps it may be as well that I should explain how it is that there is a necessity for this ceremony. The Royal South Wales Borderers Militia, composed of the amalgamated Militias of the counties of Radnor and Brecon, was a rifle regiment, and as such was not entitled to colours; but in May, 1881, an order was issued constituting the Militia regiments of the United Kingdom into the third and fourth battalions of the Line regiments. Now the united regiment of four battalions is called 'The South Wales Borderers.' As part of an infantry regiment, it became necessary that we should receive and carry colours." Having given a sketch of the chequered career of the old 24th, he said:—"Whatever may be in the future for us, whether it is peace or war, it is my hope, and I will say it is my belief, that the 3rd Batn. of the South Wales Borderers will ever be found faithful and true to their God, their Sovereign, and their country."

Royal Aberdeenshire Highlanders. The Princess of Wales has consented to present new colours to this regiment in the ensuing autumn. The Prince and Princess will arrive at Abergeldie on August 11. The presentation of the new colours will take place on the old Town Links at Aberdeen on Friday, the 29th, or Saturday, the 30th.

The following regiments assemble on Monday for 27 days' training:—3rd Brigade, Eastern Division, R.A., at Ipswich; 2nd Brigade, Cinque Ports Division, R.A., at Dover; 3rd Brigade, Western Division, R.A., at Devonport; 6th Brigade, North Irish Division, R.A., at Dungannon; 4th Batn. Border Regt., at Carlisle, for Appleby; 4th Batn. Cheshire Regt., at Macclesfield; 3rd Batn. Derbyshire Regt., at Derby; 4th Batn. Oxfordshire Light Infantry, at Oxford, for Aldershot; 5th Batn. Royal Fusiliers, at Hounslow, for Aldershot; 3rd Batn. East Surrey Regt., at Kingston, for Aldershot; 3rd Batn. Warwickshire Regt., at Warwick; 3rd Batn. Worcestershire Regt., at Worcester; 3rd Batn. York and Lancaster Regt., at Pontefract; 4th Batn. Connaught Rangers, at Galway; 5th Batn. Royal Dublin Fusiliers, at Dublin, for Curragh; 3rd Batn. Royal Inniskilling Fusiliers, at Enniskillen; 3rd Batn. Royal Irish Rifles, at Newtownards; and the 8th Batn. King's Royal Rifle Corps, at Carlow.

On Monday next, the 3rd Middlesex (Royal Elthorne), from Hounslow—25 officers and 879 non-commissioned officers and men; 4th Royal Fusiliers (Royal London), from Finsbury—15 officers and 500 non-commissioned officers and men; 7th King's Royal Rifle Corps (2nd Royal Middlesex Militia), from Barnet—16 officers and 616 non-commissioned officers and men, will arrive at Aldershot. The 3rd Middlesex encamp on Church Plateau, the 7th King's Royal Rifles on Swan Inn Plateau (3rd Brigade), the 4th Royal Fusiliers on Rushmoor Hill (2nd Brigade).

YEOMANRY CAVALRY.

Hampshire. The *Portsmouth Times* says:—"If Mr. Labouchere had paid a visit to Winchester last week, he might have seen enough to satisfy him that his assertion that the Auxiliary Cavalry are inefficient and out of order is not quite correct. The Hampshire Yeomanry Cavalry were then engaged in their eight days' drill, and at the annual inspection the parade state showed a total of 165. Col. Mussenden was highly pleased with the manner in which the evolutions were executed, and as Col. Crichton, the recently appointed commanding officer, is determined to raise the reputation of the corps, he announced that 'in future he should not take every recruit that offered himself, for he intended to keep the regiment select, and should satisfy himself that the recruit owned a horse or had the means of procuring one.'"

Cheshire. This regiment was inspected on the Roodee, Chester, on the 9th inst., by the general officer commanding the Northern District.

THE VOLUNTEERS.

3rd City of London Rifles. The Duke of Cambridge will inspect the regiment this evening on the Horse Guards Parade at 6 o'clock, and it is understood that the corps will turn out nearly 1,000 strong.

Cheshire Regiment. The 4th Batn., strength 16 officers, and 832 non-commissioned officers and men, under the command of Major C. J. Howard, was inspected at the Camp, Macclesfield, on the 10th inst, by Major-Gen. F. A. Willis, commanding the Northern District.

Sir A. Alison has intimated that he was particularly pleased with the 5th Lancashire R.V. Their behaviour was all that could be desired.

Col. C. E. Webber, C.B., commanding R.E. Home District, will inspect the three Volunteer Engineer corps in the command as follows:—1st Middlesex, July 5, Battersea Park; 1st London, July 12, Regent's Park; and 2nd East London, July 26, Victoria Park. These corps will also assemble for brigade movements in Regent's Park on the 28th inst.

The 1st Volunteer Battalion, South Yorkshire Regiment, are holding their encampment this year at Skegness, from the 12th to the 21st inst., instead of at Scarborough, as first intended. The 2nd Lancashire Rifle Volunteers have received permission to change the dates of their encampment at Fleetwood, from 12th to 19th, to 19th to 26th July.

Col. the Marquis of Londonderry presided last Thursday at the annual meeting of the National Artillery Association, at the United Service Institution. The report, which was presented and adopted, referred to the continuous prosperity of the institution, and expressed satisfaction at the success of the meeting at Shoeburyness last year, the largest ever held, and stated that the council had endeavoured to meet the suggestions of Col. Fox-Strangeways with respect to the more efficient working of the camp organisation.

Headaches and Disordered Stomach.—"After suffering for nearly two-and-a-half years from severe headache and disordered stomach, and after trying almost everything, and spending much money without finding any benefit, I was recommended to try your Fruit Salt. Before I had finished one bottle, I found it doing me a great deal of good, and now I am restored to my usual health. Others I know that have tried it have not enjoyed such good health for years.—Yours truly, Robert Humphreys, Post Office, Barrasford." CAUTION.—Legal rights are protected in every civilised country. Examine each bottle, and see the Capsule is marked "Eno's Fruit Salt." Without it, you have been imposed upon by worthless imitations. Sold by all Chemists. Directions in Sixteen Languages, —How to Prevent Disease. Prepared only at Eno's Fruit Salt Works, Hatcham, London, S.E., by J. C. Eno's Patent.

ARMY NOTES.

The War Office has just issued a circular with reference to Article 94 of the Royal Warrant relating to pay, &c., stating that the Secretary of State for War has decided that, until further orders, the following rules shall be observed regarding the voluntary retirement of officers of the Cavalry and Infantry, on the rates laid down in Articles 972 to 978 of the above-mentioned Warrant:—1. Voluntary retirement on retired pay or gratuity from the regimental rank of major on full pay, will not be allowed before the completion of 25 years' service, except in cases in which the vacancy would be filled—(*a*), by the absorption of a supernumerary major; (*b*), by the appointment to full pay of a major from the Half-Pay List; (*c*), by the promotion of a captain of the same arm of the service who shall have completed at least 18 years' service; (*d*), by the promotion of a captain who shall be within two years of the age fixed for his compulsory retirement; (*e*), by the promotion of a captain who shall, in the opinion of the Commander-in-Chief and the Secretary of State, have performed exceptionally good service. 2. Voluntary retirement on retired pay or gratuity from the regimental rank of captain on full pay will not be allowed except in cases in which the vacancy would be filled—(*a*), by the absorption of a supernumerary captain; (*b*), by the appointment to full pay of a captain from the Half-Pay List; (*c*), by the promotion of a lieutenant of the same arm of the service who shall have completed at least nine years' service; (*d*), by the promotion of a lieutenant who shall, in the opinion of the Commander-in-Chief and the Secretary of State, have performed exceptionally good service.—[The officers who have just escaped this cast of the net may well congratulate themselves. A few days' delay, and their fate under its operation would have been materially altered.—Ed. *A. & N. G.*]

A Reuter's telegram, dated Simla, June 9, says:—"It is expected that the proposed Anglo-Russian Commission for the delimitation of the Afghan frontier will also be able to undertake a survey of the River Oxus, east of Khoja Saleh. The Ameer of Afghanistan has been unofficially informed of the intended despatch of the Commission."

Major G. Harris, who has been succeeded as Brigade-Major at Chatham by Major Galwey, is attached to the department of the Commanding Royal Engineer at Woolwich, where he joined on the 10th inst. Major Plunkett has joined at the School from Dover, and Capt. Von Donop from Bristol.

The Madrid correspondent of the *Times* says:—"The Spanish officers just returned from a six weeks' stay in Germany (where they went to witness the spring manœuvres) paid their respects to Don Alfonso to-day (June 11), giving the King a short account of their visit. They express unbounded satisfaction at the courtesy and cordiality with which they were received by all, from the Emperor and Crown Prince downwards. The same or a similar commission will witness the grand autumn manœuvres of the German army. What the report of the commission will be cannot be ascertained. Its members are evidently impressed with the perfection of the Prussian system when applied to Germans; but it is not clear to them that the same extraordinarily severe discipline can be satisfactorily transplanted to Spain."

The band of the 7th German Cuirassiers is now performing daily in the grounds of the International Health Exhibition. The band has brought the silver drums presented to them by the late Emperor of Russia. It is also understood they have with them their precious regimental relic—their trumpet which sounded the charge at Vionville, and which immediately afterwards was rendered useless through being perforated by bullets. The officer who accompanies the band is Capt. Campbell, a Scotchman, who took part in the charge and was wounded. He was brought out of battle by an English officer who was on the field acting as special correspondent for a London morning paper.

Writing from Assouan on the 10th inst., the *Times* correspondent says:—"Col. Duncan reports most favourably concerning the discipline and alacrity of the Egyptian troops. No case of desertion has occured. I visited to-day the camp of the Egyptian Army under Col. Duncan. This camp shows the wonderful perseverance and energy of the Egyptian soldier in the construction of a complete system of fortifications, the earthworks standing on what was previously a deserted hill. Col. Duncan and Major Shakespear deserve the highest credit, not only for their intelligent military action in a trying climate, but for the perfect discipline which they have enforced among the raw recruits—which excites remark among the natives. This morning the men were summoned by a false alarm to man the forts in order to receive the enemy; and the promptitude with which in a few moments every man was in his place and the guns loaded would have done credit to any European force. The soldiers appear to be cheerful and obedient, and display no signs of fanaticism."

The *Egyptian Gazette* says:—"The Khedive has conferred the 4th Class of the Order of the Medijidie on Lieut. De Benel, of Baker Pasha's Staff, who was severely wounded at El Teb."

At the South Northamptonshire Conservative banquet on Tuesday, Lord Straithnairn, replying for the Army, declared that the depot system had broken down, and that the territorial plan was in the same condition. Lord Exeter said there was danger of the Militia ceasing to exist.

Lieut.-Col. W. R. Lascelles, at present Assist.-Adjt.-Gen. of the Southern District, will replace Col. Clarke at Aldershot.

A Delicious Cooling Drink is supplied in Rose's Lime Juice Cordial in water; effervescing in all the Mineral Waters. It is non-alcoholic, and highly medicinal, purifying the blood. Recommended by the *Lancet*, and Medical Profession. Sold everywhere. Purchasers should order Rose's Cordial. Wholesale Stores—11 Curtain Road, London; and Leith, N.B.

NOTICES TO CORRESPONDENTS.

For Books Received, &c., and Notices to Correspondents, see page 442.

The ARMY AND NAVY GAZETTE this week contains four pages extra.

CORRIGENDUM.—The heading "East India Squadron" was erroneously placed over the news relating to the "China Squadron" in last week's *Army and Navy Gazette*. The words "in India" were omitted after the word "courage" in the notice of the obsequies of the late Sir Bartle Frere in last week's issue.

Army & Navy Gazette.
LONDON, SATURDAY, JUNE 14, 1884.

THE evidence of Colonel Wallace, R.E., before the Committee on Commissariat and Transport in Egypt has effectually broken down a case which had very little to support it. When Sir John Adye read to the Committee on the 19th of last month a carefully-prepared history of the preparations made for the Egyptian Campaign, and of the result of those preparations, he wound up in these words:—"There was no break-down of any kind; and as I was Surveyor-General of the Ordnance when the Expedition was organised, and was Chief of the Staff in Egypt, I had good means of judging; and I am very glad of an opportunity of expressing my views on the subject." There is a *naïveté* about this which is so truly delicious that it seems cruel to suggest that if the sentence had been, "As I was Surveyor-General of the Ordnance when the Expedition was organised, and was Chief of the Staff in Egypt, I was responsible throughout, and must, therefore, declare that everything was well done," it would have accounted for the tone of the Surveyor-General's evidence; or rather, we should say, of his defence. But facts are stubborn things; and, unfortunately, no amount of praise, much less self-praise, will remove from the minds of the Committee the statements and official records as to bad flour, unserviceable mules, wretched hay, want of labour, and other grievous defects, clearly traceable to the present system at the War Office. It is, however, specially with regard to transport that the evidence of Colonel Wallace is valuable. It has been distinctly stated by Sir John Adye that the whole scheme of transport for this expedition was based on the use of the Freshwater Canal and the railway. How far a Surveyor-General or a Chief of the Staff may trust to the luck of his General, and place reliance on the chances of the enemy leaving such means at the disposal of an invading force, we need not question here. The Committee has had testimony enough that the animal transport was too late, was inefficient, and badly organised. The defence was that the force depended on the Canal and railway; and it is to this point that the evidence of Colonel Wallace, who was in charge of the railway, was directed. Anything more conclusive it seems impossible to imagine. The utter unpreparedness of the corps for the work it was expected to do was frankly admitted by its Director. His position was most lamentable; the importance of this, which at first was, with the Canal, the only means of transport, was evident. Yet he was powerless,—without engines, until two, purchased at Alexandria, could be landed at Suez; without men to lay connecting lines; without labourers to load and unload; on a single line without sidings, and no one to prepare them—the whole impedimenta of an army pressing in upon him for immediate transmission to the front, where the troops living from hand to mouth. Is it any wonder that this evidence scatters to the wind Sir John Adye's assertion that in his scheme of transport based upon the railway there was no breakdown. The sittings of the Committee are protracted, and no doubt tedious; but assuredly the time of the members is valuably employed, if, tracing the various failures, and the consequent waste of public money, to the present faulty organisation, they make the weakness of that system so apparent that it will no longer be allowed to impede the improvement of the British Army.

The Military Secretary presents his compliments to the Editor of the *Army and Navy Gazette*, and begs to state that he will not hold a levée on the 17th inst.

The only man in Egypt or out of it in North Africa who seems to be hopeful, energetic, and successful—according to his own accounts of himself and his surroundings—is the Mudir of Dongola, and if we believe him, the Mahdi is in a bad way and Berber is quite safe. As a matter of opinion, the chances are that Berber is safe, and that the story which made a sensation this week in reference to its capture and the massacre there is—well, a story. As the telegraphic despatches from Khartoum have stopped, the country is apparently settling down into comparative indifference about Gordon's fate. Commander Hammill and Lieutenants Tyrwhitt and Boore arrived in an armed steamer at Wady Halfa on the 12th inst., and left again; but they could not go very far south, as the rapids of the Second Cataract begin a few miles above Wady Halfa, and so we suppose they returned to Korosko. If the wire between Dongola and Berber be uncut, it is evident the enemy are not at the latter place. Lord Granville's instructions to Gordon would, we daresay, be suited to the circumstances, but, unfortunately, the Foreign Office does not indicate the way in which Gordon is to execute them.

Lieutenant-Colonel Broadwood, Scots Guards, has succeeded Lieutenant-Colonel Ricardo, Grenadier Guards, as Commandant of the School of Instruction at Wellington Barracks.

The Duke of Cambridge presided, with his customary success in such positions, at the great meeting in the Mansion House on Thursday to promote a memorial to Sir Bartle Frere. Politics were tabooed, but some vigorous thrusts were made by neat dialectic swordsmen like Sir R. Temple, Lord Carnarvon, and others, under the Duke's arm, at those who "punished" the deceased statesman—and both parties united in that—for the failure of his policy at the Cape. Lord Chelmsford, who was present at the funeral, did not attend the meeting.

Major-General Gipps, C.B., will make his annual inspection of regimental districts on the under-mentioned dates:—Hounslow, June 23; Kingston, June 24; Guildford, June 25; Oxford, June 26; and Reading, June 27. Troops to be in service marching order.

General Baker Pasha, say the morning papers of Friday, has left London for Cairo, "having been suddenly called upon to take up his position in the Egyptian army. It is stated that he will probably be sent to Suakim." Now, Baker Pasha left London a week ago, not for Cairo but for Italy, as we stated last week; and he has, moreover, no position in the Egyptian army, though he has the rank of Lieutenant-General (Ferik Pasha), his command being that of the Egyptian gendarmerie.

Lieutenant-Colonel Farrell has succeeded Colonel C. J. Hope Johnstone as officer commanding the Auxiliary Artillery in the Leith Fort, N.B. District.

A Cavalry field-day is ordered for Monday next at Wimbledon, under Colonel Duncombe, 1st Life Guards. The troops, 1st and 2nd Life Guards, 3rd Hussars, and C Battery, A Brigade, R.H.A., will be formed up in line of quarter squadrons west of the Windmill at 10 a.m.

Colonel Elliot has taken up the appointment of Deputy-Adjutant-General of Artillery in India for five years.

Colonel H. Brackenbury, who has been stationed for some time at Gibraltar, has received a command in India, and will take up his duties without delay.

The storm in a teacup between the majesty of Servia and the might of Bulgaria cannot be allowed to spread beyond their frontiers; but meantime the ridiculous people are "massing troops" along their geographical lines. As Prince Bismarck has proposed the mediation of Russia and Austria, which Servia has accepted, matters will smooth down unless it be otherwise desired. Certainly it looks as if steam-hammers were called in to break eggs.

Lieutenant-Colonel Wardell has been appointed to the command of the Auxiliary Artillery in the North Irish Division, head-quarters Carrickfergus, vice Colonel J. M'Mahon.

It appears from the return moved for by Major-General Alexander that there are four officers commanding Militia regiments in the Channel Islands who are over 60 years of age. These are Lieutenant-Colonel Barbenson, Royal Alderney Artillery, who has passed his 75th year; Lieutenant-Colonel Godfrey, 2nd Jersey, who is 67; Lieutenant-Colonel Galliene, 2nd Guernsey, 66; and Lieutenant-Colonel De Guerin, 3rd Guernsey, 61. The youngest commanding officer is Lieutenant-Colonel Collings, 1st Guernsey, 37.

Colonel A. C. Johnson has been appointed a Brigadier-General on the Staff of the Madras Army for five years. Colonel Gordon has taken up an officiating appointment at the head of a Brigade in the same Presidency.

There are six Cavalry and twenty-six Infantry, and eleven District officers of various kinds requiring Paymasters—total, forty-two vacancies. Eleven retired Paymasters are temporarily employed—viz., Lieutenant-Colonels Bacon, Baird, Bernard, Blurton, Burke, Campbell, Hepworth, Mahony, Powell, Richardson, and Ross. Eight officers are doing duty on probation with the Pay Department. The fact of thirty-four officers being wanted to complete the establishment of the Department cannot be considered a satisfactory state of affairs.

Captain Penton has been selected to succeed Major L. Downes as Captain Instructor in the Royal Gun Factory, Woolwich.

Last week we inserted a paragraph concerning the well deserved monument to the Gordon Highlanders, erected at Aberdeen, with a list of the names of those who fell in Egypt, of battle or sickness, in 1882. There are only fourteen in all. There is not a "Gordon" among them, but there is a "Patrick Fitzgerald"; and there are the names of Smith, Wilson, Bartlet, Martin, Hodges, and Dyer, of Lebreth, Ryder, and Payne. The name of the only officer in the corps, who fell in Egypt, is "Brooks," and the only Scotch names with a clear North-of-Tweed ring about them are Munro, McKenzie, and McLeod.

The most valuable portion of the recent acquisitions of Russia in the Merv Oasis is not the country itself, but the splendid horses and the swarming horsemen placed at her disposal by the adhesion and submission of the Turcomans.

A War-Office Circular provides for the care of machine-guns when returned to stores from service, "with a view to their preservation from the effects of rust." We may presume from this that the authorities in Pall Mall are at length being brought to admit the merits of the machine-gun, and to see that the time is approaching when it will require to be added to the establishment of the Army for field service. Hitherto, the War Office has refused to entertain any proposal for the adoption of machine-guns; but the present order would scarcely have been issued unless it was intended to adopt the gun. Perhaps the provision against "rust" could be extended to the authorities!

Major Gildea, the Deputy-Assistant-Adjutant-General for Musketry, Northern and North-British Districts, has made his inspection this week at the following stations, viz.:—Northampton, Derby, Ashton-under-Lyne, Beverley, and Chester.

Tigrane Pasha, whose arrival in London was announced in yesterday's *Times* and other papers, as if he had only just landed, has been over here for a week. Blum Pasha, who is stated to be the financial adviser of the Khedive, and with whom Tigrane has been engaged, according to the same authority, is colleague of Mr. FitzGerald in Cairo, and has been in England for some time, to lend his assistance to the Government here in Egyptian matters.

Captain Lockyer has been appointed Captain Inspector at the Royal Small Arms Factory, Enfield, vice Captain Hunter.

General Osborn Wilkinson, late honorary secretary, and now a member of the governing body, of the Royal School for Officers' Daughters,—a most admirable institution,—has sent us a letter, which we are unable to print *in extenso*, making an appeal for help to defray the cost of the new wing at Bath; and we can only say that the school seems to be entitled to generous support from the Army, seeing that it is intended to alleviate the hard lot of the widows and children of fallen comrades, and that the management appears to be conducted with every care and attention to the children within the walls of the school.

"Talk," says *Reis and Rayyet* of May 17—*apropos* of certain legal proceedings and trials at Madras in connection with religious riots at Salem, and the doings of Messrs. "McIver, Ingram, and Grant Duff"—"of a Russian advance before dangers such as these!" This sounds very dangerously, we think, from a "loyal" Hindoo paper.

Last February, Colonel Paske, writing in the *Army and Navy Magazine*, observed:—"As regards Persia and Afghanistan, the time has arrived when Russia should be called upon to assist in establishing a *modus vivendi* for Russia in Asia, Persia, Afghanistan, and British India. At a Conference between the four Powers, let the limits of Persian and Afghan territory be definitively fixed, and the frontier of Russia in Asia and of British India be clearly defined. Then let the territories of Persia and Afghanistan be declared a neutral zone, barred alike to Russia and to the British Government of India—Persia and Afghanistan at the same time accepting the frontiers assigned them—any future encroachment on the part of either Power to be resisted by the joint and combined action of the other three parties to the engagement. Let there be combined action also in regard to the construction of any railways from the frontiers of Russia or British India through Persian or Afghan territory. Looking at the aggressive policy of Russia in Asia, and at the antecedents of Persia and Afghanistan, such a peaceable solution of the question as is here proposed may seem utopian and impracticable, but in no other way does a peaceable solution appear possible."

Captain Kirby has contributed a useful paper to the *Pall Mall Gazette* on a new market for British manufactures which he has, he thinks, discovered in the countries dominated by Ashanti till Lord Wolseley broke its power, especially at Koutampo, 400 miles from the sea, where there is a great trade with Timbuctoo, &c. Another possible field for a future expedition! Bravo! Why not?

One Captain and six subalterns retired from the Army last month by the resignation of their commissions, and one Major and three Captains accepted gratuities. The deaths were:—One Major-General, one Colonel, one Lieutenant-Colonel (retired), four Majors (two retired), three Lieutenants (one retired), two Quartermasters, two Surgeons-Major (retired), three Paymasters, one Deputy-Assistant-Commissary-General of Ordnance, and one Veterinary-Surgeon (retired).

The Royal Military Tournament, in aid of the Cambridge Fund for old and disabled soldiers, will commence at the Agricultural Hall on Monday. To those who wish to enjoy a really agreeable afternoon or evening, we most strongly recommend a visit to Islington during the ensuing week. The musical ride of the 1st Life Guards will be an important feature in the exhibition.

Major Cowell, the unfortunate officer who met with such a fearful accident at Gosport lately, has been able to be moved to Netley, where he is receiving all the care and attention which that hospital can afford. Sir John and Lady and Mrs. Cowell are constantly by his side.

It is believed that the report of the Royal Commission on the defence of our coaling stations abroad and our commercial ports at home has been pigeonholed at the War Office, because it involves an expenditure of two millions of money, and the present Government desire to leave the carrying-out of the recommendations of this Committee as a legacy to their successors. So much for Government by party.

The Navy.

ADMIRALTY, June 6, 1884.

In accordance with the provisions of her Majesty's Order in Council of Feb. 22, 1870, Capt. E. H. Verney has been placed on the Retired List of his rank (June 1).

Royal Marine Forces (General Staff).—Qrmr. J. Baker, having attained the age for compulsory retirement, has been placed upon the Retired List (June 5).

ADMIRALTY, June 7, 1884.

Engineer E. Norrington has been promoted to the rank of Chief Engineer in her Majesty's Fleet (May 21).

ADMIRALTY, June 9, 1884.

Royal Marine Forces.—Superintending Clerk T. W. Davies, R.M.L.I., to be Qrmr. on the General Staff of the Corps, vice Baker, retired (June 5).

ADMIRALTY, June 11, 1884.

In accordance with the provisions of her Majesty's Order in Council of April 30, 1877, Engineer J. W. Nelson has been placed on the Retired List of his rank (June 9).

APPOINTMENTS.

Captains—H. B. Stewart, additional, to the Hecla, for command of torpedo flotilla; John Ingles, to the Excellent, additional.

Commanders—John Hayes, to the Cockatrice; George H. Rainier, to the Flora; George S. McIlwaine, to the Penelope, for Coastguard; Henry E. Walters, to the Hector, for Coastguard; Thomas de Hoghton, to the Belleisle, for Coastguard; Frederick Echlin, to the Ready.

Lieutenants—Henry Leah, Allan B. Leslie, Charles P. Streeter, Robert S. Rolleston, Frederick S. Inglefield, and James G. Brewer, to the Valorous, additional; George F. King Hall, to the Euryalus; Edward P. Jones, to the Lord Warden; Louis F. C. Jackson, Robert P. Adams, and Frank J. Thring, to the Ready.

Sub-Lieutenants—Alfred P. Ethelston, to the Helicon; Seymour E. Erskine, to the Alexandra.

Chaplains—Rev. Ralph V. Wilson, B.A., to the Valiant; Rev. Barton S. Tucker, B.A., to the Pembroke, additional.

Staff Surgeon—Donald McIver, M.D., to the Belleisle.

Surgeon — Henry F. Iliewicz, to the Cambridge, additional.

Chief Engineers—Charles F. Hulford, to the Ready; Richard T. Rundle, to the Indus, additional, for the Lily.

Paymasters—John H. Cleverton, to the Carysfort; Russell Osborne, to the Liffey; Charles Topping, to the Satellite; Henry C. Jenkins, to the Carysfort; Robert L. Hoskyn, to the Ready.

Assistant-Paymaster—Frederick H. M. Whitfield, to the Indus.

Engineers—James Lane, John G. Baker, John L. Mitchell, Frederick W. Parkes, George E. Bench, George S. Cornish, John Anderson, and James Fairbrother, to the Valorous, additional.

Clerks—Alfred J. Le Sage, to the Euryalus; George South, to the Alexandra; William Nelson, to the Hecla; Thomas C. Sudbury, to the Asia.

Chief Boatswain—James Walker, to the Asia.

Gunners—George F. Nicholas, to the Asia, for the Imperieuse; Daniel Sullivan, to the Ready.

COASTGUARD.

Surgeon and Agent—Mr. C. D. Sherrard, at Eastbourne and Langley.

Chief Boatmen—William Brett, Christchurch, to be chief boatman-in-charge, vice Tubbs, disrated; Richard Nettles, Newquay, to be chief boatman-in-charge, Lynmouth, vice John Scott, promoted.

Alecto, Lieut. and Com. Harston, was at Accra up to May 9, and would leave on May 12 for Little Popo and Cape Coast Castle, to await the arrival of the Opal.

Arab, Com. Stopford, remained at Aden on May 28 with the Woodlark.

Assistance, Capt. St. Clair, arrived at Portsmouth on June 9.

Avon, Lieut. and Com. S. N. Thompson, has been employed during the last fortnight changing fleetmen for drill between Newhaven, Brighton, and Bognor divisions. On June 4 was with Naval Reserves, and left for Dover and coast on June 7 to embark fleetmen for annual cruise. This gun-vessel will be repaired by private contract at Mr. White's yard, Cowes. The Naval Reserves have fired close on on 1,000 rounds since last year.

Banterer, Lieut. and Com. F. E. Haigh. This vessel, which has of late been employed in conveying emigrants, is at present in dock at Galway.

Bullfrog, Lieut. and Com. Papillon, would be ready about June 17 to leave Bermuda.

Canada, Capt. .F. Durrant, is expected at Portsmouth with Prince George of Wales in August.

Dido, Capt. Vander-Meulen, was to leave Bermuda on May 29 for Halifax.

Dolphin, Com. Eardley Wilmot, is under orders to leave Sheerness on June 22 for the Red Sea.

Dragon, Com. Anson, was at Bushire on May 10; she would leave for Bahrein the following week.

Flamingo, Com. Custance, was at Port Royal, on May 25, and would leave on June 1 for the north coast of Haiti, returning to the north side of Jamaica.

Flying Fish, Capt. Maclear, while entering the port of Foochow in April, lost a man overboard.

Garnet, Capt. the Hon. Victor Montagu, was at Barbadoes on May 29.

Goshawk, Lieut. and Com. W. J. Moore, was at St. Paul de Loanda on April 7, and would visit Little Fish Bay, Elephant Bay, Benguela, and Nobito Bay, returning to St. Paul de Loanda by May 1.

Hecate was temporarily commissioned at Keyham on June 10 by Capt. Loftus F. Jones with the crew of the Belleisle, to test her qualities as a seagoing ship.

Hecla, Capt. Wilson, left Portsmouth Harbour on June 7, and anchored at Spithead, and has since left to join the Channel Squadron.

Helicon, Com. Winsloe, flying flag of Lord John Hay, left Port Said on June 9 for Suez and Suakim.

Humber, Com. Hawkins, arrived at Portsmouth on Saturday morning, and proceeded next day for Egypt. She embarked, for conveyance to Alexandria, Lieut. Luke and 50 men, R.E., from Aldershot; Capt. Eden and Lieut. Walker, of the 2nd Cornwall Light Infantry; Capt. Croke and Lieut. Slessor, and 63 men, R.M.A.; Com. Chichester and Lieut. Kinder, R.N., for Port Said; Lieut. Gardner, Surgeons Donovan and Macnamara, and Engineer King, to join the Mediteranean Squadron.

Iris, Capt. Ernest Rice, and the Coquette, arrived at Suakim on June 9. The Iris landed 250 Marines for the defence of the port.

Kestrel, Com. Tisdale (act.), arrived at Suez on Saturday last from the China Seas, and was to leave the same day, homeward bound, to pay off.

Kingfisher, Com. Evan-Thomas (act.), was at Coquimbo on April 28, and would remain.

Lord Warden, Capt. Kennedy, left Portsmouth Harbour on June 7, and anchored at Spithead; subsequently proceeding to Portland to join the Reserve Squadron.

Magpie, Com. the Hon. F. Foley Vereker, left Malta for Gibraltar and Devonport on Sunday last, to pay off.

Minotaur, Capt. Britten, flagship of the Duke of Edinburgh, left Portsmouth Harbour on Saturday for Spithead, followed by the Neptune, Capt. Maxwell, and the Hecla, Capt. Wilson. The Minotaur and the Neptune received their powder from Priddy's Hard and their shell from the Gun Wharf, while berthed alongside. They consequently left the yard ready for sea, and proceeded almost at once for Plymouth (whither they had been preceded by the Sultan, Capt. Tracey), to join the lee division of the Squadron, under Rear-Admiral Whyte. The Squadron proceeded to Bantry Bay.

Orontes, Capt. Andoe, left Portsmouth on June 10 for Chatham, to make good defects.

Osborne, Capt. Thompson, having the Duchess of Edinburgh on board, arrived at Cronstadt on June 8.

Penelope, Capt. Robinson, left Sheerness on June 8 for Portland, to join the Reserve Squadron.

Philomel, Com. Lang, was at Bombay on May 10.

Ranger, Com. Pipon, arrived at Aden on June 12 from Massowah, bearing despatches from the Commander-in-Chief of the East Indies station, who had rejoined his flagship.

Sapphire, Com. Clarke, senior officer on the Coast of Chili, was at Valparaiso on April 29; would leave for Coquimbo next day.

Shannon, Capt. Adeane, anchored off Kingston on June 8, on passage to Plymouth and Portland.

Starling, Lieut. and Com. Saunders, was expected at Cape Coast Castle about May 25.

Stork, Lieut. and Com. Blennerhassett, was at Accra on May 9, and on arrival of the Starling would relieve the Goshawk on the Southern Subdivision.

Swiftsure, Capt. Aitchison, flagship of Rear-Admiral Lyons, was at Callao on May 3; she was to leave Callao for Honolulu and Vancouver on May 4. The Constance was at Vancouver on May 3, conducting duties as senior officer; the Heroine was at Vancouver on May 3, and was to leave Esquimalt on May 5 for Callao direct; the Satellite was at Callao on May 3, and would conduct duties as senior officer's ship on Coast of Peru and Chili until the arrival of the Heroine; the Mutine was at Callao on May 3, and would accompany the flagship; the Sappho was at Coquimbo on May 3; the Kingfisher was at Coquimbo on May 3, and would leave for England in the middle of May, calling at Monte Video, St. Vincent, and Madeira.

Triton, Staff Com. Tizard, left Sheerness on June 8 on surveying duties at the mouth of the Thames.

Turquoise, Capt. Woodward, proceeded out of Sheerness Dockyard on Tuesday upon the completion of her refit. Having taken in powder and shot, the Turquoise will proceed to the East Indies station to relieve the Tourmaline, senior officer's ship, at Tamatave.

Valiant, Capt. C. J. F. Knowles. This vessel left Devonport on the 4th inst., and arrived at Galway on the 7th. She was met at that port by the cruisers Argus, Victoria, Stag, and Fly, who brought the Coastguardmen of the Limerick district for the summer's cruise, 170 in number. The Valiant left Galway on June 9, and arrived at Portland on Thursday, to join the remainder of the Reserve Squadron.

Valorous, Capt. the Hon. R. Hare, has been ordered round from Plymouth to Spithead to convoy the torpedo flotilla there assembling to Berehaven, with the Hecate.

A Reuter's telegram from Candia, June 8, states that the French squadron, under the command of Rear-Admiral Conte, and H.M.'s ironclad Superb have arrived at Suda Bay.

The Calliope, corvette, the third of the Comus class, the keel of which was laid in 1881, will be launched at Portsmouth on the 24th inst.

BOOKS, Etc., RECEIVED FOR REVIEW.

Our Noble and Gentle Families of Royal Descent, by Joseph Foster (Hazell, Watson, and Viney, Limited)—The United Service Magazine, June (Philadelphia: L. R. Hamersley and Co.)—Baily's Monthly Magazine, June (A. H. Baily and Co.)—The Future of Egypt, by an Ex-Plenipotentiary (Chapman and Hall, Limited)—The Sporting Mirror, June (H. Etherington)—Night and Day, June (J. F. Shaw and Co.)—The Law Magazine and Review, May (Stevens and Haynes)—Russian Travellers in Mongolia and China, by P. Piassetsky, translated by J. Gordon-Cumming, 2 vols. (Chapman and Hall, Limited)—Our Sea Marks, by E. Price Edwards (Longmans, Green, and Co.)—The Unclassed, by George Gissing, 3 vols. (Chapman and Hall, Limited).—Concerning Carpets and Art Decoration of Floors (Waterlow and Sons, Limited).—The Great Republic, by Sir Lepel Henry Griffin, K.C.S.I. (Chapman and Hall, Limited).

NOTICES TO CORRESPONDENTS, Etc.

Newcastle-on-Tyne.—Regret we could not manage it last week; too late now.

G. H. P., Guildford.—We regret that we cannot reproduce the article you enclosed *in extenso*. The Commission is better that inaction. Its decisions will give our Government some definite boundary line to fight over, but it will be, we fear, very much like King Canute's dealings with the waves in the end.

"One of Them."—You must wait and see.

Viator.—You are mistaken or misinformed.

"The Buffs."—Thanks. It would be well if you applied yourself to special investigation of the evils. Your remarks are clear and your style very good.

Theodor Beaumont.—There is no such "Fleet Surgeon." We have nothing to do with such a farrago of nonsense.

The Naval and Military Stations are published by the Army and Navy Gazette on the first Saturday in each month.

Many interesting communications, reviews and letters, &c., are unavoidably omitted, owing to want of space, this week.

The Army and Navy Gazette exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire; Bulletin de la Réunion des Officiers; L'Armée Française; L'Italia Militare; Rivista Europea; Rivista Militare; Memorial de Ingenieros; La France Militaire; Moniteur de la Flotte; Le Progrès Militaire; Der Veteran; Streffleur's Oesterreichische Militärische Zeitschrift; Jahrbücher für die Deutsche Armee und Marine; Militär Wochenblatt; Giornale d'Artiglieria e Genio; Organ der Militär-Wissenchaftlichen Vereine; Vedette; Deutsche Heeres Zeitung; Militärische Zeitschrift; Armeeblatt, Wien; Army and Navy Journal of New York; The American, Philadelphia; Revista Maritima Brazileira*; in addition to all the home and colonial professional periodicals and journals.

ROYAL MARINES.

(FROM A CORRESPONDENT.)

It is impossible for those not intimately connected with the corps to understand the intense feelings of despondency and uncertainty the late promotion has caused in every rank. It is no secret that the special promotion clause was introduced into the Regulations for a very different purpose, *i.e.*, that should any officer of special promise or qualifications be likely to be compulsorily retired for age, that then the Admiralty might promote him. Can it be for the good of the corps, and consequently common-sense, to make 18 officers discontented by ruining their prospects? Lastly, are not these special promotions indirectly a slur on that corps whose boast has always been that "they have done their duty and are ready to do it again," by appearing as if great rewards were necessary to incite men to do their duty in the "field"? This is not meant in any way to disparage Major Tucker's meritorious service, of whom his brother officers are and always will be proud, still they cannot but feel that a grateful country might have rewarded him otherwise than solely at their expense.

Obituary.

Major-Gen. D. H. Mackinnon, who died on the 7th inst., was the youngest and last surviving son of the late Mr. D. Mackinnon, of Binfield, Berks. He graduated as a B.A. at Trinity College, Dublin, where he obtained the classical premium in 1834, and was seventh moderator in 1836. In the same year he was gazetted to a cornetcy in the 16th Hussars, and served throughout the Sikh and Afghan wars, 1838-46. In 1847, Gen. Mackinnon exchanged into the Carabiniers, was appointed pymr. of the 43rd L.I. at Templemore in 1848, and was staff officer of pensioners at Enniskillen, Leicester, Woolwich, and London successively, holding the latter till his retirement on the Full-Pay List in 1878. He is also known as the author of several military works—"Military Service in the Far East," "British Military Power in India," &c. He married Caroline, youngest daughter of the Hon. T. R., Baron Dimsdale, of Camfield, Herts.

The officers who served in H.M.S. Audacious in her commission in China from 1874 to 1879 dined together on Friday, the 6th inst., at Blanchard's. Admiral Sir Alfred P. Ryder, K.C.B., was the guest, and those present were Capt. Colomb, Com. St. Clair, Com. Sandilands, and Com. Graves, T. L. Bowling, Esq., R.N., Lieut. Goodrich, Lieut. Pike, Lieut. Oliver, Lieut. Barry, Lieut. Dodgson, and Lieut. Garforth, Rev. C. J. Corfe, R.N., Staff Surg. Stewart, Chief Engineer Marcus, and C. E. Baxter, Esq. Letters expressing their regret at being unable to be present were received from Admiral Charles F. Hillyar, C.B., Deputy-Inspector-Gen. Davis, Chief Inspector of Machinery Turner, Com. Castle, Com. Farr, Com. Ryder, Capt. Crooke, R.M.A., and other officers who served in Sir Alfred Ryder's flagship.

"H. M." in a letter to the *Standard* says:—"Two remarkable omissions from the *Gazette* of May 21 last have caused much comment. Every officer commanding in the Soudan received some mark of her Majesty's approbation except Col. Sir C. Ashburnham and Col. Tuson. One commanded the 60th Rifles, the other was sent out to command the Marines. Their previous brilliant services are well known to all."

DEATH.

Osmond—On May 8, at Savannah-la-Mar, Jamaica, George Wise Osmond, Commander Royal Navy, aged 40.

CLERGYMAN'S WIDOW OFFERS BOARD, HOME COMFORTS, &c., to CHILDREN attending college or day schools at ST. LEONARDS.
Home tuition if desired. Good references.
"R.," Mr. Green, Norman Road East, St. Leonards-on-Sea.

TO BANDSMEN.—WANTED, a few good CLARIONET PLAYERS, for the Liverpool Police Band. Candidates must not be over 29 years of age, nor less than 5ft. 8in. in height. Weekly pay, 26s 8d, rising to 29s 10d, with uniform.—Application, with testimonials (musical and otherwise), to the HEAD CONSTABLE, Dale Street, Liverpool.

CHAMBERS.—THREE ROOMS on floor, Furnished. Terms moderate.—89 Wigmore Street.

DRILL INSTRUCTOR WANTED, for BIRKENHEAD POLICE FORCE.—Applicant must be under 30 years of age; height not under 5ft. 10in., and a thoroughly good squad and company drill. He would be engaged as a constable, pay commencing at 29s a week.—Apply to the CHIEF CONSTABLE, Birkenhead.

A YOUNG PERSON desirous of going to MADRAS in October, or earlier, would give services (during voyage) as MAID to Lady, or NURSE, in return for passage.—Apply to "A. G.," 15 Rocky Hill, Maidstone, Kent.

MILITARY READING PARTY

Tactics, Topography, Military Law, &c. To MILITIA CANDIDATES for the LINE or Officers studying for Promotion.

A FIELD OFFICER, Staff College Graduate, experienced and successful in teaching, will undertake to READ with SIX Officers, preparing for the above Examinations, during a month's summer tour. To start about July 15.—For particulars, apply "F. O.," 36 Bury Street, St. James's.

ROYAL UNITED SERVICE INSTITUTION.

LECTURE, WEDNESDAY, June 18. The Chair will be taken at 3 o'clock. Captain CLAUDE E. BUCKLE, R.N., on "Sir William Thomson's Sounding Machine and its Advantages both in Peace and War."

W. O'B. ADAMS, Secretary.

SOUTH KENSINGTON (Redcliffe Gardens).—FURNISHED SEMI-DETACHED RESIDENCE, ten bed and dressing rooms, bath-room (hot and cold water), drawing, dining, and morning rooms on ground floor, library, kitchen, and good offices, lift, good garden. Sanitary arrangements perfect. To be LET for Four or Six months. Rent, to a careful tenant, Four or Five Guineas a week, according to term.—OWNER, 44 Redcliffe Gardens.

THE CEDARS and MORNINGTON PARK ESTATES, near West Kensington and Addison Road (Kensington) Stations, Omnibus Route to City, &c.—HOUSES to be LET or SOLD. Rents from £55 to £150. Well built, of white bricks and Bath-stone dressings, admirably designed, with all modern improvements, bath-rooms, electric bells, venetian blinds, &c. These well-known and fashionable Estates afford advantages which cannot be surpassed in any of the suburbs. Within easy access of the West End by road or rail, and within the four-mile radius from Charing Cross. For Military and Naval officers and persons of moderate incomes who require good family residences, they are unequalled. Soil is a fine gravel. St. Paul's School (from St. Paul's Churchyard), now being erected on the Estate, will afford exceptional advantages to the sons of residents. Lawn-tennis and ornamental gardens on the Estate for the use of residents.—Particulars post free from GIBBS and FLEW (Limited), Cedars Estate Office, West Kensington Station, W.

ESTABLISHED OVER 100 YEARS.

having secured the whole of the last exceptionally fine Crop of TRICHINOPOLY CIGARS AND CHEROOTS (Dawson's Muster), which have gained the Gold Medals at the Melbourne and Calcutta Exhibitions, are now offering these delicious Cigars at the wonderfully low prices of 22s 6d per 100, carriage paid, or £10 per 1,000. It is an acknowledged fact that smokers of BEWLAY'S celebrated Trichinopolys prefer them to any other cigars sold at even treble the price, and especially liked by all Officers and Gentlemen who have visited our Indian Empire.

The Analytical Sanitary Commissioner of the *Lancet* reports that the goods they purchased from Messrs. Bewlay and Co. for examination were not adulterated in the slightest degree.

THE MOUNTED SERVICE BOOT.—PATENT.

As adopted by the Volunteer Mounted Infantry.

A COMPLETELY NEW and USEFUL INVENTION. By a CAVALRY OFFICER.

It is equally suitable for riding or walking, and consists of an upper and lower part, which, when adjusted by the peculiar arrangement of the spur, forms a complete riding boot, and at the same time the comfort of a boot and gaiter for walking is ensured. The lower part can be worn also as an ordinary walking boot.

ECONOMY, COMFORT, and PORTABILITY.

Specially recommended to all Officers and Sportsmen going Abroad.

HENRY DUNKLEY,
MILITARY, HUNTING, SHOOTING, and FISHING BOOTMAKER, and
SOLE MANUFACTURER OF THE MOUNTED SERVICE BOOT,
13 and 15 BUCKINGHAM PALACE ROAD, S.W. (Opposite the Royal Stables).

THE MIDLAND COUNTIES WATCH COMPANY,

A. J. Windebank, Esq., Chanda House, Fratton Street, Portsmouth, December 22, 1883:—"Watch, chain, and ring to hand. I am very much pleased with their appearance, the watch especially looking a very strong, handsome one, and equal to many I have seen at double the money."

Mr. H. A. Illingworth, 82 Queen Street, Batley, March 7, 1884:—"After four years' trial of one of your 25s. watches, I now desire to express my thanks for the same. During all the time I have had it I have not paid one halfpenny for repairs. It is as good to-day as ever. When I have shown it to my friends, they have valued it at double and frequently at treble the money. To those who wish to possess a cheap, good, everyday watch, I especially recommend the above."

These Watches are frequently sold for treble the money. Cheques or P.O. payable to

Mr. A. PERCY, VYSE STREET, BIRMINGHAM.

On receipt of which, any watch will be registered post free to any part of the United Kingdom, and for 2s 6d per watch extra to any part of the postal world.

Our Indian Agents are Messrs. King, King, and Co., Bombay, and Messrs. King, Hamilton, and Co., Calcutta, through whom remittances and orders may be sent, and catalogues obtained.

DR. J. COLLIS BROWNE'S CHLORODYNE

ORIGINAL AND ONLY GENUINE.

COUGHS,
COLDS,
ASTHMA,
BRONCHITIS.

DR. J. COLLIS BROWNE'S CHLORODYNE.

Dr. J. C. BROWNE (late Army Medical Staff) discovered a remedy to denote which he coined the word CHLORODYNE. Dr. Browne is the SOLE INVENTOR, and as the composition of Chlorodyne cannot possibly be discovered by Analysis (organic substances defying elimination), and since the formula has never been published, it is evident that any statement to the effect that a compound is identical with Dr. Browne's Chlorodyne *must be false.*

Vice - Chancellor Sir W. PAGE WOOD stated publicly in Court that Dr. J. COLLIS BROWNE was undoubtedly the INVENTOR of CHLORODYNE, that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See the *Times*, July 13th, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE is the true Palliative in

NEURALGIA, GOUT, CANCER, TOOTHACHE, RHEUMATISM.

IS THE GREAT SPECIFIC for CHOLERA, DIARRHŒA, DYSENTERY.

The General Board of Health, London, report that it acts as a charm, one dose generally sufficient.

Dr. Gibbon, Army Medical Staff, Calcutta, states:—"Two doses completely cured me of Diarrhœa."

From SYMES and CO., Simla:

Dear Sir,—We congratulate you upon the wide-spread reputation this justly esteemed medicine has earned for itself all over the East. As a remedy of general utility, we much question whether a better is imported, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to say, are now relegated to the native bazaars, and, judging from their sale, we fancy their sojourn there will be but evanescent. We could multiply instances *ad infinitum* of the extraordinary efficacy of Dr. Collis Browne's Chlorodyne in Diarrhœa and Dysentery, Spasms, Cramps, Neuralgia, the Vomiting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Choleraic Diarrhœa, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's, from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of opinion that the substitution of any other than Collis Browne's is a deliberate breach of faith on the part of the chemist to prescriber and patient alike.—We are, Sir, faithfully yours, SYMES and Co., Members of the Pharm. Society of Great Britain, his Excellency the Viceroy's Chemists.

DR. J. COLLIS BROWNE'S CHLORODYNE is a Liquid Medicine which assuages Pain of every kind, affords a calm, refreshing sleep without Headache, and invigorates the Nervous System when exhausted.

DR. J. COLLIS BROWNE'S CHLORODYNE rapidly cuts short all attacks of

EPILEPSY, SPASMS, COLIC, PALPITATION, HYSTERIA.

IMPORTANT CAUTION.

The immense sale of this remedy has given rise to many unscrupulous imitations. Of all Chemists, 1s 1½d, 2s 9d, and 4s 6d.

Sole Manufacturer,
J. T. DAVENPORT,
33 Great Russell Street, W.C.

NEW SEASON'S LISTS NOW READY, AND FORWARDED ON APPLICATION.

J. AND W. TOLLEY,
1 CONDUIT STREET, REGENT STREET, LONDON;
and PIONEER WORKS, BIRMINGHAM.

NATIONAL STOCK EXCHANGE,

110 CANNON STREET, LONDON, E.C.
(close to King William's Statue).

The Proprietors of the Exchange undertake to buy and sell Stocks and Shares from and to speculators at Tape Prices, as recorded by special wire direct from the London Stock Exchange. No Commission or Brokerage is charged; therefore the speculator is put on the same footing as a stockbroker is with a jobber when he deals with him inside the London Stock Exchange.

As an illustration of the saving to be effected by this system, the following may be taken as a fair example:—

Say £10,000 English Railway Stock is purchased or sold through a broker in the ordinary way, the cost of purchasing same would be as follows:—

Jobber's turn at $\frac{1}{4}$ per cent.	£25 0
Broker's commission an $\frac{1}{8}$	12 10
Or a total cost of	£37 10

Now, the same purchase or sale made through this Exchange would stand thus:—

Jobber's turn at $\frac{1}{4}$ per cent.	£25
Broker's commission	Nil
Total cost	£25

It is thus shown to speculators that while the purchase made in the ordinary way would cost £37 10s, it would, if made through this Exchange, only cost £25; the broker's commission having been dispensed with, it is clear that a large saving would always be made on such transactions. The same rule applies to any stock in which the speculator is desirous of operating.

SPECULATIVE ACCOUNTS opened from 1 per cent. cover, with NO FURTHER LIABILITY.

No carrying-over commission charge.

Options granted at tape prices. No commission charged.

Orders by post or telegram have immediate attention.

Telegrams sent free (if required) immediately a transaction is done.

Clients have the free use of a large reading-room, containing all the financial and other papers, together with the telephone and two tapes in direct communication with the London Stock Exchange, thereby affording every opportunity to clients to see their bargains done at close market price.

SPECIAL NOTICE TO INVESTORS.

The Proprietors of the Exchange, being Stockbrokers and Dealers, have every facility of obtaining the latest and best information respecting all safe and sound investments, and are willing to forward (free of cost) such information, and give advice thereon, relating to any Stocks or Shares investors are desirous of buying or selling.

The Proprietors of the Exchange are not connected with any gold-mining or other Companies, and they only recommend to investors such securities that are sound and safe; for too much care and caution cannot be exercised either in the selection of investments or the channels through which the business is done.

We do not recommend Mines or shares in any New Company; for, unless the Directors have a large sum of money invested in same and are men of the highest commercial standing, the majority of them turn out to be worthless, and investors or speculators generally lose through dealing in them.

Prospectus forwarded gratis by the Proprietors,
A. S. COCHRANE and SONS,
Stockbrokers and Dealers.

MILITIA OFFICERS prepared for the above at

THE ABBEY, ABINGDON, BERKS.

Major F. H. DYKE, late Garrison-Instructor at Colchester, Author of "Lectures on Tactics," "Treatise on Scales," &c., will join Lieutenant-Colonel Colvile at Abingdon for "Special Course" in July.

Particulars on application to Captain PRESTON.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.

Applications from Candidates for admission to this School either by Election, by Votes at £12 per annum, or at £80 per annum without votes, should be forwarded without delay to the Secretary.

As a misapprehension appears to exist regarding the eligibility of the Daughters of certain Officers of the Army for election, the Committee desire to state in explanation that the Daughters of all Officers on the Active or Retired List in her Majesty's Army, inclusive of the Royal Marines, are eligible.

The Daughters of Officers who have severed their connection with the Army by having sold out or commuted their pensions, are eligible *only* if born before the date on which such officers quitted the service.

The Office of the School is now at 20 Charing Cross, London.

By Order,
G. W. FORSTER, Secretary.

JERSEY HIGH SCHOOL for GIRLS (Limited).

PATRONS.

The Right Reverend the Lord Bishop of WINCHESTER.

His Excellency the Lieut.-Governor of JERSEY.

Head Mistress—Miss M. E. POPE,

Certificate of London University General Examination for Women, with honours, and distinction in French, Scholar of Girton College, Cambridge, and Second-Class Natural Science Tripos in the University of Cambridge.

This School has been established for the purpose of giving a high-class education, on the principles of the Church of England. The school buildings are situated in a healthy suburb of St. Helier's, near the sea. The climate of Jersey is mild and healthy. Special facilities are provided for the acquisition of the French language. Ordinary fees—board (washing included), sixteen guineas per term; tuition, three, four, and five guineas per term.—Application for prospectuses may be made to the Secretary, R. CREWS, Esq., Wyvil House, Georgetown, Jersey.

MIDLAND RAILWAY.

TOURIST ARRANGEMENTS, 1884.

TOURIST TICKETS will be issued from MAY 1 to OCTOBER 31, 1884.

For particulars, see Time Tables and Programmes issued by the Company.

JOHN NOBLE,
Derby, April, 1884. General Manager.

ONE-HORSE LANDAUS.—F. and R. SHANKS, finding a great want for LANDAUS of superior quality, really suited for one horse, have made arrangements to supply them, fitted with their patent for opening and closing the head, at a price they consider must meet the demand. Several can be seen building at their Factory, 70 and 71 Great Queen Street, Lincoln's Inn Fields.

MEMORY.—Physiological Art of Never Forgetting, wholly unlike mnemonics, TAUGHT thoroughly by post. Any book mastered in one reading. Prospectus post-free, giving opinions (from actual study of the system) of Mr. RICHARD A. PROCTOR, Dr. ANDREW WILSON, and others. Lectures in families of the nobility and gentry. Day and Evening Classes in Never Forgetting and for Cure of Mind Wandering.

Professor LOISETTE,
37 New Oxford Street (opposite Mudie's).

LANE'S PRIVATE HOTEL (Nos. 1, 2, and 3 ST. ALBAN'S PLACE, CHARLES STREET, St. James's, S.W.), for Officers in the Army and Navy, Members of Clubs, and others. Most eligibly situated in the immediate vicinity of the principal Club Houses. Gentlemen requiring sleeping accommodation only, are respectfully informed every attention will be paid to their comfort and convenience. A trustworthy porter in attendance all night.

OFFICERS' BAGGAGE, &c.—Officers are respectfully informed that Baggage, Luggage, and all kinds of Personal Property are stored at most moderate charges at the

STORE WAREHOUSES, BAKER-STREET BAZAAR, W.

The Warehouses having been built expressly for the safe keeping of goods, are peculiarly convenient, and are kept warm at an even temperature during the winter. Removals effected.

Separate lock-up rooms for large or small quantities.

JOHN HANES, Manager.
Store Warehouses, Baker-Street Bazaar, W.

FURNISH your HOUSES or APARTMENTS throughout on MOEDER'S HIRE SYSTEM.

The original, best, and most liberal.
Founded A.D. 1868.

Cash prices. No extra charge for time given.

Illustrated priced Catalogue, with full particulars of terms, post free.

F. MOEDER, 248, 249, 250 Tottenham Court Road; and 19, 20, and 21 Morwell Street, W. Established 1862.

Being all sent up. There has been no failure in this examination since April, 1881.

* 1505 in advance of the second candidate.

ARMY EXAMINATIONS.—From 15 to 20 Pupils are received by the Rev. WALTER BAKER, M.A., Batcombe Rectory, Evercreech, Bath. A Permanent Staff of five highly qualified Instructors, all resident in the village, besides occasional Assistants, gives a guarantee of individual attention impossible where the number of Pupils is large. There are two departments under separate sets of Instructors, the one under two Graduates, Classical and Mathematical, and a Foreign Master for Candidates for Sandhurst, Woolwich, the Preliminary and Qualifying Literary Examinations; the other under two Experienced Officers for the Final Military Competitive for Lieutenants of Militia. A large per-centage, viz., nearly two-thirds of the Pupils sent up during the last 17 years have passed their respective Examinations. At the recent Military Competitive eight Lieutenants of Militia went up, and four of them who had received all their instruction at Batcombe passed among the first 40, one (Mr. W. H. Lord) taking FIRST place on the list. References are permitted to Sir John Adye, G.C.B., General Elmhirst, C.B., General Thompson (late 7th Dragoon Guards), Colonel A. H. King, R.A., A.D.C. to the Queen, the Bishop of Bedford, and many others, all parents or near relatives of former pupils.

ASHFORD SCHOOL, KENT.

HEAD MASTER—E. C. MUSSON, M.A., F.G.S., formerly Scholar and Prizeman of Queen's College, Cambridge.

Pupils can receive thorough Preparation for Woolwich, Sandhurst, &c., with Public-School training. Terms very moderate, and strictly inclusive. References permitted to Colonel Sir T. D. Baker, K.C.B., Colonel R. B. H. Blundell, Assist.-Adjt.-Gen., &c.

ROCHESTER CATHEDRAL SCHOOL, founded A.D. 1544.

Head Master—Rev. J. LANGHORNE, M.A.

Mathematics—E. T. LITTLEWOOD, B.A., 9th Wrangler. Masters in Science, &c.

Board and tuition, £70 and £60 per annum, by age. Junior Scholarships in July. Especial Preparation for Universities and Military Academies, &c. Successes in 1883-4:—33rd (direct from School) in December Woolwich List, Open Mathematical Scholarship at Oxford, &c. School House new, well placed, with cubicles.—Apply to HEAD MASTER.

MILITIA MILITARY COMPETITIVE and PROMOTION EXAMINATIONS (Army and Auxiliary Forces).—Lieutenant-Colonel J. HAY SHAW (late Royal Inniskilling Fusiliers) and Captain CH. D'ARBOIS (late French Engineers) PREPARE for the above. Apply, Wimpole House, Wharton Road, West Kensington Park, W. Of 29 sent up for the Militia Military Competitive, 20 successful. One sent up March, 1884, Lieut. G. E. Ripley, 3rd Norfolk Regiment, passed 14th (first trial), 1,935 marks.

MILITARY COMPETITIVE. Major DE THOREN and Major MORGAN sent up Four in March. All passed. Many former Successes. Classes limited. Terms moderate.—For all particulars, apply to Major DE THOREN, Bellefield, or Major MORGAN, 1 Douro Terrace, Jersey.

MILITIA COMPETITIVE EXAMINATION.

The undersigned PREPARES a LIMITED NUMBER of PUPILS (Five) for the above. Successes in March, 1883,—two, one taking the second place (first try); in September, 1883—two, Fowle, 25 (first try); Moir, 27. At the March Examination, 1884, one pupil competed, A. H. Robinson, passing 1st for Cavalry, with 2,018 marks, after four months' work.

Officers prepared for the Promotion Examination. Terms moderate.—Apply, Captain H. C. KING, 13 Blomfield Street, Westbourne Terrace, W.

FALKNER'S "REAL MALT" WHISKEY.

PURE DUBLIN DISTILLATION.

The same as supplied to the principal Clubs and Regimental Messes. Has been esteemed in Ireland for the last century as the FINEST IRISH WHISKEY procurable, being pure as distilled, and refined by age only. A stock always kept in bond ready for shipment to India and the Colonies.

LONDON, 40 CHARING CROSS.
DUBLIN, 83 GRAFTON STREET.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

At the six Militia Competitions which have taken place since September 1, 1881, Colonel WILKINSON and Lieutenant-Colonel SHAW have secured for their Pupils FORTY-NINE COMMISSIONS, although they have only Prepared and sent up a very Limited Number of Candidates. In the March, 1884, Examination, out of SIXTEEN SENT UP, TEN PUPILS succeeded; one other was two places out, and three more within a few places of being successful. Lieutenant C. J. Stanton took the SECOND PLACE at this Examination, with 2,083 marks.

At the Militia Literary Examinations held during the same period, a Number of Pupils have also passed; in this Competition the FIRST PLACE was taken in April, 1883, by Lieutenant Lord Skelmersdale, and the SECOND PLACE in the following October Examination by the only candidate sent up, Lieutenant the Honourable Victor A. Pelham.

At the recent WOOLWICH EXAMINATION Mr. W. V. Scudamore passed SIXTEENTH on the list. This candidate made very high marks in languages.

The results of the last SANDHURST EXAMINATIONS have also added to the general score, which now amounts to NINETY-FOUR SUCCESSES, obtained by Pupils since September 1, 1881.

Address, DARMSTADT, GERMANY.

NAVAL CADETS, ASSISTANT CLERKS

HOPE HOUSE SCHOOL,
SOUTHSEA.

Principals { Mr. T. H. VICKERY.
Mr. EDWARD M. BEWLAY, B.A., Univ. Coll., Lond.

AN ARMY SECTION IS NOW ADDED. PUPILS PREPARED FOR SANDHURST AND WOOLWICH.

At the late Competitive Examination in June for Assistant-Clerkships in the Royal Navy, TWO of the Five successful Competitors were Pupils of this Establishment, taking First and Third places. In June, 1882, of the five who passed, the First, Third, and Fourth were from this School, and Three qualified.

CAVENDISH COLLEGE, CAMBRIDGE.

Four Scholarships of £30 each, tenable for three years, given, one by the Clothworkers' Company, one by his Grace the Duke of Devonshire, K.G., one by Samuel Morley, Esq., M.P., and one by E. B. Foster, Esq., will be offered for competition on August 6, 7, and 8, 1884. Candidates must be under 17 on August 6.

The usual age of entry being between 16 and 17, a Degree may be taken at 19.

The College charges for lodging, boarding (with an extra term in the Long Vacation), and, including all necessary expenses of tuition, and University fees, are £84 per annum. For further information, apply to the WARDEN, Cavendish College, Cambridge.

CHARDSTOCK COLLEGE, CHARD.

Beautiful country; remarkably healthy. Special Preparation for Army, Navy, Public Schools, Universities, &c. Terms moderate. Cricket, fives, gymnastics, &c.

TO OFFICERS, ANGLO-INDIANS, and OTHERS.—First-class School, established 15 years, where boys are prepared from an early age for the Army Examinations. Numerous Staff of Experienced Graduates in Honours. System pursued has resulted in 35 successes and no failures. Indian children received. Highest references.—C. V. GODBY, M.A. (Oxon.), Bute House, Petersham, S.W.

LONDON INTERNATIONAL COLLEGE,

Spring Grove, Middlesex, W.

Inaugurated by H.R.H. the Prince of Wales, July 10, 1867. French and German (or Greek) taught to every Boy.

Amongst the successes during the year are two OPEN SCHOLARSHIPS at CAMBRIDGE, and a 13th WRANGLER.

Several FOUNDATION SCHOLARSHIPS, tenable at the School, which may be increased in amount from a Special Fund in the case of those requiring it.

Also LEAVING SCHOLARSHIPS, tenable at the UNIVERSITIES, WOOLWICH, and SANDHURST.

Apply to the SECRETARY, or to the Head Master, H. R. LADELL, M.A.

MILITARY EDUCATION in FRANCE. E. S. CARBERY, Esq., Barrister-at-Law, Doctor of Law of the University of Heidelberg, and Captain C. NORMAN, assisted by Graduates of English and French Universities, PREPARE PUPILS for all Military Examinations as well as for Law and Universities. Closest attention to French and German, strict discipline, Classes small. A Special Class for Militia Officers.—For terms, address E. S. CARBERY, Esq., or Captain C. NORMAN, Les Buttes, Dinan, France.

CAPT. A. C. HILL, Mr. W. H. BLYTHE, M.A.

Among SUCCESSES for 1883 and 1884 are:—

9 and 11 Sinclair Road, Addison Road, London, W.

TO OFFICERS, CANDIDATES for the INDIAN CIVIL SERVICE, and others (see the *Globe*, May 30).—The CHEVALIER BOROWSKI gives lessons in French, German, and Russian by a quick and easy method.—61 Gwendwr Road, West Kensington.

ARMY.—LINE and MILITIA.

IMPORTANT to STUDENTS.

Captain DUMARESQ DE CARTERET BISSON, M.A., Author of "Our Schools and Colleges" (graciously recognised by the Queen and H.R.H. the Commander-in-Chief), sends, free by post, a selected List of Prospectuses of all the most SUCCESSFUL ARMY TUTORS, and gives his Counsel on Military and Civil-Service Education free of Charge. References kindly permitted to the late Secretary of State for War.—Apply by letter only, No. 69 Berners Street, London, W.

ARMY, CIVIL SERVICE, UNIVERSITIES, PUBLIC SCHOOLS.

MESSRS. BISSON, BORMAN, and CO. send, free of charge, PROSPECTUSES of the most SUCCESSFUL TUTORS for Woolwich, Sandhurst, Military Competitive, Staff College, Home and Indian Civil Services, Universities, Public Schools, &c.—3 Berners Street, W.

MILITARY EXAMINATIONS.—Colonel LONSDALE HALE, R.E., recently Professor at the Staff College, and formerly Instructor in Fortification, R.M.C., and also Garrison Instructor, Home and S.E. Districts, and Lieutenant-Colonel C. W. FOTHERGILL, F.G.S., P.S.C., late Instructor in Military Topography, Royal Military College, prepare Officers of the Army for Promotion and for Entrance to the Staff College, LIEUTENANTS of MILITIA for the MILITARY COMPETITIVE EXAMINATION, and Officers of the Auxiliary Forces for the Examination in Tactics.

For particulars and terms, apply to Colonel LONSDALE HALE, 57 Sinclair Road, Kensington.

MILITARY COMPETITIVE EXAMINATION.

THREE sent up in March, TWO PASSED; Hill, 4th, Cumberland, 20th. Third only just failed. Many former successes. Tuition for all Competitive Examinations.—Captain PINHEY, Spring Grove, Isleworth.

CONNAUGHT MILITARY COLLEGE, WOOLWICH COMMON.

Principal—SAMUEL H. WINTER.

The Pupils of this Establishment have been uniformly successful. In July, 1882, Mr. F. Close was SECOND on the Woolwich List, being FIRST in Mathematics; in July, 1883, Mr. G. Close was TENTH and Mr. R. F. Edwards TWELFTH, all at their first trial. Mr. Winter has prepared more than 200 Pupils for various Military Examinations.

MILITARY EXAMINATIONS.—Lieutenant-Colonel G. M. CARDEW (passed 2nd from the Staff College), PREPARES SIX LIEUTENANTS of MILITIA for MILITARY COMPETITIVE, also Officers for Promotion and other Military Examinations.—14 Observatory Avenue, Kensington, three minutes from the High-Street Station.

MILITARY EXAMINATIONS and GENERAL EDUCATION.—AVRANCHES.—A GENTLEMAN, for many years successfully engaged in preparing Candidates for the Military Competitive Examination and Universities, wishes to RECEIVE PUPILS. Great facilities for acquiring the French language. Terms moderate. Highest references to Parents and Guardians of former Pupils, and to Clergymen and Country Gentlemen.—Apply to Captain CHAWNER, Bois-Guerin, Val-St.-Père, Avranches.

ARMY EXAMINATIONS.—Mr. J. WINDER, M.A., Cranworth House, Eastbourne, Sussex, PREPARES SEVEN PUPILS for WOOLWICH and SANDHURST. Special Masters for French, German, and Science. In 1880, of FOUR Candidates for Woolwich, ALL of whom passed, one was 6th and another 29th. In 1883, of THREE Candidates for Sandhurst, TWO were successful.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS, 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Laboratory, heated Swimming Bath, Fives Courts, &c.—Address, HEAD MASTER.

AN OFFICER in the ARMY WISHES to RECOMMEND strongly a PREPARATORY SCHOOL for YOUNG BOYS on the South Coast.—Apply to Colonel ABBOT ANDERSON, Professor of Military Topography, R.M.C., Yorktown, Farnborough.

A PRUSSIAN OFFICER of RANK resident in a pleasant little town near Berlin, wishes to RECEIVE PUPILS into his house, and to prepare them for Woolwich and Sandhurst. He is permitted to refer to the Rev. T. Teignmouth Shore, Chaplain to the Queen, 31 Montpelier Square, Rutland Gate.—Address, "J. H. D.," 41 Coleman Street, E.C.

HINDUSTANI TAUGHT, Cito, Tuto, Jucunde. Officers prepared for Examinations. Correct Idiom guaranteed. Also Persian, Arabic, and Sanscrit.—PUNDIT, 7 Beechholme Road, Clapton, E.

ARMY and NAVY SCHOOL, BROMLEY, KENT.

Young BOYS PREPARED from the first on the SPECIAL LINES required for these SEVERE EXAMINATIONS.

Head Master—JOHN GIBSON, M.A., assisted by three resident Graduates, and a resident French and Drawing Master.

MILITIA CANDIDATES for the LINE.—TUITION in MILITARY SUBJECTS for the COMPETITIVE ARMY EXAMINATION.

Lieutenant-Colonel FITZROY WILSON, late Rifle Brigade, a Graduate of the Staff College, and afterwards Garrison Instructor of the Eastern District, offers the above; also TUITION in MILITARY SUBJECTS to Officers of the Regular Army, partly by letter or otherwise.

Prospectus, with full additional particulars, may be obtained on application to Messrs. ASKIN, GABBITAS, and KILLIK, 38 Sackville Street, London, W.

PARIS.—A FRENCH PROFESSOR of long standing, many years resident in London, DESIRES to RECOMMEND a COLLEAGUE at Paris, who PREPARES a LIMITED NUMBER of CANDIDATES for Competitive Examinations, and offers the advantages of a real home to one or two English youths.—Address, M. DU QUESNOY, 31 Kensington Park Road.

The utmost value remitted by Post-Office order the same day for all Parcels forwarded. All letters punctually attended to.

N.B.—Mr. Norton has always on hand a large stock of present Regulation Uniforms, equal to new, at very low prices.

HOLLOWAY'S PILLS.—Dysentery, Diarrhœa, and Disordered Bowels.—These maladies are ever present, and if left unattended frequently terminate fatally. It should be everywhere known that all these complaints originate in the presence of some undigested substance in the stomach or bowels, or of some deleterious matter in the blood, and that Holloway's Pills can eliminate either with ease and expedition. They combine in a suprising degree purifying, alterative, regulating, and strengthening qualities, and thus exert over every internal organ the wholesomely controlling influence so necessary for subduing excessive action in the human frame. Holloway's medicine may be advantageously taken as a means of keeping the blood pure and the body cool—the only practicable plan of maintaining health in youth, in manhood, and in old age.

ARMY.—INFANTRY AND MILITIA.

FIRST APPOINTMENTS.

LIEUTENANTS are informed that the COMPLETE OUTFIT required for HOME SERVICE, as per Army Dress Regulations, 1883, may be obtained for

NOTES FROM ALDERSHOT.

[FROM OUR CORRESPONDENT.]

Leave was granted on a liberal scale to attend Ascot. Musketry instruction and military training were suspended on Tuesday and Thursday. With the military training of squadrons and companies still incomplete, a lengthy course of musketry on hand, and the greater portion of the Artillery absent at Okehampton and Hay for annual target practice, it has been found impossible to carry out the programme of field days, &c. The Committee on the Supply of Ammunition, of which Major-General Luard is president, held their first meeting on Monday last, when the Continental systems were studied. The sanitary condition of Aldershot and the increase of contagious diseases are seriously exercising the authorities. The Local Board have resolved to petition Parliament that the compulsory clauses of the Contagious Diseases Acts may be put in force again. Deputy-Surgeon-General Wolseley has been ordered to make an inspection in conjunction with a Committee appointed by the Local Board. The 1st Battalion, 17th Leicestershire Regiment is being fitted with khaki clothing. The new dress will be worn experimentally for six months, when the Dress Committee will report on the subject. Warrant and non-commissioned officers of the Commissariat and Transport Department in certain numbers have volunteered for service in Egypt.

The Committee on the Supply of Water, of which Major-General the Hon. W. Feilding is president, have been making experiments during the week, to test a system similar to that for the conveyance of mineral oil at Baku to the Caspian. So far the experiments here in a small way have been successful.

The 1st Division, Telegraph Battalion, Royal Engineers, marched on Monday to Chatham, for a six weeks' telegraph practice.

Major Groves, 50th; Major St. Clair, 91st Highlanders; Captain Barrow, B.S.C.; Major Beckett, 3rd Hussars; Captain Verner, 3rd Rifle Brigade; Captain Mortimer, 1st Battalion, 7th; Major Wilkinson, 40th; Captain Swaine, 108th; Major the Hon. H. G. Gough, 14th Hussars; Captain Phipps, 7th Hussars; and Lieutenant Stone, R.A., have been attached for instruction. Lieutenants the Hon. R. T. Lawley, 7th Hussars, and Cox, Filmore, and Deane, 73rd Highlanders, have been examined for promotion, and found qualified. Major FitzGeorge and Veterinary-Surgeon Cheesman have been granted leave of absence, on medical certificate. Surgeon-Major Morgan has assumed charge of the North Camp. Lieutenant of Orderlies Connor is posted to the 2nd Station Hospital. Major Cox and Lieutenant Stewart-Savile, 1st Battalion, 17th, and Lieutenant Rooke, 62nd, have proceeded to Hythe.

The Army Athletic Meeting will take place on July 1 and 2. The Rifle Meeting will be held on August 7, 8, and 9. The Summer Flat-race Meeting will be held on July 26. Two races are open to the Army and Navy—the Aldershot Stakes of 5 sovs. each, 2 sovs. forfeit, with 50 sovs. added; and the Hurdle-race Plate of 60 sovs.

THE BOMBAY ARMY.

A correspondent says:—"In reference to a letter in the *Army and Navy Gazette*, headed 'The Bombay Army,' relative to the order for the 45th Sikhs to join the Quetta Brigade, the real reasons why Bengal troops are sent to Quetta are these:—1. The Government of India have always cast a covetous eye on the Scinde and the Beloochistan frontier. You are aware that Lord Lytton and Sir G. Colley (much to Sir Bartle Frere's disgust) executed a *coup d'état*, and got rid of Merewether, appointing his subordinate, Sandeman, as Political Agent on the frontier, thereby taking it out of the control of Bombay and assuming charge themselves. 2. It has always been a pet scheme of the Government of India to deprive Bombay of Scinde and the Beloochistan frontier, and to give Bombay in place of it a portion of Central India. Sir R. Temple combatted this, and prevented the execution of this scheme. 3. This scheme was mooted again when Sir A. Hardinge went out, and opposed strenuously by him, as he foresaw that, if the Bombay Army was deprived of the frontier, Bombay would lose the only school for teaching her Army soldiering, and the Bombay Army would sink into rural police. But in continuation of the same idea of depriving Bombay of Scinde and the frontier, the Government of India still keep a Bengal political officer there; and to keep a further hold, Bengal regiments are sent up to Quetta and brigaded with the Bombay troops. The Bombay authorities have applied frequently to have sole charge handed over to them, both on the part of the Governor of Bombay politically, and on the part of Sir A. Hardinge militarily; but so far unsuccessfully. This is the real truth of the case, and the assumption of the incapacity of the Bombay Army to do its own work is utterly unfounded and mischievous. At the very moment the frontier has been extended for many hundred of miles, and the care of two routes (the Hurnai and the Bolan) confided to the care of Bombay, the Bombay Army has been reduced, in accordance with the recommendation of the Simla scheme, and at the instance of the Finance Minister, by four infantry and one cavalry regiment."

A WELL-FOUND NAVY.

In the Mercantile Marine, it is well understood that a ship must be "well found" to be efficient,—that is, that her rigging and equipment generally must be thoroughly complete and in good order, and, of course, the same holds good for a man-of-war. But an efficient man-of-war, in addition to being well manned, and having hull and machinery fit for service, requires a good armament, with many additions—such as electric lights, torpedoes, and torpedo-boats, without which she cannot be considerd "well found" in this important point. We do not touch now on the question of our personnel, which was the subject of the Prize Essay discussed at the United Service Institution on Wednesday last. It is no doubt a point of primary importance that our ships should be well manned; but at this moment this is not the place where, we hold, the shoe pinches, for, as Captain Harris says, in concluding the paper written for this year's Prize Essay, a paper highly commended by the judges, "our want will now be ships, not men." But what if we are not only deficient in ships, but if they are not as well armed or equipped for warfare as those of foreign Powers? If this is so, our splendid personnel may be called upon to fight with enemies nominally of equal force, but practically superior in all modern requirements for war. The possible effect of this being fully appreciated by our seamen is too obvious to require argument, and is a danger of the first magnitude. We urge, then, that our ships of all classes should be as well or better fitted and armed than those of other nations, as we fear that this is not the case at present. We have already referred more than once to the unpleasant fact that the Ajax and Agamemnon steer very badly; but are these first-rates really ready for immediate commission, although figuring as such in Parliamentary returns? If we are correctly informed, they have not yet been fitted with the electric light, which is an absolute necessity of modern efficiency. Are even our First-Reserve ships fitted with machine-guns or for Whitehead torpedoes? We believe not, the Hercules excepted; while there is one ship in the Channel Squadron which has not yet been supplied with the Whitehead torpedo. If we turn to smaller vessels, we shall find that even our large-class corvettes are not fitted with the electric light; and during recent operations in Eastern waters, the Euryalus, our flagship in the East Indies, had not been supplied with this valuable item, though it had been in constant use by small French men-of-war in Madagascar. It is time that attention was directed to the urgent necessity for having all our ships, whether new or old, efficiently fitted in all these respects; as it is undoubtedly the case that, while the smaller vessels of the French, Russian, Italian, German, and even of the Greek or Norwegian Navies, are armed with Whitehead torpedoes and machine-guns, and can use the electric-light, many of our ships of corresponding classes are supplied with no additions to the armament prescribed for them twenty years ago. We trust that attention will be at once directed to these points, and that no ship will be recommissioned, either in England or abroad, without being thoroughly well found and equipped as an efficient man-of-war. Of the armament proper we do not now speak, but we certainly cannot claim to have any advantage on that score, unless it be that some of our small craft, like the Dryad, fire shells having a 6 lb. bursting charge, while the shells of similar vessels in the French Navy are, for the most part, exploded with two pounds of powder. It is important to remark, with reference to small-arms, that a repeating-rifle has long been in use in the French Navy.

Indian Notes.

The *Homeward Mail* says:—"The prospects of officers of the Indian Army, whether in the important particular of pay or of promotion, cannot be said to have materially improved of late years, in spite of various faint-hearted efforts on the part of the Government on their behalf. The redress of their grievances lies with the India Office, and not with the Commander-in-Chief; it is far beyond the power of the local authorities, and is, we fear, proportionally distant in point of time. It is believed that improved offers of pension may shortly be made for the benefit of Madras, where the stagnation is greatest, but it is unlikely that the special boon of allowing all leave to count for pension will be conceded at present, and without this privilege no slight increase of liberality in the scale of pensions will be of much avail in inducing the many senior officers who crowd the list of colonels to retire instead of waiting for their off-reckonings."

The *Bombay Gazette* says:—"The proposal to establish a corps of commissionaires from Sepoys discharged from the Native Army is securing cordial support from the two classes whose members should be most interested in its formation. So far as the matter has been mentioned to representatives of the mercantile community, there has been but one opinion expressed. The commanding officers who will be consulted as to the character and fitness of applicants for employment previous to the names of the Sepoys being placed on the register, will doubtless also welcome the opportunity afforded them of helping on those who have borne a good name under them."

The Lahore paper says:—"It seems pretty well certain that Gen. Ross will succeed Gen. Cureton in the Oude command, in October next. At any rate, he has been offered and has accepted the appointment. It is also pretty well known that Sir C. Ross would have liked Allahabad; but there is not much chance of Sir H. Macpherson's leaving Allahabad, unless he gets the Meerut Division; and his Royal Highness would hardly go home—if, indeed, he go—at the beginning of the dull season."

Col. Channer, second-in-command, 32nd Pioneers, has been appointed commandant, 14th Sikhs, vice Col. Williams.

Capt. Chesney, 23rd Pioneers, has been appointed D.-A.-Adjt.-Gen., vice Major Shepherd, posted to the Sirhind Circle.

The regulations to guide officers in command of depôts of native regiments on service have been issued. Whenever a regiment is under orders for active service a depôt will be formed. A squadron or wing-officer is to command on a Staff pay of 100 rs. per mensem, and his place in the regiment will be filled by a probationer. The regiment will leave with the depôt:—Cavalry—1 native officer, 1 drill havildar or naik, 6 drill instructors, 1 assistant-armourer, 3 rough-riders, 1 Lascar, 1 assistant-salootri, and 1 schoolmaster and civilian staff. Infantry—1 native officer, 1 drill havildar or naik, 1 pay havildar, 4 drill instructors, 1 assistant-armourer, 1 schoolmaster and civilian staff, and 2 Lascars.

The dispute between the Maharajah of Mysore and the Government with reference to the old fort at Bangalore continues, and the demolition remains under suspension. The Maharajah contends, it is said, that the Government intimated their intention of making over the fort to his Highness (whose property it virtually is under the treaty) after our troops evacuated it, and reference has been made to correspondence between Sir J. Gordon and the Government in verification of that statement.

Major-Gen. Sir J. Ross has six months' leave to Europe on medical certificate.

Capt. Martin, Bengal S.C., has been appointed Assay Master of the Bombay Mint.

In future the adjutant of the Malwa Bhil Corps will receive the same allowances as adjutants of corps of the Line—viz., staff pay, 200 rupees, and office allowance 50 rupees a month, in addition to the Staff Corps pay of the officer's rank. The appointment is at present held by Capt. Bignell, Bengal S.C.

The Governor of West Australia has offered to pay the expenses of any officer the Indian Government might send to report upon that colony as a sanitarium for Indian troops.

The *Times* repeats what we announced the week before, "That the Duke of Cambridge has approved of Col. Clarke, Assist.-Adjt.-Gen., being appointed Assist.-Adjt.-Gen. at the Horse Guards, in succession to Major-Gen. Sir R. Buller (promoted). Lieut.-Col. Lascelles, half-pay, late Rifle Brigade, Assist.-Adjt.-Gen. of the Southern District, will replace Col. Clarke."

NAVAL MOBILISATION.

The discussion of the Naval Prize Essay at the Royal United Service Institution on Wednesday, under the presidency of Admiral Sir Alfred Ryder, was of a very restricted nature. This was due to the fact that, at starting, the President gave notice that the Council of the Institution had decided that four of the most important subjects dealt with by Capt. Johnstone in his Essay were not to be in any way adverted to by any one present desirous of joining in the debate. These subjects were,—1. Whether our best vessels are of the most approved type? 2. What steps can be taken to convince the country of its present dangerously unprepared state? 3. The necessity for re-establishing captain superintendents of victualling yards, &c. 4. The possibility of a Naval Reserve similar to the Army Reserve. No reason was given for the decision arrived at by the Council, but it was pretty audibly whispered among the officers present that the Admiralty were at the bottom of it, as it would be inconvenient to their Lordships at this moment were public opinion brought prominently to bear on these questions at the present time. Should the decision of the Council have emanated from any such cause, we can assure its members that they are adopting the one sure and certain course to ruin the Royal United Service Institution, so far as the withdrawal of Naval support can do so. Naval officers have time after time been assured that, within the four walls of the theatre of the Institution, they shall be free to express their opinions without fear of after consequences, and that the Admiralty will never interfere. Sir Astley Cooper Key even went the length of inviting Naval officers to come forward, and to write, read, and discuss papers at the Institution on questions affecting the welfare of the service to which they belong. But on Wednesday, when a paper of the utmost importance was to be discussed, the officers who had at considerable sacrifice made it a point to attend were informed at the outset that their lips were to be considered rivetted in regard to the most important questions dealt with in Capt. Johnstone's able essay. Capt. Cleveland, the writer of the second essay in point of merit, was stopped before he had well began to speak, as his opening sentence dealt with the present dangerously unprepared state of the country; and he very properly sat down, declining to take part in a one-sided discussion. The President also gave notice that, although strongly in favour of the re-establishment of the Master's line, he was compelled to forbid any reference to the subject; but this statement was only made after several officers had spoken in favour of a "division of labour" on board men-of-war, and against officers and men being made "Jack-of-all-trades." There were, however, many officers present who dissented from these views, and who would, doubtless, have expounded their own had they been permitted to do so. As a natural consequence, the debate "hung fire." Admiral Hamilton, after the long pause which succeeded Admiral Ryder's opening announcement, rose to protest against the torpedo defence of our coasts being assigned to the Navy. He preferred to see the Royal Engineers carrying out this duty, as the Navy, in his opinion, was purely an aggressive force. But this contention was subsequently shown to be untenable by Capt. Johnstone, who ably pointed out that the Navy had always and would always be a defensive force,—although it should at all times be in such an efficient state and condition as to be in a position to carry the war into the enemy's country. He also pointed out that the Royal Engineers were so few in number that they could not possibly be assigned the duty of protecting our coasts, and Admiral Ryder remarked, by way of clinching the argument, that he never in his life pitied men more than he did the Engineers, when he saw them driven into boats which they knew not how to manage, made to use oars they knew not how to handle, and forced to combat with spars in an element they knew not how to master. Capt. the Hon. Edmund Fremantle, C.B., thought the nation should congratulate itself on the present state of the Reserves, as in his opinion we now had more men than would be sufficient to man all our ships in the event of war being declared with a Naval Power. In his opinion the old problem as to "how to man the Navy" had been solved. The question now is one of ships, not of men, except in so far as regards the engine-room staff. In stokers we are fearfully deficient. Admiral Selwin hoped that this would soon be remedied by the adoption of "liquid fuel," when stoking would no longer be necessary. An engineer would then merely light his fires ten minutes before starting, shut his furnace-doors, and never open them again until the ship had reached her destination, and then only to put his fires out. He was not satisfied with the state of the Navy, and would like to see a proper mobilisation scheme, one extending to all our seafaring population, adopted and practised; mobilisation drill, in fact. Compulsory service, he thought, must sooner or later be resorted to. We must have more ships. Capt. Colomb, R.M.A., admitted that we might have sufficient for the requirements of the ships now built and building, but were these adequate in number to protect the vast interests of our Empire? More should be made of our colonial resources, and a mobilisation scheme that did not take in our Colonies would, in his opinion, be useless. It was of little avail to say the Admiralty had 200 merchant steamers on their list that they could charter, man, and arm on the outbreak of war, to act as auxiliaries to the Navy, as these ships were wanted for other purposes—namely, to feed the inhabitants of our islands, now dependent on foreign supplies. Besides, supposing a war to break out with France, of what use as auxiliaries would be the ships withdrawn from our trade with that nation? They were of no practical utility whatever; and could the Admiralty withdraw the American and Australian liners from their proper business at such a time? Most assuredly not. Hence, the Government should avail itself of the vast resources of the Colonies, and place them in a proper state of defence, and not, as at present, allow the Colonies to proceed in their independent and tentative manner, for all the money now spent most probably will be found to have been wasted when the real time for action arrives. The Government should heartily support and co-operate with the Colonies, instead of turning to them a "cold shoulder" when they declined to purchase old, worn-out, obsolete, and rusty cast-off weapons. Admiral Boys was of opinion that in the outbreak of war, Great Britain must stand or fall by the force she has then immediately at her command. Hence he would like to see everything prepared for war, and both ships and men ready to leave our ports at a moment's notice. In the old wars, although the Navy of England exceeded in numbers those of France and Spain combined, it was never possible for the English Admiralty to meet the French and Spanish Fleets with an English Fleet of equal numerical strength. This was due to the fact that we had to keep squadrons on every ocean to protect our trade, and in those days the East India merchant men were able to engage foreign men-of-war, being built and armed for that purpose. Would the modern merchant steamer be able to do the same in the future? Assuredly not. Then, why talk of arming them? They might be able to use torpedoes, but guns would be useless to them. Capt. Curtis advocated the cause of the widows and children of men killed in action; and Admiral Sir John Hay, M.P., commented on the fact that, with forces superior to the two largest Naval Powers, we were always inferior to their Fleets in all battles of the old wars, pointing out that at the present day our Fleet is barely a match for that of France. How, then, could the country rest satisfied with such a state of things, especially when it is remembered that the interests we now have to defend are immeasurably greater than those we protected so well a century ago? Capt. Long was of opinion that we should have at least 200 torpedo-boats, instead of 18, as at present; and at least 100 small, strong, fast-cruising, ram-built craft, able to dash into and sink the enemy's convoys, while protecting our own. Fishermen and yachtsmen should be trained to man our torpedo-boats, of which a certain number should be kept ready for use in every port round our coast and in every colonial harbour, ready to form "wasp fleets" at a moment's notice. The complements of our men-of-war should be revised. At present there were far too many idlers in every ship. On this point Admiral Ryder subsequently remarked that, in the Audacious, he had 38 per cent. of idlers, all men who did not know the use of arms; while in the French flagship, an armour-clad similar in every respect nearly to the Audacious, there were not 5 per cent. of idlers. In the modern armour-clad he found the idlers outnumbering the combatants. Surely this was not right. Every man should be made to learn the use of arms. That was his opinion; but when he attempted to put it into practice, when he had the idlers up to drill, and made them fire at a target, he received a polite hint from the Admiralty that the expenditure of ammunition was unwarranted, and would be charged against his pay. That was the way the civil administration at the Admiralty demonstrated their knowledge of the requirements of the Navy, and furthered its interests! Mr. H. O. Arnold Forster, a civil engineer, who has recently returned from a tour in Russia, Germany, Denmark, and the Mediterranean, then obtained leave to speak as to the unprepared state in which he found this country to be in. We give this gentleman's remarks in full, in the hope that what he said will carry some weight with civilians generally, who are too much in the habit of disregarding what Naval and Military men say when advocating their services being placed on a proper footing. Mr. Forster cannot be called an "alarmist." He is an enlightened Englishman, who, having travelled in the exercise of his profession, has had unrivalled opportunities of observing for himself what is going on in foreign countries, and of comparing their preparedness for war with what he finds in his own country. Now, the land of his birth must be dearer to him than the countries he has visited, and his words, therefore, should sink deep into every English heart. He said :—

"I rise with great diffidence to address such a select professional audience. My study of Naval and Military questions, though it has been long and close, has been only that of an amateur. However, as a deeply-interested reader of the papers which form the subject of this discussion, I have asked permission to say a word or two with regard to some of the points there referred to. In the first place, with regard to the subject of torpedo defence—a subject to which I have paid great attention—I would venture, with great submission, to differ from Admiral Hamilton, when he advocates entrusting the torpedo defence of our ports to the Royal Engineers. None can have a higher opinion of the Royal Engineers than I have, but there seems to me obvious reasons why this particular work should not be handed over to them. Everybody who is acquainted with the heavy work of torpedo laying, especially in a seaway or in rough water, knows very well that the qualities required are particularly those possessed by men with a sea training. The handling of boats and of heavy booms, the operations of dredging and creeping, are certain to be better performed by sailors than by landsmen. Moreover, the Engineers are liable at any time to be called away to perform the ordinary military duties for which they are constituted. The only alternative is that they should be formed into separate detachments irremovable from the seaports. The ordinary training of the Engineer in no way qualifies him for the work of torpedo defence; what he learns at the forts, he will unlearn or forget directly he leaves them. For these reasons I cannot support the suggestion that the local torpedo defence should be handed over to the Royal Engineers. One other matter connected with torpedo warfare I should like to refer to. I see that the number of our existing torpedo-boats is one of the questions to be discussed. I have recently been able to learn a good deal of foreign equipments. I have visited the Copenhagen dockyard, have spent a week in the Military and Naval section of the Moscow Exhibition, and have had frequent opportunities of observing the war vessels of the different Powers in the Mediterranean. Moreover, I have endeavoured by every means to acquaint myself with the incidents of recent torpedo warfare in the Black Sea and in the Pacific. When I consider the importance of the arm, and the activity which other Powers have shown in providing themselves with it, I am simply amazed that this country should neglect to supply itself with an ample equipment of torpedo-boats. Of course, as the last speaker said, our existing provision is absurdly inadequate. As to the manning of the boats which do not at present exist, but which I trust we shall soon have, I venture to make a suggestion which may commend itself to some here. It is that an arrangement should be made for instructing the yachts' crews, which form so important an element in our nautical strength, in the handling of the torpedo-boats, which, in my opinion, ought to be stored in large numbers round the coast. The experience acquired by yachtsmen in working small steam vessels at a high speed would be most valuable; and the particular nature of torpedo enterprise, the dash, the independence, the initiative, would doubtless commend it to the class of seamen I have mentioned. As to the question of non-combatants, I entirely agree with the criticisms which have been made with regard to the existing condition of things. It appears, to me, most undeniable that the very large engine-room staff which is now borne on many of our ships should be almost altogether uninstructed in combatant duties. Only I would say that such instruction should be made a part of, and not be additional to, their ordinary work. And lastly, with regard to the whole subject under debate, I must confess that, to me as a civilian, it does appear perfectly astounding that it should be left to such an institution as this, important though it be, to discuss this matter of mobilisation. That it should be taken for granted that in this very A B C of naval warfare, no steps, or insufficient steps, have been taken by those officially responsible, seems almost incredible. If this discussion does nothing more than rivet the attention upon the fact that we have not yet reached the point from which every other nation starts, it will not have been in vain."

Capt. Johnstone then replied to the criticisms made by the various speakers, and a vote of thanks to him and the President terminated the discussion, which, it is to be hoped, will be of some service in awakening the country to its dangerously unprepared state, for, notwithstanding Lord Northbrook's assertions to the contrary, the opinion of all present was that more ships are absolutely necessary to our very existence as a Maritime Power.

NEW BRUNSWICK FROM THE SEA.

A letter from St. John's N.F., says :—"Here we are,—the Tenedos, Fantôme, and Mallard, the Foam being away round the coast somewhere, while we guard the town during the trials. Not that our presence here is at all necessary, as during the business part of the year there is no danger of an *émeute;* such things are unknown except in winter, when all the fishermen are ashore, when work is hard to obtain, and when an interest in money-getting gives one a little time in which to cast an eye on one's neighbour's prospects of heaven. After all, the thing is reciprocal. If you assure your antagonists that no one professing Roman Catholicism can hope for a happy hereafter, are not they equally certain that the orange ribbon even will prove no passport to you; and if in addition they shoot at you, is it not as much because time hangs heavy on their hands as because they know you, in vindicating the honour of your colour, would kill them with pleasure? Besides the imaginary danger of a riot, our commercial prospects have been threatened by a more real danger in the shape of an iceberg about a mile long that has cruised threateningly off the mouth of the harbour for some days. We fear any continuance of southerly winds would cause a stoppage of the entrance which, however, though tiresome enough, would not be so damaging as if it had occurred a short time ago, when the ships were coming in from the seal fishery to refit for whaling. From a naval point of view there is little news. The Tenedos, after leaving St. Pierre, the other day came in for some very dirty weather, and had to be put into Fermouse Harbour for a night to avoid it; and the French gunboat Crocodile, in performing the same journey, made a similar experience. This latter had the pleasure of passing the winter at St. Pierre, which is, as you know, the French head-quarter out here, and one of the bleakest, most desolate places I have ever set eyes on. To these mercurial and theatre-loving gentry, such a place must be a Siberia indeed. This is a bad place for us, as we have no decent places to go to ashore and the liquor is bad; but I do not think the officers like it any better. Certainly they do go out fishing; but they return with such ridiculous little specimens of trout, one would think they might economise their trouble. Salmon here is a drug,—you can get it in the market for 4d. a pound, and, of course, fish makes a great addition to our fare. When we are further north, and can use our seine, we live for nothing, like fighting cocks. The duration of our stay here is uncertain, and though the people are kind and hospitable, 'the shorter it is, the better,' are the sentiments."

Orders have been received at Sheerness for the construction of an 8-gun sloop of the Mariner type as soon as the corvette Pylades is launched. The Swallow will have a displacement of 950 tons, and engines of 1,000 horse-power. The two foremost—5-in. breech-loading—guns will be on Vavasseur mountings, the two stern guns will have Vavasseur revolving mountings. She will be equipped with two Gardner machine-guns.

The Reserve Squadron will leave Portland on the 17th inst., under Rear-Admiral Hoskins. The sailing orders direct that the ships are to proceed to the Downs, and on leaving will anchor at Heligoland for a few days. The Squadron will visit Lerwick and certain ports on the coast of Scotland and Ireland. It is intended that the cruise shall occupy 41 days, of which 21 will be spent at sea, and 20 days in various harbours and ports.

ACTIVE SERVICE cannot wear out the teeth that are brushed night and morning with ROWLAND'S ODONTO, the purest and most fragrant dentifrice ever made. All dentists allow that neither washes nor pastes are as efficacious for polishing the teeth and keeping them sound and white as a pure and non-gritty tooth-powder; such ROWLAND'S ODONTO has always proved itself. Ask any dealer in perfumery for ROWLAND'S ODONTO, and avoid spurious imitations, theirs being the only original and genuine Odonto.

THE SEBASTOPOL CEMETERIES.

The Duke of Cambridge presided at a meeting in the Royal United Service Institution, on the 6th inst., to receive the report of the Committee appointed at the meeting in 1883 to inquire into the best way of maintaining the graves of the British who fell in the Crimea in 1854-5-6. The report, which was read by Gen. Codrington, stated that the business carried out was as follows:—The nomination of Capt. Harford, British Vice-Consul at Sebastopol, as the unpaid but active and judicious executive on the spot; the formation of a contract with Mr. Doünest for the addition to the height of the cemetery wall; the construction round the enlarged space granted by the Russian Government; the collections from the many scattered cemeteries and outlying memorials, and replacing them properly at Cathcart Hill; the addition of a custodian's house, the search for water, and, finally, the smoothing of the ground to its former natural level and appearance at all the detached burial-places. The amount of the contract for these works was £1,370. The total subscriptions amounted to £1,594 4s. 9d., the expenditure, including extras, having been £1,445 4s. 11d., thus leaving a present balance of £148 19s. 10d. The committee recommended that application be made for the maintenance grant of £200 a year promised from the Treasury, and this recommendation was afterwards embodied in a resolution. Lord W. Seymour moved the adoption of the report, Sir A. Herbert seconded it. The Duke of Cambridge, after alluding to the work done by the late Lord Hertford, Col. Conolly and Capt. Harford said everything was going as well as they could wish, and they looked to the future with the certainty that the graves of the gallant men who died in the Crimea would be properly attended to.

The Odessa correspondent of the *Times* writes on the 2nd inst.:—"At last, after the lapse of more than a quarter of a century, the question of the British military graves and graveyards on the steppes around Sebastopol appears to have been settled. These graveyards originally numbered from 126 to 130. They were inclosures within low stone walls, containing from two to perhaps two hundred bodies. Consequently they greatly varied in size. But all were either square or oblong in form. They were scattered over the ground—measuring 12 miles from east to west and eight miles from north to south—on which had stood the camps of the various divisions of the British Army; and they extended in the form of an amphitheatre from the heights of Inkerman to the village of Balaclava. They contained about 600 monuments. Among these were a few marble slabs and dwarfish pyramids and columns. But the greater number were ordinary upright gravestones formed of the soft porous sandstone which abounds at Sebastopol. Upon the conclusion of the Crimean campaign it was considered in some quarters advisable to remove the dead from these—in most instances widely dispersed—graveyards into one large and properly walled-in cemetery. This the Russians and the French did with their dead. It is true the cemetery of the latter nation is a very gloomy-looking place on account of its high walls and the total absence of monuments in it. It is, indeed, in every respect a prison-house, even for the dead. Still, they all lie there together, the officers in one high mausoleum, with their names engraved thereon; and the men in large graves all round, with their names on the immense stone slabs which cover them. In the Russian cemetery—situated to the north of the creek which divides Sebastopol into two parts—and which would be considered a handsome metropolis anywhere, the men are also laid away in batches in great graves. But their officers lie in separate graves. And their tombs are most various, and in many instances are veritable monuments. Among them are a column and bust over the remains of Prince Gortchakoff, Commander-in-Chief of the Russian forces in the Crimea, who died in Warsaw in 1861, but who 'desired to be buried amid those defenders of their country who did not permit the enemy to enter their fatherland farther than where their graves stand.' But the most conspicuous object in this cemetery is a magnificent memorial chapel of granite, marble, and bronze, in the form of a pyramid, over 100 ft. high, the walls of which, inside and out, are covered with the names of all those who took part in the defence of Sebastopol, and for whom prayers are daily offered up. From 1855 downwards every British Government, every British Consul at Sebastopol, and every British Consul-General at Odessa, has had something to say or to do in the matter of these graveyards. But notwithstanding all their efforts, they have been unable not merely to keep up, but even to preserve the graveyards. Year by year they have decreased in number. Not long since there were 10 or 11. Now these have disappeared. Their walls have been thrown down, their graves have been levelled with the steppe, and what few gravestones remained have been carried to and stuck up on a piece of land adjoining the only British cemetery left, that on Cathcart Hill—where stood the camps of the Third and Fourth Divisions and Naval Brigade—and there consecrated by the Bishop of Gibraltar, in the presence of the Russian local authorities, some Russian Imperial sailors, the British Consul-General at Odessa, the British Consul at Sebastopol, and a little knot of our fellow-countrymen and countrywomen. It should be mentioned, however, that monuments at Balaclava to two Sisters of Mercy have not been interfered with. No attempt appears to have been made to remove any remains. It is a question if any would have been met with beyond a few bones. Consequently the little necropolis on Cathcart Hill can scarcely be considered in every respect a truthful memorial, for visitors will find there monuments referring to remains that are not beneath them. Such as it is, however, it is likely to be a lasting one, for it is properly walled in, and has a house in which the keeper and his family may live."

DIMNESS of SIGHT.—Dimness of Sight and Blindness are often caused by the use of unsuitable Spectacles. Mr. H. Laurance, F.S.S., Oculist Optician, 1a Old Bond Street, scientifically adapts his improved Spectacles to strengthen and assist the weakest sights. Testimonials from Earl Lindsay, Sir Julius Benedict, F. D. Dixon Hartland, Esq., M.P., Thomas Cook, Esq., the well-known Tourist Agent, &c. Pamphlet, containing valuable suggestions, post free.

REGIMENTAL DINNERS.

The following regimental gatherings have been held in London during the week:—

2nd Life Guards. At Hyde Park Barracks, on the 7th inst. Present:—Gen. Viscount Templetown, K.C.B. Old officers:—The Marquis of Abergavenny, Mr. H. D. Brocklehurst, Mr. A. Congreve, Mr. G. Fleming, Lord Glamis, Capt. Hamilton, Viscount Hawarden, Sir S. Hayes, Mr. J. Hensman, Mr. F. Johnstone, Capt. Kendall, Mr. H. Langley, Mr. H. Lane, Hon. R. Lawley, Hon. C. H. Lennox, Capt. Lovett, Major-Gen. F. Marshall, Capt. Norton, Major-Gen. Sir R. Palmer, Sir G. Prescott, Lord Sandys, Capt. Savile, Sir M. S. Stewart, Capt. Stephens, Major-Gen. Stewart, Lord H. Vane-Tempest, Lord E. Vane-Tempest, Capt. Ward, Capt. Wake, and Capt. Young. Officers now serving:—Cols. Ferguson and G. A. Curzon; Lieut.-Col. Townshend; Capts. Sir A. Lamb, Bart., Lord Cochrane, Tennant, Neeld, and Smith-Cuninghame; Lieuts. Anstruther-Thomson, Hon. W. B. Hanbury, H. French, Beech, Sir G. Arthur, Bart., Longfield, and Naylor-Leyland; Adjt. H. H. Short, Surg.-Major H. Spry, Qrmr. Haines, Surg. Young, Rdgmr. Burt, Vet.-Surg. J. R. Rostron, and Mr. T. Hughes.

20th Hussars. At the Albion, Aldersgate Street, on the 11th inst. Present:—Major-Gen. M. C. Cotton; Cols. R. Alexander, Lockwood, Montgomerie, and G. Jackson; Lieut.-Col. Onslow; Major Budd; Capts. Bellasis, Gurney, Irwin, Nelson, Weston, and Wetherall; Lieuts. Beauchamp, Morris, and Newton.

Royal Artillery. At Willis's Rooms, on the 6th inst. Present:—The Duke of Cambridge (in the chair); Gens. Copeland-Crawford, Sir J. St. George, Sir C. Dickson, W. H. Askwith, Sir J. Brind, A. T. Phillpotts, Sir J. H. Lefroy, H. A. Carleton, E. Price, and H. Gardiner; Lieut.-Gens. Sir E. P. Hamley, Sir F. A. Campbell, Hon. E. T. Gage, Sir J. Hills-Johnes, E. Kaye, C. S. Henry, J. G. Petrie, and E. Wray; Major-Gens. G. G. Pearse, P. G. Pipon, Sir C. Arbuthnot, F. W. Hastings, H. A. Smyth, H. P. Bishop, D. MacFarlan, G. le M. Tupper, J. H. Smyth, A. Light, J. R. Sladen, C. du Plat, H. F. Greville, D. J. F. Newall, W. B. Saunders, F. T. Whinyates, and H. R. Courtenay; Brigdr.-Gen. W. E. M. Reilly; Surg.-Gen. J. M. S. Fogo; Cols. C. J. M'Mahon, W. Stirling, P. J. Campbell, G. B. Traill, E. Keate, G. C. Henry, G. H. Fraser, A. H. Harness, A. H. Williams, F. T. A. Law, W. H. Fox-Strangways, R. J. Hay, F. G. Ravenhill, A. M. Calvert, W. H. Alderson, F. Warren, L. C. A. A. de Cetto, W. H. Goodenough, F. Betty, W. Ritchie, O. B. B. Woolsey, M. le F. Taylor, T. E. Byrne, A. H. King, W. J. Finch, H. Y. Wortham, H. Edmeades, W. H. Noble, J. A. Corbett, E. A. Alderson, J. Bellord, A. Malin, E. H. Goodwin, J. Hackett, E. Hardy, W. O'Neil, W. Milner, J. K. Lethbridge, C. W. Keatinge, S. P. Statham, E. J. Rogers, R. Halpin, J. L. Moody, Beresford Harris; and G. J. Reid, Esq., and A. Liddell, Esq., of the War Office. A conference of the Chaplains of the Church of England was, by permission of H.R.H. the Field Marshal Commanding-in-Chief, held in the Levée Room, Horse Guards, previous to the dinner.

MELVILLE HOSPITAL.

"Hippocrates" says he wishes to expose some anomalies in this paragon of hospitals. Convalescent patients, he says, are made to do the work which ought to be done by men specially paid. Five labourers are allowed to carry coals, clean windows, &c. But four out of these five are employed on work for which no allowance is made. One is an amateur druggist, another superintends the bath-house, a third vegetates in an arcadia of lawn-tennis and geraniums, while the fourth is to be seen, with beaming face, behind the counter in the purveyor's shop. Marines, Blue-jackets, and stokers, unfortunate convalescents, have the pleasure of doing work as coalheavers or navvies for three hours a day, or keeping watch for eight hours in the 24, *i.e.*, four hours during the day and four hours at night. A certain number of nurses are allowed for this hospital; but the wand of retrenchment has turned one into a clerk and another into a painter!—thus making the work come heavier on the other nurses. A Blue-jacket or stoker for the first month he is in hospital draws full pay; for the next two months, however, he draws only 10d. a day; then he draws no pay at all for any period after that. Blue-jackets and stokers have been made to work for three months without pay.

THE GARB OF OLD GAEL.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—Referring in the last number of your paper to a forthcoming work on the dress of the Scottish Highlanders, you express a hope that the writer will give his authority for his arguments or assertions on any statement open to question on this subject. This is, indeed, a matter of primary importance, if the work is to carry any weight with it; for, as you further on most justly observe, a considerable amount of scepticism exists regarding the antiquity of the present Highland dress. Sir Walter Scott has disposed of the claims in this respect of the "feather-bonnet," and those of the kilt are much disputed. Query,—Is there any word in old Gaelic or Irish for kilt? The word is not given in Armstrong's Gaelic Dictionary. The antiquity of the tartan is better established, as in the "Book of Durrow," a MS. of the seventh century, now in the library of Trinity College, Dublin, in which each of the four Gospels is preceded by a symbolical representation of its respective Evangelist, St. Matthew is depicted wearing a long tartan mantle of red, yellow, and green; his stockings also are of a tartan pattern. Tartan might thus have been taken over from Ireland; and, as it admits of endless variety of pattern, the different clans, ever at feud, would naturally adopt each a distinguishing pattern.—

Inquirer.

The Duke of Cambridge will preside to-day at the United Service Institution at the ceremony of presenting to Capt. Edward Walter, Commandant of the Corps of Commissionaires, a well-won testimonial in recognition of his services as founder of the corps, which has been such a signal success and benefit to the public, and such a boon to old soldiers.

The *Standard* states that "the Committee appointed to report on Small Arms, of which Col. P. Smith, Grenadier Guards, is president, will at an early date submit to the authorities at head-quarters their report. The result, it is expected, will revolutionise the present method of equipment of the Army."

The Gazettes.

TUESDAY EVENING.

ARMY.

WAR OFFICE, Pall Mall, June 10, 1884.

1st Dragoon Guards—Lieut. W. R. Goold-Adams, Adjt., to be Capt., to complete establishment.

6th Lancashire (1st Manchester)—George Kershaw, gent., to be Lieut.

1st Middlesex (Victoria)—Lieut. A. E. Gordon resigns his commission.

4th Middlesex (West London)—Hon. Col. C. R. C., Lord Truro, resigns his commission.

14th Middlesex (Inns of Court)—The name of the Adjt. whose retirement was notified in the *London Gazette* of the 2nd ult. is Cary "Hampton" Borrer, and not as therein stated.

19th Middlesex (St. Giles's and St. George's, Bloomsbury)—Henry William Walter Nutting, gent., to be Lieut.

1st Oxfordshire (Oxford University)—Lieut. H. S. Rogers to be Capt.

2nd Oxfordshire—Walter Ballard, gent., to be Lieut.

3rd Volunteer Battalion, the South Staffordshire Regiment—John Fletcher Brewer, gent., to be Lieut. The services of Acting Chaplain the Rev. W. Cornwell are dispensed with.

2nd Volunteer Battalion, the Prince of Wales's (North Staffordshire Regiment)—The resignation of the commission held by Lieut. W. Boden, notified in the *London Gazette* of Dec. 21, 1883, is cancelled.

6th (West) Suffolk—Major A. S. Hext, 2nd Batn. the Suffolk Regt., to be Adjt., in succession to Hon. Major N. Barnardiston, who has retired on retired pay (June 4).

4th Volunteer Battalion, the Queen's (Royal West Surrey Regiment)—The under-mentioned gentlemen to be Lieuts.:—Frank Marshall and Sydney George Marshall.

1st Tower Hamlets (the Tower Hamlets Rifle Volunteer Brigade)—Capt. J. C. Tully resigns his commission; Lieut. J. J. W. Livett, from the 1st Cambridgeshire R.V.C., to be Lieut.

1st West Riding of Yorkshire—Preston Cobb, gent., to be Lieut.

7th West Riding of Yorkshire (Leeds)—The under-mentioned gentlemen to be Lieuts.:—Charles John Fowler, William Hepworth, and Charles Samuel Bedford.

3rd Volunteer Battalion, the Duke of Wellington's (West Riding Regiment)—Lieut. L. Dewhurst to be Capt.

(Where not otherwise specified, the foregoing commissions and announcements bear date June 14, and the current year must be understood.)

The *Portsmouth Times* says:—"Sir Frederick Fitz-Wygram has not allowed the grass to grow under his feet. He has already addressed several meetings, and the interval that will elapse before the trial of strength at the polling-places will be further utilised in making the acquaintance of those who will soon be his constituents."

The Admiralty have directed that two seamen's libraries are to be put on board the Deccan for the use of the Marines at Suakim and the battalion on shore. A packet of newspapers will also be forwarded weekly for each of the detachments.

The Greenwich Hospital pension of £50 a year for Fleet and Staff Surgeons vacant by the death, on the 15th ult., of retired Deputy-Inspector-Gen. Liddell, has been conferred on retired Deputy-Inspector-Gen. David Lyall, from that date.

EGYPTIAN NOTES.

Leave of absence has been granted to Lieut.-Col. Webster, C.B., of the 19th Hussars, from the 9th inst. to Aug. 30 next; to Surg. Jencken, from June 3 to Aug. 3 next; to Surg. Turner, from June 2 to Aug. 2 next; to Lieut. J. Prinsep, of the Essex Regt., from the 1st to 15th June; and to Lieut.-Col. Eyre, of the 1st Batn. South Staffordshire Regt., from June 3 to Sept. 15 next.

Two battalions of Egyptian infantry are leaving the capital almost immediately for Assouan, one of the battalions, which is at present at that place, is to move forward to Korosko, and on its arrival the half battalion which is stationed at Korosko will proceed to Wady Halfa. The battalion now in the Provinces and the battalion quartered at Alexandria proceeded to the Capital on the 4th June to replace the two battalions bound for Assouan. Two more battalions, one to consist of Egyptian volunteers, the other of Turks, are being formed rapidly. The volunteers are to receive P.T. 2½ per day, and a number of Soudanese have already expressed their wish to be enrolled. There will thus be five battalions of the Egyptian Army at Assouan and at places south of it, two battalions at Cairo, and one battalion at Suakim. In consequence of the removal of the battalion from Alexandria, Col. Baker, police, came to Alexandria to make arrangements for taking over the guard duties.

The Commanding Officer of the Royal Sussex Regt., quartered at Mangabet, near Assiout, received orders to despatch 300 men to Girgeh and 100 men to Sohag, but the orders were countermanded. The fall of Berber will make a great change in the military situation on the Nile.

London Amusements.

At the Royal Italian Opera, Madame Adelina Patti is announced to make her first appearance this season tonight (Saturday), in "La Traviata." On Monday was repeated "Le Nozze di Figaro," with Madame Albani, Madame Sembrich, and Madame Pauline Lucca in the cast. "La Gioconda" was given on Tuesday, and "Les Huguenots" on Thursday. The German operatic performances included on Wednesday Wagner's "Lohengrin," when Madame Albani sang "Elsa" in German for the first time, and a repetition of "Die Meistersinger" was given last evening. A morning performance of "Tannhäuser" is fixed for to-day (Saturday).

The season of French plays at the Gaiety commenced on Monday night, when Madame Judic sustained her original character in MM. Hennequin and Millaud's comedy of "Niniche." The clever French singer and actress again displayed that vivacity and finesse which have proved so attractive to playgoers on both sides the Channel. Her chief songs were encored and a cordial reception was accorded. M. Lassouche was a whimsical Anatole, and M. Cooper a droll representative of Gregoire. In other respects the support given could hardly be considered entirely satisfactory. On Friday, Madame Judic appeared in "Nitouche," and next week in the comic opera, "La Cosaque." Madame Sarah Bernhardt commences her engagement of four weeks on June 30, when "Fédora" will be played. The theatre during the recess has been entirely repainted and redecorated.

At the Vaudeville the farcical comedy of "Confusion," preserving an unflagging popularity though running more than a year, has been this week preceded by Mr. Howard Paul's vaudeville sketch of "The Man Opposite," originally brought out at the Strand about twenty years since, under the title of "Opposite Neighbours." The impecunious artist, Hal Fresco, is now briskly acted by the author, and Miss Kate Phillips pleasantly plays the artificial flower-maker who is the object of the gentleman's obtrusive attentions.

At the Criterion has been revived, as a prelude to "The Great Divorce Case," the late J. R. Planché's neatly-written one-act comedietta of "Somebody Else," originally produced at the Haymarket Theatre December 4, 1844, with Madame Vestris, Miss Lee, Mr. Charles Matthews, and Mr. Howe in the cast. Miss Kate Rorke and Mr. Giddens here play the prominent parts, and the piece, which is a neat adaptation of the old French vaudeville of "Georgette," has been received with a cordial welcome.

Mr. Wilson Barrett is preparing a careful revival of "Hamlet" at the Princess's Theatre, in which some new and surprising "ghost effects" will be introduced.

On Monday next will be commenced a summer season at the Surrey Theatre, under the management of Messrs. Stafford and Munro. The opening piece will be "Proved True."

An autumn season of French plays is contemplated at the Royalty, under the direction of Messrs. Mayer and Hollingshead.

Early next month Mr. Burnand's burlesque of "Black-Eyed Susan" will be brought out at the Alhambra as a spectacular operatic extravaganza.

The always pleasant programme of Mr. and Mrs. German Reed's entertainment will be varied on Wednesday next by a new second part, called "A Terrible Fright," written by Mr. Arthur Law, with music by Mr. Corney Grain, who introduces on that evening his new musical sketch, entitled "The Shows of the Season." The first part will be a revival of "Nobody's Fault."

"Health Exhibition."—"Visitors should not fail to view the fine exhibit of Messrs. Rose and Co., London, of their Lime Juice Cordial, and other Lime Juice beverages, at Stand No. 116, in main transept. The exhibit includes a fine display of the Jamaica Lime Fruit from which these delicious non-alcoholic beverages are made. Their Lime Juice Cordial supplies a most refreshing summer drink in water, effervescing in all aerated waters. No beverage has received higher recommendation from the medical profession as eminently wholesome."—See *Lancet*. No table should be without it. The Wholesale Stores are 11 Curtain Road, Finsbury.

Printed and Published for the Proprietors, at the Office, No. 16 Wellington Street, Strand, London.—Saturday, June 14, 1884. Letters on Business and Remittances should be sent to Mr. Richard James Wood.

MR. RICHARD JAMES WOOD,

AT THE OFFICE, 16 WELLINGTON STREET, STRAND, *and* NOT *to the* Editor *of the* Army and Navy Gazette.

The subscription to the paper is 7s. per quarter, or 28s. per annum, PAYABLE IN ADVANCE, *inclusive of postage to any part of the United Kingdom.*

To India, £1 12s. 6d. per annum.

The Army and Navy Gazette *can be obtained in Paris of our Agent,* Mr. J. W. S. NEAL, *English Stationer, 248 Rue de Rivoli, to whom Advertisements and Orders for the Paper may be sent.*

LET us make a clean breast of it at once, and declare that our experience of Woolwich optimism causes us to view with certain reserve the rosy pictures which are drawn for us by artillerymen of their own pre-eminence and unapproachable excellence in the matter of guns and gunnery. Our fast-fixed faith in the superiority of our guns and gunners to all the world received a rude blow and shake the day that, in a friendly competition on the plateau of Sebastopol at the end of the war of 1854-55, the French knocked us into a cocked hat for range and accuracy, and came out easy victors over our crack field guns. Then soon afterwards the early Armstrongs, eagerly adopted by Woolwich, were proclaimed to be the most admirable and perfect weapons in the world, only to be rejected after the Chinese expedition. Then muzzle-loading stud guns were copied from the French, whose system Woolwich had laughed to scorn in 1859, when it was first tried against the Austrians in Italy. Who does not remember the Adye profession of faith, that was repeated by every devout Woolwich man for years, that breech-loaders were *anathema maranatha*, and that the Adye guns were the hardest-hitting, flattest-trajectoried, shell-burstingest, most penetrating, &c., &c., ever known, or to be known, on this earth? What a trial and strain it was to have to contend, as we did for years, that the experience in the field in two great wars in Europe ought to count for something against Woolwich prejudice and Adye obstinacy, and to induce the authorities to make some experiments to test the merits of the rival systems! Well, we are now, after many changes too numerous to mention, presented with an ordnance which is declared to be, in its several types, the sealed pattern of all excellence, the acme of artillery perfection; and Colonel Maitland has delivered what may be regarded as the authoritative and official exposition of the War Office and Woolwich belief in the subject before the Royal United Service Institution. We confess, again, that we are rather disappointed, and that we are afraid, perhaps wrongly, that the influences which seem to be evolved from the melting-pots of the Royal Foundries at the Arsenal, have led the able and accomplished officer who is now Superintendent, to run in the old official groove and into the ordinary mould. The lecture, very clear and concise in form and substance, was technical, in so far as that it was necessary to use diagrams and algebraical formulæ to explain the details; but we think Colonel Maitland succeeded in establishing without their aid some very important and interesting propositions. It is much to be regretted that he should have encouraged dilatory administrators and justified crass obstructionists by putting forward such a monstrously absurd and dangerous doctrine as "that we have done well by waiting,"—that "the Power which waits the longest before committing itself to a new manufacture has the best of it," even though he qualified it by "supposing it is not caught napping by an important war." His principle and his contention are thus set forth:—"It is not necessary to explore the debateable land of the Might-have-been; it is sufficient for our purpose to know that we have *not* been caught napping by an important war, and I hope to show you to-day that the result is that having waited the longest we have got the best of it." Why "sufficient for our purpose"? If the principle be right, Colonel Maitland ought not to be making guns, but waiting still—waiting till the "Hope gun," perhaps, has been mounted, and the end of the world is at hand! As to comparisons with foreign countries, he says:—"It may be admitted that during the latter part of the seventies England fell behind in the Artillery race, but not to the extent that is supposed by many who have not thoroughly studied the subject. As a matter of fact, the old short-breech-loaders of the Continent are just as obsolete now as the old short muzzle-loaders of England, and up to about 1875 or 1876, the British artillery was as good as anybody else's. Then came a period of comparative stagnation, and we fell to leeward. During the last three years we have been endeavouring to make up our leeway." This is almost astounding,—"Up to 1875 or 1876, the British artillery was as good as anybody else's!" Why, in 1870-71, the Germans were using 40-pounder rifled breech-loaders and rifled mortars against the fortifications of Paris; and not even Sir John Adye would say—well, stop, we cannot assert that—but he ought to say, that the old short muzzle-loader of England was not as good in the larger calibres as the old short breech-loaders of the Continent. The account of the improvement in powder, and of its results in turning thickness of metal at the breech into length at the muzzle, in order to get an increased ratio of power to weight, was very interesting; but Colonel Maitland, if he intended to be just, might have pointed out the fact—in a Uriah Heap spirit—that Woolwich had little to say to the improvement, that to the Americans the world owes the introduction of cake and pebble powders, in order to suit their Rodmans and Columbiads; and that later, it was not England, but Germany, which invented the prismatic powder used in 1880 in our muzzle-loaders. Colonel Brackenbury, indeed, the able Superintendent at Waltham, very soon produced his H_3, which has now been replaced by C_2 for heavy breech-loaders. But we are still behind. Here are Colonel Maitland's words:—

> "Since that time the Germans have taken a fresh departure, and have quite lately produced a powder which seems to be a little better than C_2. It is known as cocoa powder, and its composition is a secret. The specialty of this cocoa powder is that although it lights with great regularity and burns very slowly at first, yet when the projectile has got fairly under way it burns with tremendous rapidity. In the 19-ton 9·2-in. guns it has about the same ballistic excellence as the best lots of C_2—that is, it gives about the same pressures and velocities all the way up the bore, but it takes only 170 lb. of the cocoa to produce the results attained by 200 lb. C_2. These charges give about 2,050 f.s. velocity to a projectile weighing 380 lb., the pressure being about 17 tons in the chamber. Thus the extra 30 lb. of C_2 are required to give off gas as the projectile travels through the bore to balance the quicker final burning of the cocoa."

Throughout the lecture there is cropping out proofs of foreign influence, and, we regret to say, of superior fertility of invention abroad:—

> "With a breech-loader the first necessity is a thoroughly satisfactory system of closing the breech. This was certainly not accomplished by any nation till after the Franco-German war of 1870. Krupp then entirely remodelled his breech fittings, and introduced the form now universal in his modern guns. The French Marine improved the details of their existing system in like manner, and the French land service, after a long series of experiments, retained their system of closing the breech, but adopted an entirely new method of obturation invented by De Bange, of the French Artillery, to whom I am very pleased to have this opportunity for expressing my gratitude. The great Elswick firm also adopted the French system of closing the breech, but applied a method of obturation of their own."

It was strange, indeed, to hear from Lord Hartington last March that England was behindhand in steel manufacture. Speaking of the new guns, he said:—

> "The main difficulty has been to obtain sufficiently large steel forgings for these immense weapons. There are in France and Germany several firms which have been able to supply steel forgings of the size, and also of the quality, required for these guns; but, up to the present time, the demand has been a new one to the English trade, and there has been great difficulty in obtaining from the English trade steel forgings of the size and quality required."

The three separate features selected for comparison of a crucial character by Colonel Maitland were—(1), Breech-loading and obturation; (2), Construction; and (3), Powder. Comparing the Krupp, the French marine, the French Land, the Elswick, and the Woolwich (the latter of which began with the French interrupted screw and the Elswick obturation), Colonel Maitland remarked that the Krupps, "in construction and material, are not easily to be beaten," but that by the simple plan of coming last we have been able to select and combine the best features of the French systems, land and marine, "making perhaps" (for the honour of Woolwich) "a few trifling improvements of our own." As to construction, Colonel Maitland's lecture was little short of alarming. When the Armstrong system was condemned as far as wrought iron is concerned, and forged steel introduced, it was only in consequence of the pressure of foreign ordnance-makers upon us; and we are now looking forward to the possession of an Elswick 110-ton gun, while Russia, Germany, and Italy are in actual enjoyment of similar luxuries. In 1881 Krupp produced his 70-ton steel gun, but he soon stepped out:—

> "The great German manufacturer keeps the sections of his guns a profound secret, and hence the drawing I am going to point to next, Diagram 9, must not be taken as authentic. During a visit to Essen in 1881, I saw the parts of his guns in the machines and lying about, and I hope he will forgive me for having taken furtive measurements with an umbrella and by the eye, sufficient to enable me to make a tolerably close guess at the construction. It should be said here that the Russian heavy guns are either made by Krupp on designs of similar character to this, or copied by the Russians in their own steel. Krupp's latest design is for a heavy gun weighing 121 tons, and 35 cals. long, *vide* Diagram 10, which shows the authentic outline of this grand weapon as kindly furnished to me by Mr. Longsdon. This is the heaviest gun in the world, and four are being made for the Italian land service."

It was not till July, 1882, that Woolwich prepared its typical design for the 12-ton gun which is to be our model. The account of the 63-ton (from Whitworth's works) is hopeful, but the piece is not equal to the 71-ton gun:—

> "Coming last to steel breech-loaders, England has been justified in fearlessly adopting the metal which has been thoroughly tested by German experience. She has also adopted a construction which bears a certain similarity to the French, but is modified somewhat, as in Krupp's guns."

With the elaborate and careful description of the various natures of guns, we cannot follow Colonel Maitland, but we recommend all those who are interested in this most important question to study his facts and figures, in order that they may appreciate his conclusions. Admitting that in ballistic knowledge Woolwich has no superior, and that in chambering England has taken the lead, we think it is not with pride we ought to read the summing-up of the Superintendent of our Gun Factories:—

> "Having come last among the Great Powers to steel breech-loaders, we have been able to select the best points from the various systems worked out by others. The

material is that proved admirable chiefly by German experience; the system of breech-loading is that of the French land service; some parts of our present construction have been tested in Germany and some in France; while we have been able to improve on both, and solidify the whole structure in a marked degree. It is true that in numbers we are behind, but having the best types all that is required is money and a little more time. The money will, no doubt, be forthcoming at the good pleasure of the country, which must not hesitate to pay its war insurance. The time is more serious, a heavy gun cannot be made under about fifteen months, and the only way to economise in this respect is to put up sufficient plant to permit of a considerable number of heavy guns being under manufacture at the same time. The next two or three years will see us in a very different position as regards numbers. The time has arrived for the country to face the question seriously, to grant the money, and to push the manufacture."

Three years' grace, that is all we want. We wish we may get it.

"FREE-TRADE in the Army" is the title of a most able and practical article in the current number of the *Nineteenth Century*, in which Lieutenant-General Sir Frederick Roberts seeks to show that "there must be free-trade and reciprocity in the Army,"—that is to say, a "sweeping-away of many hard-and-fast rules which now unnecessarily hamper the soldier's life, from the hour of his enlistment until the day of his leaving the Army." Sir Frederick commences by quoting from a speech of Lord Hartington, who is reported to have besought "those interested in the Army to look at it with an eye to the future, and not with an eye always turned to the past." Taking this speech as his text, Sir Frederick Roberts has preached an eloquent sermon with which we agree in almost every particular. The writer's creed may be summed up in the two following extracts:—"While concurring with Lord Hartington that a return to the old long service is impossible, I firmly believe that a continuance of the present short service is equally impossible." And again, "We must look for some system which will possess the advantages of both a long and a short service, by means of which a reserve can be formed, an effective Army maintained, and the number of men serving for pension restricted to those who make the Army their profession, either from choice or necessity, and whose lengthened employment in the ranks will be well worth paying for." With the object of supporting the view thus set out, the writer proceeds to prove, first of all, that both systems (long service and short service), tried separately, have failed. Long service was found to have failed in 1869-70, when the number of men was far below the establishment. And it was at once decided to introduce the short-service system; but although the number of recruits at first was considerably increased, Sir Frederick is evidently very doubtful as to the cause of the increase being altogether owing to the introduction of the short-service system. The following paragraph is certainly worth quoting *in extenso*:—"It is instructive to turn to the register of fluctuations in the standard for the Infantry, which immediately succeeded the introduction of Lord Cardwell's measure, and to note the successive lowering from 5 ft. 8 in.—at which the standard stood under the long-service system, early in 1870—to 5 ft. 6 in. in July, and 5 ft. 5½ in. in September of that year; 5 ft. 5 in., in July, 1871; and 5 ft. 4½ in., in 1873. Now, if any one will take the trouble to calculate the extent of the recruiting field which lies within the compass of these three and a half inches—that is, the number of English lads between 5 ft. 4½ in. and 5 ft. 8 in. in height—he will realise that the increase in the number of recruits was not altogether due to a preference for short service. During the last thirteen years, the standard has only twice been up as high as 5 ft. 6 in., and on each of these occasions for a few months only; and notwithstanding the advantages which the present short-service system is supposed to offer, the dearth of recruits and the impossibility of keeping men in the Army, necessitated the standard of recruits being reduced a few months ago to an almost dwarfish height (5 ft. 4 in.), and to a bounty being offered to soldiers unprecedented in its amount." From these deductions General Roberts draws the conclusion that the remedy for the present state of things will not be found either in long service or short service, "but by an earnest endeavour to discover the causes which have made the Army unpopular with the class on which it depends for its very existence as a voluntary force." Coming as it does, with all the weight and influence of so popular a soldier as Sir Frederick Roberts, we can only hope that this article will meet with the consideration which it may undoubtedly most justly lay claim to, and that the contingency may be happily averted, which is hinted at in the following concluding lines of Sir Frederick's paper:—"In the above remarks, I have confined myself to what appear to be the principal causes of the unpopularity of the Army, and have suggested such remedies as seem to me desirable; and I have endeavoured to draw the attention of the public to, and enlist their sympathy with, a question which concerns them very closely, if they will only believe it. An army we must have if we are to continue an Imperial power, or even exist as an independent nation; and if this army cannot be obtained by voluntary means, we shall have to resort to conscription. What sacrifices that would entail it is my earnest hope British homes may never be called upon to realise." Amen!

COLLISIONS of ships in fogs have become so numerous of late years, and the loss of life due to such accidents so great, that it is high time steps were taken to ascertain how such catastrophies may best be prevented or diminished in frequency. The subject is most important, and has occupied the minds of many persons interested in the question. The existing rule of the road, and the special clauses of the regulations in force in England, have been adopted by twenty-eight foreign mercantile nations, but in many cases are so badly translated as to render them not only useless but dangerous. This was most clearly explained last week at the Royal United Service Institution by Admiral Sir Alfred Ryder, in a paper he then read on "Collisions of Ships in Fogs." It will be remembered that Sir Alfred Ryder acted as chairman to the Fog Collision Committee appointed by the Council of the Society of Arts with the full concurrence of the Board of Trade, and with the cordial co-operation of the Marine Department. This Committee was enabled to elicit a great deal of valuable information from the directors of some fifteen large steamship companies and their captains, naval officers, and others. Most of the evidence Admiral Ryder has embodied in his paper,—and here we find the real cause of those collisions we so often hear of as having taken place in the open ocean, and even in narrow waters. It occurred to Admiral Ryder, after hearing the very important evidence

> "Of some of the captains in first-class lines of steamers to the effect 'that they always went at full speed in fogs in the open ocean; that they knew it was in direct disobedience to the law; that the law was absurd, and that they always intended to break it'—that he might be able to prepare a useful paper for the Royal United Service Institution, which if disseminated widely through the Royal Navy, would, if it served no other purpose, warn his brother officers in command what to expect, and put them on their guard, viz., that English merchant steamers—especially in the principal lines of packets now crossing the ocean in large numbers—may be expected to be in this respect always breaking the law. It may be news to British naval officers, law-abiding officers, admirals and senior officers, who when in command of fleets in the open ocean always drop the speed of the ships under their orders to from three to four knots, and when in single ships always moderate their speed, unless the urgency of their sailing orders justifies in their opinion a higher speed than 'moderate;' that this international regulation, to which they yield so ready an obedience, is so continually and pertinaciously broken by their brethren of the merchant service, in spite of the injunctions they may receive from their directors 'to comply with the law.'"

Regarding this astounding disclosure, Admiral Ryder remarks that,—

> "When discussing the most important questions which arise under these Regulations, viz., those where room is left for a difference of opinion as to which of one or two or more courses should be adopted by each vessel, both courses being left optional by the law, it is assumed—it must be assumed, to narrow the argument to debateable ground—that both vessels when making their fog signals are complying with the law, and going at not more than 'moderate' speed. But the almost universal practice confessed to by the masters of ships in some of the most important 'lines' traverses the above conclusion, and leaves my law-abiding brother officers in this embarrassment, viz., that if the fog signal they hear proceeds from an English man-of-war they may be reasonably certain that the speed is not in excess of moderate—say 3 to 4 knots; whereas if it proceeds from an English merchant steamer (in the open ocean), she is probably going at full speed—say 13 to 15 knots. As the captain cannot discriminate between the fog signal of a man-of-war and that of a merchant ship, he is tempted to the conclusion that he must endeavour to estimate the amount of probability as to whether the sound comes from a merchant steamer or a man-of-war. As the former are the more numerous in the most frequented portions of the ocean, that question is soon decided—and it may evidently be most prudent on his (the captain of the English man-of-war's) part, as regards the chance of collision, to act as though the other ship were breaking the law and going at full speed; and yet if a collision did nevertheless take place, the Court would not absolve him from blame; the Court would hold that he ought to have assumed, having no direct evidence to the contrary as regarded that individual merchant steamer or her Captain, that she was obeying the law and going at moderate speed. While the law and the almost universal practice of the merchant steamers on the principal lines when in the open ocean in fogs remain at direct issue, the whole question is in inextricable confusion."

It would appear from this that the practice of running at full speed in fogs in the open ocean is so nearly universal, and the Committee above referred to found the practice so ably defended and ingeniously justified, that they were reluctantly forced to come to the conclusion that no jury would convict the captain of a merchant steamer for having caused a collision resulting in loss of life through his breach of the Regulations. Three classes of reasons for disobeying the law, and proceeding at full speed in fogs, were given by most of the witnesses examined before the Committee. First, as seamen, the captains of ships asserted that they kept their steamers at full speed:—

> "(*a.*) Because the fog is thus most quickly traversed, and therefore the interval of time in which risk or danger is incurred is diminished by perhaps one-half or two-thirds, viz., by going, say, 16 to 12 knots instead of perhaps 4, the latter being probably the minimum speed at which the ship is manageable by the helm. (N.B.—4 knots is the Fleet fog speed in the Royal Navy, and is generally accepted in the Royal Navy in single ships as a compliance with the regulation to proceed at 'moderate' speed in a fog.) (*b.*) Because the direction of the vessel's head can be more instantaneously altered by the action of the helm (also in a double-screw by reversing one screw) when at a high speed, than can be effected when at a moderate or at a slow speed. (*c.*) Because the strong head of steam necessarily kept when at full speed enables an effective back-turn to be sooner given, and the vessel brought to a standstill, and, if necessary, driven more promptly astern, than when at moderate or at slow speed. (N.B.—The Committee are of opinion that this is an error.) (*d.*) Because the blow given to another ship, B, by A going at, say, 12 knots, or received by the ship A from the ship B going at 12 knots, is not likely to be more destructive to either ship than if the speeds were, say, four knots; both speeds 12 and four being almost equally likely to be fatal. (*e.*) Because when going at 'moderate' speed in a fog, but with the steam well up, in order to give a prompt and effective back-turn, the steam will often, in some ships, be 'blowing off,' and this will effectually prevent the fog-signals of any other ship from being heard. (*f.*) It being understood, however, that this practice of driving at full speed in a fog, as above advocated, is invariably supplemented by the practice of 'stopping' on hearing a fog-signal ahead or between ahead and three points on either bow, and of reducing the speed to the slowest speed at which the ship is manageable by the helm on hearing the fog-signal from any vessel apparently between the five and three points on the bow. Secondly,—As the servants of the owners of the ships, the captains were of opinion that full speed was necessary in a fog, as the course most in accordance with the wishes of the owners, and, in their opinion, no captain would probably retain his command who acted otherwise, although his actions were strictly in accordance with the law, and with, very probably, urgent printed orders from the owner to invariably comply with the strict letter of the law. Thirdly,—As the guardians of the mails, of the interests of the passengers, and of the interests of the owners of the goods, bound to accelerate the delivery of the mails, the passengers, and the goods, the witnesses considered full speed in a fog justified, as the course most in accordance with the wishes of the post-office, of the passengers, as also of the owners of the goods (probably fully insured). Passages are not infrequently made, not merely in narrow waters of the English and Irish Channels, but even across the Atlantic, in a continuous fog throughout the voyage. Any line of packets or single ships that reduced their normal high speed to 'moderate' speed in the open ocean in fogs, except on hearing a fog-signal, would probably get neither cargo, nor passengers, nor mails."

Here, then, we have what are considered sufficiently good reasons, both from the seamen's and the business man's point of view, for merchant captains breaking the law, and thereby endangering the lives and property of others who do not break the law. Surely this is the *reductio ad absurdum* of the argument. Admiral Ryder is of opinion that,—

> "It is only on the assumption that it would be too strong a measure to oblige all vessels to 'stop dead' in a thick fog, and remain so until it cleared (whether other vessels indicate their presence and proximity or not) that the necessity arises of considering whether it be advisable to make any additional rules or regulations (and if any, what?) for the management of vessels in thick fogs. It is very true that in some fogs sound is diminished in volume and intensity, while in other fogs the sound is intensified. It is also true that the direction of sound is sometimes wrongly indicated, and that two persons standing close together will have different opinions as to the direction. This points out the necessity of great caution, and the endeavour to obtain a consensus of many opinions as to the direction of the sound, when any change, of course, is in contemplation."

We have, however, seen a score of officers and passengers on the poop of a mail steamer, and on board men-of-war, no two of whom pointed to the same point of the compass as that from which they supposed the sound to come. Nothing is so deceiving as a fog. Even the variation of the compass is affected by it. It is generally known that fogs do not extend very high up into the air, and that a man on the look-out at the masthead can generally see the mastheads of ships a long way off; but it is not so generally known that fogs can often be looked under, by men stationed in boats, or so that they can bring their faces near to the water, which, as a rule, is quite calm in a fog. Admiral Ryder is therefore of opinion that—

> "Every steamer should have a powerful fog-whistle (preferably a siren) worked by steam, and always, when used, to be used at full power, to prevent faulty estimates as to distance; and every sailing vessel a powerful fog-horn worked by steam or condensed air, replenished by a hand air-pump if there be no steam available. That the phrase 'moderate speed' in the Fog Regulations is dangerously vague, and when vessels have collided in a very thick fog, no damages, if this term 'moderate' is retained, should be recoverable by any vessel that was going ahead through the water at more than four knots (our fog rate in a fleet), unless the minimum speed necessary to make her manageable must exceed four knots, or except under special circumstances to be judged of by the Court. The minimum speed at which the ship is manageable in smooth water—the general condition in fogs—should have been ascertained by experiment on the measured mile trial and recorded in the official log. That the attention of captains of vessels should be drawn to the facts which, although self-evident, are often forgotten—(*a*) That no collisions could well take place in any fog in which all the vessels involved had stopped dead until the fog cleared, and indicated their positions to one another frequently; and (*b*) that no collision between two vessels in a fog could well take place if their direction from one another were ascertained with approximate accuracy, and provided they receded from one another either by one vessel going astern when the other was brought ahead, judging by the direction of the sound signal, or ahead when the other was brought astern, and that, moreover, as regards any vessel that has stopped, it may be assumed (*a*) that by so doing she has diminished, by one half, the prospect of collision with any other ship also in the fog, seeing that although she may be 'run into,' she cannot run into any other vessel; also (*b*) in case of a collision, as the 'stopped' vessel cannot well be the offender, the prospect of her being found to be in default by the Court, and her owner having to pay damages, will be diminished in a still greater proportion, viz., to much less than one-half,—in fact, to *nil*."

Now the fact has been established, that collisions of ships in fogs are principally due to some merchant captains systematically breaking the law, while others using the same, parallel, or crossing tracks, are law-abiding, it is high time for the Board of Trade, in conjunction with the Admiralty, to frame and enforce rules, the observance of which will restore safety to life and property on the high seas, by rendering collisions of ships in fogs next to impossible.

Sir William Hewett arrived at Aden on June 16 in the *Euryalus*, having brought his diplomatic mission to King Johannes of Abyssinia to a successful issue. It is reported that 30,000 Abyssinians will forthwith march to the relief of Kassala and Khartoum. The *Army and Navy Gazette* was the first to publish the object of Admiral Hewett's mission, but our statement, made several weeks ago, that it was in contemplation to employ an Abyssinian army to relieve the beleaguered Egyptian garrisons, was received with general incredulity.

Rear-Admiral Hoskins hoisted his flag in the *Hercules* at Portland on June 14, and assumed the command of the Reserve Squadron. He left Portland with the ships under his command on June 17 for the annual summer cruise of this Squadron, further details of which will be found in our correspondent's report.

Lord John Hay has had the electric light of the *Orion*, at present laid up at Malta, sent on to Suakim. Surely it is time every ship should be supplied with appliances to use this most useful invention.

There are grumblers in every service, and in every walk in life, and it is only fair to let them have their say. Thus have we dealt with the officers of the Royal Marine Artillery who object to the promotion of Major Tucker. If repeated distinguished services in the face of the enemy do not entitle a man to some special reward, such as special promotion, we do not know what does.

The *Hecate* has been attached to the Reserve Squadron, and the Admiralty have ordered both Sir Anthony Hoskins and Captain Loftus Jones to make detailed reports on her behaviour under various conditions at sea.

Sir Thomas Symonds was recently brought to book by the Parliamentary Secretary of the Admiralty, for making a mistake in his figures when comparing the English and French Naval Estimates. Sir Thomas Symonds frankly acknowledged the error he had fallen into. He turns the tables on the Admiralty by challenging the accuracy of the statement recently made by the Earl of Northbrook. Writing to the *Morning Post*, Sir Thomas says that Lord Northbrook "omits *French Brennus* and *Charles Martel*, 1st-class ironclads, also eight canonnières cuirassées, costing more than either. The vote for all these vessels was, 1884, £307,264; 1885, £295,200—total, £602,464! The armoured ships voted since 1880 number eight English and two cruisers to the French eight, and eight armoured gun-vessels—not two to one. The names are clearly given on the French and English Navy Estimates, with all charges. The French Navy Estimates were 166,000,000 francs in 1882, increased in 1883 to 219,000,000, "en plus" 53,000,000 francs; and 200,000,000 francs for 1884 and 1885. The two Fleets are about equal in numbers and force—the French best armoured, gunned, and safer as to compartments and steering."

Rear-Admiral Wilson, until recently second-in-command of the Channel Squadron, has been selected, we hear, to succeed Sir William Hewett in the command of the East Indies station.

Comments are being freely made throughout the Navy on the appointment by Rear-Admiral Lyons of a junior Lieutenant to command the *Kingfisher* on Commander Thornton being invalided, as this appointment is generally considered to be unfair to the Lieutenants of that ship, who are all senior to him. Referring to this case, the *Western Morning News* says:—"The acting command might have been conferred on the Senior Lieutenant of the *Kingfisher* instead of placing a Junior Lieutenant in command of him."

Admiral Sir W. Houston Stewart made his annual inspection of the men of the Plymouth Division of Royal Marines at gun-drill in their battery on Thursday last, and was well satisfied with their smartness.

Staff Commander Henry Yorke Slader, formerly Navigating Officer of the *Challenger* under Commodore Rowley Lambert on the Australian station, and now in command of the Orient Royal Mail steamer *Lusitania*, was elected on June 17 one of the Elder Brethren of Trinity House. This is a well-deserved honour, as Commander Slader is one of the most expert navigators and seamen who ever trod a deck.

Captain Colomb completes his three years in command of the Steam Reserve at Portsmouth this day, and will be succeeded by Captain Nicholson, C.B., recently returned from the Mediterranean.

The Accountant-General of the Navy visited Dartmouth and Devonport last week and inspected the books in the Accountant and Storekeeping Departments at the Dockyard, Victualling Yard, Naval Hospital, and Marine Barracks.

The Dutch Government have ordered three of their men-of-war to proceed at once to the coast of Acheen and commence active and energetic operations against the Rajah of Tenom, with a view to securing the release of the crew of the ill-fated *Nisero*.

The Admiralty have been informed in several instances that the duties required of the Marine detachments serving on board the home ships cannot be efficiently performed if the said detachments are reduced in strength by ten per cent. as contemplated.

The officers commanding the British Forces during the Soudan expedition have been but poorly rewarded for their services. The brevet promotion of Admiral Hewett gives him just one pound a day extra pay, while holding the command of the East Indies station, and a grateful country presents him and General Graham with a money grant of about three hundred pounds each, or sufficient to cover their out-of-pocket expenses.

The letter of "A Field Officer on the Active and Non-effective List," in the *Times* of Monday, should be carefully perused by all who wish to understand the case of the much-abused grievance-mongers of Military Clubland. This letter throughout is one long string of charges, which it would be difficult, we expect, for the War Office to disprove. The *Times* lately was at much trouble to try to establish the groundlessness of the complaints which are continually emanating from the service clubs. "A Field Officer," by quoting his own experiences, shows that there does exist in some cases cause for dissatisfaction.

Sir A. Hayter, in reply to a question put by Mr. Whitley in the House of Commons on the 12th inst., said "the rank of major had only recently been granted to Staff Paymasters." So far from this being the case, the fact is exactly the contrary, inasmuch as for more than fifty years Paymasters, after ten or fifteen years' service, according as they were commissioned officers or civilians on appointment, have been promoted to the rank of major. Six years ago, when the Army Pay Department was formed, certain Paymasters who had already the rank of major, were assigned the grade of Staff Paymaster, and the seniors in this grade feel deeply their having been passed over for the grade of Chief Paymaster, as they have held the rank of major for many years, and now ask to be accorded a step in rank as some consolation for being superseded,—a contingency they could never have anticipated when joining the service. If this boon was granted now, the number of Staff Paymasters to be made Lieutenant-Colonels would be under 12, and there is no probability of its exceeding in the future 15, while the cost to the country would be sixpence a day for each officer promoted. With regard to the reasons given by the Financial Secretary for not increasing the number of Chief Paymasters, financial duties at some stations are necessarily of more importance than at others, just as the number of troops quartered in some Generals' commands is greater than in others; but as the stations in question are all considered of sufficient importance to be commanded by a General officer, and as the heads of departments serving on their staff have at present higher rank than the Pay Department officer, it would be only equitable to make him a Chief Paymaster. But the main reason for asking that the number of Chief Paymasters should be increased to at least 20 is, as we understand it, to insure an adequate flow of promotion in the department. At any rate, if five more cannot be granted at once, one additional Chief Paymaster might be temporarily sanctioned during the occupation of Egypt, as when the number of Chief Paymasters was fixed at 15, the necessity of retaining an officer of that rank in that country was not contemplated. As a proof how greatly the position of Paymasters has deteriorated in the estimation of the officers of the Army during the last three years, it is sufficient to state that the entries into the department have been as under:—In 1881, 44; in 1882, 20; in 1883, 9; and the number of vacancies have been necessarily accumulating, and now amount to about 40.

The letter of "Hope Deferred," which appeared in the *Morning Post* yesterday, on the subject of officers' pensions, deserves attention. The case is clearly and moderately stated. It certainly does seem unfair that officers should be "suddenly knocked on the head, without their being given time to look about and see what is the wisest thing for them to do." But so long as the supply of candidates for commissions continues as large as it is at present, we fear there is no prospect of the powers that be considering the feelings of subordinates. The Army never was a profession, and much as has been said about making it one, the realisation of the wishes of those who abolished the Purchase system is as far off as ever, for, on the one hand, the War Office talks of improving the status and prospects of officers, and on the other, it is continually issuing new edicts, the only effect of which is to unsettle everybody, and show how uncertain the future is of those who are foolish enough to enter upon a military career.

The language of Lord R. Kerr, in his address to the Stafford Yeomanry, was not a bit too strong, if the circumstances which were reported as concurrent with the appearance of Colonel Bromley-Davenport in the streets of Lichfield, just previous to his sudden death, were purely imaginary; and it is certainly scandalous, to say the least of it, that the Press of Lichfield, and the correspondent who sent up the accounts of the riots and disfiguring of the Johnson Memorial, &c., should have invented these libels to bring discredit on a deserving and exemplary corps which, in the words of Lord Ralph Kerr, were a "credit to the town, the county, and the country." We do not know what references were made to the Court of Inquiry, consisting of three officers of the regiment, and cannot, therefore, say what the words "riot, as alleged" in their finding, refer to; but it certainly seems a strange thing that what occurred between Trooper Smith, the man Binns, and the attempted arrest of the former, "should have been the whole of the disturbance." They are a very light-hearted set of fellows apparently,—Smith, Binns, and the rest of them. As to the death of such a thorough sportsman, thorough gentleman, and excellent type of the best kind of English squire as Bromley-Davenport, there can only be an expression of regret for the loss sustained by the corps and the country, and of sincere sorrow that it should have taken place at the same time as the excitement, caused by great provocation, &c., which created a desire among the men for a good fight, made it necessary for the Colonel to address the troopers, and order them to their billets. We have received a letter as to the occurrence in the theatre, which it would not answer any useful purpose to produce.

The *Pioneer* says:—"The declaration of the Government as to the impossibility of sending an expedition of British troops to Khartoum till October next has a peculiar significance for Anglo-Indians. Let it be noted that the British Army is thus represented as being capable of marching and fighting only when it is cool weather. This is a phase of the matter which may well be viewed with concern by the Europeans resident in India. As a matter of fact, the heat in the Nile Valley, in the latitude of Berber and Khartoum, at this season of the year, is very considerably less than in the valley of the Ganges. And yet if trouble were suddenly to arise in a part of India that could not be reached by rail, is it to be supposed that Government would find it "impossible" to move British troops till the hot season was over?" Our contemporary overlooks the difference between the conditions of service in India and in Egypt. Even in the worst times of the Mutiny, our regiments never moved without large trains of dooly-bearers, grass-cutters, and native camp-followers, all useful, and, indeed, necessary,—the like of which could not be found in Africa at all.

NOTES FROM ALDERSHOT.

[FROM OUR CORRESPONDENT.]

There are now six battalions of Militia here, and another will arrive on Monday next. Orders have been given that these battalions are to be taken as seldom as possible to divisional and brigade parades during their short course of training, which gives them barely sufficient time to carry out the new musketry course and regimental drills.

The companies of Infantry which will commence their course of military training on July 1, were put through a field-work course during the week on Redan Hill, where a series of formidable earthworks were thrown up, under the superintendence of officers of the Royal Engineers.

The batteries of Artillery from Aldershot, having completed their course of instruction at Okehampton and Hay, will return to the Camp on Monday next.

Her Majesty's Birthday will be celebrated here on Saturday next.

An abstract of the Divisional Race Fund has been issued by the hon. secretary, Lieut.-Col. Toogood (late R.A.), which shows a balance credit of £1,270. The funds have wonderfully increased during the two years the management of the divisional races has been in the hands of the present secretary, to whom alone is due the great change for the better which has taken place in this direction.

We are threatened with a water famine at Aldershot.

THE MILITARY TOURNAMENT.

The Duke of Cambridge opened the Fifth Annual Military Tournament at Islington on Monday, which has been a most brilliant success. The Greenwich boys went through a series of parade movements to music, the notes of the band taking the place of words of command. The arena was afterwards occupied by a squad of horsemen, all, with two exceptions, non-commissioned officers of mounted regiments, who took part in single combats, the sword against the sword. The judges were Col. Harnett, late 7th Dragoons; Capt. Smith, 3rd Hussars; Capt. Ridley, 7th Hussars; Capt. Dann, R.H.A., referee. The competitors were the winners in district tournaments, and were among the best swordsmen in the British Army. Of the 14 pairs of fencers, the contests between Serjt. Roach, 3rd Hussars, and Troop Serjt.-Major Bishop, 2nd Dragoon Guards, and between Fencing-Instr. Maxted, 15th Hussars, and Serjt. Allen, R.H.A., excited the most interest. A single-stick combat between non-commissioned officers and men, chiefly of mounted regiments, and a sword *versus* bayonet contest on foot, were followed by a "musical ride" by the 1st Life Guards. The other displays included an infantry *mêlée*—sword and shield, after the style of an Arab attack, against the bayonet, jumping teams by the 3rd and 7th Hussars and the Royal Horse Artillery, a cavalry display by the 3rd and 15th Hussars, an artillery trot, followed by a gallop, tent-pegging, tilting at rings, and lemon-cutting. The competitions on Wednesday were confined to officers. In tent-pegging the Earl of Harrington, Chester Yeomanry, and Major Hickman, R.H.A., each carried away six pegs. On their seventh essay the peg was set in the ground with only its edge presented towards the rider. The Earl succeeded in touching it and consequently in taking the first prize, his opponent, who just missed it, securing the second. For tilting at the ring the first prize went to Lieut. Smith, 4th Hussars, and the second to Rdgmr. Burt, 2nd Life Guards. For lemon-cutting the first prize was obtained by Lieut. Brown, 16 Lancers, and the second by Rdgmr. Browne, Commissariat and Transport Corps. For heads and posts Surg. Daniels, Dorset Yeomanry, obtained first prize, and Capt. Peters, 4th Hussars, second. Col. the Hon. P. Methuen, Scots Guards, took first, and Capt. Walker, R.A., second prize for fencing, and Lieut. Talbot, Shropshire L.I., and Qrmr. Clisham, 21st Foot, the first and second prize for singlestick. In the competition with swords, mounted, the first prize was won by Rdgmr. Stevens, R.A., and the second by Major Lord Kilmarnock, Royal Horse Guards. In that with sword against lance Lieut. Brown, 16th Lancers, took the first prize, and the Earl of Harrington the second. The Prince and Princess of Wales, Prince Albert Victor of Wales, and the Princesses Louisa, Victoria, and Maud, were present on Thursday. The Royal party remained during the military ride, and also witnessed the infantry *mêlée*, the cavalry display by the 3rd and 15th Hussars, and the trotting and galloping by the artillery. The rest of the afternoon's programme included mounted contests with sword against sword, and sword against lance, by non-commissioned officers and men, and fencing and bouts with bayonet against bayonet by the Auxiliary Forces, and wrestling on horseback. In the evening competition for tent-pegging, open to non-commissioned officers and men of the Auxiliary Forces, the first prize was carried off by Corpl. Munckton, Dorset Yeomanry, and the second by Serjt. Winterton, Warwick Yeomanry. For tilting at the ring, open to the same class, Serjt. Winterton took the first prize, and Corpl. Munckton tied with Serjt. Wood, H.A.C., for the second. For lemon-cutting, Corpl. Munckton also tied for the first prize with Pte. Green, Warwick Yeomanry. For the first prize for heads and posts Serjt. Winterton tied with Pte. Dudley, Bucks Yeomanry. Wrestling on horseback by teams of six men of the 15th and 3rd Hussars resulted in the victory of the latter, who unhorsed the whole of their opponents with the loss of only one man.

The *Times* says:—"The War Office have decided to place Ceylon, the Straits, and Hong Kong under one command, the head-quarters of the General and Staff to be fixed at Singapore. The change will probably not be effected during Gen. Sargent's term of service in this colony."

THE CHANNEL SQUADRON.

[FROM OUR CORRESPONDENT.]

Berehaven, Bantry Bay, June 12, 1884.

The Eastern Division of the Channel Squadron, the Minotaur, Sultan, and Neptune, left Spithead on the evening of Saturday, the 7th inst., and arrived in Plymouth Sound the following afternoon, where they found the Western Division, the Agincourt, Achilles, and Northumberland, secured to buoys, awaiting their arrival. The Minotaur saluted the flag of the Commander-in-Chief as she passed the end of the breakwater; the Minotaur and Sultan anchored, and the Neptune secured to a buoy. A very sad accident occurred soon after our arrival. The Vivid, the Commander-in-Chief's yacht, had come out into the Sound to take the Duke of Edinburgh on shore; as she was nearing her buoy on her return, she ran into a pleasure boat with eight people on board, two of whom, a man and a young woman, were drowned. The Squadron left the Sound at 10 o'clock on Monday forenoon, in single column line-ahead; soon after getting outside, formed columns of divisions and stood down Channel. We had steam tactics in the afternoon, and sail drill in the evening. We passed the Land's End between 8 and 9 o'clock. The next day we commenced steam tactics in the forenoon, but after performing two evolutions they had to be discontinued, as a fog came on which lasted for the remainder of the day and the greater part of the following night; it lifted a little every now and then, and was never very thick for long together, so the Squadron, which was in close order, with the columns closed to four cables, was able to keep very good station, and not get separated at all. It was, however, very unpleasant, especially at night, and was a very good example of "Bantry weather." In the morning (yesterday), it had cleared up; we made the land at daylight, and arrived here at half-past 7. We came in, in single column line-ahead, through the eastern passage; the Minotaur anchored abreast of the landing-place, the Neptune and Sultan passed her and came to a little nearer to Bear Island, as the depth of water does not allow the whole Squadron to lie in one unbroken line; the 2nd Division closed up till the two leading ships occupied the places vacated by the Neptune and Sultan, and anchored. All the ships moored. The Hecla arrived soon after us, and anchored in the eastern passage, close to where the mine field will be when the torpedo operations commence. Yesterday forenoon we hoisted out all boats, and manned and armed. In the afternoon the torpedo officers of all the ships assembled on board the Hecla to discuss the plan of operations with Capt. Wilson. A lieutenant from each ship of the Squadron has been detached for service in the torpedo boats which are fitting out at Portsmouth for an experimental cruise. Since our arrival in England, Rear-Admiral Wilson, second-in-command, and Capt. Sir W. Hunt-Grubbe, of the Sultan, have left the Squadron on the expiration of their periods of service, and have been succeeded by Rear-Admiral Whyte and Capt. R. E. Tracey. There have been a good many other changes, both among the officers and ships' companies. The Duke of Edinburgh is accompanied on the cruise by his young son, Prince Alfred.

Berehaven, Bantry Bay, June 18, 1884.

The torpedo parties of the Squadron were employed on Thursday, Friday, and Saturday of last week in laying down mines for the protection of the eastern passage. Each ship laid down one line of six electro-contact and another of six observation mines. The Squadron, with the exception of the Sultan, went out yesterday for target practice, to complete their firing for this quarter, and tested the mines as they returned through the passage in the afternoon. The blowing charges connected with the mines were all at the station on Bear Island; and as the ships passed through the part of the channel which had been mined, a succession of reports could be heard on the shore, which showed that the mines were acting successfully. The ships did not weigh their anchors, or unmoor, but slipped their moorings, leaving them buoyed, and picked them up again on their return. The Sultan did not go out with the others, as she had expended all her ammunition for this quarter when she was by herself, on passage from Malta to Gibraltar. The Seahorse joined us last Friday to act as tender for the present. Each ship has drawn a torpedo-boat from the Hecla. On Monday they were away all day at steam tactics in Bantry Bay, under the direction of the Duke of Edinburgh. They put into Glengariff in the middle of the day, and the Duke entertained all the officers at lunch at Eccles' Hotel. They have been away again at tactics to-day, under the orders of Capt. Mead, of the Agincourt. One of the torpedo-boats runs twice a day to Bantry and back carrying mails, which is a great convenience, as we now get our letters and papers soon after 10 o'clock, instead of at about 3 in the afternoon. The regular local post comes all the way round from Bantry by car. To-day the torpedo parties are engaged in laying down electro-mechanical mines, three from each ship, and in weighing the observation and electro-contact mines which are finished with. This forenoon all the Marines of the Squadron landed on Bear Island for drill, under Major Poore, of the Minotaur; and to-morrow the Blue-jacket small-arm companies will land. After the return of the Squadron to their moorings yesterday, the Duke of Edinburgh left for Galway, in the Seahorse, for a few days' fishing. We have had beautiful weather for the last four or five days.

THE RESERVE SQUADRON.

(FROM OUR OWN CORRESPONDENT).

Deal, June 19, 1884.

The Reserve Squadron, consisting of the Hercules, Capt. FitzRoy, bearing the flag of Rear-Admiral Hoskins; Hector, Capt. Arthur; Hecate, Capt. Jones; Shannon, Capt. Adeane; Repulse, Capt. St. John; Defence, Capt. Pollard; Valiant, Capt. Knowles; Penelope, Capt. Robinson; Lord Warden, Capt. Kennedy, arrived and anchored off here this forenoon. The Squadron left Portland at 2.30 p.m. on the 17th inst., under steam. The whole of yesterday forenoon was occupied with general quarters and steam tactics, which passed off most successfully, and without the slightest hitch. Sail was made to a slight breeze in the afternoon, and the Squadron remained under canvas till sunset, when, the wind having died away, the sails were again furled. The Squadron proceed in two columns line-ahead, the Hector being the leader of the lee line, and the Hecate immediately astern of the Hercules. At night-time, however, she is placed on the Admiral's starboard quarters, so as to be well in view of those on board the flagship. No opportunity has as yet arisen—the weather up to the present having been beautifully fine for judging of the Hecate's performances since she has had her superstructure fitted; but it cannot be wondered that such an unsightly craft quite spoils the appearance of the Squadron, the ships composing which, whatever be their capabilities as fighting machines, look remarkably well, especially under canvas. We remain here until to-morrow afternoon, and then leave for Heligoland. The speed of the Squadron during the cruise is to be only four knots an hour, so that we are not likely to make any rapid passages; but as the distance between the various ports to be called is not very great, this is a matter of small importance. The mails for the several ships will be made up at the General Post Office in London, so that all letters and papers need only be addressed "Reserve Squadron." It is rumoured that, on the arrival of the Squadron at Spithead on July 27 next, the Lords of the Admiralty will come to Portsmouth to inspect it. The programme of the cruise of the Squadron is as follows:—

Place.	Arrive.	Leave.	Remain.
The Downs	June 19	June 20	1 day.
Heligoland	June 23	June 25	2 days.
Kirkwall	June 30	July 3	3 days.
Stornoway	July 4	July 8	4 days.
Blacksod Bay	July 11	July 17	6 days.
Bantry	July 19	July 21	2 days.
Falmouth	July 23	July 24	1 day.
Torbay	July 25	July 26	1 day.
Spithead	July 27	—	—

Reviews.

Among other interesting articles in the current number of *Temple Bar* we find a tale by Mrs. Godfrey, in two parts, entitled "Mrs. Forrester's Secret." It is very spasmodic in its style, recalling Victor Hugo occasionally, and also recalling the story of a "Mystery in Palace Gardens." In the first part, a very striking interview is related between Mrs. Forrester and the counsel who defended her in a most critical case. In that interview both are much excited. It is he who speaks first. "'It is late for me to come to you, but I could not sleep without seeing you!' She let his hand drop. 'It is good for you to come,' she says, quietly. 'Sit down,' he says, hoarsely; 'you are tired, and I want to talk to you.' He puts out his hand to lead her to the sofa, and then drops it suddenly to his side. He dares not touch her. There is a moment's silence; then clasping her hands in her lap—those beautiful white hands that he so greatly admires—she turns to him." This is very sensational, indeed, very tall writing, and no doubt will leave its mark. The authoress, who has already made herself so favourably known, indulges sometimes in a round-about way of saying what she wishes to say. For example, a visitor is announced; he enters with a noise "that instantly reduces his host into an active realisation of his presence." This will seem to the crowd to be a rather round-about way of stating such a common-place fact; but it is in all probability a peculiarity which will prove welcome to many readers. "Mrs. Forrester's Secret," Part 2, will, it is presumed, appear in the July number of *Temple Bar*.

H.R.H. the Prince of Wales, accompanied by Col. Teesdale, C.B., and Mr. Francis Knollys, C.B., visited the Warwick Farm Model Dairy on Monday, at the International Health Exhibition, when his Royal Highness saw the process of analysing and testing the milk. The process when practised will prevent the supply of impure milk, and we are informed that the War Office is about to issue orders for the above system of milk-testing to be adopted by regiments serving in the United Kingdom.

The *Times*' Woolwich correspondent writes:—"The Royal Engineers have inspected the stock of railway material in store at the Royal Arsenal, and it is to be forwarded at an early date to the Red Sea, for the purpose of forming the nucleus of a military line to be constructed from Suakim to Berber. A ship has been selected for its conveyance. Two small locomotive engines which were purchased about two years ago for a Government railway at Cyprus will form part of the equipment, and others are ordered to be supplied by contract. All the railway plant is designed for the same narrow gauge, and the whole of the material is remarkably light."

The *Standard* announces that "The Queen has been pleased to command that the grant of the India Medal of 1854, with clasp inscribed 'North-West Frontier,' shall be extended to every officer, non-commissioned officer, or soldier who was engaged in the operations under Col. A. Macdonell against the Mohmund tribes in the defence of the Punjab Frontier, between Dec. 5, 1863, and Jan. 2, 1864, both dates inclusive, and requests commanding officers of corps employed in the above operations to prepare nominal rolls of individuals entitled to the decoration. Officers and men who are already in possession of the medal will only receive the additional clasp."

The old wooden two-decker Donegal has been selected to supersede the Vernon as torpedo school-ship at Portsmouth, the latter having been found too small for the requirements of the service upon which she is employed. The Donegal was brought from her moorings in Porchester Creek on Tuesday, and docked to have the necessary repairs and alterations effected. She was taken into the repairing basin to have her machinery taken out.

The Auckland and Hawkes Bay Land Company, Limited, has been incorporated with a capital of £100,000, with the object of purchasing, improving, and colonising land in New Zealand.

The Army.

3RD DRAGOON GUARDS. The dismounted portions of the regiment at Manchester and Birmingham will leave for Colchester on Monday next and the 2nd prox. respectively. The squadron at Birmingham proceeds by march-route on the 2nd prox., and will be relieved the same day by a squadron of the 4th Hussars from Norwich. Major T. T. S. Carlyon, formerly of the regiment, died at Tregrehan, near St. Anstell, on the 6th inst., aged 62 years. He received his first commission as a cornet in the 10th Hussars; became lieut., Dec. 6, 1844; capt., 3rd Dragoon Guards, Dec. 1, 1846; major, June 27, 1854, and retired from the service in 1860.

5TH DRAGOON GUARDS. The dismounted party of the regiment went by rail on Thursday from York to Manchester.

18TH HUSSARS. The death is announced of Lieut.-Col. Wickham-Freeman, late of the regiment, at his residence in Bath, in his 90th year. The following appeared in reference to the above in the Regimental Orders:—"The commanding officer deeply regrets to announce the death of the last surviving officer of the old 18th Hussars, Lieut.-Col. Wickham-Freeman, in his 90th year, at Bath. Col. Freeman served in the regiment throughout the occupation of Paris, leaving it on its being broken up on the reduction of the Army to the peace establishment in September, 1821. He ever took the liveliest interest in the regiment from its re-organisation in 1858, returning at that time his share of the mess plate back to the regiment. By will he devotes a sum to be applied by the commanding officer to the relief of the married on the establishment of the regiment." His funeral, which took place at Bath on the 13th inst., was attended by Mr. Mackinnon of Acryse and Mr. Knapp, his cousins; Col. Hale and Lieut.-Col. Malet, commanding the 18th Hussars, the corpse being borne to the grave by Regtl.-Sergt.-Major Ellis and by four troop-sergt.-majors, viz., Abbott, Rapson, Hicks, and Fulcher, who proceeded over from Dublin, where the regiment is quartered.

ROYAL ARTILLERY.

A Baty. 3rd Brig. has returned to Weedon from Hay, on conclusion of gun practice.

B Baty. 3rd Brig. proceeded yesterday from Weedon to Shoeburyness for gun practice.

The following appointments in the Indian Ordnance Department have been approved:—Capt. J. S. Frith, Comy. of Ordnance, 4th Class, to officiate as Comy. of Ordnance, 3rd class; Major H. T. Kinsman, Comy. of Ordnance, 2nd class, to officiate as Comy. of Ordnance, 1st class; Capt. A. H. Browne, Comy. of Ordnance, 3rd class, to officiate as Comy. of Ordnance, 2nd class; Capt. C. P. Triscott, Comy. of Ordnance, 4th class, to officiate as Comy. of Ordnance, 3rd class.

Major Walker (late Bombay), Comy. of Ordnance, Mhow, has been granted furlough to England for six months, on medical certificate.

Gen. Sir E. Warde, K.C.B., died suddenly on the 11th inst. at Brighton. The son of that distinguished Guardsman, the late Gen. Sir H. Warde, G.C.B., he began life with the advantage of many valuable friends, and being gazetted to the Royal Artillery in 1828, he soon obtained his first "jacket" in the Horse Artillery. He was prevented from starting with the original expedition to the Crimea by being promoted just as he had prepared his troop, "the Galloping Blacks," for service, but he soon followed to take command of the siege train, the duties of which he conducted until within three weeks of the fall of Sebastopol, when he became dangerously ill with fever. He was promoted as one of the "distinguished colonels," and at the close of the war returned to the Horse Artillery in command of the brigade at Woolwich. He was promoted to the command of the Artillery at Aldershot on the formation of that camp, and two years later, in 1859, was selected to proceed to Malta to re-arm that fortress when war with France seemed imminent. From there in 1861 he was sent to command the Artillery in the South-West District. In 1864 he was selected, though only a colonel, for the command of the Woolwich District, with the rank of major-general. It was during the period of this command that he had an opportunity of exhibiting the prompt determination for which he was remarkable. An explosion at Erith so destroyed the river-wall that one tide might have flooded the whole country up to Camberwell, and burst the great sewers just then completed. In less than an hour he took what proved to be efficient measures for averting the danger. He received the thanks of the Government for this service, and on giving up the command of the District was promoted a K.C.B.

ROYAL ENGINEERS.

Major-Gen. E. M. Grain, on the Retired List, died at the Grange, Gillingham, near Chatham, on the 13th inst., aged 57 years.

A General Order directs that a limited number of men between the ages of 21 and 30 will be enlisted by special authority for the Royal Engineers for appointment as military mechanists. The trades of the men will be notified when called for. The men will not be required to sign the certificate as to departmental pay. They will be promoted to the grade of company serjt.-major mechanist from the date of appointment on promotion.

The Cairo correspondent of the *Standard* says:—"The company of Royal Engineers now under orders for Suakim will construct a jetty at that place in order to permit of the landing of material for a railway to be laid for a distance of five miles from Suakim. The men to be employed on this work will be sent from London."

An officer and a first-class staff serjeant-major of the Survey Department have left for Egypt, taking with them a complete equipment of surveying instruments, to survey the Desert between Suakim and Berber, with a view to laying down a railway. We wonder how and when they will set about their business?

A correspondent of the *Times* states that the 8th Company, which is being organised at Chatham as a railway corps for Egypt, is to be put through a special course of instruction in driving railway engines and the knowledge of signals. The directors of the L. C. and D. Railway have granted special facilities for the instruction of the men.

GRENADIER GUARDS. Lieut.-Col. Eaton has been appointed to command the camp at Wimbledon during the meeting of the National Rifle Association, Brig.-Surg. Elkington having charge, as before, of the Field Hospital during the meeting.

1ST, OR ROYAL SCOTS. Major Roden has been posted to the 2nd Batn. on promotion, and ordered from Barbadoes to the Curragh. Capt. Fenton has been posted to the 2nd Batn. on his recent promotion. Capt. Tippinge has been removed from the 2nd to the 1st Batn. on promotion, and ordered to join the depôt at Glencorse.

4TH KING'S OWN (ROYAL LANCASTER REGIMENT). Col. Eccles has been transferred to the command of the 4th Regtl. District from the 101st Regtl. District, Tralee.

12TH SUFFOLK REGIMENT. Brigdr.-Gen. G. F. Walker, half-pay, Agra Brigade, has been transferred to the command of the Gwalior District, vice Brigdr.-Gen. Massey.

15TH EAST YORKSHIRE REGIMENT. The following committee of paymastership has been formed in the 2nd Batn., vice Capt. and Pymr. Hanstock, who has six months' leave to England:—Major Carey, président; Capt. Pogston and Lieut. Sladen, members. Major Carey performs the duties on the responsibility of the committee.

17TH LEICESTERSHIRE REGIMENT. The *Bombay Government Gazette* notifies the appointment of Brigdr.-Gen. G. T. Brice, commanding the Belgaum District, to officiate on the divisional staff during the absence of Major-Gen. Sir J. Ross, K.C.B., commanding the Poona Division, who is proceeding home on furlough.

23RD ROYAL WELSH FUSILIERS. Capt. and Qrmr. P. M'Cormick, of the 1st Batn., who was at home on leave from India, died on the 5th inst. Capt. M'Cormick served with the 2nd Batn. during the campaign in South Africa in 1873, and has the medal and clasp for Ashantee. He leaves a widow and a large family. Major Knox Leet, Pymr. 2nd Batn., has obtained leave of absence on private affairs till Aug. 16. The 2nd Batn., under the command of Major Walwyn, marched out into the country on Tuesday last to the range of mountains known as "The Devil's Bit," which are situated in a westerly direction, a few miles from Templemore, each man being supplied with 20 rounds of blank ammunition, a detachment having been sent on in advance of the main body as a defending party, which took up its position in extended order just behind the brow of the mountain, well under cover, and out of sight from the attacking force, which advanced up the hill, also in skirmishing order, very cautiously and feeling its way, and taking advantage of every possible cover which offered itself; and when within about 400 yards of the top of the hill the defending party opened fire, which was quickly responded to by the attacking force, and a sharp fire was kept up on both sides until the summit of the mountain was reached, when it was discovered that the company on the right of the attacking force had changed direction to the left, and so got round the left flank of the defending party, which compelled them to retire. The battalion then formed up, piled arms, and every man supplied with a pint of ale or a bottle of lemonade, and then prepared for dinner, the rations having been sent out under the charge of Capt. and Qrmr. Knightley, who, in the absence of proper cooking utensils, contrived to borrow sufficient pots and pans of different patterns from the officers' and serjeants' messes and other places for cooking the rations on the ground, which arrangements were very satisfactorily carried out under his superintendence, dinners being ready soon after the fight for the hill was over. After the dinners the officers got up a sweepstake race for the men up to the top ridge of the "Devil's Bit"—1st prize, 12s.; 2nd prize, 7s.; 3rd prize, 5s.—for which about 150 men started, but very few succeeded in going the full distance. Pte. Hollidge took the 1st prize, Pte. Mitchell the second, and Pte. Jones the third. The race being over, the men fell in and started for barracks about 3.30 p.m., arriving about 6.30 p.m. in excellent spirits.

39TH DORSETSHIRE REGIMENT. Major Young is ordered home from India on vacating his appointment as brigade-major in India.

44TH ESSEX REGIMENT. Lieut. Brabazon has been appointed interpreter.

ROYAL MARINES.

Capt. H. H. Morgan, R.M.L.I., has been medically surveyed and placed on half-pay for 12 months, when a further report is to be made on his state of health, as to his fitness or otherwise for the service.

The Admiralty have approved of 16 Royal Marines, four from each Division, attending at Wimbledon at the meeting of the National Rifle Association, to compete for the following prizes, viz.:—"Brinsmead Challenge Shield," "United Service Challenge Cup," "Army and Navy N.R.A. Challenge Cup," and "Gen. Eyre's Prize." The four from each Division will be at once selected, and will appear at Wimbledon on July 21.

In consequence of the retirement of Major H. W. Bamber, of the Chatham Division of Royal Marine Light Infantry, on May 28, Major G. A. Heseltine, of the Plymouth Division, obtains the maximum rate of pay of his rank; and Capt. and Brevet Major A. B. Crosbie, of the Chatham Division, has been promoted to major at that division.

Staff Serjt. Edwin P. Bolton (staff clerk, Royal Marine Office), has been promoted to the rank of Superintending Clerk—warrant officer—on the General Staff of the corps, vice Waters, deceased (dated June 3).

The following officers have been granted leave of absence, viz.:—Lieut. E. C. L. Congdon, R.M.L.I., 14 days, for the benefit of his health; Major and Brevet Lieut.-Col. A. French, R.M.A., two months on disembarkation; Lieut. F. G. Kappey, until July 31 next, on disembarkation; Col.-Comdt. J. de C. Meade, 14 days' extension.

Lieut.-Col. Way, R.M.L.I., and the detachment of Marines under his command, disembarked at Port Said from the P. and O. steamer Deccan on May 20, and were quartered in the Dutch House, but have since been moved to Suakim. Capt. Montgomery, and Lieuts. Roche, Horniblow, and Holman are the officers under Col. Way. They were sent on from Ramleh to prepare the quarters for the Marines' reception. The men are billeted in the large store rooms very comfortably. On the 28th, the Alexandra, bearing the flag of Vice-Admiral Lord John Hay, arrived; also the Express, gun-vessel. Capt. T. Byam, arrived in the P. and O. steamer on passage to the Invincible at Alexandria. His Excellency Tewfik Ibrahim Pasha paid a state visit to the Dutch House, and was received on landing by a guard of honour under the command of Capt. McKechnie and Lieuts. Brine and Curtoys. After all the officers had been presented, his Excellency went the entire round of the mess quarters, with which he seemed much pleased. Before leaving, he was entertained by the officers in their mess. Tewfik Ibrahim Pasha studied at the Royal Military College, Woolwich, at the same time as the late Prince Imperial.

60TH, KING'S ROYAL RIFLE CORPS. Major Blackwood-Price, 3rd Batn., is about to retire.

82ND SOUTH LANCASHIRE REGIMENT. The head-quarters and service companies will leave Devonport, where they have been stationed for nearly three years, on Monday next for South Africa, being conveyed in H.M.S. Himalaya.

90TH CAMERONIANS (SCOTTISH RIFLES). Major Brunker has been appointed officiating brigade-major at Sealkote.

91ST (ARGYLL AND SUTHERLAND HIGHLANDERS). The *Standard* says:—"The Queen has approved of Major J. St. Clair being appointed Brigade-Major, 1st Infantry Brigade, at Aldershot, in succession to Major Hutton, King's Royal Rifle Corps, who has proceeded to Egypt. The *Natal Mercury* states that two companies have been ordered at once to Etshowe.

97TH QUEEN'S OWN ROYAL WEST KENT. Lieut. Hilton is about to retire upon temporary half-pay.

98TH NORTH STAFFORDSHIRE REGIMENT. A correspondent at Quetta gives the following account of the recent murder near that station of Lieut. Dupuis:—"The deceased officer had a passion for hill-climbing. He attempted to ascend Mount Zurghat on Sunday, May 18, but was unsuccessful, and tried again on the 25th. How near he got to the summit is not known; but in a notebook which has been recovered he had entered that he found snow at an altitude of 10,600 ft. He had descended, and was within 400 yards of the spot where he had left his pony, when he had to cross a narrow ledge with a fall of some feet on either side. Here he was waylaid by three Yassinzai Pathans, who pushed him off the ledge and stoned him to death. Mr. Dupuis fired two shots from his revolver at them, but both missed. The murderers buried the body in the shingle of the watercourse where the unfortunate officer fell. The search was directed first to the main hill. The searchers gradually drew close to where the body lay, and at last discovered both it and the murderers. The men were arrested; one of them was hanged, and two were transported for life. The cause of the murder probably was that it was too great a temptation to these fanatical Pathan blackguards to see an English officer wandering unprotected."

102ND ROYAL DUBLIN FUSILIERS. The command falls vacant from the 7th inst., by the retirement of Col. Duncan, who has completed his five years. Lieut.-Col. Cleland will succeed to the vacancy, Major Vetch becoming second lieut.-col.

107TH ROYAL SUSSEX REGIMENT. Col. Johnstone, half-pay, late of the regt., has been selected for the command of the 101st Regtl. District, Tralee.

RIFLE BRIGADE. The *Whitehall Review* says:—"Among regimental moves as yet unchronicled will be a transfer of the 2nd Batn. Rifle Brigade from the Curragh to Winchester, the move being carried out in the autumn and in place of the 2nd Batn. 60th Rifles, which crosses over to Ireland."

MEDICAL DEPARTMENT. The next examination of candidates will be held at the University of London on Aug. 11.

ARMY PAY DEPARTMENT. In the House of Commons, on the 12th inst., Mr. Whitley, Member for Liverpool, asked the Secretary of State for War, "Whether it is the fact, as stated in the *Times* of May 8, that the rank of lieutenant-colonel will be bestowed upon staff paymasters in the Army Pay Department after five years' service in that position, and whether he can hold out any hope that the number of chief paymasters will be increased, so as to allow of general officers commanding at home and abroad having on their staff, as financial adviser, an officer holding corresponding rank to that of the other heads of departments." Sir Arthur Hayter said in reply:—"The honorary rank of major has only recently been conferred on staff paymasters, and it is not considered desirable to confer the higher honorary rank of lieutenant-colonel upon them after five years' service. In reply to the second question, I have to say that the number of chief paymasters has only recently been increased from 12 to 15, a number which in our opinion is adequate. There are several districts both at home and abroad commanded by general officers, in which the financial duties are not sufficiently important to justify the employment of a chief paymaster. Both my answers must, therefore, be in the negative."

The Auxiliary Forces.

MILITIA.

NORTHERN DIVISION, ROYAL ARTILLERY. The 2nd Brigade (Durham Artillery) embarked yesterday in H.M.S. Assistance at North Shields for Dover, where the annual training will be carried out. The brigade will disembark on Monday.

EAST LANCASHIRE REGIMENT. The 3rd Batn., 18 officers and nearly 800 men, proceeded from Burnley to Southport on Tuesday last, for the annual training.

LINCOLNSHIRE REGIMENT. The depôt and 3rd Batn. were inspected on the 11th inst. by the Major-General commanding the Eastern District. The 3rd Batn. was marched past and performed a few battalion movements very satisfactorily, proving how effective is the work of a thoroughly efficient staff such as the 3rd Batn. possesses. The General expressed himself thoroughly satisfied. Immediately after the completion of the inspection by the Major-General, the recruits of the depôt, also of the 3rd and 4th Batns., were inspected by the Inspector-General of Recruiting, the physique of the recruits being of the average type of the present day, about one in ten being capable of enduring a severe field day on the long valley at Aldershot.

Royal Inniskilling Fusiliers. The 3rd Batn., now assembled for training at Enniskillen under command of Col. Irvine, musters on parade two field-officers, five captains, five lieutenants, the adjutant, quartermaster, surgeon, 25 serjeants, 15 corporals, 6 drummers, and 297 privates.

Sherwood Foresters. The officers of the 5th Batn. (Derbyshire Regt.) dined at Willis's Rooms on Thursday. Present:—Cols. Mosley and Woolnough; Major Cox; Capts. Cox, Paget, Pearson, Bouverie, Borough, and A. L. Salmon; and Lieut. Hon. A. N. Curzon.

Royal Irish Fusiliers. Gen. Sir T. Steele last week inspected the 3rd Batn. at Armagh. At the close, Sir Thomas warmly complimented Col. Stanley and his officers on the efficiency and appearance of the men. The officers present were:—Col. Stanley; Lieut.-Cols. Simpson and Cuming; Capts. Alexander, Lemon, Jameson, and Mansergh; Lieuts. Leeper, Segrave, Bulfin, and Nicholson; Major Pakenham, adjt.; Surg.-Major Lavery, and Qrmr. Drewin.

Connaught Rangers. The 4th Batn., now assembled at Galway under the command of Col. Daly, musters two field-officers, four captains, five lieutenants, the adjutant, quartermaster, surgeon, 22 serjeants, 14 corporals, six drummers, and 316 privates.

Nine regiments are under orders to assemble for training on Monday, and, with the exception of the Yorkshire Artillery, who will be in billets at Scarborough, all go into camp at the following places:—3rd Argyll and Sutherland Highlanders, Stirling; 6th King's Royal Rifles, Rhyl; 3rd Middlesex, Aldershot; 3rd Northumberland Fusiliers, Alnwick; 3rd Royal Fusiliers, Aldershot; 4th Yorkshire, Richmond; 3rd East Yorkshire, Beverley, and 3rd Connaught Rangers, Westport.

An Army Circular, just issued, states that the annual bounty due to a Militiaman may, with the special sanction of the Secretary of State, be paid in cases in which, from very exceptional circumstances, the period of recruit drill or training has been reduced or attendance thereat dispensed with on proper authority.

YEOMANRY CAVALRY.

Staffordshire. An inquest was held at Lichfield on Monday on the body of Lieut.-Col. Bromley-Davenport, who died suddenly on Sunday evening, whilst proceeding from mess to his quarters at Yeomanry House. Major and Adjt. Graves stated that Col. Bromley-Davenport had complained to him of pains in the chest, and that on Friday he said that if the pains continued he would have to hand over the command to Lord Anglesey. The jury returned a verdict to the effect that death resulted from natural causes. On Tuesday, a Court of Inquiry was held at Lichfield as to the disturbances, by order of the War Office. Lieut.-Col. the Marquis of Anglesey presided, and there were present Major Lord Berkeley Paget and Capt. F. Monckton, M.P. The court made the following declaration:—"The court having maturely considered the evidence now brought forward before them, are of opinion that there was no riot as alleged, and that the whole of the disturbance was confined to what occurred between Trooper Smith, Queen's Own Royal Yeomanry Cavalry, and the man Binns, and the attempted arrest of the former." This was signed by the officers constituting the court. The annual training concluded on Wednesday with the inspection on Whittington Heath, Lord Anglesey in command. At the conclusion, Lord R. Kerr, addressing the officers and men, said he regretted very much the sad blow which had fallen upon the regiment and which had cast a gloom over their meeting. He wished to take that opportunity to convey to them his heartfelt condolence upon the gross manner in which they had been treated by the public Press. Newspapers had been vying with each other in casting filth upon the regiment and accusing them of every sort of unsoldier-like conduct. He congratulated them on their soldier-like conduct when, under great provocation, in the streets of Lichfield, instead of giving way, as they would have liked to have done, and had a good fight, they one and all went back to their billets, because they felt that it was their duty to obey orders. It would not be his fault if a contradiction were not given to the false statement that they brought about the death of their colonel by a riot in the streets. Instead of being a discredit to the service, they had been a credit to the town, county, and country.

Oxfordshire. The officers held their annual dinner at the Albion, on Wednesday. Present:—Cols. Barnett, Ruck-Keene, and Hall; Majors Mackenzie, Norris, and Slater-Harrison; Capts. Viscount Valentia, Viscount Parker, A. Brassey, and Adjt. Becher; Messrs. A. H. Butler, R. S. Bolton Davis, R. T. Hodge, J. F. Mason, L. Noble, and G. H. Norris.

Of the 39 regiments of Yeomanry Cavalry, 28 have already completed their training, and four will be dismissed before the end of the month, viz., the Ayr, on Tuesday; the Duke of Lancaster's Own and the Pembroke, on Thursday; and the Queen's Own Lancashire, on Saturday.

THE VOLUNTEERS.

3rd City of London Rifles. The Duke of Cambridge inspected the regiment, 12 companies of 32 files, 1,003 present, under command of Lieut.-Col. Laurie, on the Horse Guards' Parade on Saturday evening last. His Royal Highness told Col. Laurie that he was satisfied with the drill and appearance of the corps, which had passed a very creditable inspection.

18th Middlesex (Paddington) Rifles were inspected on Saturday last by Major-Gen. Gibbs. Col. FitzRoy commenced the inspection; but the General, who arrived late, took the salute, and in addressing the regiment afterwards made known to Col. Gordon Ives, the commanding officer, his complete satisfaction with all he had seen. The regiment was in 10 large companies.

20th Middlesex (Artists) Rifles were officially inspected on Saturday evening on the Guards' Ground. They were turned out completely equipped under command of Lieut.-Col. Edis, and showed a total muster of 692. Sir F. Leighton, hon. col., was present. Col. Moncrieff, the inspecting officer, intimated that he was well pleased with the inspection, and especially with the neat and serviceable turn-out of the corps.

The *Liverpool Courier* says:—"To save expense the Volunteer Artillery have now to fire shells without any bursting charge. These shells are collected, after firing, for further use. It would be almost as well to issue no shells at all, and to limit the Volunteers to solid shot. If the Volunteer Artillery are worth maintaining they are worth instructing, and to deprive them of shell practice by such petty economy is not the way to do it. The Government are always ready to praise the Volunteers, as compliments are cheaper than shells, Martini rifles, or camp allowances."

Five thousand Volunteers will undergo training at Aldershot in August. The corps will go under canvas from the 9th to the 16th.

ARMY INTER-REGIMENTAL RIFLE MATCHES.

The regulations for these matches for the current year (the eleventh since their institution) have now been published. The chief alterations from the conditions enforced in past years are:—1. Regiments and battalions serving abroad (except India) to compete among themselves, and not, unless desired, with those serving at home. 2. In the "team" contests, the shooting will be by teams of ten, the eight best scores of the ten to count as the aggregate score of the team. The chief features of these competitions are:—1. They are allowed to be held, under a very strict system of marking and register-keeping, on local rifle-ranges, and on any day or days within the following limits:—United Kingdom, June 1 to Sept. 30; other stations, Sept. 1 to end of February. 2. The prizes are so arranged that cavalry and infantry at home, cavalry and infantry abroad, and Militia battalions, compete separately for their own entrance moneys, and so as to be on equal terms. 3. There are team contests at 200, 500, and 600 yards, team volley matches at 600 yards (500 for Militia), individual competitions in connection with the three-distance team contests, rifle-matches at 800 and 900 yards, revolver matches at 30 yards, and rifle matches for Militia battalions at 200 and 500 yards. The average total value of the prizes awarded during the last three years is £404. The secretary (honorary) is Major F. M. Salmond, D.A.A.G., School of Musketry, Hythe.

THE CORPS OF COMMISSIONAIRES.

A meeting of naval and military officers was held at the United Service Institution on Saturday, under the presidency of the Duke of Cambridge, to present a testimonial to Capt. E. Walter, in recognition of his great service in establishing the Corps of Commissionaires. The testimonial consisted of a chased silver plateau, candelabra, and two dessert stands, inscribed as follows:—"To Edward Walter, Esq., late captain 8th Hussars, in acknowledgment of the benefits which he has conferred upon sailors and soldiers by his foundation and command of the Corps of Commissionaires, this testimonial is presented by Officers of the United Services. 1883." The Earl of Longford having read a report stating the steps which had been taken in promotion of the public recognition of Capt. Walter's service to the State, the Duke of Cambridge, in making the presentation, said it was with a real and sincere feeling of gratitude, based upon public and private grounds, that he took part in this good work. On his own responsibility, and almost entirely without outward assistance, Capt. Walter had inaugurated a corps which was of the greatest public use, and to him alone belonged the merit of its establishment. The institution which Capt. Walter had founded was begun in a small way in London; now it was an appreciated fact in most of our large towns.

Capt. Walter returned thanks, and said that, while highly valuing the expression of esteem from his brother-officers of both services, he hoped that the Corps of Commissionaires would long and increasingly enjoy the confidence of the public. The annual parade and inspection of the Commissionaires took place next day at Chelsea Hospital. The Commissionaires, over 900 strong, formed in columns of divisions, the right wing, under Capt. James, with Major Dixon and Major Stauiland, composed of cavalry, infantry, Grenadier companies, sailors, and Marines; and the left, under Capt. Swinhoe and Major Hawkins, of Artillery, Engineers, police, and warders of convict prisons. Capt. E. Walter had the chief command. At 10.30 Sir Patrick Grant arrived, and the band played the National Anthem. After a minute inspection, the bugle sounded, and a man representing each regiment in the service, also sailors and Marines, formed a long line on the lower terrace. Subsequently squares were formed on each side of the terrace steps, with the band in the centre.

Sir Patrick Grant addressed the men, saying that a finer body he never inspected in his life. It was a pleasure to look upon them, for it reminded him of the type of soldiers of former days. The greatest credit was due to Capt. Walter for having originated the corps.

Capt. Walter replied on behalf of his officers and men, and warmly thanked Sir Patrick for the hearty and sincere compliment he had paid them. The visitors that day had seen in line representatives of the grand old army, and it was intended to carry out the idea as long as they possibly could. They wished to keep up the traditions of the old army, and if there were any officers on the parade who wished to present the men with copies of the colours of their regiments, he should be happy to receive them. Nothing would please old soldiers more than a sight of their colours. In conclusion, Capt. Walter expressed his hope that improvements in the way of making the soldier a more representative individual would soon be seen in the Army. Divine service, *al fresco*, followed, a sermon being preached by the Rev. G. F. Haydon, Vicar of Hatfield.

Service Questions in Parliament.

In the House of Lords on Monday the Royal Military Asylum, Chelsea (Transfer) Bill was read a second time.

In the House of Lords on Tuesday, Lord Morley, in reply to Lord Dorchester, said he was disposed to believe, with the noble lord, that there had been great exaggeration in the published accounts of riotous proceedings on the part of Yeomanry Cavalry at Lichfield. At a later period of the evening, Lord Morley read a telegram bearing out his supposition on the subject.

In the House of Commons, Mr. J. K. Cross, in reply to Mr. Gibson on the subject, stated that the proportion of officers in the administrative grade of the Indian Medical Department, is one to every 27 executive officers. In 1880, there was a reduction of one administrative officer. In 1880 the limits of age for compulsory retirement were fixed at 55 years for the new rank of brigade-surgeons and surgeons-major, and at 60 years for surgeons-general and deputy-surgeons-general; instead of at 55 and 65 years respectively. The effect of lowering the age for compulsory retirement in the higher grades was to quicken, not to retard, promotion.

In reply to Sir T. Lawrence, Mr. Cross stated that no official communication had reached the India Office regarding any discontent or dissatisfaction at the present rate of promotion in the Indian Staff Corps.

In the House of Commons on Tuesday the Marquis of Hartington assured Sir F. Milner that inquiries should be made into statements that soldiers in Alexandria were practically drugged at drinking establishments kept by low-class Maltese.

The Marquis of Hartington said, in reply to Mr. Biggar, that it would not be consistent with the regulations of the service for any quartermaster to petition the Government as a body. Any officer or soldier, however, might individually, through his superior officers, appeal to the Secretary of State, with the certainty that his case would be inquired into. The position of the quartermasters had been fully considered. Much had been done to improve their emoluments and rank, and he did not think that as a body they had any reasonable ground of complaint.

Mr. M'Coan asked the Surveyor-General of Ordnance whether Lieut.-Col. Hope, V.C., had offered to supply the War Office with 200 armour-piercing, breech-loading "Hope" guns of various descriptions; and whether those offers had been accepted by the War Office; and if not, whether he would lay the correspondence on the subject upon the table of the House.

Mr. Brand replied that Col. Hope had made the offer, but it had not been accepted. Col. Hope had been informed that if he constructed a gun himself and submitted it to the Ordnance Committee, it would be tried.

London Amusements.

The enthusiastic reception accorded Madame Adelina Patti on Saturday evening, when a crowded audience assembled at the Royal Italian Opera to welcome her reappearance among us, testified to the sustained popularity of the accomplished vocalist. The opera selected for the occasion was Verdi's tuneful "La Traviata." On Monday was repeated "Le Nozze di Figaro." On Tuesday Madame Patti appeared in Verdi's "Aïda," associated with Madame Tremelli and Signor Nicolini, every seat in the house being occupied. Thursday was allotted to "Lucrezia Borgia," and this (Saturday) evening will be represented "Il Barbiere de Seviglia," with Madame Patti, Signor Nicolini, and Signor Cotogni in the cast. The only notable feature of the week's programme of the German Opera Company has been the performance on Friday evening of "The Flying Dutchman," with Madame Albani as Senta.

At the Gaiety the sprightly acting of Madame Judic in "Nitouche" has delighted a succession of numerous audiences keenly appreciating the force and fun of her vivacious embodiment. On Wednesday evening, and during the remainder of the week, "La Cosaque" has been performed. On Friday next Miss Kate Vaughan here gives her special matinée, when "The Busy Body" will be revived.

The second annual matinée in aid of the "Actors' Benevolent Fund" took place at Drury Lane Theatre on Thursday, a stupendous programme being arranged for the occasion. It is estimated that about £800 will be the financial result.

The season at Toole's Theatre will terminate on Saturday, July 12, Mr. J. L. Toole taking his annual benefit on the preceding Thursday, when two distinct performances will be given.

On Wednesday night Mr. Corney Grain gave at St. George's Hall his new musical sketch called "The Shows of the Season. A new second part was at the same time provided by Mr. Arthur Law, entitled "A Terrible Fright."

No firework display has been seen for many years comparable with that now being given at the Crystal Palace by C. T. Brock and Co. The pyrotechnic device, representing the "Battle of Trafalgar," is one of the largest ever exhibited in this country.

Mr. James Albery's version of "Tête de Linotte" will be produced at the Criterion Theatre on Monday night, in the form of a three-act comedy, called "Featherbrain."

In consequence of Miss Lotta's American engagements, the English version of "Nitouche" will be withdrawn from the Opera Comique at the close of next week.

Mr. F. Maccabe, who has been making a tour round the world, will reappear on Monday next at the St. James's Hall, after an absence from London of four years.

It has been decided, the *Standard* says, that on Major Hutton taking over the command of the Mounted Infantry in Egypt, that force will be considerably strengthened, in view of active service.

The Gazettes.

TUESDAY EVENING.

ARMY.

INDIA OFFICE, June 17, 1884.

The Queen has approved of the admission of the under-mentioned Surgeons to her Majesty's Indian Medical Service:—

To be Surgeons:—Bengal: J. J. Pratt and R. Shore, M.D. Madras: W. B. Bannerman and H. Thomson. Bombay: C. J. Sarkies (all dated Sept 29, 1883).

The Queen has approved of the retirement from her Majesty's Indian Military Forces of the under-mentioned officers:—

Lieut.-Cols. and Brevet Cols. C. H. Clay, of the Bombay S.C. (April 20); C. Jameson, of the Bombay S.C. (June 13).

Deputy-Surg.-Gen. R. H. Perkins, of the Bengal Army (May 4).

Surgs.-Major F. W. A. De Fabeck, of the Bengal Army (April 24); T. Holmested, of the Bombay Army (April 7).

The Queen has approved of the resignation of the under-mentioned officer:—Lieut. G. D. Giles, of the Bombay S.C. (May 29).

Brevet.

The under-mentioned officer is granted a step of honorary rank on retirement:—

To be Major-General:—Lieut.-Col. and Brevet Col. C. H. Clay, of the Bombay S.C. (April 20).

Note.—The retirement from the service and promotion to the hon. rank of Deputy-Surg.-Gen. of Surg.-Major C. J. Sylvester, M.D., on the Bombay Army, took effect from Jan. 13, 1879, and not as stated if the *London Gazette* of March 18, 1879, and June 1, 1880.

FRIDAY EVENING.

ARMY.

WAR OFFICE, Pall Mall, June 20, 1884.

4th Dragoon Guards—Capt. F. T. Penton resigns his commission.

Regimental Districts.

Lieut.-Cols. and Cols. A. C. K. Lock, having completed five years' service in command of the 4th Regtl. District (the King's Own Royal Lancaster Regt.), is placed on half-pay; C. Eccles, from Lieut.-Col. commanding the 101st Regtl. District (the Royal Munster Fusiliers), to be Lieut.-Col., to command the 4th Regtl. District (the King's Own Royal Lancaster Regt.), vice Col. A. C. K. Lock; J. D. Johnstone, from half-pay, to be Lieut.-Col., to command the 101st Regtl. District (the Royal Munster Fusiliers), vice Col. C. Eccles.

Line Battalions.

Wade; Cols. Lloyd, Leigh, and Reid; Lieut.-Cols. Gordon and Twynford; Majors Sparks, Roberts, M'Queen, and Ballantyne; Capt. Leigh; Messrs. C. F. Calland, J. Couch, H. H. Higginson, G. H. Randolph, J. Shaw, and W. F. Trevelyan.

Army Veterinary Department. At the Holborn Restaurant, on the 13th inst. Present:—Dr. Fleming (Principal), Messrs. Lambert, Walters (Inspectors), Sewell, Appleton, Walker, Burt, Rostron, Oliver, J. Reilly, Dwyer, S. L. Pallin, Gillard, Elphick, Whitfield, Cox, Burton, Crawford, Sartin, Jones, Spooner, Davis, D. C. Pallin, Dibben, Griffith, Kelly, Fenton, and Joslen.

INDIAN ITEMS.

Warrant officers of the Indian Army holding honorary commissions will have their names inserted in future issues of the War Office *Army List*, under the head of Local and Temporary Rank.

Every Native infantry regiment armed with short Snider rifles in the three Presidencies is now permitted to draw 20 long Snider rifles to enable the men to compete in Army matches on equal terms with corps armed with the latter weapon.

A Madras paper hears that Deputy-Surg.-Gen. Colvin Smith vacates his appointment on completing on Aug. 5, and will be succeeded by Brigade Surg.-Major Bidie, the Superintendent of the Government Museum.

We are informed that the Bombay Government have accepted the tender of Messrs. Meakin and Co., of Kasauli, for the supply of 6,000 hogsheads of malt liquor per annum, at 50 rs. per hogshead, for a period of five years, to the troops at Bombay, Deolalee, Poona, Ahmednuggur, Belgaum, and Mhow, the firm undertaking on their part to build a brewery in the Bombay Presidency (probably at Panhgunny).

The *Homeward Mail* has reason to believe that the *Englishman's* announcement that an Afghan Frontier Delimitation Commission will be sent out in the autumn is premature. It appears likely, however, that an agreement for the appointment of such commission will be arrived at before long, and it is said that the Indian Government have already sent in an unofficial notice of the intended appointment of it to the Ameer. Public opinion in Calcutta is unanimous in designating Sir Charles MacGregor as being the officer best qualified to head the commission. The rumour that the boundary will be a line from the Oxus to Pul-i-khutun is very doubtful. There is reason to hope that it may be drawn much further north. The Russians are said to have released 400 prisoners detained by the Tekkes and the Saryk Turcomans. The Russians are building a fort in Koshut Khan Kali, in the centre of the enclosure built by the Turcomans in 1880. A raid has been made on to Persian territory by some Saryk Turcomans from Panjdeh. Eighteen travellers were carried off near Dogaru, on the Meshed road.

The Household Cavalry and R.H.A. in the Home District had a field-day on Monday, on Wimbledon Common. 1st and 2nd Life Guards, 3rd Hussars, and E Baty. A Brig. R.H.A. under Col. Duncombe, 1st Life Guards, were formed at 10 o'clock. On the arrival of Major-Gen. Gipps, the work was commenced by the scouts of the light cavalry, who found the enemy near Cæsar's Camp. An engagement ensued, which lasted for an hour and a half, and at the close, instead of the usual march-past, the whole force executed a brilliant charge across the wide plateau from Wimbledon Green to the Pavilion now being erected. The troops returned to quarters at noon.

The Prince and Princess of Wales have been pleased to accept a copy of "For King and Kent" (1648), by Col. Colomb. The song "Invicta," published by Chappell and Co., which is taken from "For King and Kent," is now played by regimental bands arranged as a march.

H.R.H. the Field-Marshal Commanding-in-Chief held a levée at the Horse Guards on Thursday, which was fully attended.

The *Daily Telegraph* observes:—"With regard to Lord Hartington's statement on Thursday, which might appear to indicate that the assumption of the control of the Egyptian Army was a new step, it is pointed out that Lieut.-Gen. Stephenson has actually been controlling military operations in Egypt for months past. One proof out of many was his refusal to allow Gen. Wood to act or to send Egyptian troops up the Nile or to Suakim."

IMPORTANT to NAVAL and MILITARY MEN.

THE MUTUAL LIFE
ASSURANCE SOCIETY.
(*Established* 1834.)

No EXTRA PREMIUM for Climate or War Risk is Charged after the Policy has been Five Years in force, and the Life Assured is aged Thirty.

Army & Navy Gazette.
LONDON, SATURDAY, JUNE 21, 1884.

AFTER the official report of Lord Ralph Kerr, the Inspector-General of Auxiliary Cavalry in the Northern District, backed up as it has been by the resolution of the Mayor and Corporation of Lichfield, it is placed beyond doubt that the reports which appeared in the papers on Monday and Tuesday, as to the conduct of the Staffordshire Yeomanry, have been, as is usual in such cases, grossly exaggerated. We fully concur in the opinion expressed by a local contemporary when it says:—"By all means let justice be done, but in the meting out of it, let it first be remembered that three or four hair-brained—or rather, brainless—young officers, and a half-a-dozen of larking privates no more represent the Yeomen of Staffordshire than do the handful of youths, varying from sixteen to six-and-twenty, the citizens of Lichfield. It is quite within the power of such a band to discredit a regiment or to mar the fair name of a fair city; but when they have done their worst, when, like flies in the ointment, they have fouled the face of an excellent reputation, it is the duty of the public to calmly review the situation, to measure out an unbiassed opinion, and to place the onus on the shoulders of the delinquents responsible for such a *contretemps*." There is no disguising the fact that Lichfield has witnessed a little exuberance of spirit on the part of some few members of the County Yeomanry, but it is unfair to tarnish the good name of a whole regiment because one or two officers and men—youngsters, doubtless, for the first time under military instruction—have been unable to keep within the bounds of decorum. The Staffordshire Yeomanry has made great strides during the last four or five years, both in numbers and efficiency; indeed, it is now one of the strongest regiments in the kingdom. To the civilian mind it may appear unaccountable that men enrolled as these yeomen are, with the object of keeping order, should be the first to disturb the peace. But we must make allowance for youth and inexperience. As to the action of Major and Adjutant Graves and the senior officers, too much cannot be said. Major Graves, from all accounts, behaved with admirable tact and discretion. The country, unfortunately, has to mourn the loss of a respected politician, and the Yeomanry a most able and zealous commanding officer. The Lichfield incident, it is to be hoped, will be kept in remembrance by Yeomanry officers in future. There is a tendency in some regiments to regard the annual training rather as a week's amusement than as a period of military exercise. This feeling should be stamped out, and commanding officers should let it be understood that they will punish severely any officer who, from want of discretion or other cause, acts either in public or private, in a manner calculated to bring discredit on the service in which he is enrolled, and the good name of which it should be his study to uphold. The men. it should be remembered, invariably take their "tone" from their superiors, and if those superiors forget themselves, their subordinates, in nine cases out of ten, will do so too. If the stories as to the conduct of certain officers of the Staffordshire Yeomanry at the theatre are true, the offenders ought to be made an example of in the interests of the service.

The Duke of Cambridge spoke from his heart at Wellington College, when he said he tried to imitate the Duke of Wellington, and endeavoured to keep the British Army in the state in which it was under the great Duke; but his head must have told his Royal Highness that he had not succeeded, and that the Army was by no means the "same" as it was in the time of his great predecessor. Whether it be better or worse, it is an Army almost radically different from that which the Duke of Wellington administered in the name of the Crown. It is changed in its form of government. It is now more the Army of the Secretary of State for War and of the Commons House of Parliament. The Horse Guards has ceased to be what it was in the Duke's time. The Secretary for the Colonies was charged with functions which were by no means so important as those of the Secretary of State for War, and the administration of the Army was as different in those days from that which exists at present, as was its organisation and composition. The Iron Duke was a rigid disciplinarian; he punished unrelentingly, he passed over no offence, he smoothed over no difficulty, and he evaded none. He never was afraid of any expression of opinion in or out of the Press, as long as he was persuaded he was doing his duty; and as he always believed in himself, he had no doubts at all as to the course to be pursued in any case which called for attention.

Sir Gerald Graham will not return to Egypt. It is said he will be succeeded by Major-General Kent (October 23, 1883), who is junior to Major-General Dormer (November 18, 1882).

It is rumoured that Bishop Claughton intends shortly to resign his appointment as Chaplain-General of the Army. He is more than 70 years of age, and very probably wishes to make room for a younger man. We hope Lord Hartington will use a wise discretion in choosing his successor. We should be glad to see the selection made from among the present staff of Army Chaplains, many of whom are able and zealous clergymen. There is no reason why the Chaplain-General should be a Bishop. Dr. Claughton rarely performed any episcopal duties in connection with the Army. What is required of the Chaplain-General is that he should be active, hard-working, a good organiser, able to speak and preach well, and above all that he should understand soldiers, and be constantly among them. Bishop Claughton was appointed too late in life ever to succeed in thoroughly mastering the duties of the peculiar office to which he was called. Besides being Chaplain-General, he is Archdeacon of London and Canon of St. Paul's, and has thus been unable to give his undivided attention to his military duties. The Chaplain-Generalship has, as far as its active duties are concerned, been in commission during the last few years; it is therefore very desirable that the next incumbent should throw himself heartily into his work, and endeavour to give new life and vigour to a department of the Army which only requires an active head to secure its efficiency. The ex-Chaplain-General Gleig was a model of discretion and a type of the efficient administrator; and we are glad to learn the veteran soldier-priest is still in the possession of all his faculties, and in the enjoyment of "honour, love, and troops of friends," the best companions of old age.

Lieutenant-Colonel Clarke took up his duties as Assistant-Adjutant-General at Horse Guards on Monday last.

On June 3 the Mudir of Dongola telegraphed to Cairo that the most perfect tranquillity reigned throughout his Mudirieh, and that all he needed to keep his frontiers respected was ammunition. To-day he reports that he must retire from his Mudirieh, and leave Dongola to its fate, when Ramadan is over and the season of fasting is succeeded by feasting and fighting. In such a crisis as there is in the Nile Valley, suspicion is very natural. Moreover, it is rather in vogue to doubt every one's sincerity out there, and Englishmen, whether correspondents or not, who place implicit confidence in each other, are prone to regard dark-skinned natives with distrustful eyes. Hence we are led to believe by the correspondents of the London papers that the Mudir may be playing a double game, and it is reported that he is a little too intimate with the Mahdi's family, who live in Dongola. But why should he not be? Again, there are reports that the whole story about the capture and the massacre of Berber—the valour of Hassan Khalifa, and the pretty episode of his two sons rushing from the enemy's ranks to save their father's life—is what the Americans call "bogus." "All that we know is, nothing can be known." It is a very curious and unedifying phase in the Egyptian business that Gordon has suddenly been "dropped like a hot potato" by the excitable and emotional British public. The *Pall Mall* no longer tears her hair over the abandonment of her "Christian hero," the hysteria of the *St. James's Gazette* has apparently yielded to repeated applications of the Gladstone soothing syrup, and the sobs and cries which convulsed the Clubs as long as communications with Khartoum were open, ceased as soon as there was no news from Gordon, or of him at all! "'Tis strange! 'tis passing strange! 'Tis pitiful! 'tis wondrous pitiful!"

Lieutenant Hunter, Rifle Brigade, has been appointed Aide-de-Camp to Lieutenant-General Lord A. G. Russell, commanding in Canada, and has been ordered to hold himself in readiness for immediate embarkation.

The present state of the Aldershot Division may be pointed to as fair evidence of the condition of the Army. A correspondent writes :—"During the month of June, last year, the drill season was in full swing, and field-days of opposing forces and minor operations were carried out twice or three times a week. Such is not the case at the present time. We have had as yet but one field-day of opposing forces, minor operations have not commenced, and the sound of a gun is seldom heard in the vicinity of the Camp." And yet Aldershot is our leading tactical station. But as a Staff Officer observed very truly,—"If there is no Army to drill, how can we drill it?"

The Committee appointed to report on a plan for supplying water to troops in a waterless country have experimented further during the week. The proposed system would undoubtedly be of value for the conveyance of water for short distances. From a sea base, for instance, condensed water could be pumped through the pipes to reservoirs twenty or thirty miles inland. In a hostile country, however, it would be impossible to convey water for long distances by this means. The transport of large quantities of metal pipes is also a serious consideration.

"It is no use crying over spilt milk," if taken to mean that "what can't be cured must be endured," is, no doubt, wise. But before we make up our minds to endure an evil, we should feel very certain that no cure does or can exist. Before we stop the lamentation for past accidents and misfortunes, we should take precautions against similar mishaps in the future. Now, this is just what the Directors of Army Supplies appear to overlook, and it is only by calling their attention to the accidents and failures of the Egyptian Campaign that the Committee of the House of Commons can hope to force such measures to be taken as will prevent a repetition of the extraordinary mistakes which might have caused dire misfortune to British troops. No doubt it is a serious matter to the taxpayer that thousands of pounds have been wasted in the purchase of supplies of unsuitable quality, that costly preparations have been thrown away through tardiness or incomplete arrangements; but the money is gone, and no amount of crying will bring it back. Is there nothing to be done, then? Is the public always to be subjected to such losses? Is the Army always to trust to the luck of its administrators and to the ignorance of its enemies? One thing is clear, that the War Department officials are satisfied that everything was done as well as possible; or, at any rate, that the mistakes and waste are not worth inquiring into. If, in the course of the Committee's proceedings, there had been anything like acknowledgment of failure, anything which could be taken as a sign that those who failed were wise enough to see their failures, and to profit by them in shunning them for the future, there would be some hope for the present organisation. But when the failures have been before them for more than a year, when they have been driven home by the strongest evidence, and are yet entirely ignored by the late Surveyor-General—and, as far as can be judged from his questions, by the present holder of that office also—it is surely time for the public to say,—"Your system is bad, and as you are incapable of seeing its badness, and therefore unable to amend it, we must look to others to remedy the defects which have cost us so dear, but which we will prevent for the future." There is a great difference between useless crying over the past and blind refusal to admit that loss has occurred. To cry over the fact without attempting precautions for the future is silly; but until the Directors of the Supply of the Army and his fellows can see that their faults have been grievous, they are very unsafe people to trust to for future campaigns.

The position of Assistant-Quartermaster-General at Aldershot has been no sinecure lately. It was rumoured that this Staff appointment was about to be abolished. Its retention was said to be no more necessary for the working of the Aldershot military machine, than the addition of a fifth wheel to a coach. It is at least certain that the Staff at the Camp has been sufficiently numerous for the not very heavy field duties of recent years. Colonel Harrison, the present incumbent of the office, and permanent president of the standing committees on equipment, clothing, transport, pack-saddles, Army tables, &c., is the hardest worked officer in the command.

Lieutenant-Colonel Lascelles, who has been transferred from Portsmouth to Aldershot, will assume the duties of Assistant-Adjutant-General of the Division on Monday next.

A propos of the Warrant on Voluntary Retirement, it seems as though the framers of this scheme had overlooked certain consequences. Captain A. wishes to retire (perhaps from pecuniary reasons), the senior subaltern of his regiment has only eight years' service. Captain A. says to him, "If you give me a certain sum of money, I'll remain till you have nine years' service, and you will thus avoid having a subaltern promoted over you from another regiment." Captain B., of the same regiment, also wishes to retire, and goes to the senior subaltern with the same story. Captain C. may do the same thing, and the senior subaltern, to avoid being passed over, pays one, and perhaps two or three Captains to remain on in his regiment till he himself has the required nine years' service. What is to prevent such a state of things? But it must be admitted that it is not desirable.

The Engineer and Railway Transport Volunteers have done much useful work in quite an unostentatious manner. The corps has an establishment of 30 Lieutenant-Colonels, 20 Majors, 20 Captains, and 40 Subalterns; but at present it includes only 21 Lieutenant-Colonels and nine Majors. There are no Captains and no subalterns. It is difficult to understand how it is that no steps are taken to fill the vacancies. Surely there are numbers of civil engineers who would give their services.

In order to facilitate the audit of Army accounts, the Adjutant-General of the Forces furnishes monthly a statement showing the difference between the numbers of men on the establishment of the Regular Army, exclusive of India, as provided for in the Army Estimates, and the effective strength, as shown by the official returns; the difference between the estimated number of men of the Regular Army serving in India, as shown by the Army Estimates, and the effective strength of the Indian Establishment, as shown by the official returns of the Adjutant-General; the difference between the total estimated number of men of the Regular Army serving on the home and Colonial establishments and in India, as shown by the Army Estimates; and the total effective strength, as shown by the returns of the Adjutant-General.

In the House of Commons lately, Lord Hartington declared that the standard required from Captains in their examination for promotion, viz., ·55, was too high, and that it was to be reduced to ·5, which he considered sufficient. Surely it would only be an act of bare justice for the authorities to allow that any Captains who obtained ·5 of full marks at the examination in January are qualified for promotion. Let us take a case. Captain A, for instance, at that examination qualified in every subject, and obtained, say, a total of ·538—a higher standard than that now required. He has, perhaps, been reported as having failed to pass, and received official notice that he will be passed over for promotion. Such treatment will be most unfair, and yet the case is possible.

The Navy.

ADMIRALTY, June 12, 1884.

Royal Marine Light Infantry.—Major H. W. Bamber, being medically unfit for further service, has been placed on the Retired List (May 28).

ADMIRALTY, June 13, 1884.

Deputy-Inspector-Gen. of Hospitals and Fleets G. Mason, M.D., has been promoted to the rank of Inspector-Gen. of Hospitals and Fleets in her Majesty's Fleet (June 11).

ADMIRALTY, June 16, 1884.

Royal Marine Light Infantry.—Capt. and Brevet Major A. B. Crosbie to be Major, vice Bamber, to Retired List; Lieut. F. E. Hast to be Capt., vice Crosbie (both dated May 28).

ADMIRALTY, June 18, 1884.

Royal Marine Light Infantry.—Capt. H. H. Morgan, being medically unfit for further active service, has been placed on the Half-pay List, under the provisions of her Majesty's Order in Council of Nov. 30, 1882 (May 17).

APPOINTMENTS.

Captains—Lindesay Brine, to the Hercules, additional; Thomas S. Jackson, to the President, additional.

Lieutenants—John T. White, to the Euryalus; Frederick L. Campbell, to the Vernon; William C. H. Snell, to the Valiant.

Midshipman—Charles H. Morgan, to the Sultan.

Chaplains—Rev. Thomas Roberts, M.A., to the Curacoa; Rev. Alfred J. Whistler, to the Turquoise.

Deputy-Inspector-General of Hospitals and Fleets—Belgrave Ninnis, M.D., to the Chatham Division, Royal Marines.

Surgeons—William M. Craig, M.B., to the Alecto; George J. Fogerty, to the Banterer; John L. Barrington, to the Ready; William Tait, M.B., to the Cambridge; John O'Callaghan, George Bate, Joseph H. Whelan, M.D., to the Alexandra, additional; Michael J. McCarthy, M.D., to Plymouth Hospital; Henry F. Iliewicz, to the Ganges.

Paymasters—James A. Bell, to the Decoy; Henry W. Hunt, to the Condor.

Engineer—William C. Hilder, to the Terror, additional.

Gunner—Daniel G. O'Connell, to the Cambridge.

Boatswains—Edmund J. A. Baker, to the Helicon; James Ellis, to the Terror.

Carpenter—Alfred J. du Carteret, to the Indus.

COASTGUARD.

Chief Officers—Richard Knott, to the Hector, additional; John H. Bailey, to the Hercules, additional.

Chief Boatmen—Robert Iago, Porthcawl, to be chief boatman-in-charge; James January, Kingston, to be chief boatman-in-charge, vice Hooper, pensioned.

Commissioned Boatman—John Bates, Thorney, to be chief boatman, vice Brett, pensioned.

Arab, Com. Stopford, was at Aden on June 2, and would probably visit Zeyla about June 18. The Woodlark was at Aden on June 2, and has since been ordered to Suakim. The Philomel was at Bombay on May 17. The Dragon was at Bushire on May 17.

Boadicea, Capt. E. J. Church, flagship of Rear-Admiral Nowell Salmon, V.C., was at Simon's Bay on May 27, and was to leave the same day for Durban, where she has since arrived. The Sylvia was at Simon's Bay, refitting; she will be ready for sea about the end of June. The Frolic was at Simon's Bay on May 27, and would join the flag at Natal. The Opal left Simon's Bay on April 21, for the Coast; she will assemble the ships for a cruise in July, August, and September if practicable. The Alecto was in the Bights. The Starling would leave Ascension for Cape Coast Castle on May 15; on relief by the Forward, she will sail for Devonport. The Goshawk was on the South Sub-Division, West Coast of Africa. The Stork was in the Bights.

Canada, Capt. Durrant, having on board Prince George of Wales, left Halifax last Saturday for a cruise in the Gulf of St. Lawrence.

Cruiser, Com. S. C. Darwin, arrived at Cartagena on June 13, and was ordered to proceed at once to Gibraltar.

Dido, Capt. Doughty, arrived at Halifax on June 5 from Bermuda.

Dolphin, Com. Eardley Wilmot, will be ready next week to proceed to the Mediterranean, Red Sea division.

Grappler, Lieut. and Com. C. H. Cochrane, left Gibraltar on June 6 for Malaga, to embark Lieut.-Gen. Sir John Adye and suite on his return from England.

Hecate, Capt. Loftus Jones, left Devonport Harbour last week, and proceeded under steam into the Sound, where she was swung for the adjustment of her compasses. The vessel was then taken outside the breakwater for a three hours' trial of her machinery. The sea was smooth, the wind light, and the trial was made under most favourable circumstances. Capt. Edward Kelly, of the Steam Reserve, was in command, the engines were in charge of Mr. O. N. Booker, chief inspector of machinery, while Mr. L. Rudd, second assistant to the chief engineer, represented the factory. The navigating duties were performed by Staff Com. Lilburn, of the Belleisle. The following were the mean results obtained:—Steam in boilers, 23·2; vacuum in the condensers, starboard, 27, port, 27·1; revolutions, starboard, 98·5, port, 96·8; pressure on cylinders, starboard (forward) 16·5, (aft) 17·1, port (forward) 16·5, (aft) 16·3; indicated horse-power, starboard, 639, port, 914—total, 1,253; speed (by patent log), 9·3. After the trial the pumps and turrets were worked, and the whole was considered very satisfactory. During the trial every place where air could enter was opened, and the fans worked in the engine-room, where the thermometer showed 91; between the cylinders it was 103, while in the stoke-hole amidships it was 144, giving a mean of 130. When, as must be the case in bad weather, the ship is battened down, this will probably be increased to 180, and as during the coming cruise the ship will be under steam for five and six days together, the stokers do not look forward to the prospect with any degree of pleasure. The Marines, 20 in number, are berthed in three messes under the superstructure, about two and a-half feet from the funnel casing, which was so hot after only the few hours' steaming that it was impossible to place one's hand on it, while the deck, which is directly over the boilers, was equally hot. What these men are likely to suffer after steam has been up any length of time can be readily imagined.

Hercules, Capt. FitzRoy, C.B., flagship of Rear-Admiral Sir Anthony Hoskins, having assembled the Reserve Squadron at Portland, proceeded, on June 19, on the annual cruise.

Hyacinth, Lieut. and Com. J. W. Brown, has been under the painful necessity of trying his carpenter, Mr. John Tozer, by court-martial on a charge of drunkenness. The court assembled on board the Royal Adelaide on Friday last, and found the prisoner guilty; but the record of his services showing that there was not a single offence against him, and Capt. Kelly having testified to his extremely good character, the court only adjudged him to forfeit one year's seniority as a carpenter, to be dismissed his ship, and to be severely reprimanded.

Magpie, Com. the Hon. Foley C. P. Vereker, left Malta on June 8 for England. She was recommissioned at Hong Kong on March 26, 1881, and has been employed surveying on the China station, her present commander only having been in her a little over a year.

Northampton, Capt. Digby, flagship of Vice-Admiral Commerell, was at Halifax on June 6, and would leave for Newfoundland on June 25, and for a cruise in the Gulf of St. Lawrence and south-west coast of Newfoundland; the Canada was at Halifax on June 6, and was to leave on June 12 to visit the ports in Cape Breton, Prince Edward's Island, and Newfoundland; the Garnet was on the Barbadoes division, and will leave the beginning of July to join the flag at Halifax; the Tenedos, Fantôme, and Mallard was at Newfoundland on fishery duties; the Dido was to have left Bermuda for Halifax about May 28; the Griffon was at Barbadoes on May 17; the Flamingo was at Jamaica on May 17; the Bullfrog was at Bermuda on May 26, and was to leave about June 17 for Jamaica.

Nelson, Comdre. James E. Erskine, A.D.C., will complete her three years' commission on June 29. She is to be recommissioned at Sydney, N.S.W., and the new crew will, as has already been announced, be sent out in the Thalia, but as that vessel has not sufficient accommodation for an admiral and his staff, Sir Frederick Richards will proceed to assume the command of the Australian station by mail steamer.

Pelican, Com. R. W. Hope, arrived at Monte Video on June 17, and would leave on June 24.

Rifleman, Com. Mayow, now over three and a half years in commission, will, it is said, be relieved by the Ready, shortly to be commissioned for the purpose.

Superb, Capt. H. F. Cleveland, is reported to have been ordered home from the Mediterranean, but we doubt it, as the ship has just been thoroughly overhauled, and the extensive repairs made to her machinery under the direction of Mr. David Robb have been so successful that the Superb was found at the trial of her machinery to steam better than she has ever done before. The Admiralty have expressed their satisfaction at these results, and it is hardly likely that they would under such circumstances order the Superb home.

Swiftsure, Capt. Aitchison, flagship of Rear-Admiral Lyons, with the Satellite and Mutine in company, was at Callao on April 29. A sailing match took place in the bay a week previously between the boats of the Squadron. The prizes amounted to £11. The Swiftsure's boats which competed were nine in number, including the Admiral's galley, barge, and despatch-boat, the captain's gig, sailing-launch, pinnace, and three cutters. The Satellite started one cutter and two whalers, and the Mutine also one cutter and two whalers, making a total of fifteen boats, all told. The course was about four miles, twice round, and by arrangement the launch allowed all the other boats fifteen minutes start. They all got off in good style, and as anything in the shape of sail was allowed, some of them were very ingeniously rigged out. At her appointed time the launch started in pursuit of the others, and soon gave evidence of her excellent sailing qualities. At the end of the first round she had made up nine minutes of her time, but the leading boats were the Mutine's cutter and whaler, with the Satellite's whaler next. Then came the Swiftsure's launch and first gig. In the next and final round the launch went to the front, and easily won the first prize. The second prize went to the gig, and the third to the Mutine's cutter. The winning boat was sailed by Lieut. Coode, the gig by Capt. Aitchison, and the cutter by Gunner Boland. On the evening of the same day the Admiral gave a grand dinner-party, at which the guests were Prince Oscar of Sweden, the British Minister at Lima, and the captains of the various ships in port. The Swiftsure and Mutine will sail on Sunday for Honolulu. They are expected to reach there about June 9, and, after making a stay of ten days, will proceed to Esquimault, where they are due to arrive on July 12. Up to the present time there has been little or no sickness on board the ships lying in Callao Bay.

Temeraire, Capt. Compton E. Domville, was put out of dock at Malta on June 9, and has since shipped her barbette guns. Her mainyard has been found to be rotten, and numerous other defects having been discovered, it is not at all likely that the Temeraire will be ready for sea by the date fixed, namely, July 31. Her crew could be utilised in the Orion, Dee, and Don, which are all ready for sea.

Turquoise, Capt. Woodward, left Sheerness on Thursday to relieve the Tourmaline on the coast of Madagascar.

The Hyacinth is being brought forward at Devonport for commission, and it is anticipated that she is destined for the Pacific station.

"Health Exhibition."—"Visitors should not fail to view the fine exhibit of Messrs. Rose and Co., London, of their Lime Juice Cordial, and other Lime Juice beverages, at Stand No. 116, in main transept. The exhibit includes a fine display of the Jamaica Lime Fruit from which these delicious non-alcoholic beverages are made. Their Lime Juice Cordial supplies a most refreshing summer drink in water, effervescing in all aerated waters. No beverage has received higher recommendation from the medical profession as eminently wholesome."—See *Lancet*. No table should be without it. The Wholesale Stores are 11 Curtain Road, Finsbury.

NAVAL NOTES.

The three officers selected for appointment to the Royal yacht are Sub-Lieuts. Ernest C. T. Troubridge, from the Satellite, in the Pacific Squadron; Alexander L. Duff, from the Boadicea, flagship at the Cape; and Edmund Cooper Key, from the Alexandra, flagship in the Mediterranean. Mr. Troubridge is second son of the late Col. Sir Thomas Troubridge, and Aide-de-Camp to the Queen, who was wounded at Inkerman. He is grandson of Admiral Sir E. Troubridge, son of that Sir Thomas Troubridge who, after leading the British Fleet in the action off Cape St. Vincent, and distinguishing himself in Nelson's attack upon Teneriffe, was lost at sea in the Blenheim, on the East Indies station, 18 months after the death of his cherished friend, the hero of Trafalgar. Sub-Lieut. Cooper Key is second son of Admiral Sir Astley Cooper Key, Senior Naval Lord of the Admiralty, and has been 11 years in the Navy.

Torpedo-boats Nos. 2 and 5, recently commissioned by Lieuts. Rolston and Carus-Wilson for service with the torpedo flotilla attached to the Channel Squadron, left Plymouth for Spithead on June 18, the journey to be accomplished in three stages, the first day's run being to Dartmouth, the next day to Portland, Portsmouth being reached on the evening of the third day out from Plymouth. From Spithead the whole torpedo squadron—numbering in all about 12 boats—will sail for Bantry Bay, being convoyed thither by the Valorous, Capt. the Hon. R. Hare. The boats at Devonport—Nos. 2 and 5—were inspected at Keyham by Rear-Admiral C. T. Curme, Admiral Superintendent, who was accompanied by Capt. Edward Kelly, Captain Superintendent of the Steam Reserve.

The Camperdown will not be launched in March next as originally proposed, as it is now found that it will be impossible to complete her in time, a gang of shipwrights having been transferred from her to the Collingwood. The whole of the skin plating has been fitted up to the armoured deck, and the work of fixing the thickened plates in wake of the anchors has been commenced. The whole of the armour of the forward and after bulkheads of the citadel has been placed in position, and four of the side armour-plates are also fitted in. The armoured protection of the citadel consists of 40 18-in. plates, and of these 14 have been attached to the backing. The progress of the ship in this respect is entirely dependent upon the receipt of plates from the manufacturers.

The Shah is at length being brought forward at Portsmouth for another commission. Though it is intended to supply her with breech-loading guns, she will only undergo a temporary outfit, and will be employed upon home service. Her repairs are to be completed within the current financial year.

The Victoria and Albert has been taken out of dock, and is now under the shears at Portsmouth, having her machinery placed on board.

The Mariner, building at Devonport Dockyard, will, by order of the Admiralty, be launched on Monday. The Mariner is one of four ships of the same class laid down at Devonport, the first one to leave the stocks being the Reindeer, which was launched in November last. Of the four, the Reindeer is the least powerfully armed, her advanced state precluding the Admiralty from making the changes which they have effected in her sister-vessels—the Mariner, Racer, and Icarus. These are to be fitted with four 5-inch guns on central pivot mountings, two to be placed on the forecastle, and two on sponsons on the fore part of the poop. The guns on the pivot mountings will have as much training fore and aft as any broadside guns. In addition to the guns mounted on the forecastle and poop, the Mariner, Icarus, and Racer are to carry four 5-inch guns, two on either side of the vessel, so that now the majority of the class will have eight instead of four guns, as originally intended. They are also being fitted to carry Nordenfelt machine-guns.

The Mistletoe is being brought forward at Plymouth for commission, to relieve the Dasher in the duty of protecting the Channel Islands fisheries.

The gallant Admiral who at present commands the East Indian station has certainly brought good luck to those serving under his command. His Flag Captain, says the *Hampshire Telegraph*, "has obtained a C.B., his Commander has been promoted and awarded a C.B., his Flag Lieutenant has been made a Commander, his Chief Engineer an Inspector of Machinery, his Staff Surgeon a Fleet Surgeon, his Surgeon a Staff Surgeon, his Navigating Lieutenant a Staff Commander, whilst his Senior Lieutenant received the Osmanieh of the 4th Class for his services in the Egyptian War, and his Secretary the Medjidie of the 3rd Class for the same campaign. The gallant Admiral himself has been made a K.C.S.I., received the Medjidie of the 2nd Class for the Egyptian War, and a good-service pension for the recent operations in the Soudan. All this has occurred within the two years he has been in command, and is truly a record of promotion that but few flag officers can hope to see in their flagship. But then Billy Hewett always had luck, only he has never kept it all for himself."

Sub-Lieut. Charles McCrea, says the *Portsmouth Times*, who is now the senior sub-lieutenant but one on the list, has already taken first-class certificates in three subjects, and will, without doubt, obtain the same in the final subject—gunnery—in which he is at present qualifying. The promotion which would, therefore, accrue to this officer in consequence can be of no avail to him, as he would probably be promoted now, even had he taken third-class certificates a little sooner. His failure to complete his examinations earlier is all the more to be regretted, being, as it was, due to his having to be discharged to the shore for a considerable period, owing to ill-health occasioned by service. Mr. McCrea is a son of the late Rear-Admiral McCrea.

Active Service cannot wear out the teeth that are brushed night and morning with Rowland's Odonto, the purest and most fragrant dentifrice ever made. All dentists allow that neither washes nor pastes are as efficacious for polishing the teeth and keeping them sound and white as a pure and non-gritty tooth-powder; such Rowland's Odonto has always proved itself. Ask any dealer in perfumery for Rowland's Odonto, and avoid spurious imitations, theirs being the only original and genuine Odonto.

THE BISMARCK CUIRASSIERS.

A correspondent writes to us as follows :—" You will not take it as presumption on my part to tell you of an inaccuracy in your issue of June 14, *re* Bismarck's Cuirassiers at Mars la Tour (Rezonville) ? The cavalry that charged was the cavalry supporting the 3rd Corps, of which the above regiment only formed a part of 2,500 sabres. This they repeated several times, until stopped by great masses of French cavalry in the rear. They went through skirmishes and supports, and through the batteries, and repeated it. In fact, it was the finest thing of modern times, Balaclava counted. It was not, again, Prince Frederick Charles who sacrificed them, but Gen. Count von Alversleben. Having made a reference to the above at Gastein, I have what I state under Prince Bismarck's own hand. N.B.—The time served was from 10.30 till 1 p.m., giving time for the Brandenburg Corps to receive more ammunition, which had been expended."

[The "Todten Ritt" of the Bismarck Cuirassiers and the 16th Uhlans forms a distinct charge of itself, an account of which is to be found in every German work on the French War of 1870.—Ed. *A. & N. G.*]

A large case of torpedo gear, valued at £500, is missing. The case was despatched by the manufacturers to Portsmouth Dockyard two months ago, but has never been received, and though a strict enquiry has been instituted, no trace of the gear can be found.

A Delicious Cooling Drink is supplied in Rose's Lime Juice Cordial in water ; effervescing in all the Mineral Waters. It is non-alcoholic, and highly medicinal, purifying the blood. Recommended by the *Lancet*, and Medical Profession. Sold everywhere. Purchasers should order Rose's Cordial. Wholesale Stores—11 Curtain Road, London ; and Leith, N.B.

Obituary.

Vice-Admiral Alexander Boyle died on Sunday last at his house in Princes' Gardens, aged 74. He was the second son of the Right Hon. David Boyle, Lord Justice-General of Scotland, and obtained his commission as lieut. in the Royal Navy in Oct., 1830, was promoted to commander in 1842, capt. in Aug., 1857, became rear-admiral on the Retired List in Aug., 1875, and retired vice-admiral Aug. 2, 1879.

Gen. R. J. P. Vassall died on Sunday at his residence in Westbourne Street, Hyde Park. The deceased was a son of the late Col. Spencer Vassall. He was born in 1804 and entered the Army in 1822. He obtained field rank in 1865, became a lieut.-gen. in 1874, and a gen. in 1877.

The recent disappearance of an assistant-paymaster from one of the ships at Devonport, says the *Western Morning News*, is all the more to be deplored as it was hoped that the Naval service had seen the last of scandals of this description which at one time were not infrequent. That an officer placed in a position of trust should appropriate public money at all is deplorable, but it is all the more deplorable when the sum is so small that a temporary aberration of intellect can be the only valid reason assigned for conduct so extraordinary.

DIMNESS of SIGHT.—Dimness of Sight and Blindness are often caused by the use of unsuitable Spectacles. Mr. H. Laurance, F.S.S., Oculist Optician, 1a Old Bond Street, scientifically adapts his improved Spectacles to strengthen and assist the weakest sights. Testimonials from Earl Lindsay, Sir Julius Benedict, F. D. Dixon Hartland, Esq., M.P., Thomas Cook, Esq., the well-known Tourist Agent, &c. Pamphlet, containing valuable suggestions, post free.

THE MOUNTED SERVICE BOOT.—PATENT.

As adopted by the Volunteer Mounted Infantry.

A COMPLETELY NEW and USEFUL INVENTION. By a CAVALRY OFFICER.

It is equally suitable for riding or walking, and consists of an upper and lower part, which, when adjusted by the peculiar arrangement of the spur, forms a complete riding boot, and at the same time the comfort of a boot and gaiter for walking is ensured. The lower part can be worn also as an ordinary walking boot. ECONOMY, COMFORT, and PORTABILITY.

Specially recommended to all Officers and Sportsmen going Abroad.

HENRY DUNKLEY,
MILITARY, HUNTING, SHOOTING, and FISHING BOOTMAKER, and
SOLE MANUFACTURER OF THE MOUNTED SERVICE BOOT,
13 and 15 BUCKINGHAM PALACE ROAD, S.W. (Opposite the Royal Stables).

W. H. COCHRAN, Chartered Accountant,
Secretary, pro. tem.

This Company was incorporated under the Companies Acts, 1862 to 1880, with limited liability. Its objects are to purchase, improve, and colonize land in New Zealand.

Definitive offers of two blocks of Land, comprising 50,000 acres, in the Northern Island, have been submitted to the Directors, for which negotiations are going on, which it is expected will result in an immediate settlement being effected on most favourable terms.

Large tracts of virgin land, suitable in every respect for settlement, can now be purchased in New Zealand at prices ranging from 4s to 20s per acre, and after a very moderate expenditure in road-making and slight improvements, the same land sells readily to farmers and emigrants at prices ranging from £3 to £10 per acre.

An Agent of the Company is now in New Zealand, acting in conjunction with the Local Manager, for the purpose of reporting upon land which it is considered desirable the Directors should acquire on behalf of the Company; such Agent has already made a report of a most satisfactory and encouraging description.

Applications for Shares must be addressed to the Secretary of "The Auckland and Hawkes Bay Land Company, Limited," 15 St. Swithin's Lane, London, from whom Prospectuses and Forms can be obtained.

PYRETIC SALINE.

HAVE IT IN YOUR HOUSES AND TRAVELS, USING NO OTHER. This is the true antidote in Fevers, Eruptive Affections, Sea or Bilious Sickness having peculiar and exclusive merits. *Officers and others proceeding to Egypt, India, and the Colonies should not fail to take a supply with them, it being also an anti-Choleraic and pr ventive of Dysentery.*

EKOWE (with Col. Pearson).—"There was great demand for Lamplough's Pyretic Saline."—See *Blackwood's Magazine.*

LETTER FROM RAWUL PINDEE.—"Your Pyretic Saline will do more to prevent *fever* than all the quinine can cure."

Observe the GENUINE has my NAME and TRADE-MARK on a BUFF-COLOURED WRAPPER.

113 HOLBORN HILL, LONDON.

HOLLOWAY'S PILLS.—PURE BLOOD.—When the blood is pure, its circulation calm and equable, and the nerves well strung, we are well. These Pills possess a marvellous power in securing these essentials of health by purifying, regulating, and strengthening the fluids and solids. Holloway's Pills can be confidently recommended to all persons suffering from disordered digestion, or worried by nervous fancies, or neuralgic pains. They correct acidity and heartburn, dispel sick headache, quicken the action of the liver, and act as alteratives and gentle aperients. The weak and delicate may take them without fear. Holloway's Pills are eminently serviceable to invalids of irritable constitution, as they raise the action of every organ to its natural standard, and universally exercise a calming and sedative influence.

"FOR THE BLOOD IS THE LIFE."

CLARKE'S

WORLD-FAMED

BLOOD MIXTURE.

THE GREAT BLOOD PURIFIER AND RESTORER.

For cleansing and clearing the blood from all impurities, it cannot be too highly recommended.

For Scrofula, Scurvy, Skin Diseases, and Sores of all kinds, it is a never-failing and permanent cure.

It Cures Old Sores.
Cures Ulcerated Sores on the Neck.
Cures Ulcerated Sore Legs.
Cures Blackheads, or Pimples on the Face.
Cures Scurvy Sores.
Cures Cancerous Ulcers.
Cures Blood and Skin Diseases.
Cures Glandular Swellings.
Clears the Blood from all impure matter,
From whatever cause arising.

As this mixture is pleasant to the taste, and warranted free from anything injurious to the most delicate constitution of either sex, the Proprietor solicits sufferers to give it a trial, to test its value.

Thousands of Testimonials from all Parts.

Sold in Bottles, 2s 6d each; and in cases, containing six times the quantity 11s each—sufficient to effect a permanent cure in the great majority of long standing cases—BY ALL CHEMISTS and PATENT MEDICINE VENDORS throughout the world, or sent on receipt of 30 or 132 stamps by The LINCOLN and MIDLAND COUNTIES DRUG CO., Lincoln.

Trade Mark—"BLOOD MIXTURE."

JERSEY HIGH SCHOOL for GIRLS
(Limited).

PATRONS.

The Right Reverend the Lord Bishop of WINCHESTER.
His Excellency the Lieut.-Governor of JERSEY.

Head Mistress—Miss M. E. POPE,
Certificate of London University General Examination for Women, with honours, and distinction in French, Scholar of Girton College, Cambridge, and Second-Class Natural Science Tripos in the University of Cambridge.

This School has been established for the purpose of giving a high-class education, on the principles of the Church of England. The school buildings are situated in a healthy suburb of St. Helier's, near the sea. The climate of Jersey is mild and healthy. Special facilities are provided for the acquisition of the French language. Ordinary fees—board (washing included), sixteen guineas per term; tuition, three, four, and five guineas per term.—Application for prospectuses may be made to the Secretary, R. CREWS, Esq., Wyvil House, Georgetown, Jersey.

SIX PER CENT. MORTGAGE DEBENTURES.

GIBBS and FLEW, Limited.—Subscribed Capital, £250,000. The Directors are prepared to receive APPLICATIONS for DEBENTURES at par. They are issued free of expense to the lender in sums of £50, and either to bearer or registered holder. Interest payable April 15 and October 15.—Prospectus and full information can be obtained of the SECRETARY, at the Office of the Company, 80 Lombard Street, E.C.

THE WALDEGRAVE-PARK ESTATE, Strawberry Hill.—To be LET or SOLD, FREEHOLD Detached VILLAS, on this delightfully-situated Estate, adjoining Strawberry Hill Station (South-Western Railway). Rents, from £65. Designed with a view to adapt more modern requirements as regards interior conveniences and decorations to exterior attractions of the Queen-Anne style of architecture, containing three reception, seven bed and dressing-rooms, bath-room (hot and cold), two staircases, excellent servants' offices; handsomely decorated to requirements of tenants; large gardens and lawn-tennis ground to each house. Near the river, for boating and fishing, and close to the celebrated Strawberry Hill Mansion. Picturesque, healthy neighbourhood, within easy walking distance of Richmond and Bushey Parks, &c.—Apply to GIBBS and FLEW (Limited), Cedars Estate Office, West Kensington Station; or Branch Offices, Strawberry Hill Station, and Richmond Old Railway Station (adjoining the booking-office).

DAIRY FARM of 155 acres of very excellent land with superior FARM RESIDENCE and ample Buildings, 10 miles from London, close to a Railway Station. The LEASE at a low rent to be DISPOSED of.—Apply to Mr. NIGHTINGALE, Land Agent, Kingston-on-Thames.

FARM.—Excellent DAIRY FARM of 155 Acres to be LET, ten miles from London, and near a railway station, with Superior FARM-HOUSE, ample Buildings, and four COTTAGES. Now or at Michaelmas.—Apply to Mr. NIGHTINGALE, Land Agent, Kingston-upon-Thames.

CAMBERLEY, SURREY.—To be LET, Furnished, between July 15 and September 1, No. 2 Silberhorn Villas, containing two large sitting rooms, a study, and four good furnished bedrooms, kitchen, cellar, scullery and other offices. The villa has a pretty little garden, and is situated a quarter of a mile from Camberley Station, and close to the magnificent woods which surround the Staff College. Rent, 3½ guineas per week.—Apply to Captain MOODY, 2 Silberhorn Villas, Camberley, Farnborough, Hants.

ONE-HORSE LANDAUS.—F. and R. SHANKS, finding a great want for LANDAUS of superior quality, really suited for one horse, have made arrangements to supply them, fitted with their patent for opening and closing the head, at a price they consider must meet the demand. Several can be seen building at their Factory, 70 and 71 Great Queen Street, Lincoln's Inn Fields.

LANE'S PRIVATE HOTEL (Nos. 1, 2, and 3 ST. ALBAN'S PLACE, CHARLES STREET, St. James's, S.W.), for Officers in the Army and Navy, Members of Clubs, and others. Most eligibly situated in the immediate vicinity of the principal Club Houses. Gentlemen requiring sleeping accommodation only, are respectfully informed every attention will be paid to their comfort and convenience. A trustworthy porter in attendance all night.

OFFICERS' BAGGAGE, &c.—Officers are respectfully informed that Baggage, Luggage, and all kinds of Personal Property are stored at most moderate charges at the

STORE WAREHOUSES, BAKER-STREET BAZAAR, W.

The Warehouses having been built expressly for the safe keeping of goods, are peculiarly convenient, and are kept warm at an even temperature during the winter. Removals effected.

Separate lock-up rooms for large or small quantities.

JOHN HANES, Manager.
Store Warehouses, Baker-Street Bazaar, W.

ARMY EXAMINATIONS.—Captain W. H. JAMES, F.G.S., P.S.C., late R.E., and Major E. J. LYNCH, late Garrison-Instructor, London, 19 Lexham Gardens, Cromwell Road, W., PREPARE Gentlemen for the Army, *viâ* WOOLWICH, SANDHURST, and the MILITIA; also special Classes for the STAFF COLLEGE and Promotion Examinations. Eighty-three successes in 1882.

ONE HUNDRED and FIFTY-ONE in 1883, viz.:—

SANDHURST:—Twenty-seven.

WOOLWICH:—Five.

MILITIA COMPETITIVE:—Thirty-four Commissions obtained by Pupils.

MILITIA LITERARY:—Eleven.

SANDHURST PRELIMINARY:—Nineteen.

STAFF COLLEGE:—Twelve.

PROMOTION EXAMINATIONS:—Forty-two.

COOPER'S HILL:—The only one sent up.

Details of the above have already been advertised.

MILITIA COMPETITIVE, March:—Thirty-six, viz.:—3rd, 5th, 6th, 9th, 10th, 15th, 16th, 18th, 19th, 22nd, 27th, 28th, 34th, 35th, 36th, 39th, 41st, 42nd, 43rd, 45th, 47th, 48th, 52nd, 55th, 57th, 58th, 59th, 60th, 61st, 65th, 66th, 69th, 71st; and Cavalry, 2nd, 4th, and 9th.

MILITIA LITERARY, April:—

Order of Merit.	Name.	Marks.
FIRST	*E. G. V. Stanley	5517
3rd	W. E. R. Collis	3991
4th	L. O. Williams	3619
22nd	P. B. J. Petre	2572
29th	W. L. M,Mahon	2090
32nd	F. M. Sandys-Lumsdaine	1963

Being all sent up. There has been no failure in this examination since April, 1881.

* 1505 in advance of the second candidate.

ARMY EXAMINATIONS.—From 15 to 20 Pupils are received by the Rev. WALTER BAKER, M.A., Batcombe Rectory, Evercreech, Bath. A Permanent Staff of five highly qualified Instructors, all resident in the village, besides occasional Assistants, gives a guarantee of individual attention impossible where the number of Pupils is large. There are two departments under separate sets of Instructors, the one under two Graduates, Classical and Mathematical, and a Foreign Master for Candidates for Sandhurst, Woolwich, the Preliminary and Qualifying Literary Examinations; the other under two Experienced Officers for the Final Military Competitive for Lieutenants of Militia. A large per-centage, viz., nearly two-thirds of the Pupils sent up during the last 17 years have passed their respective Examinations. At the recent Military Competitive eight Lieutenants of Militia went up, and four of them who had received all their instruction at Batcombe passed among the first 40, one (Mr. W. H. Lord) taking FIRST place on the list. References are permitted to Sir John Adye, G.C.B., General Elmhirst, C.B., General Thompson (late 7th Dragoon Guards), Colonel A. H. King, R.A., A.D.C. to the Queen, the Bishop of Bedford, and many others, all parents or near relatives of former pupils.

ASHFORD SCHOOL, KENT. HEAD MASTER—E. C. MUSSON, M.A., F.G.S., formerly Scholar and Prizeman of Queen's College, Cambridge.

Pupils can receive thorough Preparation for Woolwich, Sandhurst, &c., with Public-School training. Terms very moderate, and strictly inclusive. References permitted to Colonel Sir T. D. Baker, K.C.B., Colonel R. B. H. Blundell, Assist.-Adjt.-Gen., &c.

PHYSICAL EDUCATION.—A Large Practice, many years established, and premises especially built; an excellent private connection, as well as Ladies' and Gentlemen's Schools; with appliances for special orthopædic cases, may be acquired on Reasonable Terms. Preference will be given to a qualified Medical Man or Officer (retired). As a good personal recommendation is most essential, only a moderate amount of capital will be required to be invested.—Application to be made by Principals or Solicitors to the SECRETARY, Scholastic, Clerical, and Medical Association, Limited, 8 Lancaster Place, Strand, W.C.

MEMORY.—Physiological Art of Never Forgetting, wholly unlike mnemonics, TAUGHT thoroughly by post. Any book mastered in one reading. Prospectus post-free, giving opinions (from actual study of the system) of Mr. RICHARD A. PROCTOR, Dr. ANDREW WILSON, and others. Lectures in families of the nobility and gentry. Day and Evening Classes in Never Forgetting and for Cure of Mind Wandering.

Professor LOISETTE,
37 New Oxford Street (opposite Mudie's).

F. MOEDER, 248, 249, 250 Tottenham Court Road; and 19, 20, and 21 Morwell Street, W. Established 1862.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

At the six Militia Competitions which have taken place since September 1, 1881, Colonel WILKINSON and Lieutenant-Colonel SHAW have secured for their Pupils FORTY-NINE COMMISSIONS, although they have only Prepared and sent up a very Limited Number of Candidates. In the March, 1884, Examination, out of SIXTEEN SENT UP, TEN PUPILS succeeded; one other was two places out, and three more within a few places of being successful. Lieutenant C. J. Stanton took the SECOND PLACE at this Examination, with 2,083 marks.

At the Militia Literary Examinations held during the same period, a Number of Pupils have also passed; in this Competition the FIRST PLACE was taken in April, 1883, by Lieutenant Lord Skelmersdale, and the SECOND PLACE in the following October Examination by the only candidate sent up, Lieutenant the Honourable Victor A. Pelham.

At the recent WOOLWICH EXAMINATION Mr. W. V. Scudamore passed SIXTEENTH on the list. This candidate made very high marks in languages.

The results of the last SANDHURST EXAMINATIONS have also added to the general score, which now amounts to NINETY-FOUR SUCCESSES, obtained by Pupils since September 1, 1881.

Address, DARMSTADT, GERMANY.

NAVAL CADETS, ASSISTANT CLERKS
HOPE HOUSE SCHOOL,
SOUTHSEA.

Principals { Mr. T. H. VICKERY.
Mr. EDWARD M. BEWLAY, B.A., Univ. Coll., Lond.

AN ARMY SECTION IS NOW ADDED. PUPILS PREPARED FOR SANDHURST AND WOOLWICH.

At the late Competitive Examination in June for Assistant-Clerkships in the Royal Navy, TWO of the Five successful Competitors were Pupils of this Establishment, taking First and Third places. In June, 1882, of the five who passed, the First, Third, and Fourth were from this School, and Three qualified.

CAVENDISH COLLEGE, CAMBRIDGE.

Four Scholarships of £30 each, tenable for three years, given, one by the Clothworkers' Company, one by his Grace the Duke of Devonshire, K.G., one by Samuel Morley, Esq., M.P., and one by E. B. Foster, Esq., will be offered for competition on August 6, 7, and 8, 1884. Candidates must be under 17 on August 6.

The usual age of entry being between 16 and 17, a Degree may be taken at 19.

The College charges for lodging, boarding (with an extra term in the Long Vacation), and, including all necessary expenses of tuition, and University fees, are £84 per annum. For further information, apply to the WARDEN, Cavendish College, Cambridge.

CHARDSTOCK COLLEGE, CHARD.

Beautiful country; remarkably healthy. Special Preparation for Army, Navy, Public Schools, Universities, &c. Terms moderate. Cricket, fives, gymnastics, &c.

TO OFFICERS, ANGLO-INDIANS, and OTHERS.—First-class School, established 15 years, where boys are prepared from an early age for the Army Examinations. Numerous Staff of Experienced Graduates in Honours. System pursued has resulted in 35 successes and no failures. Indian children received. Highest references.—C. V. GODBY, M.A. (Oxon.), Bute House, Petersham, S.W.

LONDON INTERNATIONAL COLLEGE,
Spring Grove, Middlesex, W.

Inaugurated by H.R.H. the Prince of Wales, July 10, 1867. French and German (or Greek) taught to every Boy.

Amongst the successes during the year are two OPEN SCHOLARSHIPS at CAMBRIDGE, and a 13th WRANGLER.

Several FOUNDATION SCHOLARSHIPS, tenable at the School, which may be increased in amount from a Special Fund in the case of those requiring it.

Also LEAVING SCHOLARSHIPS, tenable at the UNIVERSITIES, WOOLWICH, and SANDHURST.

Apply to the SECRETARY, or to the Head Master, H. R. LADELL, M.A.

MILITARY EDUCATION in FRANCE. E. S. CARBERY, Esq., Barrister-at-Law, Doctor of Law of the University of Heidelberg, and Captain C. NORMAN, assisted by Graduates of English and French Universities, PREPARE PUPILS for all Military Examinations as well as for Law and Universities. Closest attention to French and German, strict discipline, Classes small. A Special Class for Militia Officers.—For terms, address E. S. CARBERY, Esq., or Captain C. NORMAN, Les Buttes, Dinan, France.

STAFF EXAMINATION. — MODERN LANGUAGES, PREPARATION by CORRESPONDENCE.—The Lecturer on German language and Literature, attached to the Preparatory Classes for Military Examinations of Captain James and Major Lynch, Lexham Gardens, Dr. J. BRANDT, formerly Professor of German at the Military College of Saint Cyr, from 1871-75, Lecturer on Modern Languages, Literature, and Military Terminology to the General Staff of the late Versailles Army, continues, during the Vacation, to CORRECT TRANSLATIONS and ESSAYS, sent to him by Officers preparing for the above Examination, and returns the Papers, completed by Notes on Grammar, Style, &c., wherever they are required.—Address, Professor J. BRANDT, 19 Eardley Crescent, South Kensington.

HOP BITTERS.

If you are a man of business or labourer, weakened by the strain of your duties, avoid stimulants, and take HOP BITTERS.

If you are a man of letters, toiling over your midnight work, to restore brain and nerve waste, take HOP BITTERS.

If you are suffering from over-eating or drinking, any indiscretion or dissipation, take HOP BITTERS.

If you are married or single, old or young, rich or poor, suffering from poor health, or languishing on a bed of sickness, take HOP BITTERS.

Whenever you feel that your system needs cleansing, toning, or stimulating, without intoxicating, one bottle of HOP BITTERS will do more good than £5 in all other medicines or doctor's visits.

Have you dyspepsia, kidney complaint, disease of the stomach, blood, liver, or nerves? You will be cured if you take HOP BITTERS.

If you have flatulency, rheumatism, or gout, or are simply ailing, are weak and low-spirited, try it! Ask your chemist or druggist for HOP BITTERS.

IT MAY SAVE YOUR LIFE. IT HAS SAVED HUNDREDS.
FOR SALE BY ALL CHEMISTS AND DRUGGISTS.

E. & E. EMANUEL,

3 THE HARD (3 DOORS FROM H.M.'s DOCKYARD), **PORTSEA.**
WATCH AND CLOCK MAKERS, GOLDSMITHS, SILVERSMITHS, and JEWELLERS.

THE AFGHAN MEDAL AND STAR.
Miniature Copies of all Medals and Decorations.
Regimental, Prize, and Presentation Plate.
Electro-Plate. Table Cutlery.
Rare China, Antique Plate, Bronzes, and Curios.
Collections valued and purchased.
Old Plate, Jewels, and Epaulettes bought.
Foreign Money exchanged
Race, Field, and Opera Glasses. Nautical Instruments.
English and Foreign Watches & Clocks.

REPORT.—"I cannot speak too highly of the gold watch No. 17,179 of your make, and which I purchased from you in January, 1875. It was my constant companion during the winter 1875-1876 in the Arctic, and accompanied me sledging. It was about the best, if not the very best, in the 'Discovery,' and since my return home continues to perform equally satisfactorily."

Sole Address—3 THE HARD, PORTSEA.

UNIFORM.

A New Regulation INFANTRY OFFICER'S UNIFORM, Complete, by best Maker, also RIFLE UNIFORM, to be DISPOSED of Cheaply, at

NATHAN'S
NAVAL AND MILITARY WAREHOUSE,
17 Coventry Street, Piccadilly Circus, W.

EPAULETTES.

Several Pairs of NAVAL EPAULETTES for all Ranks, in perfect condition, by best Makers, at

NATHAN'S
NAVAL AND MILITARY WAREHOUSE
17 Coventry Street, Piccadilly.

WORCESTERSHIRE SAUCE

(HOLBROOK'S)

HALF-PRICE.

When buying Worcestershire Sauce, save half the cost by getting
HOLBROOK AND CO.'S Brand.
All Grocers sell it.

WORCESTERSHIRE SAUCE
(HOLBROOK'S)
HALF-PRICE.

CAUTION.

In consequence of Imitations of Label, calculated to deceive, it is necessary to note, "HOLBROOK & CO.," in Red Letters on Black Ground.

⁂ *NOTICE.—The* Editor *of the* Army and Navy Gazette *is*

MR. WILLIAM HOWARD RUSSELL.

All communications and correspondence not connected with the advertising, commercial, and financial business of the paper, should be addressed to the Editor *only.*

☞ *Advertisements, applications for copies of the paper, remittances, and communications on business, should be addressed to*

MR. RICHARD JAMES WOOD,

AT THE OFFICE, 16 WELLINGTON STREET, STRAND, *and* NOT *to the* Editor *of the* Army and Navy Gazette.

The subscription to the paper is 7s. per quarter, or 28s. per annum, PAYABLE IN ADVANCE, *inclusive of postage to any part of the United Kingdom.*

To India, £1 12s. 6d. per annum.

The Army and Navy Gazette *can be obtained in Paris of our Agent,* Mr. J. W. S. NEAL, *English Stationer,* 248 *Rue de Rivoli, to whom Advertisements and Orders for the Paper may be sent.*

"W. H. R." writes "to remind" us of what we have not forgotten, that "the connection of the Duke of Cambridge with the Army has subsisted during many years of a revolutionary epoch, in relation to which his influence should be estimated not so much by what has been effected by the active agencies of change as by the evils he has prevented, and the plagues of reforming he has stayed." And that is very true. And more! We may be sure that had any person of inferior rank to a Royal Duke—any soldier with or without party connections and tendencies—been in the place of the Commander-in-Chief, the man could not, and would not, have resisted the fury of the iconoclasts, and must have been overwhelmed by a pressure which the Duke of Cambridge could with difficulty oppose and overcome. The personal influence of the Sovereign is still, we rejoice to know, very great in the direction of the Army; and the relations of the Duke of Cambridge, as a Prince of the Blood trusted by his Sovereign, have been strengthened by his extraordinary knowledge of the Army, over the administration of which he has been called on to preside in times of great difficulty and trouble. When his Royal Highness said the other day that he had striven to keep the Army as it was under the Duke of Wellington, he might well have added that he had failed to do so, not because he was weak, but that he was subjected to forces which the Iron Duke himself would not have encountered with success. Those who are content with the present state of the Army may say that the Duke of Cambridge did not approve of the changes which have been forced on the Horse Guards by the War Office as the Executive of the House of Commons; but no one can honestly contend that the Field-Marshal Commanding-in-Chief has not done his best to administer the system he has had to accept with entire honesty and scrupulous fidelity. There has been an immense revolution, the greatness and completeness of which we can as little understand to-day as we can forecast its possible outcome in the military service of the Crown. At the cost of nigh twenty millions sterling the system of promotion, established under the sanction of the Crown, has been bought out and destroyed; but it is impossible for any one who is not inside the War Office to understand what has been accomplished by the Duke of Cambridge in neutralising the effects of indiscriminating changes and in perpetuating the traditions of our military system when they were menaced with extinction. We must measure the good which has been the consequence of the Duke of Cambridge's tenure of office at the Horse Guards, not by the results of the innovations he has been compelled to accept, so much as by an appreciation of the injuries to our military institutions which he has been enabled to prevent; and in that sense a comparison between the Duke of Wellington's methods of administration and those which have been put upon the Horse Guards of to-day would fail if it did not take note of the difficulties to which the change in public policy in dealing with the Army has subjected the Field-Marshal Commanding-in-Chief; and the great difference which has been created between the relative positions of the Horse Guards and the War Office of late days, as compared with those which subsisted when the greatest of English Generals since Marlborough, with all the prestige of his military glory and knowledge, directed with absolute power every department of the Army, and virtually removed them from the control of Parliament. A time-serving politician, as the Duke of Marlborough certainly was, living in these times, could not have done as much as a Royal Duke, above all party, has been enabled to effect in arresting the wave of what is called Army Reform. Is it for good or for evil that there has been found some obstructive force in the traditions of the Horse Guards, inherited and acted upon as far as possible by the Duke of Cambridge? The answer to the question will be given hereafter; but in the meantime we venture to anticipate the verdict of history and to say, that the fulfilment of his duties by the Commander-in-Chief has been fraught with advantages to the Army and to the country.

IN a recent letter to the *Morning Post*, to which we referred last week, Sir T. Symonds accuses Lord Northbrook of having omitted the French ironclads *Brennus* and *Charles Martel* from his statement in the House of Lords on the 9th inst., comparing the ironclads laid down in England and France respectively in the four years, 1880 to 1883; and of having further forgotten a little matter of eight ironclad gunboats building in France, to which the Admiral naturally attaches some importance. We understand, however, that as Lord Northbrook conveniently only dealt with the four years ending December 31st, 1883, he was technically right in the case of the two large ships to be laid down in France this year, though it was scarcely justifiable to leave out the gunboats. We propose to carry the comparison between the ships laid down in the two Navies up to the end of this year, or as far as can be done from the Estimates published in both countries. We find, then, that this year two 1st-class ironclads, the *Brennus* and *Charles Martel*, of 9,780 tons displacement, are to be laid down, to be advanced to ·11 and ·06 respectively by January 1, 1885. On the other hand, we are to have the *Hero*, building at Chatham, advanced to ·25 this year; and a new vessel, not named, is to have 387 tons built at Portsmouth. So far we would add two to each side, but we cannot omit the eight French ironclad gunboats building, of which the most advanced will have ·66 completed by the end of the year, while the most backward will have ·21 of her hull complete at the same date. We would direct special attention to these by no means despicable small ironclads. Their displacement is 1,639 tons in the four larger, which are to cost £72,000 each for hull and engines, while the four smaller ones are to have a displacement of 1,045 tons, and to cost £51,000. The French Navy Estimates further show that in the year 1885 two "cuirassés de stations" of 5,800 tons, not named, are to be laid down and are to be advanced ·11 and ·05 respectively. It is evident from the above that the French Admiralty are not holding their hand now, and that they have an ambitious ship-building programme in the future, as in the past. Lord Northbrook's statement, then, though perfectly accurate and clear as far as it goes, requires considerable addition and comment, if it is to be taken as a comparison either between the work done by the two Administrations, Liberal and Conservative, or the ironclad shipbuilding in the French and English Navies. A fortnight ago, we showed how the omission of the question of repairs by Lord Northbrook made the comparison intended to be drawn between the work done towards strengthening our ironclad fleet, by the two political parties, entirely misleading; while it is easy to show that a similar omission renders the careful comparison between ships laid down in England and France in the years 1880-83 equally unreliable. Lord Northbrook tells us that in those four years we have laid down eight ironclads, to the French four; but if we include the year 1884, we must add our *Hero* and the "new vessel," making our numbers ten laid down in five years; whilst by adding the *Charles Martel* and the *Brennus*, we shall make the French number six, and there are the eight ironclad gunboats in addition. The true comparison for five years, 1880-84, should be not that since the present Government have been in office we have laid down ships at the rate of "two English to one French," as stated by Lord Northbrook, but that in five years we have laid down ten ships in this country, against six large ships and eight ironclad gunboats in France. The two-to-one superiority supposed to have been shown recently in England has, then, vanished altogether, and, as we have seen, the French have a programme entailing the commencement of two ironclads in 1885, so that, merely to keep pace with them, we must lay down two ships next year. But this is not all, and, indeed, it is little more than half the question, for just as Lord Northbrook conveniently omitted to consider repairs, when referring to the work done by the Conservative Admiralty, so he has left out the important point of what ships were on the stocks and in progress when comparing the ships laid down by the French from 1880-83 with those commenced in this country. Now, his own statement shows that when the Liberal Government assumed office, the French had seventeen ironclads building and completing against only seven in this country. Their energies during those years were accordingly mainly directed to the completion of the ships laid down in the previous years; and now that many of these are completed, we see that they are again active in commencing new ships. We commend the following extract from a speech made by Mr. Goschen at Bristol in 1872, when First Lord of the Admiralty, to Lord Northbrook, as applicable to the triumphant vindication recently made by him of the Admiralty shipbuilding policy, and we can guage its value by considering how the figures would have stood had Mr. W. H. Smith, before leaving office, adopted the policy humorously recommended by Mr. Goschen:—"Now, I could produce, if I thought it right, which I do not, a most sensational Naval policy at a moment's notice; and it would be this:—The moment you are going out of office, lay down ten gigantic ships, make the contracts, commit the country to them, then go out of office, and leave your successors to find the money for their completion. (Cheers and laughter.) But that is not half the fun. After you have committed your successors to finish the ships, you should say to them, 'Oh, you are beginning no new works; you have not the dash, nor the initiative, nor the care for the country that we showed. We began the ships; you did not.' Well, but we cannot always be beginning ships; we must complete those already begun."

IN reply to Earl Percy's recent question in the House of Commons as to whether Lord Hartington could inform the House what steps he proposed to take with regard to the system of examination of officers for promotion in the Army, and whether he could afford any relief to those who had suffered from the present regulations, Lord Hartington replied:—"After carefully looking into the subject, I have come to the conclusion that the aggregate of marks required (viz. ·55) is too high, and that it should be reduced to the former standard—viz. ·5. The aggregate was, I understand, increased to compensate for a reduction which was simultaneously made in the minimum of each subject, but on the whole I think that the old aggregate standard was sufficiently high. I have also carefully considered the circumstances of the last examination in which so many officers failed to qualify. I find that in one of the examination papers there was, unfortunately, a typographical error which, though not of great importance, undoubtedly did prejudicially affect the papers of several of those who failed to qualify, and I have therefore decided that the record of that examination, so far as it regards the unsuccessful candidates, shall be cancelled, and that they shall be allowed another trial at the examination in July." It will be remembered that some time ago Earl Percy elicited, by a question in the House of Commons, the fact that, at the examination held in January last, of 227 officers who went up, 85 failed to pass the qualifying examination. The majority of these officers qualified in each of the subjects set at the examination, but failed to obtain the necessary aggregate number of marks which would qualify them for promotion. There was a widely expressed feeling that the aggregate, ·55 of the maximum number of marks, was too high for a qualifying examination, and Earl Percy again and again returned to the charge on behalf of those who had failed, until, on the Army Estimates, Lord Hartington promised that he would look into the matter. He has kept his word, and we can now congratulate Lord Percy and all the officers concerned on the result of the agitation. We presume from Lord Hartington's statement that those who failed in January are to be re-examined next month, under the new aggregate of ·5; and judging from the fact that, except in the case of the Northumberland Fusiliers on which the question was first raised, no officers who failed in January last have yet been superseded, it appears that the vacancies, which could at present only be filled by such supersession taking place, will be kept open. But if so, what then is the position of those officers who have failed at previous examinations under the ·55 aggregate, and have been superseded in consequence? Of these no mention has been made in Lord Hartington's reply. Nevertheless, we fail to see by what just reasoning they can be excluded from partaking of the benefits about to be conferred upon those who failed in January last. We quite see that some difficulty would naturally arise in re-adjusting supersessions which took place so long ago; but then justice ought not surely to give way before mere inconvenience. The majority of those concerned were "purchase" lieutenants, and regard it as, to a great extent, a hardship to be called upon to pass any examination for the rank of major at all. When they entered the Army such an examination was unknown. On the abolition of purchase, the examination for promotion to the rank of major was instituted; but "purchase" captains were not required to pass. While officers who entered the Army on precisely similar terms with quite as long, and in many cases longer service, but who, from circumstances over which they had not the slightest control, were unfortunate enough to be in regiments where promotion was slow, were required to pass the examination because they had not obtained their companies before November 1, 1871, an altogether arbitrary date. Again in 1881, all captains with five years' service, as such, were exempted from the examination with the exception of the one subject—Tactics. Here, again, it was simply a matter of good fortune which had divided a large number of officers of equal service into two classes of unequal service in the rank of Captain. Thus it will be seen that the same class of officers—purchase subalterns who did not pass through Sandhurst—with equal periods of total service, are arbitrarily divided into four distinct divisions. (1.) Those lucky enough, by rapid promotion, to have attained the rank of Captain before November 1, 1871, who were exempted altogether from examination. (2.) Those lucky enough to have attained the rank of Captain before July 1, 1876, who were exempted from examination, except in tactics. (3.) Those who were examined prior to January 1, 1884, who had to obtain an aggregate of ·55 of the maximum number of marks; and (4) those who will be examined in the future, who will only have to obtain an aggregate of ·5. Another point brought out by one of Earl Percy's questions was the fact that, under the present system, it is quite possible that an officer of long service, with distinguished War Service in remote parts of the world, who has had but few, if any, opportunities of preparing himself for examination, may be superseded by officers much their juniors in length of service, and who, moreover, may never have been out of the United Kingdom, and have thus had every possible opportunity of preparing for and passing the required examination. Taking all these circumstances into consideration, we would suggest for the consideration of the Secretary of State for War, even now at the eleventh hour, that justice, in the case of officers who entered the Army under the purchase system, can only be met in one of two ways: Either all such officers should be exempted, as in the case of their fellows who attained the rank of Captain before July 1, 1876; or else exemption should be accorded to such as entered the Army before a certain date; a line of equal service thus being drawn instead of a chance line, regulated only by the caprice of fortune in different regiments.

PLEASURE-SEEKERS, both on shore and afloat, appear callous as to the risks they run in their endeavours to get a glimpse at passing Royalty. On shore, the dangers of road and rail, shrieking engines and restive horses, are set at nought. Afloat, yachts and pleasure-boats are headed direct for the steamer on board which the Royal personage is known to be. Thoughtless, heedless curiosity is at all times at the helm; and it is not to be wondered at, therefore, that even Royal yachts, the most carefully navigated vessels in the world, meet with accidents at times. The ordinary civilian can have no idea of the difficulties besetting the navigation of our harbours when pleasure-seekers are out, on sight-seeing intent. Then the surface of the water is covered with tiny craft, all making in one direction when Royalty is near, and that is in the direction that Royalty will pass. Should the channel be narrow, it is sure to be overcrowded with boats and yachts, necessitating the Royal yacht stopping or being run aground in an endeavour to get out of the way of that impertinent curiosity, which, with crass ignorance, places itself at all times in the fair-way. The fate of the *Mistletoe* should have been a lesson to sightseers. Unfortunately, that craft belonged to a wealthy gentleman, who lost his daughter in the collision, and the indignation of an ignorant public knew no bounds. The Daily Press argued the point from the yachtsman's point of view; and, as a result, the public held the Navy to blame, not the sightseer who got into the way of Royalty from sheer wanton curiosity. In the more recent accident in the Hamoaze, the sightseers were only ordinary folk, and the Press has not troubled itself about their fate. The result has been that both the Coroner's inquest and the Court-martial have been unfettered; and the verdict of both has been given against the pleasure-seekers and in favour of the officer navigating the *Vivid* at the time of the accident, when H.R.H. the Duke of Edinburgh was on board. We have ever maintained that the *Mistletoe*, and not the Royal yacht, was carelessly handled in the Solent; and in the more recent accident we feel convinced that whoever reads the evidence given at the court-martial held on board the *Cambridge* on Wednesday last must come to the same conclusion as did the members of the Court, namely, that Staff Commander Gravener was in no manner to blame. Indeed, it must be patent to all, that an officer in command of a steamer, after porting his helm to clear a sailing-boat passing across his bows, cannot, by any possible argument, be held responsible for the act of the helmsman of that boat when he suddenly luffs up into the wind, and the next moment bears away, jibs, and runs into the bows of the advancing steamer. To avoid colliding under such a combination of adverse circumstances is utterly impossible, unless, indeed, every steamer were to stop dead the moment a boat approaches her course ahead, and shall remain at rest until that boat has crossed her bows and taken herself well out of the way. But such a course would be fraught with so many disadvantages that it could never be adopted. The deep channels are for large vessels; the shallow waters on either side are extensive enough for small craft, without their at all times obstructing the fair-ways leading into our harbours. Not that they should always keep out of them; but when in the track of large ships, they should at least take the same amount of precaution to avoid being run over, as they expect the larger vessel to take to avoid sinking the pleasure-boat. This seems only fair and reasonable, but it is very seldom acted upon. Too often a party of pleasure-seekers place their boat right in the way of a steamer with the avowed object of annoying her navigator, by forcing him to alter his course. They do this, too, with an effrontery hardly credible, in the firm belief that should they be run over the steamer will be found in the wrong, and will be cast in damages. We feel convinced that every officer who has ever navigated a steamer in British waters will corroborate this statement, most of them being able to remember the time they nearly run over a boat from such a cause, and how its occupants jibed and jeered as the steamer glided past them, within an ace of having sunk their boat. No doubt, the effects of strong drink has much to do with the dare-devil behaviour of pleasure-seekers at such times; and in the present instance, the accident appears to be wholly attributable to the effect of strong drink upon Bradshaw and Butland, both of whom seem to have been entirely responsible for the disaster they brought about by endeavouring to satisfy the curiosity of their companions to get a glimpse of Royalty. It is, however, high time that stringent regulations, governing the movements of pleasure-boats in the fair-ways leading into our ports and harbours, should be drawn up, and rigidly enforced.

WHEN the French Squadron recently left Toulon to go to Lisbon, says the *Débats*, it was accompanied as far as Tangiers by two torpedo-boats—Nos. 63 and 64—and by the coast-defence ship *Tonnerre*, which two months previously had taken part in the manœuvres in the Mediterranean. Before he sent back his torpedo-boats, Admiral Jaurez conceived the idea of subjecting them to a trial, which took place on the night of June 7 on the Algerian coasts. A night attack upon the Squadron by torpedoes was decided upon, and it took place under conditions which were highly favourable to the Squadron, for it was a full moon, and as light as day. In spite of this, the torpedo-boat 64 managed to get within 1,200 yards of the Squadron before it was seen. It attacked in front, and taking into account the speed of the Squadron and that of the torpedo-boat, the latter could have reached the ironclads and have discharged its torpedoes one minute and two seconds after having been sighted. The Squadron was going nine and the torpedo-boat 18 knots. It is clear that the ironclads, with their heavy and their light guns, would not have had time to sink their adversary. It must further be observed that the torpedo-boat would not have to accomplish the whole of the 1,200 yards; they can discharge their torpedoes with a great chance of success at 450 yards distance and at 350 yards with an absolute certainty of success. Then when the torpedoes get within 30 yards of a ship they are under shelter. These results, we are told, were considered decisive. The writer goes on to say that it has been pretended by some of the maritime journals that, with the column of water raised by the torpedo-boats going along with giddy rapidity, it will be impossible to discharge torpedoes. But three days before leaving Toulon, with a strong wind from the east, which produced a heavy sea, going over eighteen knots, and, consequently, raising a strong column of water, the torpedo-boats 63 and 64 were able to send their torpedoes straight to the mark. It has also been said that, in the event of the torpedo-boat attacking a vessel in front, the torpedo will be turned aside by the current produced by the ironclad under steam. This is a problem to be solved, and a trial must be made. The writer has very little faith in protecting ironclads with steel netting, which would considerably diminish the speed of a vessel. An ironclad attacked by torpedo-boats would be in this position. With its netting, its speed would not be above six knots, and at night it would be obliged to employ electric lights, and would thus become a target for the gunboat of the future. In fact, the marine monster would have little chance against the parasites. At the trial made on the coast of Algeria, by a full moon and a calm sea, when the attack was announced beforehand to take place between 9 and 10 o'clock, the torpedo-boat was not perceived, as we have said, until within 1,200 yards of the squadron; and in less than two minutes it was on the ironclads. It is asked what would have been the surprise, the emotion, and the panic on board the ironclads if 20, 30, or 50 torpedo-boats had suddenly made their appearance to attack them in reality. The writer does not seem to see his way clearly to doing away with heavy ironclad squadrons; but he says at the same time that such squadrons attacked by torpedo-boats, gunboats, and rams would be completely at their mercy.

SEVERAL efforts have been made to obtain the publication of an official history of the war of 1870-71. The most recent endeavour was that by the

French War Minister in June, 1882, who appointed Colonel Perrier, an eminent scientific officer and member of the Institute, to prepare an account, on the model of the work by the German General Staff. Whether from the difficulty of obtaining official data, —a difficulty well understood from the confusion, bordering on chaos, prevailing after the close of a disastrous war,—or owing to the frequent changes of War Ministers since that time, who may each have held different views on the subject, nothing has been made known regarding the work. Under these conditions, the issue of an official report, recently submitted by M. de la Porte, the reporter of the Committee charged with the draft bill for regulating definitely the Budget of 1871, gains in importance. The financial side of the report concerns us less than that part which deals with the number of men levied during the war. It is from the figures supplied by M. de la Porte, who obtained them from official documents supplied by the Minister of War and of the Interior, that we learn what tremendous efforts France was able to make, and what she actually performed. According to the data preserved in the French War Office, there were in Paris on January 1, 1871, 7,267 officers and 278,280 men, together 285,547; comprising 131,760 men of line, 117,934 Mobile Guards, 21,321 auxiliary troops (including marines, douaniers, forest guards, &c.), and 45,532 administrative service, gendarmerie, and staffs. In this total are not included the marching battalions of the National Guard, the number of which is estimated by the War Office at about 90,000. On February 5, 1871, there were in the field in the provinces of France 956,630 men, including the Regular Army, Mobile Guards, mobilised National Guards, and Franc-tireurs. This total was made up as follows:—First, or Army of the North (General Faidherde), 28,920 men; Corps d'Armée of Havre, 31,000; Peninsula of Cotentin, 32,119; Second Army (General Chanzy) and Army of Brittany, 238,649; 25th Corps d'Armée (General Pourcet), 29,870; 28th Corps (General Billot), 33,335; Corps of Nevers, 18,318; Army of the Vosges (Garibaldi), 44,449; Corps of Bourg, 15,502; Corps of Lyons, 22,986; Belfort garrison, 12,000; remnants of the Army of the East (Bourbaki's), 6,080; collection of Mobiles at Angoulême and Saint-Sulpice, 33,869; territorial divisions of sub-divisions of Algiers, 354,533; mobilised troops in the camps, 55,000; total, 956,630 men. It may, however, be supposed, it is stated in the report, that of this total, according to the data preserved in the French War Office, 457,000 men belonged to the active Army (deducting the troops at Paris or who had entered Switzerland); 230,000 were Mobile Guards (as stated above, there were 118,000 in the Paris Army, whilst in the Army of the East the Mobiles were represented by 23 regiments and seven single battalions); the mobilised National Guards were nearly as strong, and the remainder were Franc-tireurs. The above figures tell us what were the actual number of troops on the day of the armistice, consequently at the time of the capitulation of Paris, and the entry of the Army of the East in Switzerland. But they do not permit us to form an estimate of the troops raised during the second period of the war. M. de la Porte supplies the information in the lists drawn up by him. The effective of the French active army on August 1, 1870, was 531,867 men. The losses from that date to April 1, 1871, including killed, prisoners, missing, and dismissed, amounted to 656,509 men. The effective on April 1, 1871, was 542,509 men, and exceeded, therefore, that of August 1, 1870, by 10,642. This result was obtained by enrolling between the two dates 666,735 men, made up of 143,918 volunteers, who entered for the duration of the war; 139,434 old soldiers, of the age from 25 to 35, who had been recalled to the colours by virtue of the law of August 10, 1870; 58,821 reserves, &c.; 317,613 conscripts; and, finally, 6,949 new commissioned officers, taken from the ranks. Besides these forces of the regular army, there were raised 455,000 Mobile Guards, about 600,000 Mobilised National Guards, 72,000 Franc-tireurs, and 96,000 men of the marching battalions of Paris. Taken altogether, we obtain a total of close upon 1,900,000 fresh combatants, which were raised by France in six months, from August 1, 1870, to February 1, 1871, without reckoning the local National Guards, who also took their share in the fighting in more than one action. The report of M. de la Porte states:—"This is the final balance-sheet of which France may justly be proud, as a striking testimony of her energy, her courage, and her patriotism in the midst of great disasters." The writer in the *Militär-Wochenblatt*, from which we quote the figures, adds that the statistics given in the report, which bear the stamp of perfect truthfulness, show the levies raised by France during the war of 1870-71 were much larger than has hitherto been believed, which makes the results obtained by the numerically much weaker German forces appear in a much more favourable light.

Rear-Admiral Hoskins, with the Reserve Squadron under his command, arrived at Heligoland on Monday, and left on Wednesday.

Commander Burges Watson has been selected by the Admiralty for the command of the *St. Vincent*, training-ship at Portsmouth, in succession to Commander Arthur Bromley, who will recommission the *Swift*, on the China station. Commander Watson entered the Navy in 1860; became Sub-Lieutenant on September 5, 1866, and the same day was promoted to Lieutenant, owing to a death vacancy. He was promoted to Commander on July 3, 1879, but has seen no active service. Commander Bromley, whom he relieves, joined the Navy in September, 1860; became a Sub-Lieutenant in December, 1866; Lieutenant in June, 1869; and Commander in June, 1882. He is the son of the late Accountant-General of the Navy. It was recently mentioned at the Royal United Service Institution that the boys sent to sea from the *St. Vincent* are entirely deficient of that ready resource which used at one time to be characteristic of the British seaman. That they all were educated up to a certain standard, and could be likened to bullets cast in the same mould. The training ship boys acquire a certain amount of knowledge, but never appear desirous of adding to that stock; and it was said they are totally different from the seamen of the olden days.

The appointment of Commissioner for the Volta District of the Cape Coast Colony has been placed at the disposal of the Colonial Office through Commander Rumsey's acceptance of the appointment of Assistant-Harbourmaster at Hong Kong. Retired Naval officers are eligible.

It appears that to handle torpedo-boats special training is necessary, owing, presumably, to the rapidity with which they manœuvre when at high speed, and the necessity of the officer in charge being thoroughly acquainted with their turning powers; otherwise, how came one of these boats to crash into the stern of the Crocodile at Portsmouth on Wednesday when turning in the harbour? She stove her bows in, but fortunately did no further damage. She will have to be replaced, however, by another boat, as she was intended for the Channel Squadron flotilla.

Lieutenant-Colonel Moody, R.M.L.I., was to have given a lecture on Wednesday last at the Royal United Service Institution on "Recruiting for her Majesty's Service," but had to postpone it. As Colonel Moody has been stationed so long in London on recruiting service for the Admiralty, great disappointment has been felt by a vast number of Naval and Marine officers.

The evolutionary squadrons of all the great Maritime Powers are at this moment actively engaged studying modern Naval tactics. The French squadron put into Lisbon last week, and was received with great demonstration by the Portuguese. The Royal Family and Ministers visited the squadron, and met with an enthusiastic reception at the hands of the French. The German, the Austrian, the Russian, the Italian, and the English squadrons are all at work off their respective coasts, and in each torpedo and torpedo-boat drill is the order of the day. Everything, in fact, seems to have to give way before these new engines of maritime warfare, which are now considered of greater importance than were seamanship and gunnery in the olden days, and no wonder!

A question has arisen as to the liability of the Admiralty for damages to merchant ships caused by the Admiralty buoys being out of position. The case in point is this:—The buoys marking the channel into Queenstown Harbour are Admiralty buoys, and are laid down by the dockyard officials. On June 21 a large German ship, the *Carl Friedrich*, relying on the position of a certain buoy as marked in the chart, approached to what she deemed a safe distance from the shore, but suddenly found herself aground, and was put to considerable expense before she could get off. On verifying the position of the buoy it was found to be over 100 yards from its proper place, and was in 20 feet instead of 25 or 30 feet water. If the liability of the Admiralty be once admitted, it will open the door for endless litigation. The pilots of each port should know the real position of every danger without regard to the buoys. At the same time the Admiralty should take every possible precaution to ensure these buoys remaining in their assigned position.

It is not necessary to make any comments, of a critical character, upon the evidence before the Court which has acquitted Staff Commander Gravener of negligence in the discharge of his duty as Commander of the *Vivid*, Admiralty yacht; but it is painful to observe that, as is nearly invariably the case, those who were on board one vessel gave evidence which is in direct contravention of the statements of those who were on board the other. Staff Commander Gravener received the highest testimonials for skill and care and caution from the Commander-in-Chief at Devonport; and few will gainsay, we think, that the conclusion at which the Court arrived was just, and that the charge was not proved. Captain Bosanquet only expressed the feelings of the service when he said he had much pleasure in handing back to Commander Gravener his sword.

Major Evans Bell has revived the terrible Indore controversy—which we fondly believed to have been dead and buried—in a letter to Mr. Durand, who, he says, "champions the interest of a family, a class, and a profession that has sacrificed the authority, the dignity, and honour of the Empire, and only sustained the interests of the Office and the credit of the Service." Mr. Durand, Under-Secretary of the Government of India, published a life of his father, and a work on the events in Central India at the outbreak of the Mutiny, (which more properly might be described as a rebellion) at Indore in 1857. Without entering into any discussion, it may be allowed to us to state the opinion formed at the time, and not far from the spot—that the Maharajah Holkar acted, under all the circumstances, much better than the late Sir Henry Durand did, so far as his relations to the British Government in India were concerned; but we cannot quite approve of the heat and vehemence of Major Evans Bell, who has considered it necessary for his vindication of Holkar to "run a-muck," so to speak, against many eminent servants of the Crown. One thing is pretty certain, that if a great public officer states an adverse opinion, or brings a charge against a Native Prince, it is almost impossible for the latter to recover the effects of it, or to make good his defence; but we think it will be very often found that, when so charged, the Potentate has laid himself open to a grave suspicion, if not to a positive certainty, that he has offended in the matters stated against him. There is a conviction which, when tested and probed, is found to rest upon the suggestions and statements of those who were alive at the time, that Holkar did not do all that might have been done by him to stay the rising and the attack on the Residency, which Travers defended with such brilliant courage, and from which Durand retreated with his fugitives,—not to Mhow. But Major Bell certainly shows, if his statements are to be depended on, that Holkar had, before the attack, entreated the Resident to prepare for it, to send away his people and his treasury; and that three weeks before the outbreak, at a conference which he specially called at his palace, Holkar warned Durand that, in the event of a mutiny, his own troops could not be trusted; that the treasury should be moved to the military cantonment along with the English ladies, and that the Residency building should be fortified. We trust that Holkar does not feel as Major Evans Bell appears to do with regard to his treatment by the British Government, for it would not be pleasant to have a man in his position with such feelings in his mind in the central position of Indore, with Scindia close at hand, brooding over the retention of Gwalior, when Russia may seek out favourable materials with which to create a blaze in our rear at any time she considers favourable to provoke a conflict.

In a French military journal, we find an account of some experiments which have just been made at Brest, having for their object to "search out" the narrow entry into the roads with the electric light, and to see if it would be possible for a ship to slip through by surprise during the night. A tug-boat called the *Laborieux* was told-off to represent the enemy, and was directed to try and force the entry. The authorities were desirous of knowing if the powerful electric apparatus they had established on shore could pierce the obscurity to a sufficient distance to show the aggressor in time enough to permit the defences to act. The *Laborieux* was discovered when she was in the middle of the "neck," and though she changed her course, she was easily kept in view. Two torpedo-boats which were stationed close to the shore, might have attacked her without being seen, for as the *Laborieux* wished to act by surprise, she could not make use of an electric light, which would at once have betrayed her presence. The probability, of course, is that an enemy's ship, on finding herself discovered, would at once back out, and not wait to be attacked.

There were "a select few," and among them General Count V. Blumenthal, who went with his old friend, General Eyre, paying their respects last Waterloo day to the Earl of Albemarle, on the 65th anniversary of the battle which "made some noise in its time," and of which the consequences have not yet quite disappeared, in which the venerable peer, then a little over 16 years of age, entered an appearance *non sine gloriâ*. Among others was Lord Eversley, the veteran in another field, the arbiter of many a hard-fought fight in the House of Commons, and it is said that one of the company desirous of showing the German General a good specimen of a British nonagenarian, said:—"You will scarcely believe it, but Lord Eversley has just ordered a pair of new guns for the forthcoming season," whereupon Count Blumenthal, who is also a chasseur, remarked:—"The Emperor has just ordered four!" A pair of brothers—*par nobile fratrum*—like Lord Albemarle and Harry Keppel is certainly a great glory to a house, and their forbears did well for their country

The *Avenir Militaire* says that a clothing experiment has just been made in France, with a certain number of battalions of the territorial army. The authorities wished to see with what amount of facility they could be clothed in the event of a mobilisation being ordered. The experiment is said to have perfectly succeeded. It was thought that the rural districts would have furnished a large number of men too big for uniforms in store, but such was not the case, and the number of men who could not be fitted did not exceed between two and three per cent.

The new military law in France, reducing the period of active service to three years, has been very severely criticised by Colonel Corbin, who points out that any reform should have these three objects in view:—(1), To improve the condition of the Army; (2), to lighten the burden on the people; (3), to diminish the expenditure. According to Colonel Corbin, the new Bill fails to accomplish any of these desiderata. The Army will lose 15,000 non-commissioned officers; it will not be more numerous than it is to-day, but the quality will be inferior. The country will feel the conscription more heavily than before, because no one will escape, and the War Estimates will be greatly augmented. In fact, this unfortunate Bill seems to have hardly a friend beyond the walls of the Chamber, and the rumour is that the Government will find some means of evading it.

Reviews.

An Epitome of the Reports of the Medical Officers to the Chinese Imperial Maritime Customs Service. Compiled by Surgeon-General C. A. Gordon, C.B. (Baillière, Tindall, and Cox.)

This splendid volume contains a vast amount of valuable information. It dates from 1871 to 1882, and not only contains the matter above stated, but is supplemented with chapters on the "History of Medicine in China," "Materia Medica," "Epidemics, Famine, Ethnology, and Chronology in Relation to Medicine and Public Health." The value of the information given by the author on the different subjects which are treated of in its pages may in some degree be estimated by a reference to the numerous and important works which have been compiled, arranged, and published by him. Many of his experiences were gained on the battle-grounds in India, and others in the Franco-Prussian War. He has also studied the subject of China from a medical point of view, and no doubt has seen some curious phases of life on the Gold Coast. We do not attempt to grapple even partially with the vast quantity of matter which is published in this volume, but must remain content with wishing Surgeon-General Gordon's work the full measure of appreciation which it undoubtedly deserves.

Hay Fever. By Morell Mackenzie. (J. A. Churchill).

The questions,—Is it Hay Fever? Or, if not, what is it? do not appear to be much nearer solution than they were in the year 1819, when one of the faculty of the period detected some unusual symptoms, and published a pamphlet respecting them. He was followed by many others, but no diagnosis of this malady seems accepted without question. Mr. Mackenzie's little work will throw much light on the subject. He recommends a large variety of nostrums, which may serve their purpose for a time; but he will scarcely say he has discovered the origin of hay fever, or that he can trace its course from point to point, or what is more important, that he has succeeded in originating a perfect cure. Some of the author's suggestions will be appreciated by the invalids, viz.,—"In hay fever the food should be nutritious and easily digestible; stimulants in small quantities are necessary—light claret, hock, and whisky." If a non-professional opinion be admissible, it would be this,—a month before the attack developes itself go on board your yacht if you have one, and stay there till all fear is over. If you have not a yacht, open negotiations with some of the lightships. Go on board as a lodger, and stay there. This remedy or, more properly speaking, this preventative, has frequently been tried, and always succeeded. Dr. Mackenzie's pamphlet seems to exhaust the whole question, and deserves close attention.

The Violinist of the Quartier Latin. By G. Curzon. (Sampson Low, Marston, and Co.)

The Violinist of the Quartier Latin is open to the charge of being too sensational, but if a work possesses genuine merit, the fashion by which that fact is established should be a secondary consideration. In the present instance, the promise of sensation is abundant. Sir Arthur Hildyard, Governor-General of the Straits Settlements, has just welcomed his only daughter Ethel to Singapore. She was in her seventeenth year, and had from her infancy been under the charge of Sir Arthur's brother, Edmund Hildyard. For many years Edmund Hildyard had managed his brother's property in Berkshire, and resided in the family mansion, Elm Park. The auditor of the estates, Mr. Robert St. Clair, formerly a cavalry officer, also resided in Elm Park with his wife and two step-children. Before long, St. Clair discovered that Edmund Hildyard was robbing his brother. He at once saw the situation, and also the way in which it could be turned to his own advantage. One of his daughters, who was about the same age as Ethel, resembled her most strikingly in every particular, and he conceived the bold idea of pawning off his own daughter Adrienne upon Sir Arthur. The girl shrunk with indignation from the cruel fraud. Pressed, however, by her father, the inexperienced child consented to accept the *rôle* of Ethel Hildyard. There was another cause still for excusing her. She lived in daily fear of a half-lunatic, Louis Onslow, who, young as she was, had forced her to promise solemnly that she would marry no one else. The first appearance of Ethel Hildyard in society created a marked sensation. Lovers flocked around her, alliances were offered, but she showed no preference for any of her suitors. At length Prince Suwaroff appeared upon the scene, with palaces at St. Petersburg and Florence, a villa at Terracina, and a castle on the wooded heights of the Carpathians, and gained the prize. We next meet with Ethel and her father at the little village of Autueil, where they intended to reside in seclusion for some weeks. Louis Onslow, accompanied by his brother Geoffrey, force their way into the room where Sir Arthur and his daughter are together, denounce Ethel as an impostor, and disclose the plot which had been organised by her, by Edmund Hildyard, and by Robert St. Clair. She fled that night, no one knew where. In the meantime Sir Arthur wrung from his brother a full confession of the charges made by the Onslows, and the heart-breaking account of the last month's suffering of his real daughter. Robert St. Clair and Louis Onslow meet by mere chance. Onslow was unknown to St. Clair, but soon revealed himself. When they were in a narrow path that circled a steep cliff, acting on a sudden impulse, St. Clair struck his enemy a blow, which hurled him down the precipice. Louis Onslow, by a miraculous chance, was not killed. Thoroughly disguised, he traced St. Clair to an emigrant ship just about to sail for Australia, and secured a passage on board her. On the second night of her voyage, a fire broke out, and the ship was enveloped in flames. St. Clair and Onslow found themselves sole occupants of a raft in mid-ocean. Onslow attacked his foe with a dagger; but once more St. Clair was the victor, and stabbing Onslow, shoved him overboard. At the moment, a schooner steered alongside; the crew hauled the murderer on board, and sailed away. We next find ourselves in the Quartier Latin. A street accident has just occurred,—a poor blind lad has been run over, and lies awaiting death in the arms of a boy, who witnessed what had occurred. Who was he? The reader will scarcely fail to recognise Adrienne. During months of unspeakable sorrow for her sin and intense physical sufferings, her love for Sir Arthur had become etherealised, and had lost all of its earthliness that it had ever known; but her eyes had beheld him again; her ears had listened to his voice; her hand had touched his; the past had revived within her, and she would have perilled her soul to become his for ever. The epilogue is full of interest, and shows most abundantly that the trials and miseries endured by Adrienne effected a solemn change in one man's life. They made a Christian of her repentant father. Writing from a far distant foreign country to Sir Arthur Hildyard, he says:—"I have stood dry-eyed beside Adrienne's deathbed. I had mutely contemplated my murderous handiwork. The sight of it had seemed to steel anew my callous and impervious nature. But when I read her letter, I wept."

Concerning Carpets and Art Decoration of Floors. (Waterlow and Sons.)—Although it would be difficult to show what carpets have to do with "service" papers, there can be no objection to gaining a little information on a subject which is interesting to a vast number of people. This opportunity is offered by Messrs. Waterlow's attractive little book, the express object of which is to convey instruction to readers who have no special knowledge of the matter. We are told that there has been an astounding development in England during the past 30 years, not only of decorative art work (particularly applied to floor coverings), but in the appreciation by the public of such work. We are also told how enormous sums were paid in ancient times for Babylonish productions, and for all descriptions of art decorations. For example, the tapestry used for the hangings of one of the Emperor Nero's dining-rooms cost over £32,000, an amount exceeding one-third of the sum realised by the Fountain sale, which has recently caused so great a sensation. Inquiring minds will find no little interest in studying this pamphlet, though it be only about carpets and art decorations of floors.

Transactions of the Royal Historical Society.—A melancholy interest is attached to this pamphlet by the intelligence of the death of Sir Bartle Frere, one of whose last acts was to prepare for press his paper on South Africa, which is now before the public. It occupies 60 pages, and is marked "to be continued."

Catechism of Military Training. By Major H. Fitzroy Marryat. (Gale and Polden, Chatham.)—This little work does not claim to be original, but simply a compilation intended to facilitate officers and men in going through the syllabus laid down by G.O. 30 of March 1, 1884. Every care has been taken by the compiler to ensure correctness in the details, and a very short acquaintance with it will satisfy those who read it carefully as to its being a work of sound practical utility. There can be no doubt that non-commissioned officers and men may derive a good deal of information from Major Marryat's little work. The contents are divided into four weeks, in the course of which no item appears to be left unnoticed.

Hunt-room Stories and Yachting Yarns. By the Author of "Across Country," &c. (Chapman and Hall.)—This is an attractive title, which promises some capital reading—an observation applicable as well, if not more, to the yachting than the hunt-room stories. "Home from Hunting" is an excellent tale, and very well illustrated. We have here a downright determined runaway, whose outstretched head and wretched eye proclaim that the brute who owns them means mischief. But that he has his mistress on his back is at once made apparent by the illustration. "She was sitting well back and pulling all she knew," but as the horse flashed by it was seen that the curb-chain was hanging loose, and that this bold equestrian had little chance of stopping her steed until he consented. Fortunately for her, one of those present who knew how to ride, and who knew the country, just managed to prevent what must have been a serious, if not fatal, accident. We can strongly recommend the "Yachting Yarns," particularly "The Cruise of the Moonshine." The volume is brought out in quite a superior style.

Biographies of Celebrities for the People. Edited by F Banfield, M.A., Oxon.; published by Messrs. Maxwell, Shoe Lane, is not a very commendable publication, as far as the illustrations and printing are concerned. It is absurd to call the brief notices, referring to military men, monarchs, and rulers, Naval men and eminent women,—their "Lives;" but in a short compass, the little book contains a good deal of matter taken from various sources, and many likenesses of the most unlike character.

For Their Sakes.—Messrs. Chapman and Hall have published a volume of papers by various authors—some of distinction and some of no distinction—in the hope of aiding a society for training teachers of the deaf on the German system; and with such a commendable object in view, the book is entitled to our commendation. The stories are of great diversity of character, and unequal in merit; but there is plenty of matter good enough to attract the reader, and to enable us to commend the volume to the public, who will thereby contribute to a most praiseworthy and truly Christian work, without any reason to complain of their being "taken in" or bored.

The Journal of the United Service Institution of India, May number, contains a very interesting technical account of the German manœuvres at Homburg last year, by Lieut.-Col. Middleton, 2nd Batn. 4th Foot, with a map by which the movements can be followed. There is also a narrative of the British wars in China from 1840 to 1860—rather dry reading—by Major Mark Bell, being selections from a military report on China submitted to the Quarter-master-General. It seems indisputable, we think, from the statements respecting the outbreak of the war of 1840, that the wicked trade in opium, and our complicity in it, led to the rupture, although the author declares that this view is fallacious, and that the war was just and unavoidable. The Chinese, he said, ingeniously made the trade appear as the *fons et origo* of the whole dispute, while the demands for reparation and redress for the injuries inflicted were thrust in the background; but surely the injuries were inflicted on wrong-doers, and reparation was not due to those who violated the laws of the land in which they were allowed to live. We are glad to know that the war was not popular in England; and we believe that the nation was not mistaken, as Major Bell says it was, in the idea that the war was unjust. Our contemporary gives very full notices of books, and we are glad to say that full attention is paid to foreign military literature.

Cassell's Family Magazine.—Messrs. Cassell and Co., not satisfied with a continuation of the excellent stories which appear in the ordinary numbers of their contributions for July, have conceived the bright idea of an extra holiday number of the *Family Magazine*, 1884, and here it is. About twenty capital stories—some gay, some sombre, some neither the one or the other—are collected together in a tastefully-arranged cover, and accompanied with some fairly executed illustrations, are offered *en bloc* to the public for sevenpence. If the reader will refer to page 64 of "Summer Days," he or she will be interested by what may be learned there, and will learn much that they are not now aware of.

The summer supplement of the *Argosy*, just published by Mrs. Henry Wood, contains several stories which are quite entitled to bear a part with the author of "East Lynne" in making the summer supplement successful. Mrs. Wood has contributed one of those weird stories, "The Surgeon's Daughter," which "fetch" people so much. The other tales are of average merit, but each and all are worthy of perusal.

Service Questions in Parliament.

In answer to Dr. Cameron and Col. Levett, the Marquis of Hartington said, in the House of Commons on Thursday, that for the last four years the reports respecting the Staffordshire Yeomanry had been very satisfactory. His attention had been called to the statement attributed to the Mayor of Lichfield, to the effect that what had occurred was only what had taken place in former years; but he did not at present see that any advantage would be gained in extending the inquiry, which was now taking place, to the general conduct of the corps while in training for some years past.

Questioned by Mr. Tottenham, Mr. E. Ashley said he had no information that the graves of British soldiers who died at Pretoria, in the Transvaal, were in a neglected state.

The Marquis of Hartington informed Mr. Tottenham that the Government had no intention of granting a medal or any other decoration for the operations in the Transvaal.

Chief Pymr., Lieut.-Col. Farwell, A.P.D., takes financial charge of the Northern District, York, early next month. Major Woodall, A.P.D., from York District Office, has exchanged with Capt. Nott, 30th Regt., recently in Egypt. Between this and the end of the year, four chief pymrs. are retiring,—Lieut.-Cols. Nowlan, Leigh, George, and Bryson, A.P.D.

Foreign Military Literature.

Organ der Militär-Wissenschaftlichen Vereine. Vol. XXVIII., Part 3, "Die Kriegsformationen des Deutschen Reichsheeres." This article is a *resumé* of an important paper, entitled "Les Formations de Guerre en Allemagne," which appeared in a recent issue of *Le Progrès Militaire*, and which the writer in our Austrian contemporary, the *Organ*, thinks ought to be of the highest interest to all military readers, although, as the critic submits, the French author "by no means always hits the right point." The writer in the Austrian *Organ* thinks that the French author is a well-informed officer, who takes great pains to clear up the uncertainty, and bases his military calculations upon it. Although he is not always correct in his conclusions, it would be difficult to prove this assertion, excepting by a reference to the highest military authorities at Berlin, who would probably not be willing to expose their plans to the public gaze. The French writer's statements are full of interest. He enables us to judge what value the French really attach to the present war formations of the German Army. Probably unintentionally, he lets us see that the French Army is not yet fully organised, and that not even the fundamental principles are yet settled which would have to be applied in war. The French have borrowed much from the Germans, but they have at the same time let national peculiarities have their sway. Military institutions, the Austrian critic thinks, should resemble as much as possible the systems of national defence.

Jahrbücher für die Deutsche Armee und Marine. June. (Lennart Torstenson.) The account of the share of the Swedish General in the Thirty Years' War is concluded. The last campaign of Torstenson in Bohemia is described. Its object was the relief of Olmütz (held by Col. Paikul against an overwhelming force), and the capture of Vienna. Although he beat his opponent, Count Hatzfeldt, at Jankau, in Bohemia, on February 23 (March 5), 1645, taking him prisoner, together with five of his Generals, 4,000 soldiers, 77 stands of colours, and 26 guns, Torstenson failed in his object,—partly because he was not seconded by his allies as he ought to have been; partly because the disease from which he was suffering, and which ultimately became mortal, finally obliged him to surrender his command. But there is no doubt that Torstenson's victory, and his bold push for Vienna, which he closely approached, hastened the peace negotiations at Münster, making Austria somewhat more amenable to reason. It was through the great Swedish General that Denmark acceded to the demands of Sweden in the peace of Brömsebro, that the Elector of Saxony consented to a truce, and the Emperor Ferdinand seriously thought it was time to make peace. Even France became more obliging; and Sweden, on the contrary, more confident and independent. In September, 1646, Torstenson returned to Sweden, and, notwithstanding the fatal nature of his disease, lived until the spring of 1651 (April 7), honoured by a national reverence which has extended even to the present day.

On Monday morning a review and sham-fight of the Cavalry and Artillery quartered in and near the metropolis was held on Wimbledon Common in the presence of the Field-Marshal Commanding in Chief. The 1st and 2nd Life Guards, the 3rd Hussars, numbering about 900 sabres, and C Baty. A Brig. R.H.A., with four 9-pounder guns, were formed up in line of double columns at 10 a.m., under the command of Col. Duncombe, 1st Life Guards. A series of manœuvres representing the repulse of an enemy advancing on the metropolis from the South Coast, lasted an hour and a half. The whole force then marched past.

The *Times* says:—"The Lieutenancy of the Tower of London being held to be active military service, Lord Chelmsford's appointment to that office will avert his retirement from the Army, which would otherwise have taken place on July 15, in consequence of his lordship's non-employment for five years since his supersession in South Africa in 1879 by Lord Wolseley. Majors-Gen. Crealock, Marshall, and Trevor will also be liable within the next few weeks to retirement, through five years' non-employment, upon a pension of £700 a year in each case. The senior colonels for promotion are Sir William Bellairs, K.C.M.G., and Col. the Hon. C. W. Thesiger, who lately held the appointment of Inspector of Yeomanry in the Northern District."

Commenting on the new Retirement Warrant, the *Times* says:—"The cause of this new regulation is, that the rate of promotion in all but the highest regimental ranks, which, as we lately pointed out, has become much accelerated under the non-purchase system, in some instances to an extent that is considered disadvantageous to the public upon financial and unnecessary upon military grounds. The new restriction does not apply to purchase rights which are guaranteed by the Act of 1871, nor to officers going to half-pay, and it is not probable that it will cause serious inconvenience to those contemplating retirement in many other instances. It may, in fact, be taken as a limitation of regimental promotion, unless in exceptional circumstances, to captains with not less than 18 and lieutenants than nine years' service."

The sum of £388 having been raised at Cairo for the benefit of the widows and orphans of the non-commissioned officers and men of the Army and Navy who fell in the late Soudan Expedition, it has been distributed as follows:—10th Hussars, £46; 19th Hussars, £73; Black Watch, £133; Rifle Corps, £20; Navy, £73; Marines, £33.

ARMY MEDICAL DEPARTMENT.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—The competition at the recent examinations for commissions in the Army Medical Department, highly gratifying as it has been to this service, must be taken either as the awakening of the English medical schools to the advantages of an Army career, or rather as the result of over-competition in civil life. Consequently, it must be granted that, as regards numbers and attainments of candidates, the future of the Department is assured. This means that in any reasonable demands aid must not be expected from external influences, but from the authorities at the War Office, who are responsible for the welfare of the Army. The steady object of the unification system is now pronounced to be a small Active List for foreign service, the work at home to be done by half-pay and retired Medical officers and civilians; in other words, the conversion of the Medical service into a force for employment almost exclusively abroad. At present, home service is a very small element; after five years abroad, the period at home extends from two to three years; in 20 years' service, 15 must be spent away from England, excepting a selected few, who pass on from one to another the permanent home appointments, and completely despise the roster for foreign service. What is remarkable about this is, that less than half of the British Army is abroad; combatant officers may take this percentage as the average of their home and foreign service, not including leave, which is granted to them freely, and from which medical officers are debarred by departmental rigour. Surely our period of exile is sufficient already, without further increasing it; the step now contemplated of lengthening our time in India to seven years seems the preliminary of almost permanent foreign service. In adopting the present system, it was not anticipated that the Department would renounce its claims to equality with other branches of the Army, in respect to foreign service and leave. The price of independence appears to be total loss of social advantages, and sentence of perpetual banishment. Reasons of economy determine the reforms in the Army, in the Medical Department, no matter how radical, they are approved of and even suggested by its own administrators. In 1883, for 134,793 men in the Army at home and in the Colonies, 545 medical officers were considered sufficient; in India, with 55,000 men, 330 are retained. In the above proportion, India has 105 medical officers in excess, and this, too, in a country where there are large garrisons and few detachments. The economy of keeping a large surplus in India at the expense of the Indian Government is apparent, the imposition of this reserve out of all just proportion is resented by their refusing to recognise relative rank as conferring corresponding pay,—the anomaly of surgeons drawing £100 less pay than captains, by which rank their pay at home and in the Colonies is regulated, may be instanced. The establishment of medical messes requires additional strength to support them; in the Rawal Pindee one 25 medical officers are collected for this one object. Under the station hospital system, any number of patients can be treated by a staff of three or four; a crowd in each hospital only leads to confusion, and engenders habits of indolence; large civil hospitals at home and in India are managed efficiently by a small staff. Another aspect of this increased foreign service, is our further alienation from the customs of the Army and the loss of prestige incurred. The Army Medical Department deserted and isolated seems the utmost part chosen for sacrifice; the rights of its officers are ignored, its position assailed, and its future darkened by the gloomy prospect of increased foreign service.—I am, &c., DULCE DOMUM, A.M.D.

India, June 1, 1884.

The Bristol Naval Artillery Volunteers were presented with colours by Miss Brassey (acting for Lady Brassey) who also distributed the prizes won during the year by the members of the corps, on Saturday last. The hall was gaily decorated with trophies of flags and arms. There was a crowded and influential attendance, the following, among others, occupying seats on the platform:—Sir John Jones Jenkins, R.N.A.V., M.P. (Swansea), the Right Worshipful the Mayor (Mr. J. D. Weston) and the Mayoress (Mrs. Yates Stevens), Miss Stevens, the High Sheriff (Col. Savile), Sir Charles and Lady Cuyler, Admiral Dunn, Gen. Beatson, Col. Plant, Col. Newbolt, Dr. Kevern, R.E., Rev. J. Johnson (Nailsea), Surg.-Major S. Smith (1st Batn. G.E.V.), Major Graham, Capt. Lowe, Capt. W. R. Webb, Capt. Whitting, Lieuts. J. Weston Stevens, Harding, Strachan, and Glasson, Rev. J. G. Alford (chaplain Artillery Volunteers), Capt. Blick, Capt. Barge, Capt. Tupman, R.N. (H.M.S. Dædalus), and Qrmr. Arrowsmith. The officers of the corps present were Lieut.-Com. Betton Sayce, R.N., Com. Roberts, R.N., Surg. Lloyd, Rev. Canon Girdlestone (chaplain), Hon. Lieuts. Charles Thomas and Thatcher, Sub-Lieuts. Lewis, Withington, and Elmes. A Swansea battery was present under Sub-Lieuts. Daniel, Madge, Andrews, and Simpson. Sir Thomas Brassey and Miss Brassey were received by a guard of honour of the Bristol Engineer Volunteers, and were loudly cheered on entering the hall. Sir Thomas wore his uniform as hon. commander of the Liverpool Brigade. Miss Brassey unfolded the new colours, presented them to Sub-Lieut. Elmes amid loud applause, and said she felt much pleasure in presenting the colours on behalf of her mother, and knew that the corps would do all honour to them. After a spirited drill, Miss Brassey distributed the prizes.

The General Order that the Egyptian medal (pattern of 1882) be granted to those forces under Sir Gerald Graham who have not previously received it, and a clasp inscribed "Suakim" to those who have, was issued last week. All who landed at Suakim or Trinkitat between Feb. 19 and March 26, 1884, both dates inclusive, will be entitled either to the medal or the clasp. Her Majesty has further approved of a clasp, inscribed "El-Teb—Tamaai," for those who were in both actions, and "El-Teb" or "Tamaai" for those who were in one or the other, but not in both.

ROYAL UNITED SERVICE INSTITUTION.

A paper on "Soldiers' Food," a subject unquestionably of vital importance, was read at the Royal United Service Institution on Wednesday, by Lieut.-Col. Tulloch, C.B., 41st Regiment. It commenced with a brief account of the food allowed to British soldiers on active service three or four hundred years ago, and of the mode of cooking then, which had only one merit, that of extreme simplicity. The lecturer, leaving those times, when the soldier's breakfast was "a mere matter of form," and when a regular evening meal "had no existence even in theory," then dealt with the present aspect of his subject. Plain directions for testing the quality of meat and bread; for distinguishing sound healthy cattle from those that are diseased, or otherwise unfit for food; for economising the rations and groceries; and for utilising much of what is now wasted, proved Col. Tulloch's mastery of his subject. Tabular statements from the works of Parkes and De Chaumont showed the chemical constituents and the comparative nutritive values of different articles of food. From these it appears that the food of our soldiers on home service is less nutritious than that of French, Prussian, and Austrian soldiers, and decidedly inferior to that given to boys in the Royal Navy. Col. Tulloch considers that the diet of our troops is barely adequate for full-grown men doing a moderate amount of work, and that it is insufficient for the immature lads of whom our home battalions are largely composed, who require more nutriment, because they are growing and have to do a large amount of work while being drilled. The paper merits a more extended notice than we can find space for. In the discussion that followed, Col. Knollys and Col. Clive corroborated the views and opinions of the lecturer. Major-Gen. Mackay dissented as to the present diet being insufficient, even for growing lads. Surgeon-Major de Chaumont, Professor of Hygiene at Netley, gave a clear exposition of the question, showing that, as soldiers are liable to be called on at short notice to make exertions far in excess of their ordinary work, their food should be regulated with a view to such contingencies.

The discussion which followed the reading of Col. Maitland's paper on "The Heavy Guns of 1884," at the United Service Institution on Friday, the 20th inst., was continued on Thursday last. Admiral Boys presided during the latter part of the discussion, as Mr. W. H. Smith was obliged to leave. On the former day, Admirals Hamilton and Boys, Mr. Rendel, and others, spoke with reference to some points in the paper. Lieut.-Col. Hope offered what he considered an explanation of the irregular "wave pressures," as they are called, which are sometimes indicated; but Sir F. Bramwell controverted this explanation, admitting, however, that he, as well as Col. Maitland, was unable satisfactorily to account for them. Capt. Palliser announced that he had received proposals from the Canadian Government for the construction of an arsenal at Quebec. In the continued discussion on Thursday Mr. Longridge, Mr. Edmunds, Capt. Noble (Elswick), Col. Maurice, R.A., Admiral Selwyn and Col. A. Moncrieff took part. Mr. Longridge said he viewed some of the statements in Col. Maitland's lecture with alarm and dismay. It was there admitted that we were lagging behind, that our prospects of improvement depended on what other countries might do. He thought an empire like ours ought to lead the van, instead of following Krupp and the French. We were moving, he thought, in a wrong direction, because we presume there is no "wire-worm" at Woolwich. Rapid rotation of shot to ensure accuracy, strong powder, and high velocity were required, instead of slow-burning powders, which necessitated guns of unwieldy length. Capt. Noble entered into some of the details of the construction of guns at Elswick. Admiral Selwyn expatiated on the disadvantages of slow powder and very long guns. Col. Moncrieff, referring to preceding remarks, said that gun-carriages on his system were more suitable for older guns than for the very large guns lately made, and that hydro-dynamic carriages were preferable for the latter.

The paper by Sir Henry Daly on "The Punjaub Frontier Force," read at the United Service Institution, naturally attracted an Indian audience, and well deserved the attention with which it was received. We regret that we cannot find space to give any lengthened account of the gallant officer's history of the force which has provided the Indian Government with such a splendid material for its defence on the northern frontier; but the forthcoming number of the Institution's papers will contain it *in extenso*. In speaking of the losses of the corps at Delhi, and of the splendid services of Chamberlain, we think it is almost to be regretted that Sir Henry Daly should have brought in the name of Travers with a qualification, or surplus description, that he was brother of the General who won the Victoria Cross by charging, with four or five Sikh troopers, Holkar's guns at Indore, as it would lead to the idea that Sir Henry, who was a friend of Holkar, and was resident at his Court, believed that the guns were under Holkar's orders when they were attacking the residency. In the summary of services there are good causes for the survivors of the Punjaub Force to feel proud of their work at Delhi. In the casualties—little short of a thousand—250 were killed, including nine British and 11 native officers; 16 British and 28 native officers were wounded. In the Guides and 1st Punjaub Infantry six British officers were killed, and 11 wounded, some twice; and not one escaped without a mark. In describing the second action by which Sam Browne won the Victoria Cross and lost his arm, Gen. Daly omits to tell us what reward was given to the native officer and old friend, badly wounded himself, who saved Sam Browne's life. Altogether, it was a most dramatic and interesting paper, with somewhat of the smack of the romance of war about it, which gave such intense interest to military service in India, and developed such noble qualities in the soldiers who served there in the establishment of our Empire.

The Argentine man-of-war Uruguay, Capt. Bland, arrived at Queenstown on June 20 from Buenos Ayres, short of water. She proceeded on the following day to Liverpool, where she is to undergo extensive alterations.

CAPTAIN COLOMB ON COLLISIONS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—I do not think the writer of your article of June 21 on the above subject quite got at the kernel of Sir Alfred Ryder's paper. The writer starts with the expression, "Here we find the real cause of those collisions we so often hear of," &c. Whereas, I understood the Admiral's mind to be quite free on the "real cause." He seemed to think them open to argument, while he pleaded that if the high speeds adverted to were a cause, something should be done to reduce them; while, if they were not a cause, the law should be relaxed. The evil he seemed to lay his finger on was that involved in a breach of the law, not because it directly caused collisions, but because it induced a slackness all round. At the reading of the paper, I endeavoured to show that as the large majority of the collisions in fog arose when the ships were at low speed, it became necessary—in arguing the Admiral's points—to inquire in what way high speed could be said to lead to collision? I showed then it was not possible, in the face of the facts, to say that in all cases under the existing law, high speed or increase of speed directly led to ensuring collisions. That, on the contrary, wherever a ship was by law entitled to cross the bows of another, high speed and not low speed was enjoined upon her, not only by seamanship, but constantly by the law courts. But I also endeavoured to show that there were some other practices usual in fogs which always preceded collision, and that as it was certain the opposite practices also prevailed, and yet never preceded collision, there was some reason to look here rather than to speed for a chief cause of collision. The case of the Romano, reported in the *Times* of the 20th, is of interest in illustrating the usual—almost universal—form of collision in fog, and the practices to which I allude. It has the advantage also of being one of the rare cases of high-speed collisions. The Nevada, an ocean-going steamer, was steering east by south at the rate of 12 knots in a fog. She heard a steamer whistle on her starboard bow, and slowed her engines. She heard it again, and put her helm hard-a-starboard. Now, consider for a moment. This whistle that she heard was from a steamer (the Romano) which was about either to strike her on the starboard side; to pass ahead of her; to pass astern of her; or to go clear of her altogether to starboard. Hard-a-starboard helm for the Nevada was clearly, under such circumstances, unnecessary or dangerous. It was unnecessary in the last two of the possible contingencies. It was dangerous in the second, because it tended to prevent the approaching ship from passing safely ahead. If the approaching ship was already about to strike the Nevada, port helm alone had a chance of throwing the stern clear of the Romano's stem. But the Nevada also stopped, and reversed. The effect of this on the ship would be to greatly lengthen the time it took to turn, or the speed over the arc described in turning, while it would somewhat decrease the radius of such arc until the way was nearly lost. But, again, this starboard helm of the Nevada could only be sensibly used with the design of getting across the other ship's bows. If so, the highest speed should have accompanied it. Safety depended on speed; and to make a helm movement to take your ship across another's bows, and a reduction of speed which would retard that crossing, can be justified on no grounds of common-sense or seamanship. Meanwhile, the Romano was going four or five knots, steering W. by N. ½ N. She heard the Nevada's whistle ahead, and then—apparently because she ported a little—on her port bow. She thereupon put her helm hard-a-port. Observe, now, that what the Romano heard and did were the same things that the Nevada heard and did. Each ship heard the whistle on the bow, and each used such helm as to bring it more on the bow. Very soon after this the Romano saw the Nevada three points on her port bow. She put on full steam, but the Nevada's stem took her port broadside before she could get across, and sank her. In what way did high speed affect this case? If we assume that the Nevada's speed prevented the Romano from getting across her bows as the latter designed, we can equally well assume that if the Romano had been going faster, she might have crossed in safety as she tried to do. No doubt we can condemn the Nevada for going 12 knots contrary to law, if that were the question—which it is not. But as a matter of seamanship, if starboard helm for the Nevada meant getting across the Romano, are we to blame the former for having too much or too little speed? Can you have—in seamanship—too much speed to cross another ship's bows? For that is what we arrive at. We see, in short, that when it comes to these crossings, or attempted crossings, of one another's bows, it is not the sum of the speeds, but the difference of the speeds, which increases or reduces the danger. And the difficulty immediately arises, that if the law permits crossings it cannot prescribe speed, unless it can order that the ship which crosses ahead shall always have the greater speed, which would clearly be an absurdity. Consider the case of these two ships for a moment. Say that with normal speeds of 12 knots for the Nevada and five knots for the Romano, they came into collision. Who is to assert that they would not equally come into collision had the Nevada been going five knots and the Romano 2·1 knots? No one, of course; for our knowledge of the turning and stopping powers of ships is all against it. The two ships most probably began to port and starboard when they were 1,000 or 1,200 yards apart; and the turning powers of measured ships would make collision inevitable under such circumstances. Coming to the helm, however, it is easy enough to say that if the Nevada had not starboarded, or if the Romano had not ported, they would not have come into collision. This follows from the fact that they were steering nearly opposite courses to begin with, and a very little turn of either ship would have cleared the other. Perhaps, we can say, if they had only let their helms alone, they might have passed clear of one another on all but parallel courses. But on what sort of ground can we justify the Nevada for starboarding to a whistle on the starboard bow? If there is danger in such a sound, it can only be because the ship's sounding is crossing your bows from starboard to port. Surely, seamanship tells you that whatever you do you must not then starboard your helm, for that will either take you into the unseen ship, or place you under her bows. The Nevada was the giving-way ship. Can not ships in like case be plainly and bluntly told that starboard helm is always wrong? The Courts in old times did not hesitate to say that the ship close-hauled on the port tack "must never put her helm a-lee." Are we moderns right in forsaking this old precision? Then what is to be said for the port helm of the Romano? She had the right "to keep her course," and was, indeed, compelled to keep it unless she apprehended "immediate danger," if the sound was on her port bow. The only danger from it would arise in the case that the ship sounding was crossing her bow from port to starboard, and starboard helm would then be proper. Does it not, then, inevitably follow the port helm is always wrong in such a case? And can we not say so with the same robust reliance on seamanship as our fathers displayed? The Court condemned both the Nevado and Romano, so that there can be no impropriety in using them as "frightful examples" of the ordinary errors which almost always preclude collision.—

I am, &c., P. H. C.

[We arrived at the conclusion from the evidence brought forward by Admiral Ryder, that the real cause of collisions in fogs is that some masters of merchant vessels systematically break the law, while others abide by it; but we did not assert that this was Admiral Ryder's view of the case. All is confusion worse confounded at sea in a fog, for even when the fog-signal is heard, the direction from whence the sound came will not appear to be the same to persons standing together. Hence, a ship starboards her helm when she ought to port or leave it alone, as in the case explained by "P. H. C." Were all ships to abide by the law as to moderate speed—say, four knots an hour—collisions would be greatly reduced in number in a fog.]

During the past week the Mariner has been launched in the presence of the Commander-in-Chief, Admiral Sir Houston Stewart, Rear-Admiral Curme, and, besides the Naval and Military officers stationed at the port, some 6,000 spectators, at Devonport, and the Calliope at Portsmouth. The Mariner belongs to the Acorn class of gun-vessel, and is sister-vessel to the Reindeer, launched from the same yard a few months back. Her length between perpendiculars is 167 ft., extreme breadth 32 ft., and mean draught 11 ft. 9 in., and she has a displacement of 950 tons, and engines of 850 horse-power. She differs from her sister-ships, however, in her armament, which will consist of eight 5-in. breech-loading guns mounted on Vavasseur carriages, the guns carried by the other gunboats numbering six only. Admirable arrangements were made on June 23 for the launch, and for the disposition of the spectators. Miss A. M. Wilson, daughter of Capt. Wilson, commanding the Impregnable, performed the christening ceremony. Lady Hornby, sister of the Commander-in-Chief, Admiral Sir Geoffrey Hornby, christened the Calliope, the bands of the Royal Marines playing "Rule, Britannia" as the ship glided into the water. Among those present were Admiral Sir G. P. Phipps and Lady and the Misses Hornby, Gen. Prince Edward of Saxe-Weimar, Gen. Sir G. and Lady Willis, Admiral Superintendent and Mrs. Herbert, Admiral Sir Lewis P. Jones, Admiral Chads, and a number of Naval and military officers and ladies. The Calliope is a larger vessel than the Wanderer, being a screw corvette, built of steel and iron, cased with wood, of 2,770 tons, and 3,000 horse-power. She was launched at Portsmouth on June 24, and belongs to the well-known C Class. Her dimensions are:—Length between perpendiculars, 235 ft.; extreme breadth, 44 ft. 6 in.; draught of water forward, 17 ft. 5 in.; aft, 19 ft. 11 in.; mean, 18 ft. 8 in. Her estimated speed is 13¾ knots, and she has stowage for 320 tons of coal. Complement of officers and men, 281. Her lines are graceful, and she embodies various improvements upon the preceding corvettes of this class. The actual weight of her hull is 1,471 tons, the equipment accounting for her total displacement. The transverse frames are formed of iron, but the rest of the material, such as the skin-plating, transverse and other bulkheads, longitudinals, &c., are steel. The stern and body posts and ram are of solid brass forgings, and the rudder is of oak. Water-tight cellular spaces are fitted, so that in the event of one being pierced by shell the others would remain intact, and thus preserve the buoyancy of the ship. Coffer dams are erected round the large hatchways to the engine-room, boilers, and stoke-holes, while the hatches themselves are protected by armour-shutters or bars, the result being that the spaces below are supposed to be completely protected from shell fire. The steel skin of the ship is cased in two thicknesses of wooden sheeting upon which the copper is fastened. The Calliope will carry 12 5-in. breech-loading guns, besides four 6-in breech-loaders fitted on sponsons, two of which are built aft, as well as two forward. The Calliope will thus command an all-round fire, and will have torpedo-equipments and machine-guns.

Lieut.-Gen. Lord Chelmsford presided on the 20th inst. at the 29th anniversary meeting of the Soldiers' Daughters' Home, Hampstead, in the grounds of the Institution. In March last there were 187 girls in the Home. Thirty-six had been admitted during the year, of whom two were orphans, 28 were fatherless, and four motherless, and two had both parents living. Unfortunately, there had been a diminution in the funds—in donations to the amount of £250, and in subscriptions £67, and stock of the value of £500 had been sold out. The balance-sheet showed a total income of £4,962, and an expenditure of £4,701. Lord Chelmsford spoke of the fatherly care which Major-Gen. Boileau bestowed upon the inmates, and had the satisfaction of finding that his remarks were received with loud applause. The report was adopted.

ACTIVE SERVICE cannot wear out the teeth that are brushed night and morning with ROWLAND'S ODONTO, the purest and most fragrant dentifrice ever made. All dentists allow that neither washes nor pastes are as efficacious for polishing the teeth and keeping them sound and white as a pure and non-gritty tooth-powder; such ROWLAND'S ODONTO has always proved itself. Ask any dealer in perfumery for ROWLAND'S ODONTO, and avoid spurious imitations, theirs being the only original and genuine Odonto.

The Army.

3RD DRAGOON GUARDS. The regiment is proceeding from Manchester to Colchester.

4TH DRAGOON GUARDS. Major Tynte will have charge of the ranges during the forthcoming Wimbledon Meeting.

5TH DRAGOON GUARDS is *en route* from York to Manchester, &c.

12TH LANCERS. Major E. Mansel-Pleydell has been granted leave from India to England for twelve months, on medical certificate.

20TH HUSSARS, on arrival in England from Ireland, will be stationed at York.

ROYAL ARTILLERY.

Gen. Selby (late Madras), died at Velmead, Crookham, Hants, on the 19th inst., aged 70. He entered the Army as a 2nd lieut. in the Madras Artillery in 1830, and was appointed a col. commandant in 1881.

Col. Barnes has been appointed to command the Royal Artillery in Egypt, with Brevet Major Slade as his brigade-major.

Lieut. C. C. Townsend, attached to the Punjab Frontier Force, has been appointed an Assist.-Supt. of Factories in India, from May 14, 1884.

Capt. A. M. Rawlins, R.H.A., has been appointed Superintendent of the Remount Depôt at Oosoor.

A distinguished service reward of £100 becomes vacant. by the succession of Gen. J. Turner, as a colonel-commandant.

No 8 Baty., Western Division, embarked at Cape Town on the 23rd ult. for Natal.

The two batteries left Okehampton on Saturday for Canterbury and Aldershot. A Baty. B Brig., from Dorchester (Major A. C. Brough), 9-pounder M.L., and H Baty. B Brig. (Major S. Burnell), 13-pounder M.L., arrived in the afternoon. Col. Burns is succeeded by Col. Martin, from Exeter, as second-in-command.

ROYAL ENGINEERS.

In notifying Lieut.-Gen. Walker's retirement from the Indian Public Works Department, which he has for some time past administered as Surveyor-General in India, and in which he has served for upwards of 30 years, Lord Ripon has officially placed on record "the sense which the Government of India entertains of Lieut.-Gen. Walker's long and distinguished services, especially in connection with the Great Trigonometrical Survey of India. That great work, planned in the first years of the century by Major Lambton, and prosecuted for many years with signal ability by Sir George Everest and Sir Andrew Waugh, was in 1861 confided to Gen. Walker's charge, and was in 1881 brought by him to a successful conclusion. This satisfactory result has been due in no small degree to the personal exertions and unflagging interest of Gen. Walker. Gen. Walker's geographical knowledge and scientific attainments have on many other occasions merited and obtained special recognition, and his administration of the Survey of India has been such as to maintain it in the high state of efficiency to which it had been brought by his distinguished predecessors."

The 17th Compy. has been ordered from Cairo to Suakim.

The 32nd Compy. embarked at Cape Town on the 23rd ult. for Natal.

GRENADIER GUARDS. Col. Colvile left England for the Soudan at four hours' notice last week. Lieut. the Hon. C. Colville is to act as Camp Adjt. at Wimbledon during the N.R.A. Meeting. The *Times* says:—"Col. the Earl of Sandwich is about to retire from the Grenadier Guards. His retirement will, however, cause no promotion, as Col. Crichton, who was supernumerary while holding the appointment of military secretary to Sir Arthur Borton at Malta, will be brought back upon the strength of the regiment as major, in the room of Lord Sandwich. Lieut.-Col. the Hon. William Carington is also on the eve of retiring from the Grenadier Guards."

1ST, OR ROYAL SCOTS. The 2nd Batn. will proceed by rail to-day from the Curragh to Dublin to embark for Glasgow, *en route* to Edinburgh.

7TH ROYAL FUSILIERS. Lieut. Barttelot has resigned his commission in the Egyptian Army. For the present, all vacancies in that force will be made up from those officers noted at the War Office for service in Egypt.

11TH REGIMENT. The officers, non-commissioned officers, and men of the 2nd Batn. of this regiment are about to erect a memorial brass tablet in Exeter Cathedral, to the memory of their comrades who died during the late Afghan Campaign. The tablet is 6 feet in length by 4 feet in height. In the centre are engraved the names of 2 officers and 139 non-commissioned officers and privates, surmounted by the regimental badge and the honours borne on the colours, and on each side a soldier of the regiment resting on his arms reversed. The inscription is as follows:—"This tablet is erected by the officers, non-commissioned officers, and men of the 2nd Batn. 11th (North Devon) Regt., in memory of their comrades, who died in the service of their country during the Afghan Campaign, 1880-81." The tablet is being executed by Messrs. Matthews and Hodgson, of Regent Street. We extract the following from Mr., Shadbolt's work on the Afghan Campaign, 1878-80:—"The 11th was the first regiment of European soldiers that had ever marched through Scinde and the Bolan Pass during the hottest season of the year. Notwithstanding the precautions taken, numerous cases of heat apoplexy and many deaths occurred. The battalion was composed principally of young soldiers who, when stationed at Poona during the previous year, had suffered considerably from fever, the effects of which many had not shaken off, but who, nevertheless, on hearing the news of the investment of Candahar, were eager to push on to its relief. The natural difficulties of a march through such a country at such a time of the year, the thermometer at several of the halting-places marking 111° and 112° at 9 o'clock in the morning, were overcome by the physical endurance of the men, but orders, counter-orders, and counter-marches, bad water at the camping grounds, half rations, quarter rations, and always bad rations between Quetta and Candahar, together with the lack of change of clothing for picket and night duties in a trying climate, laid the seeds of diarrhœa and dysentery, and eventually cost the regiment, which left Kurrachee on July 23, 1880, 715 strong, in deaths 2 officers and 139 men, and left head-quarters on January 1, 1881, with only 215 men available for duty." The following officers served with the battalion in the war :—Lieut.-Cols. Corrie, Smyth, and Green; Majors Street and Gibbons (invalided); Capts. Marriott, O'Brien, Kinder (invalided), Yale, Kelsall, Weigall (died); Lieuts. Park (Adjt.), Davies, Stanley (invalided), Briggs, Bishop (died), Phayre, Pirie, Light, Ellicombe (invalided), Harries (invalided); Qrmr. Evans (invalided); Capt. Andrews (Brig.-Major). Qrmr. Evans, 2nd Batn., is returning home from India to join the 4th Batn.

14th West Yorkshire Regiment. Lieut. Walker has ceased to be a probationer for the Indian S.C., having been granted leave to England from India.

15th East Yorkshire Regiment. Lieut. Priestley, 2nd Batn., is a candidate for the Indian S.C., and has been appointed to the 21st Bengal N.I., on probation.

17th Leicestershire Regiment. Col. Tompson, C.B., completes his period of service in command of the 1st Batn. on the 15th prox.

21st Royal Scots Fusiliers. Lieut. the Hon. A. G. Hardinge, 2nd Batn., has been appointed A.D.C. to the Governor of Bombay. The *Home News* says :—"Mrs. Gildea, whom the Queen has been graciously pleased to decorate with the Order of the Royal Red Cross, is the wife of Col. F. Gildea, A.D.C. This mark of royal recognition has been conferred on this amiable lady for her unremitting care of the sick and wounded during the well-known and protracted siege of Pretoria. All soldiers who defended this garrison, and who have the honour of knowing Mrs. Gildea, are thankful that one at least has been remembered, than whom none is more worthy."

35th Royal Sussex Regiment. The *Times* correspondent at Wady Halfa, Nile, writes on the 23rd inst. :—"We are delighted to hear that the Royal Sussex Regt. is coming up the river. It should, however, be sent, not to Assouan, but to Wady Halfa and Dongola." The regiment proceeded up the river on Tuesday for Assouan.

38th South Staffordshire Regiment. Lieut.-Col. Sir Norman Pringle, Bart., has been selected for the command of the 80th Regt.

39th Dorsetshire Regiment. Lieut.-Col. Smyth succeeds Col. Dixon in command, when the latter retires on the 2nd prox.

50th Royal West Kent Regiment. The *Pioneer* says :—"Lieut.-Col. Doran, who was passed over for the command of the battalion last November by the senior major, Lieut.-Col. Leach, has determined to retire, for which purpose he has obtained leave to England from Egypt. This was only what was expected, and what in nine cases out of ten officers so psased over regimentally are sure of doing, their position being untenable, as may be easily imagined. The question is, whether an officer having been promoted lieutenant-colonel without any proviso, it is justice to refuse him the command when the vacancy occurs. It cannot but be presumed that an officer so promoted is considered capable of upholding his rank and position under all circumstances. A second or junior lieutenant-colonel of a regiment or battalion, especially in this country, very often exercises command of his corps for six months at a time; if he is not considered capable of so doing permanently, he should certainly never be allowed to do so at any time; consequently, no officer should be promoted above the rank of major whose abilities are such that he is not considered by the authorities as fit for the position of commanding officer. It should be a *sine quâ non* that a major, being promoted lieutenant-colonel in a corps, is fit for commanding it. If he is not so considered, then he should be passed over, and not be allowed to block the way for those who are; the question of fit or unfit for the appointment of commanding officer should be decided when an officer is a major, and not after he has been promoted lieutenant-colonel."

58th Northamptonshire Regiment. Major Churchill is under orders to embark for Natal, to rejoin head-quarters, from staff employ. When we heard from Natal, the mounted company was *en route* from Cape Town, for service in Zululand.

60th King's Royal Rifle Corps. Lieut. Myers, 3rd Batn., has been appointed Extra A.D.C. to Lieut.-Gen. Stephenson, C.B., commanding the Army of Occupation in Egypt. Lieut. G. C. Kitson, 4th Batn., has been appointed A.D.C. to Major-Gen. Lyons at Aldershot. We (*Whitehall Review*) hear that the 2nd Batn. 60th Rifles, at present in garrison at Winchester, will shortly receive orders for Aldershot. They proceed to that station on being relieved by the 2nd Batn. Rifle Brigade from Ireland, and do not cross the Channel as has been stated.

69th Welsh Regiment. Major Aitchison is about to retire on pension. Capt. King leaves for the Cape in charge of the draft of the 1st Batn.

72nd Seaforth Highlanders. There is every probability of the regiment going to Glasgow when it leaves Parkhurst in the autumn.

77th Middlesex Regiment. Lieuts. Thornton and Cockeran are candidates for the Indian S.C., and have been appointed to the 11th Bengal N.I., on probation.

78th Seaforth Highlanders. Major Grant has an extension of leave to remain in England from India until Oct. 24.

80th South Staffordshire Regiment. Col. Tucker, C.B., completes his period of service in command of the regt. on the 9th prox.

81st North Lancashire Regiment. Lieut. Smith, a probationer, attached to the 12th Bengal Cavalry, is about to be admitted to the Bengal S.C., from Aug. 22, 1882.

82nd South Lancashire Regiment. The *Pioneer* says :—"The retirement of Major W. Marsden, of the South Lancashire Regiment, the 1st Batn. of which is at resent at Peshawur and Cherat, on retired pay, will not give any promotion, as that officer was on the Seconded List on the date of his retirement. Major Marsden, who had only 20 years' service, first served in the 87th Regt., obtaining his company therein in five and a half years. He exchanged in Nov. 1869, into the 100th Regt., and joined the 82nd in March, 1871. Major Marsden, whose *forte* was musketry, had been employed in the staff of that department from March 1, 1874, till his retirement, at which time he was deputy-assist.-adjt.-gen. at the School of Musketry, Hythe, to which he was appointed on Jan. 1, 1880." At the Garrison Chapel, Devonport, on Sunday morning, the Rev. T. Coney, M.A., chaplain to the forces, made allusion to the departure of the regiment. Mr. Coney said :—"You can well imagine what my feelings must be on parting with a regimen with which I have been so closely connected for nearly three years. It does not often fall to the lot of an army chaplain, with the constant moves which the necessities of public service require, to be called on to minister in holy things to one body of men for quite so long a period as has marked the time since the South Lancashire Regt. first took up their quarters in the Western District. In looking back over the time that has passed, perhaps I shall not be deemed presumptuous if I venture to congratulate you on the good order and discipline which have very generally prevailed in your ranks, and to assure you that the inhabitants of the town are very sorry to part with you." The following district order was issued on Tuesday from the Assistant-Adjutant-General's Office, Devonport:—"The General Officer commanding the Western District desires to express to Lieut.-Col. Lock his sense of the excellent discipline which has prevailed in the 2nd Batn. South Lancashire Regt. during the lengthened period in which it has been quartered in this garrison. Composed of young soldiers, as must always be the case with battalions at home which have their linked battalions in India, the 2nd Batn. South Lancashire Regt. has shown that this fact is perfectly compatible with steadiness in drill, soldier-like bearing, and, above all, with a high standard of discipline. In placing upon record his sense of the good-conduct of this battalion, the Major-General desires also to convey to Lieut.-Col. Lock, the officers, non-commissioned officers, and men of the regiment, on their departure for foreign service, his good wishes for their future." A district court-martial assembled at Government House, Mount Wise, on Monday, for the trial of Colour-Serjt. W. Powner, on charges of fraudulent falsification of accounts and embezzlement. Lieut. Sumner prosecuted, and the prisoner pleaded guilty. The summary of evidence was read, and stated that the pay-sheet and ledger of B Compy., kept by the prisoner for the month of May, was examined by Lieut. Sumner, who found several alterations in the figures, and that the totals had been erased and others substituted to cover a deficit of £6 on an amount of £26. Prisoner's testimonials, extending over a considerable portion of his service, were read, and described him as a well-conducted, trustworthy, sober, and efficient non-commissioned officer. The *Liverpool Courier* says :—"The 2nd Batn. South Lancashire Regt., better known by its old number, the 82nd, which has had such a long spell of home service, and been 'under orders' for Egypt, Gibraltar, &c., has now been ordered to South Africa. A number of Liverpool men, including several from the Volunteers, are serving in this battalion. Col. Walters, Assist.-Adjt.-Gen. for Recruiting at Liverpool, formerly commanded the 82nd, and the following adjutants are supernumerary officers of the same, viz., Major Carr, 1st C.R.V.; Major M'Carthy O'Leary, 9th L.R.V.; Capt. Flood, 18th L.R.V.; and Major Ritchie, 3rd (Militia) Batn. of the regiment."

91st Argyll and Sutherland Highlanders. Lieut.-Col. Robley and head-quarters left Pietermaritzburg for Etchowe on May 24, on account of the disturbances in the Reserves in Zululand.

92nd Gordon Highlanders. The regiment proceeds from Edinburgh to Devonport.

93rd Argyll and Sutherland Highlanders proceed, according to present arrangements, from Glasgow to Parkhurst, I. of W., in the autumn.

103rd Royal Dublin Fusiliers. Capt. Cooper has arrived and taken over the duties of Adjt. of the 4th Batn. at Dublin.

Veterinary Department. Vet.-Surg. F. J. Short has been transferred from the 1st Hussars to the 3rd Madras Light Cavalry, and has been succeeded by Vet.-Surg. A. H. Waddell. 1st-class Vet.-Surg. I. Matthews has been appointed to the 17th Lancers. The death is announced from India of 1st Class Vet.-Surg. F. W. Going, attached to the 2nd Madras Light Cavalry. The deceased entered the Army, June 3, 1868, and became 1st Class, Aug. 27, 1882.

The Auxiliary Forces.

YEOMANRY CAVALRY.

Duke of Lancaster's Own Hussars. The *Liverpool Courier* says :—"The regiment assembled at Lancaster for annual training on the 18th inst. It consists of six troops, with an establishment of 374 of all ranks, and has not many vacancies. The uniform is scarlet, with blue facings, black leather helmets, with white plumes. Some of the troops proceeded partly by rail, but the Blackburn troop marched to Lancaster."

Staffordshire. A court of inquiry, held by direction of the Secretary for War, was opened at Lichfield on Tuesday. Col. Knowles, C.B., A.A. and Q.M.G., presided, and the other members were :—Col. T. Phillips, commanding the 15th Regtl. District, York, and Col. Tucker, 2nd South Staffordshire Regt. The inquiry was conducted in private, and we have seen no report of the proceedings; but, meantime, some strong statements as to the misconduct of some of the corps have been allowed to appear in certain London papers. The late Lieut.-Col. Bromley-Devonport some time ago placed in the hands of Messrs. Chapman and Hall a complete work on sport, to be brought out in the autumn.

THE VOLUNTEERS.

2nd V.B. Royal Fusiliers. The regiment, under the command of Lieut.-Col. Routledge, will be inspected this evening in Hyde Park by Gen. Lord Wolseley, its hon. col.

The new Volunteer regulations have been issued, and, as we have already stated, the changes since 1881 are not numerous. The rule as to saluting officers is the same as in the books of 1878 and 1881. The examination in tactics is one of the new features. There are some changes in rules as to uniform.

The following detail has been issued as to the forthcoming Wimbledon meeting :—Major Tynte, 4th Dragoon Guards, to have charge of ranges; Lieut. Hon. C. Colville, Grenadier Guards, to be camp adjutant; Capt. R. Boyd, R.E., to have the command of Royal Engineers; Deputy-Assist.-Comy.-Gen. Mulcahy to have the command of the Commissariat.

RECENT ADMIRALTY CIRCULARS.

LIEUTENANTS, R.N.

The Admiralty have issued a Circular directing that, from and after April 1, 1884, every lieutenant serving in her Majesty's Navy of ten years' seniority in his rank, who has completed seven years' service in that rank, three of which must have been in a ship-of-war at sea, is to be paid at the rate of 12s. a day when on full pay, exclusive of any allowances to which he may be entitled for special duties. When on half-pay he will receive 8s. 6d. a day pay. The highest pay to which a lieutenant can attain is, therefore, that of 17s. 8d. a day, or £322 8s. 4d. a year, when of ten years' service under the above conditions, and employed as transport agent, but this includes an allowance for a servant.

PETTY OFFICERS, R.N.

The Admiralty have issued a Circular directing that certain additions shall be made from and after April 1, 1884, to the pay and allowances of chief and other petty officers, seaman class, and establishing the rating of Armourer's Mate, with pay of 2s. 8d. a day. The same is to be a 2nd-class petty officer's rating, and for continuous-service men only, and those holding it will be eligible for good-conduct badges and the good-conduct medal and gratuity. The liberality of the Admiralty in their dealing with the petty officers has not been great. Chief petty officers of less than three years' service in that rating get an increase of just 1d. a day, and after that of 5d. a day, if continuous-service men; no increase being made to non-continuous-service men, it appears. First-class petty officers have now to serve four years on 2s. 2d., non-continuous service men remaining at 1s. 11d. After four years' service, the pay of continuous-service men will be 2s. 5d. a day. Second-class petty officers are to receive 2s. a day instead of 1s. 11d. as heretofore, non-continuous-service men receiving 1s. 8d. A 2nd-class signalman having served three years in that rating, will, in passing an examination, be noted as "Qualified for Signalman" (Q.S.), and be granted an allowance of 2d. a day, to be retained by him when advanced to any higher rating. Men holding the ratings of chief yeoman of signals, yeoman of signals, and signalman will be considered as having qualified, and will receive the increase of pay from the day named. Men incapable of performing their duties efficiently, however, will, on receipt of the circular, be reported to the Commander-in-Chief of the station, who may order the rating to be changed to one other for which the man is qualified. The rating of yeoman of signals is not to be conferred on any man unless he has passed for Q.S., or is entitled to the letters from holding the rating when this Circular came into effect. A chief yeoman of signals requalifying as trained man is to be examined only in cutlass, rifle, and pistol exercises. Continuous-service men, after having completed their first term of 10 years, receive another addition to their pay of 2d. a day.

NAVAL AND GREENWICH HOSPITAL PENSIONS.

The Admiralty have issued a Circular, under the authority of the Order in Council of May 9, 1884, dealing with the Naval and Greenwich Hospital Pensions. The total sum hitherto expended on these pensions for commissioned officers will not be diminished, but two Greenwich Hospital Pensions of £35 a year have been established each for chief gunners, boatswains, and carpenters, who cease to be eligible in future for Warrant Officers' Pensions of £26 a year. These pensions are now increased in number for gunners, from five to 16; for boatswains, from six to sixteen; for carpenters, from four to nine. The Coastguard also come in for three pensions of £25 a year for pensioned chief officers, senior mates of such vessels, and chief officers of stations; but any such officer who has been granted civil superannuation will be ineligible for a pension.

Thomas W. Smith, ship's corporal, 1st class, of the Hecla; J. Browning, captain forecastle, of the Achilles; Edward Henry Gale, master-at-arms, of the Assistance; William White, petty officer, 1st class, of the Vernon; William Doling, painter, 1st class, of the Victoria and Albert; Thomas Henry Tidby, coxswain, 2nd class, of the Excellent; John Reader, sick-berth attendant, of the Royal Adelaide; John Thomas, quartermaster, of the Cambridge; James Johnson, bandsman, of the Royal Adelaide; John Hambly, second captain maintop, of the Cambridge; Benjamin Rowe, tailor, of the Impregnable; Giles John Willing, gunner's mate, of the Ganges; William Locke, ship's corporal, 1st class, of the President; William Delicate, coxswain, 1st class, of the Nelson; and William Henry Turpin, carpenter's mate (skilled), of the Woodlark, have been awarded the medal for long service and good conduct.

Experiments will shortly be carried out with an electric waggon. This waggon was exhibited at the Vienna Electrical Exhibition, where illustrations of its mode of working were given on a mimic battle-field. It is highly spoken of by the German Military authorities.

"Health Exhibition."—"Visitors should not fail to view the fine exhibit of Messrs. Rose and Co., London, of their Lime Juice Cordial and other Lime Juice beverages, at Stand No. 116, in main transept. The exhibit includes a fine display of the Jamaica Lime Fruit from which these delicious non-alcoholic beverages are made. Their Lime Juice Cordial supplies a most refreshing summer drink in water, effervescing in all aerated waters. No beverage has received higher recommendation from the medical profession as eminently wholesome."—See *Lancet*. No table should be without it. The Wholesale Stores are 11 Curtain Road, Finsbury.

IMPORTANT to NAVAL and MILITARY MEN.

THE MUTUAL LIFE ASSURANCE SOCIETY.

(*Established* 1834.)

No EXTRA PREMIUM for Climate or War Risk is Charged after the Policy has been Five Years in force, and the Life Assured is aged Thirty.

Army & Navy Gazette.

LONDON, SATURDAY, JUNE 28, 1884.

THE Government has decided that any expeditionary force that may be needed for the relief of Khartoum shall take the route from Suakim to Berber. We have great misgivings with regard to this decision, nay, convictions—the nature of which our readers, who remember the reasons we assigned in previous articles for our preference for the Nile route, will not require us to specify—that the Government are wrongly advised, but we presume that the advantages which it is supposed the making of a railway from Suakim to Berber on the Nile will secure for trade have had some influence in the minds of the authorities in determining their choice, and that in addition to the attractions of sea transport for troops, stores, &c., to Suakim, there is the ulterior object of direct communication with Equatorial Africa in view. We suppose, too, that the Naval officers who have gone as far as Wady Halfa have been impressed with the difficulties to be encountered at the First and Second Cataracts, but it is to be hoped they made allowances for the time of year and the state of the river, and that they took into account the diminution of risk and difficulties which the rising of the Nile will effect. There can be no question that the Cataracts and rapids are troublesome, and that they would create delays; but any officer who, like Lord Wolseley, has seen portages in North America, would not regard these as insuperable, or even serious. Then, again, the river route is long,—very long. But it *is* the river. There is "water, water everywhere" along it, and all of the water is fit to drink. There are innumerable boats exactly suited for navigation with large loads upon the Nile. There is food, vegetables, cattle, goats, sheep, poultry, corn, and all sorts labour to be had along the banks. Unless the expedition sails from England or the Mediterranean in ships so completely equipped that the vessels can pass through the Canal without stopping or breaking bulk, there will be a combination of land-and-water carriage for men and stores, and at least two embarkations and disembarkations to be effected before the march from Suakim to Berber can be commenced. And then an immense number of camels must be collected, and also supplies of food for them, at Suakim, as the desert furnishes only a small quantity of camel forage and water. Caravans have to be reduced, and have to pass along the route with intervals, to allow the wells to fill and the grass herbage to crop out again, between each other. A railroad for the carriage of men, ammunition, and provisions could not be laid in less than four months, if it be intended to be a permanent work.

The Prince of Wales will hold levées at St. James's Palace, on Monday, the 7th, and on Monday, the 14th of July next, at 2 o'clock.

The following lectures are arranged to be delivered at the Royal United Service Institution, viz.:—Wednesday, July 2, Major F. Graves, 20th Hussars, on "The Functions of Cavalry in Modern War," Part I. Friday, July 4, Captain the Right Hon. Lord Charles D. Beresford, R.N., on "Machine-guns in the Field." Wednesday, July 9, Major F. Graves, 20th Hussars, on "The Functions of Cavalry in Modern War," Part II. The lecture will begin each day at 3 o'clock.

The impecuniosity of the War Office is, it is understood, the cause of the delay in relieving the batteries of Artillery, which have now been stationed at Bermuda between three and four years.

Colonel Bromley-Davenport, having been supernumerary, no appointment will be made to the list of Yeomanry Aides-de-Camp consequent on his death.

We notice that the new regulations as to voluntary retirements appear in the Army Circulars under the heading "Finance." But how the results will in any way affect "finance" we altogether fail to see. If the Financial Secretary thinks that by the new scheme he will stop voluntary retirements, and so save money to the public, we fear that he will be woefully disappointed. Compulsory retirement has been instituted to facilitate the flow of promotion, but compulsion of any sort is always distasteful. Hitherto compulsory retirements in the rank of major and captain have been comparatively few, being always relieved by the free use of voluntary retirement. The stoppage of voluntary retirement, therefore, would simply mean the increase of compulsory retirement; and as the new regulations, as they now stand, will not prevent voluntary retirement, we cannot at all understand the object of their issue, except as an introduction to a system of promotion throughout the Army from one general list. If this be so, it is a step which cannot be too soon or too strongly condemned. It is important that the men should know the officers under whom they serve, and it would be unwise in the extreme to initiate a system which, especially with the very short-service system now in vogue, would prevent the men from knowing from month to month either who would be their commanding officer, company officer, or even their subaltern officer during the next month.

Lieutenant-Colonel FitzGeorge, half-pay, 20th Hussars, has taken up his appointment as Aide-de-Camp to the Field-Marshal Commanding-in-Chief.

We understand that Lieutenant-General Sir Beauchamp Walker will retain his appointment as Director of Military Education until January next. General Walker attains the age of 67 in October.

We learn from India that General Sir Henry Ramsay has vacated his appointment as Commissioner of Kumaon. He is succeeded by Mr. H. E. Ross, of the Civil Service.

The *Bulletin de la Réunion*, in continuation of the interesting studies of the fortifications of the principal States of Europe, begins a paper on those of England and Ireland, from the perusal of the first part of which we rise with feelings of great satisfaction. It is pleasant to learn that Inverness is defended by "the solid forts," "Georges" and the "Fort Rose;" and that ancient forts, "Augustus" and "William," protect the Caledonian Canal; that Edinburgh possesses the ancient Castle of Holyrood and "Edinburgh Castle, with vast barracks;" that Berwick is defended by "batteries," and that works have been commenced to defend the Firth of Forth; that Sunderland is defended by "batteries," and that Hartlepool has an accessible port defended by dykes and ancient fortifications; that Filey is to be soon a Military and Naval port of the first order; that the estuary of the Humber is defended by Kingston-on-Hull, the Citadel, Fort Paull, a fort at Halton, and one at Immingham; that Great Yarmouth is defended by "many batteries;" that three great forts are to be erected at Lowestoft, Waveney, one at Pakefield, another at Gunton Denes, the third a little inland; and that Harwich is defended by the "gros fort de Landguard," not to speak of other important works. The accounts of the defences of the Thames, Sheerness, and Chatham would scarcely be accepted as exact by the engineers; but as "buggaboo" creations of the first order, we hail them with effusion, and hope the readers of our excellent contemporary believe in them all implicitly.

Another vacancy is about to be created on the Staff of the Intelligence Department, Major Reynolds returning to regimental duty after August 13.

Captain C. E. Warde, 4th Hussars, has been appointed Aide-de-Camp to Major-General L. E. Knight, commanding the Belfast District.

The French are experiencing in Tonquin the truth of the simple saying of a Brother Jonathan friend of ours, who said, in reference to our Cape trouble, "Wall, sir! if you Britishers will go 'Empire-ing it' all over the world, you must expect to get considerable surprises, and pay pretty handsome for your fun, I guess." If the accounts be true that Hanoi has been attacked by Chinese regulars, war or immense compensation for the breach of treaty must be the result.

The reward Lord Doneraile has received for presuming to live on his estates in Ireland, and to do his duty as a landlord, is a "sentence of death." The many officers who have hunted with the Duhallow in their best days, and who know what Lord Doneraile did for sport, will appreciate this sort of "gratitude." Lord Castletown, who went out as a volunteer with his old regiment, and served throughout the last campaign with the Household Brigade, is married to Lord Doneraile's only daughter.

Gordon is still "under a cloud" at Khartoum. Even Mr. Ashmead-Bartlett has ceased to trouble himself or the Government about him. But there is a refreshing and possibly truthful rumour that he has been harrying the Mahdi's people with his gunboats, and the rising Nile will enable him to extend his operations in that way, and impede the Soudanese in their march to freedom.

The Royal Engineers have begun a course of torpedo experiments and practice in the mouth of Queenstown Harbour. The operations will be carried out under Lieutenant Tyler, R.E., and will last about three months. It is becoming evident to our Engineers and Artillerists that the Forts, Camden and Carlisle, at the inner end of the entrance to Queenstown Harbour, although of great strength, are quite unable to defend Haulbowline Dockyard; and that if an ironclad chose to lie outside, she might shell the Dockyard and the fleet of merchantmen in the Harbour with but little danger to herself. It is also evident that, if a swift vessel chose to attempt to enter the Harbour, the chance of her being hit by a shot from the heavy guns in the forts would not be sufficient to deter a vigorous enemy. Hence the necessity for a complete system of torpedo defence.

Colonel H. Le Cocq, commanding Artillery at Halifax, N.S., will succeed Colonel Williams in September in command of the Horse Artillery in Dublin.

Colonel Holdsworth, R.A., has been selected for the command of the Artillery at Gibraltar, vice Colonel Markham.

With questions of confidence and votes of censure we have nothing to do; but the consequences of them involving both services in professional duties of the gravest character cannot be regarded with indifference by the Navy or the Army. It will not be too much to say that if the agreement arrived at between France and England shall be disapproved of, and the Conference end in a fiasco, the chances of maintaining peace in the East for any very long time are seriously diminished. It would be impossible to forecast the complications that might arise from the declaration of a policy with regard to Egypt, on the part of this country, which would need the utmost exertion of our Naval and Military power to maintain in the face of Europe. It is not true that England has received *carte blanche* from Europe, meaning by that word the Great Powers; nor is it correct, as is assumed, that the declaration of even a Protectorate, far less of an annexation pure and simple, would receive support, founded on advice, or an exchange of views, between the Court of St. James's and the Foreign Offices of the Great Powers. Unofficial remarks, no doubt, have passed, and it has been said that Germany, at least, would not be hostile to the outcome of a bold policy in Egyptian matters by England, whatever it might be; but without any disrespect to the great military Colossus at Berlin, who bestrides Central Europe from the Vistula to the Rhine, and from the Baltic to the Northern Alps, we may fairly suspect the disinterestedness of concession to a policy of aggression in Egypt, for which there is no doubt connivance might be expected with regard to larger schemes nearer home.

Lord Rosebery should turn his attention to Army reformation! He very nearly persuaded Lord Strathnairn to join him in an attempt to induce the House of Lords to reform itself, and there can be no doubt Lord Strathnairn would gladly associate himself with Lord Rosebery in an attempt to return to some of the customs of the good old times in military administration. When Lord Rosebery called on the cab-drivers last week to deplore the restrictive regulations which prevent such an officer as Sir F. Haines doing his duty in the field, he pointed out one of the sorriest of all devices for clearing out the ways of promotion; and when Sir F. Haines stood up, with his gallant front and vigorous soldierly bearing, to return thanks for the Army, the cab-drivers, who are not all in the prime of life, must have wondered what the "young ones" were like, if the gallant General was an obsolete veteran. But these things are accepted, and no one attempts to alter, though all deplore them!

Of course, if Colonel Chapman, Military Secretary to Sir Donald Stewart, sets up to be a severe critic of the German system, because he attended German manœuvres (and did not think they were perfect), he is welcome to be so; but if he is such a very superficial person as to think the Reserves are the real strength of the German Army, the sooner he is put on a double allowance of pens and ink, the better. The "Reserves" had nothing to do with the successes of the first line of the German Army at Sadowa or Königgrätz in 1866, or at Sedan and Metz in 1870-1, any more than they had with the victories at Leipsic or at Waterloo. For a long war, the Reserves are indeed valuable; but it is the excellence of the first line of the German Army, and the perfection of all the mobilisation arrangements, which render the German Army a veritable *fulmen belli* at the outset.

A propos of the election of Sir F. FitzWygram to Parliament and the activity of Major-General Fraser at Aldershot, it is worth while to ask how the duties of Inspector-General of Cavalry can be efficiently fulfilled by an officer whose whole time ought to be taken up with his tactical work and drill as well as with the other very important matters devolving upon him at Aldershot? It seems very strange that there should be no Cavalry officer at the War Office in the position formerly filled by an Inspector-General or something like it. In no other Army, we venture to say, would such a strange combination as that of Inspector-General of Cavalry for the United Kingdom and Major-General of Cavalry at Aldershot be possible. Cavalry officers are quite enough out of the running in the matter of Staff appointments, especially since the Home District command, originally devised for the employment of the late Lord Rokeby, has been treated as an exclusive Guards command, although there are no less than four Cavalry regiments in the district. There was some reason in giving the command to Guards officers as long as there were victims to the tune of £8,000 and more among them in consequence of the changes in our system; but Major-General Gipps, the present holder, is, we believe, the last of these eligible under those conditions, and it really seems only reasonable that a Cavalry Major-General should have a turn now and then in command of the Home District.

The following question was set at the recent military competitive examination. The question has been since submitted to six passed Staff College men, and strange to say three answered it one way, three in another:—"12. On January 1, 1883, a soldier was sentenced by court-martial 'to be imprisoned with hard labour for six calendar months;' on January 2, while still in the guard-room, he committed a fresh military offence, for which he was again tried by court-martial on January 8, and sentenced 'to be imprisoned with hard labour for 112 days.' Make comments on this case. When will his punishment expire?" This question somewhat resembles one which was put a long time ago to an officer who was passing his examination for his company,—"What foot," he was asked, "does a soldier step off with when closing to a flank by the side step?" The officer under examination replied in plain but rather unmilitary language,—"That depends on the side you want to go to." The occasion for this question surely could not arise, for in the second sentence it should have been clearly stated whether the second sentence was to commence from the expiration of the former sentence or not. To judge, however, of a young man's military capacity by his ability to dispose of such miserable quibbles, is a proof rather of the incapacity of those who set the paper than the intelligence or knowledge of those to be examined.

The Navy.

ADMIRALTY, June 23, 1884.

Royal Marine Light Infantry.—The promotion of Lieut. F. E. Hast to be Capt., notified in the *London Gazette* of June 17, 1884, has been antedated to May 17, 1884, the date on which Capt. Morgan was placed on half-pay; Lieut. T. J. P. Evans to be Capt., vice Crosbie (May 28).

ADMIRALTY, June 24, 1884.

In accordance with the provisions of her Majesty's Order in Council of Feb. 22, 1870, Chaplain and Naval Instructor the Rev. W. French, B.A., has been placed on the Retired List of his rank (June 24).

ADMIRALTY, June 25, 1884.

Fleet Surg. E. T. Mortimer has been promoted to the rank of Deputy-Inspector-Gen. of Hospitals and Fleets in her Majesty's Fleet (June 11).

APPOINTMENTS.

Captain—Henry F. Nicholson, to the Asia.

Commanders—Arthur C. B. Bromley, to the Swift; Burges Watson, to the St. Vincent; Arnold J. Errington, to the Humber.

Lieutenants—Henry B. Wroughton, to the Vigilant; Thomas F. C. Dundas, to the Sultan; John A. Colwell, to the Alexandra, additional, as transport officer at Suez; Reginald H. S. Bacon, to the Cruiser; Ernest L. Austen, to the Woodlark; James P. Montgomery, to the Cockatrice; Tom B. Triggs, Frederick A. Warden, and Edward L. Lowdell, to the Swift; George H. King and William L. Down, to the Wasp; Arthur J. Loane, to the Serapis, for the Swift; Thomas F. Pullen, to the Indus; William H. Coombs, to the Superb; James de C. Hamilton, to the Ganges.

Sub-Lieutenants—Arthur H. Christian, to the Vigilant; Arthur H. Faithfull (act.), to the Hector; Francis W. Kennedy, to the Alecto.

Staff Surgeon—John Wood, to the Swift.

Chief Engineers—Thomas Hughes, to the Swift; Edward Norrington, to the Vigilant.

Surgeons—John Acheson, to the Jackal; Richard E. Biddulph, to the Vigilant; William M. Craig, to the Alecto.

Paymaster—William J. Nash, to the Swift.

Assistant-Paymasters—Edgar V. Sharpe, to the Vigilant; Colville D. W. Kiddle, to the Alecto; Harry W. Braddon, to the Duncan; Frederick C. Good, to the Royal Adelaide; Henry S. Baskerville, to the St. Vincent.

Engineers—Thomas Green, to the Asia, additional, for the Rupert; William A. Ellis, to the Indus (supernumerary); Daniel Griffin, to the Alecto.

Assistant-Engineers—Henry J. Oran, to the President, additional; Henry A. Evans, to the Vigilant; Walter J. Graham, to the Alecto.

Assistant-Clerks—Charles F. Pollard, Alfred W. Claxton, and Frederick Belling, to the Royal Adelaide, additional; Joseph L. Ferris, to the Duke of Wellington, additional.

Gunner—James Allen (act.), to the Swift.

Boatswains—Alexander Johnston, to the Vigilant; John Westrope, to the Turquoise; Cornelius Duggan, to the Alexandra; Richard Smith (b.), to the Tenedos; John Callaghan, to the Wye.

Coastguard.

Chief Officer—Thomas Longford, to the Valiant, additional.

Surgeon and Agent—Mr. Charles S. Heap, at Swanage.

Chief Boatman—Thomas Cobbledick, Cairn Ryan, to be chief boatman-in-charge at Port Patrick, vice Hewitt, removed.

Alexandra, Capt. Rawson, was at Port Said on June 24 waiting the Commander-in-Chief's return from Suakim.

Amethyst, Capt. Brent, was at Monte Video on June 21, would leave July 1; the Pelican left on June 24 for Pacific Station; the Kingfisher arrived on June 21, and would leave on June 28 for England.

Arab, Com. Stopford, was at Aden on June 10. The Woodlark left Aden on June 3 for Massowah.

Assistance, Capt. St. Clair, arrived at Dover on June 22.

Audacious, Capt. Hugo Pearson, flagship of Vice-Admiral Sir William Dowell, was at Amoy on May 5, and would proceed to Foochow, Kelung, Chusan, Woosung, arriving about May 25, thence to Chinkiang (subsequent report, was at Shanghai on June 5). The Flying Fish arrived at Amoy on May 3, having completed survey of Haitan Straits, to give leave; she will sail for the Corea, to examine the coast and off-lying islands. The Champion was at Hong Kong, in dockyard hands, refitting; she would be ready for sea about June 15, and was then to be stationed at Amoy. The Daring was at Canton on May 1; would be relieved temporarily by the Tweed about the middle of May, and go to Hong Kong to give leave to crew, returning to Canton about the end of May. The Swift was at Amoy; would proceed to Formosa about May 16, and return to Amoy. The Linnet was at Gulf of Tonquin; arrived at Pakhoi on April 22; to remain in Gulf of Tonquin until arrival of Zephyr, and then proceed to Hong Kong. The Vigilant was at Hong Kong on May 1; would join flag at Amoy with mails due at Hong Kong early in May; will take Commander-in-Chief to Swatow, Foochow, Tamsui, and Kelung. The Foxhound was at Foochow on April 14; when relieved by the Merlin, about the middle of May, is to proceed to Hong Kong to complete, and thence to Singapore, to take the place of the Zephyr. The Merlin was at Kong Kong on May 1; would relieve Foxhound about the middle of May. The Cleopatra left Shanghai on April 21 for the Corea, with H.M.'s Minister at Peking; would return to Shanghai at conclusion of mission, and resume duties of senior officer. The Curacoa was at Shanghai on April 24; remains as senior officer in the absence of the Cleopatra. The Fly was at Shanghai on April 24; would visit Ningpo, and then be available for general service. The Albatross was at Yang-tse-kiang, Chinkiang, on April 23; left Shanghai on April 21, under orders to visit Chinkiang, Wuhu, Kinkiang, and Hankow, and was to remain at the latter port, relieving the Espoir. The Cockchafer was at Chefoo on April 12, and would leave for Newchwang on April 13; she is ordered by senior officer to return to Chefoo, and convey H.M.'s Minister's escort and baggage to the Corea. The Espoir was at Yang-tse-kiang, Hankow, on April 21, and was to be relieved by the Albatross. The Sapphire, senior officer in Japan, was at Yokohama on April 3, and would remain in the neighbourhood. The Pegasus was in the Straits of Malacca on May 2, and left Singapore for Acheen, with provisions for the Nisero. The Zephyr was at Bangkok on April 4; she was to return to Singapore about the end of April, and was to proceed about the second week in June to the Gulf of Tonquin, to relieve the Linnet. The Midge was at Tientsin on April 20, and would remain.

Bullfrog, Lieut. and Com. Papillon, would leave Bermuda for Jamaica on June 17.

Cambridge. Capt. Bosanquet and the ward-room officers gave an afternoon dance on board last Saturday. The upper and main decks were used for the dance, and the large space on the upper deck was prettily laid out with flowers and evergreens, and lined with flags. On the main deck, in addition to the decorations, there were two Whitehead torpedoes, which had an exceedingly good effect, and showed off the decorations and guns to advantage. There was also an electrical table with different novelties on view, under the direction of Mr. Dantis, torpedo-gunner of the Cambridge. The string band of the Royal Adelaide, under the direction of Mr. Binding, was in attendance. Among the guests were the Earl of Mount Edgcumbe, Lord Valletort, Ladies Alberta and Edith Edgcumbe, Admiral Sir W. Houston, Lady and Miss Stewart, Major-Gen. and Mrs. Sayer, Admiral-Superintendent and Mrs. Curme, Col. Sir W. and Lady Hamilton, Lieut.-Col. Anderson, Capt. and Mrs. Allington, Major and Mrs. Armstrong, Mr., Mrs., and Misses Arthur, Miss Ashford, Com. W. N. Annesly, Mr. J., Mrs., and Misses Angear, and Staff of Admiral's office, Col. Blankley, R.M.L.I., Mrs. Bosanquet, Mrs. Brooke, Major and Mrs. Brownrigg, Col. and Mrs. Butler, Mr. and Mrs. Beaton, and many others.

Carysfort, Capt. Stewart, was at Malta on June 16.

Condor, Com. Domville, remains at Port Said.

Cruiser, Com. Darwin, left Gibraltar for Malta on June 21.

Cygnet, Lieut. and Com. Jauncey, was at Malta on June 16 awaiting the arrival of her new commanding officer, Lieut. Alexander M. Gardiner, when she would proceed to Port Said.

Dolphin, Com. Eardley-Wilmot, fitting out at Sheerness to relieve the Express on the Mediterranean station, was put out of basin on June 21. She was inspected by the Commander-in-Chief at the Nore on Thursday, and left that afternoon for Suakim.

Dwarf, Lieut. and Com. Millett, tender to the Defence, left Portsmouth on June 21.

Falcon, Com. Pringle, arrived at Gibraltar on June 20.

Firebrand, Lieut. and Com. Dickson, was at St. Vincent on June 21, *en route* to China.

Foam, Lieut. and Com. Higgins, was paid off at Sheerness on June 24, after four years' commission on the North America and West Indies station.

Garnet, Capt. the Hon. Victor A. Montague, was to leave Barbados for Antigua, so as to arrive in English Harbour during the first week in July.

Griffon, Com. R. W. Davies, arrived at Barbados on May 31, would accompany the Garnet, leaving about June 30 for Antigua.

Inflexible, Capt. Seymour, left Corfu for Malta and Alexandria on June 23.

Invincible, Capt. Buckle, will remain at Alexandria until further orders.

Kestrel, Com. V. A. Tisdall (act.), left Malta for Gibraltar and Devonport on Wednesday.

Magpie, Com. the Hon. F. Vereker, arrived at Plymouth on Tuesday and steamed up the harbour on Wednesday. She was inspected on Thursday preparatory to paying off.

Osborne, Capt. Thompson, arrived at Copenhagen on June 24, and would leave for England June 25.

Sappho, Com. B. F. Clark, was under orders to be at Callao by June 7.

Satellite, Capt. Theobald, was at San Lorenzo on May 22, and was to remain there some time.

Seahorse, Staff Capt. Hoskin, attached to the Channel Squadron in lieu of despatch-boat, arrived at Queenstown on June 23 to coal. Will return to Berehaven.

Swiftsure, Capt. Aitchison, flagship of Rear-Admiral Lyons, with the Mutine, arrived at Honolulu on June 9, and would leave on June 21 for Esquimalt; the Sappho was at Coquimbo on May 9. Ordered to remain.

Temeraire, Capt. Domville, was at Malta on June 16.

Turquoise, Capt. Woodward, arrived at Spithead on Saturday last from Sheerness, *en route* to Madagascar and the East Indies station, and left for Gibraltar on June 24.

Wanderer, Com. Churchill, left Sheerness for Portsmouth on June 21, on her way to the China station to relieve the Fly, and left Spithead for Plymouth on June 23.

The Committee appointed to inquire into the building and repairing of her Majesty's ships by contract and in her Majesty's dockyards, assembled on Thursday for the purpose of receiving evidence from the Captain of the Medway Steam Reserve (Lord W. T. Kerr) and the Director of Navy Contracts. The following members were present:—The Earl of Ravensworth (chairman), Mr. Norwood, M.P., Mr. Palmer, M.P., Capt. Codrington, R.N., C.B., Mr. Samuda, Mr. Ismay, and Mr. F. H. Miller, secretary.

The *Illustrated Naval and Military Magazine* will make its *début* on July 1. It will be devoted to all subjects connected with her Majesty's land and sea forces. No. 1 will include articles by Admiral Sir George Elliot, Capt. Berkeley, Mr. Lynal Thomas, Col. Brackenbury, and Majors Hutton and Elliott; and the illustrations have been specially drawn by Messrs. Linley Sambourne, R. Caton Woodville, W. H. Overend, Rudolf Blind, and other prominent masters of the pencil.

DIMNESS of SIGHT.—Dimness of Sight and Blindness are often caused by the use of unsuitable Spectacles. Mr. H. Laurance, F.S.S., Oculist Optician, 1a Old Bond Street, scientifically adapts his improved Spectacles to strengthen and assist the weakest sights. Testimonials from Earl Lindsay, Sir Julius Benedict, F. D. Dixon Hartland, Esq., M.P., Thomas Cook, Esq., the well-known Tourist Agent, &c. Pamphlet, containing valuable suggestions, post free.

BOOKS, Etc., RECEIVED FOR REVIEW.

Biographies of Celebrities, by F. Banfield, M.A. (J. and R. Maxwell)—A Digest of English History, 1689-1760, by M. Gutteridge, B.A. (Relfe Brothers)—A Treatise on the Application of Wire to the Construction of Ordnance, by J. A. Longridge, M.I.C.E. (E. and F. N. Spon)—A Letter to H. M. Durand, C.S.I., from Major Evans Bell (Chatto and Windus)—Summer Days, the Holiday Number of Cassell's Magazine (Cassell and Co., Limited)—For Their Sakes (Chapman and Hall, Limited)—John Bull's Neighbour in Her True Light (Wyman and Sons)—Magazines for July:—Longman's Magazine (Longmans, Green, and Co.); The Cornhill Magazine (Smith, Elder, and Co.); The English Illustrated Magazine (Macmillan and Co.); Cassell's Publications (Cassell and Co., Limited); Blackwood's Magazine (W. Blackwood and Sons); The Argosy (R. Bentley and Son).

NOTICES TO CORRESPONDENTS, Etc.

Tom Claridge (Pretoria).—We are not aware of any instance of the V.C. being conferred, except in war time.

The Naval and Military Stations are published by the Army and Navy Gazette on the first Saturday in each month.

Many interesting communications, reviews and letters, &c., are unavoidably omitted, owing to want of space, this week.

The Army and Navy Gazette exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire*; *Bulletin de la Réunion des Officiers*; *L'Armée Française*; *L'Italia Militare*; *Rivista Europea*; *Rivista Militare*; *Memorial de Ingenieros*; *La France Militaire*; *Moniteur de la Flotte*; *Le Progrès Militaire*; *Der Veteran*; *Streffleur's Oesterreichische Militärische Zeitschrift*; *Jahrbücher für die Deutsche Armee und Marine*; *Militär Wochenblatt*; *Giornale d'Artiglieria e Genio*; *Organ der Militär-Wissenchaftlichen Vereine*; *Vedette*; *Deutsche Heeres Zeitung*; *Militärische Zeitschrift*; *Armeeblatt, Wien*; *Army and Navy Journal of New York*; *The American, Philadelphia*; *Revista Maritima Brazileira*; in addition to all the home and colonial professional periodicals and journals.

DEEP-SEA SOUNDING.

The question, "Where was the lead?" has repeatedly been asked in the columns of the *Army and Navy Gazette* when ships have been stranded from the mere want of precaution in obtaining a cast of the lead, but it has never been answered. In most cases the lead had been forgotten The true seaman, the careful navigator, never forgets his lead In narrow waters, and within the 100-fathom line, a ship can, in thick weather, be navigated by the lead, now that most parts of the world have been surveyed and charts carefully compiled. How, then, comes it that, on a ship nearing land, so needful a precaution as obtaining a cast of the lead should be so often forgotten? The reason is not far to seek. The old sounding gear necessitated the ship if sailing, being hove-to; and if steaming, having her engines stopped, to enable the deep-sea lead to be used. The hand lead is not of much use beyond the ten-fathom line, and as there is generally plenty of room between the ten and the five and three-fathom lines, navigators have far too often put off using the deep-sea lead, intending to send the men out into the chains when the shorter soundings had been reached. The ship, however, had over-run her reckoning, and before the hand-lead could be got out, she was within the breakers; in a moment or two more she had struck and was lost. Such is the history of nearly every catastrophe of this nature within our ken. To the question "why were no deep-sea soundings taken?" the true answer is always the same, "it was too much trouble to heave-to, or to stop the ship to use the deep-sea lead." This excuse, however, is no longer valid, since the invention by Sir William Thomson of his sounding machine, the advantages of which in peace and in war are set out in the following manner by Capt. Claude E. Buckle, R.N., in a paper recently read by Capt. Long, R.N., at the Royal United Service Institution. The advantages of Sir William Thomson's sounding machine are:—1st. Practically perfectly correct and reliable soundings in any weather, and in any sea. 2nd. Soundings at considerable depth can be obtained at a high speed. 3rd. That a ship need never be off her proper course for one minute for the purpose of obtaining soundings. 4th. That by running a line of soundings a ship's position can at all times be known with certainty, provided the charts are accurate. 5th. That by frequent use of this sounding machine in fogs, vessels can with much greater safety continue at a moderate speed, and greatly decrease the danger of collision in narrow waters. Capt. Buckle succeeded, through Admiral Mends, when Director of Transports, in having one of these instruments fitted to the Assistance; and notwithstanding the head-shaking and warnings of officers of experience, and the advice not to depend upon it, Capt. Buckle determined to give the invention a fair trial, and he soon found that he could get very good soundings by its means without stopping the ship. Capt. Buckle says:—"All the advantages that I have adduced in favour of Sir William Thomson's sounding machine in time of peace are doubled, nay, trebled, in time of war." He also gave many illustrations of his proposition.

THE BATTLE OF TRAFALGAR.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—Maclise, in his picture of "The Battle of Trafalgar," has introduced several attractive-looking women attending wounded sailors. Was it ever customary in our naval service for females to be carried upon ship's books, and even to remain for cruising? And if so, when has this custom originated, and why so? For in our time I believe females are not allowed ratings on board H.M.'s ships. Kindly furnish information upon this point in naval history?

Putney Bridge, June 18. Peter Lyons.

[No record exists of a woman having been on board the Victory during the battle. It was contrary to regulations then as now to carry women on board ships of the Navy. Had a woman been on board, she would certainly not have been allowed on the quarter-deck, but would have been sent to the Cockpit.—Ed. *A. & N. G.*]

A Delicious Cooling Drink is supplied in Rose's Lime Juice Cordial in water; effervescing in all the Mineral Waters. It is non-alcoholic, and highly medicinal, purifying the blood. Recommended by the *Lancet*, and Medical Profession. Sold everywhere. Purchasers should order Rose's Cordial. Wholesale Stores—11 Curtain Road, London; and Leith, N.B.

BIRTH.

MURRAY.—On June 20, at Hauteville, Guernsey, the wife of Captain H. Murray, Royal Munster Fusiliers, of a daughter.

DEATHS.

CHATTERTON.—On May 25, at his residence, Devonshire Place, Youghal, Thomas Justly Green Chatterton, Esq., late 35th Royal Sussex Regiment, son of the late Major Chatterton, Royal Welsh Fusiliers, grandson of the late General Sir William Green, Bart., K.C.B., Royal Engineers, Marass, Kent, and nephew of the late Sir Charles Holloway, K.C.B., Royal Engineers, and of the late Sir Justly Green, Bart.

HANNAY.—On the 21st inst., at Alphen Lodge, Sandown, Isle of Wight, aged 27, Kathleen, wife of Staff Commander Hugh H. Hannay, of H.M.S. Hector, and only daughter of Frederick T. Dod, Esq., of 14 Belmont Crescent, Glasgow, N.B.—Friends will please accept this intimation.

MORICE BEY MEMORIAL FUND.

Is raised at the instance of brother officers and friends and in the conviction that many Englishmen would gladly record their sense of recognition of acts of devotion and courage, which will cause the name of Morice Bey to be enrolled amongst the heroes of our country.

It is PROPOSED to ERECT a MEMORIAL TABLET, vesting the remainder of the Fund in Trustees for Major Morice's infant son.

Further List of Subscriptions, £68 4s 9d.

Subscriptions earnestly requested.

TREASURERS TO THE FUND,
Messrs. RIDGWAY and SONS,
ARMY AGENTS,
2 Waterloo Place, London,

To whom it is requested that all Contributions be sent.

ANY GENTLEMAN desirous of acquiring a Practical Knowledge of the Profession of an Auctioneer, with a view to commence business on his own account, may hear of a first-class opportunity by writing to "Z. A.," at HORNCASTLE'S, 61 Cheapside, London.

Now ready, price 2s 6d.

THE ILLUSTRATED NAVAL and MILITARY MAGAZINE.

A Monthly Journal devoted to all Subjects connected with her Majesty's Land and Sea Forces.

TABLE of CONTENTS.—No. I. JULY, 1884.

"SAVING THE GUNS AT MAIWAND." Frontispiece.
1. INTRODUCTORY. Illustrated by R. Caton Woodville.
2. OUR FUTURE NAVAL BATTLES and HOW to FIGHT THEM—
No. I. { LINE-OF-BATTLE SHIPS and TORPEDO VESSELS. By ADMIRAL SIR GEORGE ELLIOT, K.C.B.
SWIFT CRUISERS. By CAPTAIN H. BERKELEY, R.N. Illustrated by W. H. Overend.

THE MIDLAND COUNTIES WATCH COMPANY,

OF VYSE STREET, BIRMINGHAM.

Let every reader of this send for our beautiful, new, Illustrated Catalogue, containing 1,000 unsolicited Testimonials (from all parts of the world), and over 500 fine, copper-plate Engravings of Watches, Jewellery, and Electro-plate, sent gratis and post-free on application to any part of the World.

GENTLEMEN'S FINE SILVER, flat crystal glass, 25s.
LADIES' FINE SILVER, flat crystal glass, 25s.
YOUTH'S FINE SILVER, flat crystal glass, 25s.
LADIES' GOLD LEVERS, in exquisitely chased cases, 70s.
GENTLEMEN'S GOLD LEVERS, engine-turned cases, 80s.

A. J. Windebank, Esq., Chanda House, Fratton Street, Portsmouth, December 22, 1883:—"Watch, chain, and ring to hand. I am very much pleased with their appearance, the watch especially looking a very strong, handsome one, and equal to many I have seen at double the money."

Mr. H. A. Illingworth, 82 Queen Street, Batley, March 7, 1884:—"After four years' trial of one of your 25s. watches, I now desire to express my thanks for the same. During all the time I have had it I have not paid one halfpenny for repairs. It is as good to-day as ever. When I have shown it to my friends, they have valued it at double and frequently at treble the money. To those who wish to possess a cheap, good, everyday watch, I especially recommend the above."

These Watches are frequently sold for treble the money. Cheques or P.O. payable to

Mr. A. PERCY, VYSE STREET, BIRMINGHAM.

On receipt of which, any watch will be registered post free to any part of the United Kingdom, and for 2s 6d per watch extra to any part of the postal world.

Our Indian Agents are Messrs. King, King, and Co., Bombay, and Messrs. King, Hamilton, and Co. Calcutta, through whom remittances and orders may be sent, and catalogues obtained.

ROYAL UNITED SERVICE INSTITUTION.

LECTURE, WEDNESDAY, July 2. The Chair will be taken at 3 o'clock. Major FRANK GRAVES, 20th Hussars, on "The Functions of Cavalry in Modern War."—Part I.

LECTURE, FRIDAY, July 4. The Chair will be taken at 3 o'clock. Captain the Right Hon. Lord CHARLES D. BERESFORD, R.N., on "Machine-Guns in the Field."

To be followed by Discussions.

By Order of the Council,
BOUGHEY BURGESS, Captain,
Secretary.

ADMIRALTY,
MEDICAL DEPARTMENT OF THE NAVY,
44 Spring Gardens, S.W.
May 31, 1884.

AN EXAMINATION of CANDIDATES for COMMISSIONS, to fill TWENTY-FOUR VACANCIES in the MEDICAL DEPARTMENT of the ROYAL NAVY, will be HELD at the UNIVERSITY of LONDON, Burlington Gardens, by permission of the Senate, on MONDAY, August 11, 1884, and following days, at 10 o'clock. The Forms to be filled up by Candidates will be supplied on application to this Department.

JOHN W. REID, M.D.,
Director-General.

TO BANDSMEN.—WANTED, a few good CLARIONET PLAYERS, for the Liverpool Police Band. Candidates must not be over 29 years of age, nor less than 5ft. 8in. in height. Weekly pay, 26s 8d, rising to 29s 10d, with uniform.—Application, with testimonials (musical and otherwise), to the HEAD CONSTABLE, Dale Street, Liverpool.

INFANTRY CHARGER WANTED.—Handsome, steady with troops, and good fencer; age between 5 and 8; height about 15·1 or 15·2. Trial and veterinary examination required.—Address, Major WYNEN, Dorset Regiment, Junior United Service Club, Charles Street, S.W.

MEMBERS and HONORARY MEMBERS of the ROYAL NAVAL CLUB wishing to join the GOODWOOD LUNCH, Cup Day, July 31, are requested to communicate as soon as possible with the HONORARY SECRETARY, Goodwood Lunch, Royal Naval Club, Portsmouth.
June 25, 1884.

THE MOUNTED SERVICE BOOT.—PATENT.

As adopted by the Volunteer Mounted Infantry.

A COMPLETELY NEW and USEFUL INVENTION. By a CAVALRY OFFICER.

It is equally suitable for riding or walking, and consists of an upper and lower part, which, when adjusted by the peculiar arrangement of the spur, forms a complete riding boot, and at the same time the comfort of a boot and gaiter for walking is ensured. The lower part can be worn also as an ordinary walking boot. ECONOMY, COMFORT, and PORTABILITY.

Specially recommended to all Officers and Sportsmen going Abroad.

HENRY DUNKLEY,
MILITARY, HUNTING, SHOOTING, and FISHING BOOTMAKER, and
SOLE MANUFACTURER OF THE MOUNTED SERVICE BOOT,

All letters punctually attended to.

N.B.—Mr. Norton has always on hand a large stock of present Regulation Uniforms, equal to new, at very low prices.

HOLLOWAY'S PILLS.—Bilious complaints and irregularities of the system, produced by redundancy of vitiated bile, can always be corrected by a few doses of these estimable Pills, which are everywhere admired for their rare combination of mildness and power; for though they conquer with ease and rapidity the most obstinate disease, they never weaken the stomach or necessitate any interruption of ordinary duties or amusement. On the contrary, they increase the appetite, strengthen the organs of digestion, give increased energy and life to all the animal functions, and fit both hand and brain for fresh exertions. The sick and enfeebled may by a single trial speedily discover what a happy revolution these Pills have the power to effect in the human system.

MILITIA COMPETITIVE. — Major LENDY, assisted by a Field Officer, Graduate of the Staff College, PREPARES a limited number of Candidates. Two hundred and thirty-one of his Pupils have succeeded at purely Military Competitions. Sunbury-on-Thames.

SANDHURST and WOOLWICH.—Assisted by Four Resident Tutors (Cambridge Wrangler, Oxford Honoursman, French and German Diplomas), Major LENDY continues to RECEIVE Candidates. He has already passed 1,300 Pupils, and of the last twenty he sent up to compete fifteen were successful. Sunbury-on-Thames.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.

At an Election of Eight Pupils, on Wednesday, June 25, the following was the Result of the Poll:—

	Votes.		Votes.
SUCCESSFUL.

,, L. M. Boulter	1967		

* Vacancies having occurred after the Voting Papers were issued, the Committee admitted Misses E. O. Sherlock and A. M. Vibart, being the Candidates with the next highest number of votes.

Each donation of £5 5s entitles to one life vote, and each annual subscription of 10s 6d, paid in advance, entitles to one vote at all elections during the year.

The NEXT ELECTION will take place on DECEMBER 17, 1884.

By order,
G. W. FORSTER, Secretary.

Office, 20 Charing Cross (corner of Craig's Court), S.W., June, 1884.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.

Applications from Candidates for admission to this School either by Election, by Votes at £12 per annum, or at £80 per annum without votes, should be forwarded without delay to the Secretary.

As a misapprehension appears to exist regarding the eligibility of the Daughters of certain Officers of the Army for election, the Committee desire to state in explanation that the Daughters of all Officers on the Active or Retired List in her Majesty's Army, inclusive of the Royal Marines, are eligible.

The Daughters of Officers who have severed their connection with the Army by having sold out or commuted their pensions, are eligible *only* if born before the date on which such officers quitted the service.

The Office of the School is now at 20 Charing Cross, London.

By Order,
G. W. FORSTER, Secretary.

FINAL MILITARY COMPETITIVE.

MILITIA OFFICERS prepared for the above at

THE ABBEY, ABINGDON, BERKS.

Major F. H. DYKE, late Garrison-Instructor at Colchester, Author of "Lectures on Tactics," "Treatise on Scales," &c., will join Lieutenant Colonel Colvile at Abingdon for "Special Course" in July.

Particulars on application to Captain PRESTON.

JERSEY HIGH SCHOOL for GIRLS (Limited).

PATRONS.

The Right Reverend the Lord Bishop of WINCHESTER.
His Excellency the Lieut.-Governor of JERSEY.

Head Mistress—Miss M. E. POPE,
Certificate of London University General Examination for Women, with honours, and distinction in French, Scholar of Girton College, Cambridge, and Second-Class Natural Science Tripos in the University of Cambridge.

This School has been established for the purpose of giving a high-class education, on the principles of the Church of England. The school buildings are situated in a healthy suburb of St. Helier's, near the sea. The climate of Jersey is mild and healthy. Special facilities are provided for the acquisition of the French language. Ordinary fees—board (washing included), sixteen guineas per term; tuition, three, four, and five guineas per term.—Application for prospectuses may be made to the Secretary, R. CREWS, Esq., Wyvil House, Georgetown, Jersey.

MILITIA COMPETITIVE EXAMINATION.

The undersigned PREPARES a LIMITED NUMBER of PUPILS (Five) for the above. Successes in March, 1883,—two, one taking the second place (first try); in September, 1883—two, Fowle, 25 (first try); Moir, 27. At the March Examination, 1884, one pupil competed, A. H. Robinson, passing 1st for Cavalry, with 2,018 marks after four months' work.

Officers prepared for the Promotion Examination.

Terms moderate.—Apply, Captain H. C. KING, 13 Blomfield Street, Westbourne Terrace, W.

OFFICERS' BAGGAGE, &c.—Officers are respectfully informed that Baggage, Luggage, and all kinds of Personal Property are stored at most moderate charges at the

STORE WAREHOUSES, BAKER-STREET BAZAAR, W.

The Warehouses having been built expressly for the safe keeping of goods, are peculiarly convenient, and are kept warm at an even temperature during the winter. Removals effected.

Separate lock-up rooms for large or small quantities.

JOHN HANES, Manager.
Store Warehouses, Baker-Street Bazaar, W.

THE ARMY and NAVY PENSIONERS' EMPLOYMENT SOCIETY, without fees, SUPPLIES good men as CLERKS, Time or Gatekeepers, Messengers, Porters, Caretakers, Indoor Servants, Grooms, &c.—Apply, personally or by letter, to SECRETARY, 44 Charing Cross. Branches in Manchester, Glasgow, and Dublin.

MILITIA LITERARY, April:—

Order of Merit.	Name.	Marks.
FIRST	*E. G. V. Stanley	5517
3rd	W. E. R. Collis	3991
4th	L. O. Williams	3319
22nd	P. B. J. Petre	2572
29th	W. L. M,Mahon	2090
32nd	F. M. Sandys-Lumsdaine	1963

Being all sent up. There has been no failure in this examination since April, 1881.

* 1505 in advance of the second candidate.

ARMY EXAMINATIONS.—From 15 to 20 Pupils are received by the Rev. WALTER BAKER, M.A., Batcombe Rectory, Evercreech, Bath. A Permanent Staff of five highly qualified Instructors, all resident in the village, besides occasional Assistants, gives a guarantee of individual attention impossible where the number of Pupils is large. There are two departments under separate sets of Instructors, the one under two Graduates, Classical and Mathematical, and a Foreign Master for Candidates for Sandhurst, Woolwich, the Preliminary and Qualifying Literary Examinations; the other under two Experienced Officers for the Final Military Competitive for Lieutenants of Militia. A large per-centage, viz., nearly two-thirds of the Pupils sent up during the last 17 years have passed their respective Examinations. At the recent Military Competitive eight Lieutenants of Militia went up, and four of them who had received all their instruction at Batcombe passed among the first 40, one (Mr. W. H. Lord) taking FIRST place on the list. References are permitted to Sir John Adye, G.C.B., General Elmhirst, C.B., General Thompson (late 7th Dragoon Guards), Colonel A. H. King, R.A., A.D.C. to the Queen, the Bishop of Bedford, and many others, all parents or near relatives of former pupils.

STAFF EXAMINATION. — MODERN LANGUAGES, PREPARATION by CORRESPONDENCE.—The Lecturer on German Language and Literature, attached to the Preparatory Classes for Military Examinations of Captain James and Major Lynch, Lexham Gardens, Dr. J. BRANDT, formerly Professor of German at the Military College of Saint Cyr, from 1871-75, Lecturer on Modern Languages, Literature, and Military Terminology to the General Staff of the late Versailles Army, continues, during the Vacation, to CORRECT TRANSLATIONS and ESSAYS, sent to him by Officers preparing for the above Examination, and returns the Papers, completed by Notes on Grammar, Style, &c., wherever they are required.—Address, Professor J. BRANDT, 19 Eardley Crescent, South Kensington.

TO TUTORS for ARMY, CIVIL SERVICE, and UNIVERSITY.—For disposal, the LEASE of FIRST-RATE PREMISES. Accommodation for 20 to 30 pupils, class-rooms, workshop, bath-room, lavatories, &c. Perfect sanitary arrangements. Very healthy situation. Boating, riding, &c. Best professors at hand. No competition in neighbourhood. Frequent enquiry for such tuition. A rare opportunity of extending a good connection.—For particulars, apply by letter "M. A.," care of Messrs. STUCKEY and JENNINGS, Solicitors, Prince's Place, Brighton.

MEMORY.—Physiological Art of Never Forgetting, wholly unlike mnemonics, TAUGHT thoroughly by post. Any book mastered in one reading. Prospectus post-free, giving opinions (from actual study of the system) of Mr. RICHARD A. PROCTOR, Dr. ANDREW WILSON, and others. Lectures in families of the nobility and gentry. Day and Evening Classes in Never Forgetting and for Cure of Mind Wandering.

Professor LOISETTE,
37 New Oxford Street (opposite Mudie's).

FALKNER'S "REAL MALT" WHISKEY.

PURE DUBLIN DISTILLATION.

The same as supplied to the principal Clubs and Regimental Messes. Has been esteemed in Ireland for the last century as the FINEST IRISH WHISKEY procurable, being pure as distilled, and refined by age only. A stock always kept in bond ready for shipment to India and the Colonies.

LONDON, 40 CHARING CROSS.
DUBLIN, 83 GRAFTON STREET.

ONE-HORSE LANDAUS.—F. and R. SHANKS, finding a great want for LANDAUS of superior quality, really suited for one horse, have made arrangements to supply them, fitted with their patent for opening and closing the head, at a price they consider must meet the demand. Several can be seen building at their Factory, 70 and 71 Great Queen Street, Lincoln's Inn Fields.

SHAVING a PLEASURE.

EDWARD SMITH'S 1s HOLLOW-GROUND RAZOR is pronounced by all the most wonderful razor ever introduced. It has during the past two years stood every test, and thousands have been sold retail only, at No. 3 Cheapside. It never requires grinding or setting, and is complete in case for 1s 1d; post free, 1s 3d. Complete list of razors, &c., on application. N.B.—A liberal allowance to Serjeants and others taking a quantity.—EDWARD SMITH ("The City Toy Shop"), 3 Cheapside, London.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

At the six Militia Competitions which have taken place since September 1, 1881, Colonel WILKINSON and Lieutenant-Colonel SHAW have secured for their Pupils FORTY-NINE COMMISSIONS, although they have only Prepared and sent up a very Limited Number of Candidates. In the March, 1884, Examination, out of SIXTEEN SENT UP, TEN PUPILS succeeded; one other was two places out, and three more within a few places of being successful. Lieutenant C. J. Stanton took the SECOND PLACE at this Examination, with 2,083 marks.

At the Militia Literary Examinations held during the same period, a Number of Pupils have also passed; in this Competition the FIRST PLACE was taken in April, 1883, by Lieutenant Lord Skelmersdale, and the SECOND PLACE in the following October Examination by the only candidate sent up, Lieutenant the Honourable Victor A. Pelham.

At the recent WOOLWICH EXAMINATION Mr. W. V. Scudamore passed SIXTEENTH on the list. This candidate made very high marks in languages.

The results of the last SANDHURST EXAMINATIONS have also added to the general score, which now amounts to NINETY-FOUR SUCCESSES, obtained by Pupils since September 1, 1881.

Address, DARMSTADT, GERMANY.

NAVAL CADETS, ASSISTANT CLERKS

HOPE HOUSE SCHOOL,
SOUTHSEA.

Principals { Mr. T. H. VICKERY.
Mr. EDWARD M. BEWLAY, B.A., Univ. Coll., Lond.

AN ARMY SECTION IS NOW ADDED. PUPILS PREPARED FOR SANDHURST AND WOOLWICH.

At the late Competitive Examination in June for Assistant-Clerkships in the Royal Navy, TWO of the Five successful Competitors were Pupils of this Establishment, taking First and Third places. In June, 1882, of the five who passed, the First, Third, and Fourth were from this School, and Three qualified.

CAVENDISH COLLEGE, CAMBRIDGE.

Four Scholarships of £30 each, tenable for three years, given, one by the Clothworkers' Company, one by his Grace the Duke of Devonshire, K.G., one by Samuel Morley, Esq., M.P., and one by E. B. Foster, Esq., will be offered for competition on August 6, 7, and 8, 1884. Candidates must be under 17 on August 6.

The usual age of entry being between 16 and 17, a Degree may be taken at 19.

The College charges for lodging, boarding (with an extra term in the Long Vacation), and, including all necessary expenses of tuition, and University fees, are £84 per annum. For further information, apply to the WARDEN, Cavendish College, Cambridge.

CHARDSTOCK COLLEGE, CHARD.

Beautiful country; remarkably healthy. Special Preparation for Army, Navy, Public Schools, Universities, &c. Terms moderate. Cricket, fives, gymnastics, &c.

TO OFFICERS, ANGLO-INDIANS, and OTHERS.—First-class School, established 15 years, where boys are prepared from an early age for the Army Examinations. Numerous Staff of Experienced Graduates in Honours. System pursued has resulted in 35 successes and no failures. Indian children received. Highest references.—C. V. GODBY, M.A. (Oxon.), Bute House, Petersham, S.W.

LONDON INTERNATIONAL COLLEGE,

Spring Grove, Middlesex, W.

Inaugurated by H.R.H. the Prince of Wales, July 10, 1867. French and German (or Greek) taught to every Boy.

Amongst the successes during the year are two OPEN SCHOLARSHIPS at CAMBRIDGE, and a 13th WRANGLER.

Several FOUNDATION SCHOLARSHIPS, tenable at the School, which may be increased in amount from a Special Fund in the case of those requiring it.

Also LEAVING SCHOLARSHIPS, tenable at the UNIVERSITIES, WOOLWICH, and SANDHURST.

Apply to the SECRETARY, or to the Head Master, H. R. LADELL, M.A.

MILITARY EDUCATION in FRANCE. E. S. CARBERY, Esq., Barrister-at-Law, Doctor of Law of the University of Heidelberg, and Captain C. NORMAN, assisted by Graduates of English and French Universities, PREPARE PUPILS for all Military Examinations as well as for Law and Universities. Closest attention to French and German, strict discipline, Classes small. A Special Class for Militia Officers.—For terms, address E. S. CARBERY, Esq., or Captain C. NORMAN, Les Buttes, Dinan, France.

BRIGHTON COLLEGE.

On THURSDAY and FRIDAY, July 10 and 11, there will be an EXAMINATION for the following SCHOLARSHIPS:—

(a) Two Council Scholarships of the annual value of £20.
(b) One Gill Memorial Scholarship of the annual value of £20.

Candidates for the Gill Memorial Scholarships must be sons of Officers of the Army. Both the Council and the Gill Scholarships are tenable for three years, and may, in the case of boarders who especially distinguish themselves in the Examination, be augmented up to any sum not exceeding £80 per annum. The Scholarships are all open to boys under 15 years of age on July 1. For further particulars, apply to the SECRETARY, Brighton College, Brighton.

GERMANY. — SEASIDE. — A limited number of GENTLEMEN'S SONS who will spend their holidays in Germany, in order to learn the German language, are received as Boarders for July and August in the house of a Clergyman in a small town close to the sea.—For particulars, apply to Pastor TILEMAN, Norden, Province Hanover.

ARMY.—LINE and MILITIA.

IMPORTANT to STUDENTS.

Captain DUMARESQ DE CARTERET BISSON, M.A., Author of "Our Schools and Colleges" (graciously recognised by the Queen and H.R.H. the Commander-in-Chief), sends, free by post, a selected List of Prospectuses of all the most SUCCESSFUL ARMY TUTORS, and gives his Counsel on Military and Civil-Service Education free of Charge. References kindly permitted to the late Secretary of State for War.—Apply by letter only, No. 69 Berners Street, London, W.

ARMY, CIVIL SERVICE, UNIVERSITIES, PUBLIC SCHOOLS.

MESSRS. BISSON, BORMAN, and CO. send, free of charge, PROSPECTUSES of the most SUCCESSFUL TUTORS for Woolwich, Sandhurst, Military Competitive, Staff College, Home and Indian Civil Services, Universities, Public Schools, &c.—3 Berners Street, W.

Districts, and Lieutenant-Colonel C. W. FOTHERGILL, F.G.S., P.S.C., late Instructor in Military Topography, Royal Military College, prepare Officers of the Army for Promotion and for Entrance to the Staff College, LIEUTENANTS of MILITIA for the MILITARY COMPETITIVE EXAMINATION, and Officers of the Auxiliary Forces for the Examination in Tactics.

For particulars and terms, apply to Colonel LONSDALE HALE, 57 Sinclair Road, Kensington.

MILITARY COMPETITIVE EXAMINATION.

THREE sent up in March, TWO PASSED; Hill, 4th, Cumberland, 20th. Third only just failed. Many former successes. Tuition for all Competitive Examinations.—Captain PINHEY, Spring Grove, Isleworth.

CONNAUGHT MILITARY COLLEGE, WOOLWICH COMMON.

Principal—SAMUEL H. WINTER.

The Pupils of this Establishment have been uniformly successful. In July, 1882, Mr. F. Close was SECOND on the Woolwich List, being FIRST in Mathematics; in July, 1883, Mr. G. Close was TENTH and Mr. R. F. Edwards TWELFTH, all at their first trial. Mr. Winter has prepared more than 200 Pupils for various Military Examinations.

MILITARY EXAMINATIONS.—Lieutenant-Colonel G. M. CARDEW (passed 2nd from the Staff College), PREPARES SIX LIEUTENANTS of MILITIA for MILITARY COMPETITIVE, also Officers for Promotion and other Military Examinations.—14 Observatory Avenue, Kensington, three minutes from the High-Street Station.

MILITARY EXAMINATIONS and GENERAL EDUCATION.—AVRANCHES.—A GENTLEMAN, for many years successfully engaged in preparing Candidates for the Military Competitive Examination and Universities, wishes to RECEIVE PUPILS. Great facilities for acquiring the French language. Terms moderate. Highest references to Parents and Guardians of former Pupils, and to Clergymen and Country Gentlemen.—Apply to Captain CHAWNER, Bois-Guerin, Val-St.-Père, Avranches.

ARMY EXAMINATIONS.—Mr. J. WINDER, M.A., Cranworth House, Eastbourne, Sussex, PREPARES SEVEN PUPILS for WOOLWICH and SANDHURST. Special Masters for French, German, and Science. In 1880, of FOUR Candidates for Woolwich, ALL of whom passed, one was 6th and another 29th. In 1883, of THREE Candidates for Sandhurst, TWO were successful.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS, 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Laboratory, heated Swimming Bath, Fives Courts, &c. — Address, HEAD MASTER.

AN OFFICER in the ARMY WISHES to RECOMMEND strongly a PREPARATORY SCHOOL for YOUNG BOYS on the South Coast.—Apply to Colonel ABBOT ANDERSON, Professor of Military Topography, R.M.C., Yorktown, Farnborough.

A PRUSSIAN OFFICER of RANK resident in a pleasant little town near Berlin, wishes to RECEIVE PUPILS into his house, and to prepare them for Woolwich and Sandhurst. He is permitted to refer to the Rev. T. Teignmouth Shore, Chaplain to the Queen, 31 Montpelier Square, Rutland Gate.—Address, "J. H. D.," 41 Coleman Street, E.C.

Established over 100 Years.

having secured the whole of the last exceptionally fine Crop of TRICHINOPOLY CIGARS AND CHEROOTS (Dawson's Muster), which have gained the Gold Medals at the Melbourne and Calcutta Exhibitions, are now offering these delicious Cigars at the wonderfully low prices of 22s 6d per 100, carriage paid, or £10 per 1,000. It is an acknowledged fact that smokers of BEWLAY'S celebrated Trichinopolys prefer them to any other cigars sold at even treble the price, and especially liked by all Officers and Gentlemen who have visited our Indian Empire.

The Analytical Sanitary Commission of the *Lancet* reports that the goods they purchased from Messrs. Bewlay and Co. were not adulterated in the slightest degree.

DR. J. COLLIS BROWNE'S

ORIGINAL AND ONLY GENUINE. **CHLORODYNE**

COUGHS,
COLDS,
ASTHMA,
BRONCHITIS.

DR. J. COLLIS BROWNE'S CHLORODYNE. Dr. J. C. BROWNE (late Army Medical Staff) discovered a remedy to denote which he coined the word CHLORODYNE. Dr. Browne is the SOLE INVENTOR, and as the composition of Chlorodyne cannot possibly be discovered by Analysis (organic substances defying elimination), and since the formula has never been published, it is evident that any statement to the effect that a compound is identical with Dr. Browne's Chlorodyne *must be false.*

Vice-Chancellor Sir W. PAGE WOOD stated publicly in Court that Dr. J. COLLIS BROWNE was undoubtedly the INVENTOR of CHLORODYNE, that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See the *Times*, July 13th, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE is the true Palliative in

NEURALGIA, GOUT, CANCER, TOOTHACHE, RHEUMATISM.

IS THE GREAT SPECIFIC for CHOLERA, DIARRHŒA, DYSENTERY.

The General Board of Health, London, report that it acts as a charm, one dose generally sufficient.

Dr. Gibbon, Army Medical Staff, Calcutta, states:—"Two doses completely cured me of Diarrhœa."

From SYMES and CO., Simla:
Dear Sir,—We congratulate you upon the wide-spread reputation this justly esteemed medicine has earned for itself all over the East. As a remedy of general utility, we much question whether a better is imported, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to say, are now relegated to the native bazaars, and, judging from their sale, we fancy their sojourn there will be but evanescent. We could multiply instances *ad infinitum* of the extraordinary efficacy of Dr. Collis Browne's Chlorodyne in Diarrhœa and Dysentery, Spasms, Cramps, Neuralgia, the Vomiting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Choleraic Diarrhœa, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's, from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of opinion that the substitution of any other than Collis Browne's is a deliberate breach of faith on the part of the chemist to prescriber and patient alike.—We are, Sir, faithfully yours, Symes and Co., Members of the Pharm. Society of Great Britain, his Excellency the Viceroy's Chemists.

DR. J. COLLIS BROWNE'S CHLORODYNE is a Liquid Medicine which assuages Pain of every kind, affords a calm, refreshing sleep without Headache, and invigorates the Nervous System when exhausted.

DR. J. COLLIS BROWNE'S CHLORODYNE rapidly cuts short all attacks of

EPILEPSY, SPASMS, COLIC, PALPITATION, HYSTERIA.

IMPORTANT CAUTION. The immense sale of this remedy has given rise to many unscrupulous imitations. Of all Chemists, 1s 1½d, 2s 9d, and 4s 6d.

FROM BERBER TO SUAKIM.

At the present moment, when the Government are sending out rails to make a road over the Desert from Suakim to Berber, the following notes of a journey made by Mr. J. F. Russell, now Vice-Consul at Alexandria, when he was returning from Gordon's first Soudan expedition (of which he is almost the sole survivor), may be found of interest. Even accounts of the ordinary transit of the First Cataract appear to be considered worth print and paper :—

Suakim, June 4, 1875.

My dear ——,—I arrived here after a hard and hot march, yesterday evening, just in time to miss the steamer which left in the morning ; so now I shall have to wait for the man-of-war which is expected in a few days to take the Sultan of Darfur to Cairo. Mussinger Pasha is also going. We shall be an awful crowd, but it will be rather amusing. I heard here the news of poor Lord Ranfurley's death. What a sad ending to a pleasant shooting expedition; and he was such a nice fellow! I will now try and give you a little outline of my trip across the desert this time, as I made a pretty quick march. I had a great many annoyances, and never knew before that I had a temper to lose. On May 24 all was ready for a start from Berber. I had eight camels and a guide. I would not take a soldier this time, as I had always found them more bother than they were worth. In the afternoon I sent my camels on to the wells, about four hours from Berber, and started later with the guide, and trotted on. We soon caught up to the camels. The first thing I saw was not pleasant for a start. I espied Mahmut, my servant, running after my sheep, which had got away ; a camel had thrown down my boxes, and was careering over the desert, and the guide immediately started after him,—so it was a case of halt. I then found I had a brute of a camel, which preferred trying to get me off his back to remaining quiet; all the camels were young and full of spirit, if one can say such a thing of a camel. I should have gone back to Berber, but the Bey there is a savage; if I had gone I might have been delayed another 10 days, so I thought it best to go on; but I saw I should have trouble. We halted at the wells that night and made an early start the next day, and made a march of five hours through a plain, when we halted, fizzing hot. The sheep, I suppose, delighted at a halt, kicked up his legs, and rushed for a shady place, frightening two of the camels on the way, who threw down my boxes, breaking up two, and there was general confusion. I found I had six extra camels; I made inquiries, and the guide had the cheek to tell me they carried ohluna for the camels to eat on the way. I knew that was a lie, and warned him that if they came with me I would lick him. I soon saw, to add to my troubles, that the guide was inclined to be cheeky. I had only two other men for loading the camels, and when one is loaded and they are loading another, the other either sits down or walks off. We arrived at Oobach at midnight on the 26th, after some hard marches. My servant was ill on account of his camel bolting with him in the night and hurting his back, and I could not get anything cooked. Oobach is a wretched place, and the water is bad, impregnated with salt. We had to remain here all the morning, as the place was full of irregular cavalry going to Darfur. From Oobach there are two roads. I chose the one to Kokoreb by Rowai, thinking it shorter. Got away from Oobach at 4.20, not before a general row with my people. Met a lot more cavalry on the road. They move at a good pace, and the horses seemed strong and in good condition. They make their march lively in the night by beating a sort of tom-tom and singing. I made a march of seven hours over hills, road bad and stony, and the camels brutes. Mine is a regular demon, and shies at everything, or sits down suddenly. I have already changed camels twice; but they are all the same. Made an early start, 28th ; the same sort of road, not a human being ; a perfect wilderness, and very bad road for camels. The heat is trying in the middle of the day; but I always halt and put up the tent, then come hot blasts from the hills which generally bring it down. It gets quite chilly in the evening. The water is salty, the more one drinks the more one wants, and we have no fresh water until we get to Kokoreb; but I have eight water-skins. Made a march of eight and a half hours in the evening, more of my boxes coming to grief, and more swearing at the guide. Passed the village of Rowai in the evening, situated in a very little narrow valley, surmounted on all sides by high hills. On the 29th made an early start, and went ahead with the guide; halted within sight of the wells of Kokoreb, the camels turning up at noon. Heat very bad, and I have only a tarboosh and umbrella. One of the camels carrying the water fell and broke two skins, so we have very little left, and have a long march before us. Started in the afternoon at 5, and had the worst march I have ever had on camels. I thought, by my time as I had written it down on the last journey I made between Suakim and Berber, that we ought to be about five hours from the wells ; but it turned out we were eleven, and I did not get there until 4 a.m. next morning. We had to go on, as we had no water, and the camels were going badly. I turned-in, pretty well done up. I took seven days to get here last time. Halted the whole of the 30th to give the camels rest, and started on the morning of the 31st for the wells of Hairtree. Got on the regular caravan road to Suakim now. The Sultan of Darfur's caravan is a day ahead of us. They have been already 16 days from Berber. I cannot buy sheep or anything, as all the natives have bolted to the hills to get out of the way of the big caravans. But I eat very little travelling. I meant to have taken it easy, but I have been so annoyed that I want to get on and this journey finished. My guide is a brute, but I am making it rather unpleasant for him, and he, on his part, is trying to annoy me, but I think I shall get the best of it. Made a march of 11 hours on the 31st. Towards evening camels going so badly I halted some distance from Hairtree Wells. Made an early start on the 1st, and trotted on with the guide, and reached Hairtree Wells at 10.30, the camels coming up at 12.30. They are getting rather done. I have not seen a gazelle this time. I suppose they have all been frightened away by the large caravans and soldiers that have been passing lately. Came up to the Sultan's caravan here. It was rather a picturesque sight in the valleys, immense numbers of camels feeding over the hills,—it is wonderful how they get up rocky hills to a great height after a green bush,—soldiers of all colours and dresses, and a detachment of men mounted on fast-going dromedaries; under every shady tree, groups of Darfurian men and women, some of the women rather good-looking, but the men do not seem up to much. I saw sheep being roasted whole. I cannot get a bit of meat, and have to content myself with rice and maccaroni. There are an immense number of people with the Sultan, and I do not know what they will do with them all at Cairo. In the afternoon it looked very like rain, the clouds lying in thick piles on the tops of the hills which surround us on all sides. The Sultan's caravan passed us, as my men took such a long time loading; it was rather a fine sight, seeing the immense number of camels and men filing over the hills, and the different-coloured dresses, and the flashing of the arms of the cavalry when the sun broke out occasionally from the clouds. There were a few swells mounted on horseback, and there were some splendid "hygenes," or fast-trotting camels. We halted just outside. The rain must have come down pretty hard, as some of the watercourses had been full and run off again. They rise very rapidly. The ground slopes here from east to west. Towards evening got into a great plain, very slippery-going for the camels, on account of the rains; but the gay spirits have quite gone out of my camels, as I have been giving them long marches. We had some difficulty passing the Sultan's caravan, as they halted in the middle of the road, and lit enormous fires, which our camels would not pass. Halted for the night at 10.15 p.m., after a pretty fair march. We are about 18 hours from Suakim, if my reckoning is right from last time ; but we are taking a great many hours this time, and I am getting pretty down. 2nd.—Was woke up by the large caravan passing. I immediately got ready for a start, as I did not mean to let them pass us again. Got off at 5.20 a.m., and trotted on, and I had the pleasure of inspecting the whole of the caravan as I passed. Some of the women are really good-looking, and were by no means shy, and did not cover their faces. They cover themselves well in blue cloth, and the men also wore blue gowns. Met a Turkish swell in charge of caravan ; the Sultan himself is a wretched-looking old man. Passed the wells of Galoun at 7.30, my guide wanted to stop, as he said the camels had had no water. I got awfully angry, as he ought to have given the camels water at Hairtree, and I would not let him stop. Halted towards noon—very little "go" left in the camels, but we cannot be far from Handoub Wells. Got off at 3.15 p.m., and the guide then told me for the first time, that the wells were a long way off, as he was taking me the long road. There is a short road over the hills, which I went by last time. I was savage, as we have hardly any water left, and I am sure he is doing it on purpose. Towards evening I became convinced he was going wrong, but he said it was the regular road. After that it was pitch dark, we got off all roads altogether, and high hills all round us. We were going all over the place, and at last he said he had lost the road ; so I halted at 11, to wait for the other camels to come up. I was rather drowsy, and had nothing to eat or drink, so fell asleep. I woke up about 2 a.m., but no camels. I asked the guide where they were. "Oh," he said, "they will never come here to-night; they don't know the way. They must have halted on the way." I ordered my camels to go in search of them, and fired a few shots from my revolver. We found our caravan a quarter of a hour back all snugly asleep. I promised my guide corbach at Suakim. He is a Biskareen Arab (the worst of the lot). 3rd.—Got the people astir early; but no water to make coffee and not a sign of a road. We got away from the hills altogether and came into a large plain, when I espied the wells of Handoub a long way off, the guide having taken the road skirting round all the hills. These last two days have been fairly trying. Got to the wells at 9, the camels turning up at 10.20 a.m. I immediately had a wash and sleep, and got something to eat, and we shall be in Suakim this afternoon, having done the distance in nine days' march, with a whole day halt at Kokoreb—very quick considering the camels and guide I had, the general time being 12 to 13 days. If I had gone the short road from Hairtree I should have caught the steamer here, started in the afternoon, and got to Suakim after two hours' trotting. Found the Bey away, and only the old woman of a Vakeel here, who is perfectly useless, especially to Europeans. The place is full of the Sultan's people, so I had to find a room in the town, and will have to pay all my expenses ; my things got knocked about, but it is all over now. I turned in early pretty well done, as rice and maccaroni are not very fattening. It is terribly hot. Nothing to do except to remain quiet and wait for a steamer. The Sultan arrived on the 4th; they fired a salute of a few guns in his honour. Mussinger Pasha is also expected here. I am just two months now from Fashoda.

THE ARTILLERY CREED.

A correspondent, who signs himself "Gunner," sends us this *jeu d'esprit*, which is obviously a parody on that of St. Athanasius. To our objection that it might be considered irreverent, "Gunner" replied that Athanasius was in no way apostolic, and that after his exploits at Alexandria, and his bombardment, so to speak, of his opponents, his sanctification was not by any means accepted without cavil. We do not profess to know who is the particular Deputy-Adjutant-General mentioned in the text :—

Whosoever will be advanced, before all things it is necessary that he should hold the Artillery Faith.

Which Faith, except every one do keep wholely, without doubt he shall serve abroad everlastingly.

And the Artillery Faith is this,—that he believe in one Artillery in three and three in one.

Neither confounding the Branches nor dividing the Regiment.

For there is one Artillery of the Garrison, another of the Field, and another of the Horse.

But the importance of the Garrison, Field, and Horse is all one,—the glory unequal and the work coequal.

Such as the Garrison is, such is not the Field nor the Horse.

The Garrison Artillery is disorganised, the Field Artillery disorganised, and the Horse Artillery disorganised.

The Garrison Artillery is incomplete, the Field Artillery is incomplete, and the Horse Artillery is incomplete.

So also the Garrison Artillery is unsettled, the Field Artillery is unsettled, and the Horse Artillery unsettled.

Yet there are not three unsettled, but one unsettled.

As also there are not three incompletes, but one incomplete; not three disorganised, but one disorganised ;—

Yet though we are compelled by the Artillery verity to acknowledge each Branch to be Artillery, so are we forbidden by the Artillery Faith to say there are three Artilleries.

The Garrison Artillery is made of none, neither made nor recruited.

The Field Artillery is of the Garrison alone,—neither made nor existing, but depending.

The Horse Artillery is of the Garrison and Field,—neither made nor recruited, but selected.

So that in all things as is aforesaid, the one regiment in three branches, and three branches in one regiment, is to be reverenced.

He therefore that will serve at home must thus think of the three branches.

Furthermore, it is necessary to everlasting service at home that he believe rightly in the infallibility of the Deputy-Adjutant-General.

For the right faith is this,—that he believe and confess that our Deputy-Adjutant-General is a perfect man and perfect gunner.

Perfect man and perfect gunner, of an unreasonable mind and disagreeable temper existing.

This is the Artillery Faith, which except a man believe faithfully he cannot get on.

H.R.H. the Field-Marshal Commanding-in-Chief has signified his intention of inspecting the Brigade of Guards in Hyde Park on the 11th prox.

The first shipload of railway plant for Suakim left the Royal Arsenal, Woolwich, on Thursday.

NOTES FROM ALDERSHOT.

[FROM OUR CORRESPONDENT.]

To-day the Division, including Militia, 9,000 strong, will parade in the Long Valley, for the celebration of her Majesty's Birthday. At noon the infantry will fire a *feu-de-joie*, and will give three cheers for the Queen, by signal from Sir Archibald Alison.

The very good behaviour of the seven battalions of Militia (about 5,000 men), now assembled here for annual training, is worthy of remark. Time was when much turbulence would have been looked upon as the natural result of the assembling of so many Militiamen at one station. But a great change has been working during recent years, and now, as regards both appearance and discipline, the Militia, as we see them here, will compare favourably with the Line battalions. In the ranks of these Militia battalions may be found many old soldiers of a stamp rarely or ever to be met with nowadays in the ranks of the Regulars, and man for man they are much superior to the Linesmen. It should not be overlooked that the Militia have now the great advantage of being trained by old and experienced non-commissioned officers, who have, during recent years, been transferred in large numbers from the Line battalions, much to the disadvantage of the latter.

The scarcity of water at the Camp is becoming very serious. The consumption of water by the mounted corps is very great, and an arrangement has been made with a private company to supply water to the Cavalry and Permanent Infantry Barracks.

Notwithstanding the scarcity of water here, which has necessitated the closing of all the bath-rooms, I have observed unnecessary waste of the Bourley water, in defiance of regulations, used to water gardens. In the face of such proceedings, it is impossible for the Lieutenant-General commanding to hope "that all ranks will co-operate in the spirit as well as in the letter of these regulations for the common benefit," to quote from a memorandum on the subject recently circulated.

Formerly the batteries carried on gun-practice on Cove Common, but for two or three months during the drill season artillery is not available in combination with the other arms.

It has been ordered that the cavalry are not to be taken for brigade or divisional work until this course of instruction has been completed.

The band and pipers of a regiment here ("Black Watch") are deservedly popular. However, after contributing to the harmony of a "gathering of the clans" in the Metropolis, they are said to have much over-stepped the bounds of decorum on their return journey to the arid wastes of Aldershot, and to have been, in a general way, "unco fou;" and musical (?) instruments came to grief. Unfortunately it was found necessary to admit one of the harmonists to the Cambridge Hospital, suffering from a fractured jaw and sundry serious bruises. Perhaps recent territorial disarrangements may have something to do with this business!

It has been decided by the Stewards of the Aldershot races to allow officers of the Militia and Yeomanry to enter for the two races which are open to officers of the Army and Navy, at the Summer Meeting on July 26 next. This has not been permitted in previous years.

Prizes to the value of £500 will be given away at the Sixth Army Rifle Meeting, to take place at the Cæsar's Camp ranges on August 7, 8, and 9 next.

The Eighth Grand Army Athletic Meeting will commence here on Tuesday next. The first ties of the mounted and dismounted competitions for non-commissioned officers and men will be contested on the morning of July 1, commencing at 10 a.m.

The Rev. T. O'Reilly, Acting Roman Catholic Chaplain, died here on Tuesday last, after a short illness. His remains were interred in the Military Cemetery yesterday (Friday).

The friends of the Rev. M. Cuffe, for several years Roman Catholic Chaplain, were grieved to hear that he had met with a serious accident. No serious consequences are apprehended.

Lieutenant-Colonel Lascelles, A.A. and Q.M.G., has been transferred from Portsmouth to Aldershot, and took up his duties.

A detachment of A (Pontoon) Troop has been ordered to Shrewsbury on July 10 to throw a bridge across the Severn.

THE TREATY WITH CHINA.

In "The Tonquin Question," the results of the French campaign are cleverly summed up by *Deutsche Heeres-Zeitung*, No. 48. With the occupation of the Delta and the treaties of Hué and Tientsin, the expedition to Tonquin may be considered at an end, and in a sense extremely favourable to France. It devolves upon the commercial classes of France to prove that this conquest was in the "interests" of their own country (not to speak of a "necessity"); for other countries can conquer an Asiatic empire just as well, if they are willing to send a division and the necessary ships, and spend forty (now already eighty) million francs. It will have to be shown whether France has taken merely for the sake of possessing, or whether the capital sunk will yield a return. The first step to ensure repayment is the clause in the treaty of Tientsin which stipulates for a treaty of commerce with advantageous conditions "for France," China granting at the same time free-trade to "France and Annam" along the whole of the new frontier. France, on her part, will adopt a rigid system of protection against all foreigners in her new territory to reimburse the French for their expenditure, and to attract French elements. The writer is of opinion that the only consequence will be to raise prices of commodities to such an extent, that the charm of setting up in business in the new colony will vanish and prevent its development. There is more reality in the hard facts of the bill that remains to be paid. From November to April, the daily expenditure of the French for the campaign has been half a million francs (£20,000), and it is not without interest to select one or two of the items. Each ton and each passenger had to pay a toll of ten francs in the Suez Canal. The cost of transport per 1,000 men and 3,000 tons of material, and the return voyage of the ship in ballast, amounted to 580,000 francs, and somewhat higher for hired vessels. Two small Farcy river gunboats cost 300,000 francs, and their transport to Cochin China 500,000 francs! When such sums are involved, it does not matter much when Admiral Courbet drew 12,000 francs per month during the time of his command, General Millot 6,400 francs, and M. Harmand, during his leave of absence in France, 1,250 francs per month. The writer concludes:—"*Beati possidentes* is already addressed by many to the French in Tunis and Tonquin. We (the Germans) will be content to wait until we are convinced that this possession is a fortunate one for France, for Tonquin, or for Tunis; at the present moment it appears to us to be a fortunate thing only for—us, and for peace on the Continent."

PRISON THOUGHTS.

[FROM A CORRESPONDENT.]

To those who are interested in the future welfare of the nation, it may seem worthy of consideration whether we are doing wisely in locking up and keeping close at considerable expense some of our boldest and most daring men. A young fellow of a fiery, turbulent, and excitable temper may be, and no doubt is, very difficult to break in to discipline; but when breaches have to be stormed or ships boarded, he would be well worth all the trouble expended. If such a man, excited by drink and perhaps by aggravated forms of petty bullying, strikes a corporal or other superior officer, we consign him to five or more years' penal servitude, and throw him on one side, never to be used again; or, if leniently disposed, imprison him for two years, during which he is doing anything but fitting himself for future service. It is not argued that crimes against discipline should be leniently dealt with, but that crimes of violence should be met by violent punishments, short, sharp, and decisive, which are best suited as deterrents and best understood by violent men. It is said that the worst use you can put a man to is to hang him; there are, however, those who think that a still worse use to make of a man is to imprison him for life and have to pay an annuity for his keep, and build substantial prisons to keep him in; and that similarly it would be far better to flog a man for a crime of violence, and have done with it, than to keep him close for two years at considerable expense and loss of his services during the interval. Opponents may say that we want in our Army and Navy only good men. But good men in peace and good men in war are very different men. The good-conduct badges that too often show a capacity for shirking a row are not highly valued by leaders when the time comes that fights are the daily or nightly work of men. Men who are good in war are not so extremely common in England that we can afford to keep them locked up out of the way simply to pander to a sentimentalism which wishes to avoid hurting their feelings. It is probable that if the actual total cost to the nation of keeping a man in penal servitude and obtaining another man to perform his duty were fairly estimated, it would cause a considerable difference in the opinions of many economical humanitarians who talk much of what they practically know little.

OUR "NEWS."—"The home authorities have decided on the issue of the Egyptian war medal, with a clasp bearing the word 'Suakim,' being given to the officers and men of Her Majesty's forces who took part in the recent actions in the Eastern Soudan. Those on whom the Egyptian war medal has already been conferred will receive the clasp. The troops will also receive a gratuity of £2 per man."—*Egyptian Gazette*, May 26!!!

HOW TO AVOID THE INJURIOUS EFFECTS OF STIMULANTS. —The present system of living—partaking of too rich foods, as pastry, saccharine and fatty substances, alcoholic drinks, and an insufficient amount of exercise—frequently deranges the liver. I would advise all bilious people, unless they are careful to keep the liver acting freely, to exercise great care in the use of alcoholic drinks, avoid sugar, and always dilute largely with water. Experience shows that porter, mild ales, port wine, dark sherries, sweet champagne, liqueurs, and brandies, are all very apt to disagree; while light white wines, and gin or old whisky largely diluted with soda water, will be found the least objectionable. ENO'S FRUIT SALT is peculiarly adapted for any constitutional weakness of the liver; it possesses the powers of reparation when digestion has been disturbed or lost, and places the invalid on the right track to health. A world of woes is avoided by those who keep and use ENO'S FRUIT SALT, therefore no family should ever be without it. CAUTION.—Legal Rights are protected in every Civilised Country. Examine each bottle, and see the Capsule is marked "ENO'S FRUIT SALT." Without it, you have been imposed on by worthless imitations. Sold by all Chemists. Directions, in Sixteen Languages, how to Prevent Disease. Prepared only at ENO'S Fruit Salt Works, Hatcham, London, S.E., by J. C. ENO'S Patent.

Indian Notes.

Lieut. Herbert is appointed Cantonment Magistrate, Nusseerabad.

Lieut. Campbell, 2nd Sind Horse, is appointed to the 2nd Central India Horse.

Capt. Chesney, 23rd Pioneers, is appointed D.A.A.G. for Musketry.

Col. Harvey is Brig.-Gen. during the absence of Brig.-Gen. Murray.

Mr. H. C. Blaker is appointed Sub-Lieut. of the Calcutta Naval Artillery Volunteers.

Lieut.-Col. Wauchope, Major Gibbs, Lieuts. Jervis and Pollard are granted leave.

Lieut.-Col. Vivian is permitted to retire.

Major La Touche is transferred to the Half-pay List.

Major Cole, R.E., reverts to the Public Works.

Sartorius Pasha was entertained on his return from Egypt by the members of Lodge St. George, Bombay. Col. Sartorius's father, who fought at Trafalgar as a boy of 12, is now Admiral of the Fleet and senior officer of the English Navy. His two brothers have both won the Victoria Cross. He has himself been lucky enough to see service in other armies as well as his own. He was with Gen. Baker in Turkey, and he was with Gen. Baker again as second-in-command in the Suakim Expedition.

The steamboat Comet, which was recently built in Bombay for the use of Mr. Plowden, the British Resident in Turkish Arabia, has been stopped at Gwadur on her way to Bagdad by order of the Government of India, owing, it is believed, to some difficulty raised by the Turkish authorities.

Col. J. Hudson, Bengal S.C., has been appointed President of the Committee on the organisation of the Indian Sappers and Miners at Simla.

In addition to having warned the Governor of Herat to resist by force any encroachments upon Afghan territory from the Persian direction, the Ameer has strengthened his relations with the nomad tribes by appointing Azmutullah Khan to be Governor of Panjdeh.

The fact that no K.C.S.I. was included in the recent *Gazette* is stated to be due to a limitation in the number of those honours.

Brigdr.-Gen. Sir Hugh Gough has been appointed permanently to the Brigade Staff, Bengal Army, vice Brigdr.-Gen. Blair vacated, and posted to Mooltan, but will continue in command of the Eastern Frontier District until Gen. Hill's return from leave. Col. Hudson, 28th Bengal N.I., meanwhile officiates for him at Mooltan.

Col. Lockhart, head of the Intelligence Department, has been recommended by the Indian Government for employment in Acheen in connection with the Nisero affair. Col. Lockhart has twice visited Acheen.

It is estimated that 40,000 workmen will be employed in the completion of the railway to Quetta.

Orders have been given for an expeditionary force to be prepared against the Kakar Pathans to start early in the autumn.

It is stated that Col. Stewart, on special duty on the Perso-Afghan frontier, has so much improved in health that he has for the present abandoned his intention of taking sick-leave.

The Indian Military Budget estimates for 1884-85, contrasted with the Budget for 1874-75, give the following curious results:—The total effective charges in 1874-75 were 112,475,590 rs.; in 1884-85 they are 113,043,730 rs. Notwithstanding the reduced army and its economic working, the non-effective charges have risen from 6,224,410 rs. in 1874-75, to 8,169,270 rs. in 1884-85. Of the total effective charges, Bengal absorbs 65,571,420 rs., against 62,506,107 rs. in 1874-75; Madras, 23,650,410 rs., against 26,113,270 rs. in 1875-75; Bombay, 23,821,900 rs., against 23,861,710 rs. in 1874-75. The non-effective charges are:—Bengal, 3,809,420 rs., against 2,454,650 rs. in 1874-75; Madras, 2,866,720 rs., against 2,604,240 rs. in 1874-75. The non-effective charges for Madras are exceptionally heavy, being equal to about 12 per cent. of the effective charges, and nearly double those of Bombay, whose effective charges, considering the smallness of the presidency, are high.

The *Indian Daily News* believes it is settled that Gen. Hardinge, C.B., Commander-in-Chief of the Bombay Army, will succeed Sir D. Stewart, as Commander-in-Chief in India.

The military correspondent of the *Pioneer* writes:—"I hear that Sir Thomas Baker is a warm candidate for Sir George Greaves's place as Adjutant-General in India. I doubt if he would be near as good a man for the work as Col. Elles, who is a complete master of the business, so far as the subject of discipline is concerned." "There is also," says the *Times of India*, "another warm candidate for the place in the person of Gen. Annesley, the Adjutant-General of the Bombay Army. Gen. Annesley was for many years the able commander of a crack cavalry corps; in the War Office he became conversant with bureaucratic work; and he has proved himself to be a most successful Adjutant-General. Gen. Annesley is well acquainted with India, the habits and customs of both the Bengal and Bombay sepoy, and has passed the higher-standard both in Hindostanee and Persian. It would be in one way a great advantage to the Presidency if Gen. Annesley was translated to Simla, for he might remove some of the dense ignorance which prevails in that hill station regarding the Bombay Army."

It is reported that the question of granting certain allowances to medical officers of the Indian service, when placed in temporary charge of British troops on the line of march, has been decided. On such occasions it is intended to grant certain extra allowances, viz.:—For an entire regiment, 100 rs. per month; for a wing, or a detachment equal to a wing, 75 rs.; for a battery of Royal Artillery, 50 rs.

A Reuter's telegram to the *Standard* states that:—"A scheme for increasing the Indian Army is under the consideration of the Indian Government."

Obituary.

Gen. George Warren. This distinguished officer, who died at his residence, 1 Brandon Terrace, Southsea, on the 22nd inst., in the 84th year of his age, retained to the last an unclouded mind, and the incidents of a remarkable and varied career, military and sporting, were to the last as vivid in his marvellous recollection as on the dates of their occurrence. Gen. Warren commenced tiger-shooting in 1821, and closed it with an eventful bag of five to his own "Rock" in 1852, making a grand total of 413 undivided honours, as, shooting as a rule by himself, he could, and always did, claim his own skins. The records of his prowess with gun, rifle, and spear, for, light in weight, lithe and active, he was a splendid horseman, and distinguished in pig-sticking exploits, immortalised in the pages of a Calcutta sporting magazine. At the period of his death, and for some time previously, Gen. Warren was the senior officer of the Indian Army, embracing those of Bengal, Madras, and Bombay. He obtained a cadetship in 1818, and did duty with the Bengal European Regt. Dying, to use his own words, "a staunch Bengal Fusilier," it was a source of chagrin when his old corps, endeared to him by the associations of a connection of 41 years, lost its individuality in the nothingness of a territorial designation, an incongruous medley of Line, Militia, and Volunteers, 1st, 2nd, 3rd, and 4th Battalions. In the latter end of 1825 fate led the regiment to Bhurtpore, where, in 1805, it was nearly annihilated. Warren was severely wounded by a deep sabre cut, a slash on the left side of the face, and on the left hand, which necessitated amputation of the first joint of the thumb and the loss of two fingers. Just seven years after obtaining his company, he had the unprecedented good-fortune to secure his regimental majority. Before the close of 1838, war was declared against Dhost Mahomed. At Ghuznee he was struck by three balls,—one shattering the bone of his right arm above the elbow, the second taking the upper part of the left wrist, and the third grazed the body. In Oct., 1839, Lieut.-Col. Warren left Cabul, and on arrival at Meerut was gratified by the announcement that the Governor-General had appointed him "Town and Fort Major of Fort William." The Earl of Auckland, in complimentary terms, expressed the pleasure it gave him to provide for "one so badly wounded." In the space of a few years the garrison non-commissioned staff was composed entirely of serjeants from the European regiment, and strict and effective discipline reigned in Fort William. In 1842, Col. Orchard, then commanding the European regiment, was appointed a brigadier in the Army of Reserve, and Lord Ellenborough wrote expressing a wish for Col. Warren to take his place. This he did at Kurnaul, for the first time seeing the corps as "Light Infantry." On the break-up of the Army of Reserve, Col. Warren resumed the duties of his office at Calcutta, remaining in possession till he fell into colonel's allowances. His subsequent duties being in brigade commands were unconnected with the regiment, though he remained attached to it till 1861. In 1852-3, Col. Warren commanded, as Brigdr.-Gen., the Bengal Brigade in Burmah, in the expeditionary force under Gen. Godwin, and also the Barrackpore command, and, in returning from the former, met his old corps for the last time in India, but again renewed acquaintance with it on its arrival in England, having beneath its colours won the Order of the Dooranee Empire, medals with clasps for Bhurtpore, Ghuznee, and Pegu, and two wound pensions. Gen. George Warren was a type of the men who won empire and honour for England in its far dependency. The last Military pageant in which the deceased General officer bore a conspicuous part was on the occasion of the old colours of his regiment being deposited in Winchester Cathedral in 1871. He resided from 1861 to 1868 in Brussels, having pleasant shooting retreats in Belgium. Gen. Warren was treated with marked distinction by the late King of the Belgians and by the Duke and Duchess de Brabant, and was an honoured guest at the palace of the King. The deceased was twice married, and leaves three sons and five daughters. The following are the dates of his commissions :—Ensign, Oct. 6, 1819; lieut., Jan. 30, 1820; capt., April 13, 1830; major, Feb. 25, 1837; brevet lieut.-col., April 23, 1839; lieut.-col., Aug. 6, 1843; brevet col., July 16, 1849; col., Dec. 5, 1853; major-gen., Nov. 28, 1854. Dates of commission in her Majesty's Indian Forces :—Lieut.-gen., April 6, 1863; gen., Aug. 23, 1869. The deceased was buried in the family vault, Southsea Cemetery, on the 26th inst., being followed to the grave by his family and many distinguished officers—his personal friends.

By the death of Capt. Pauli, her Majesty's Consular service loses a distinguished officer. William Berjew Pauli was born at Belham House, Surrey, on Sept. 5, 1830, and entered the Royal Navy as a cadet in 1845. He served in the Vernon, Jumna, Dædalus, Stromboli, and Rifleman, on the South-East Coast of America, the East Indies, the China and Pacific stations, and was honourably mentioned in despatches to the Admiralty for his coolness and courage on board the Jumna during a hurricane in April, 1848, when she was thrown on her beam-ends and dismasted. In passing for lieut. he obtained a first class in gunnery, and was promoted in May, 1854. He served in the Harrier in the West Indies, and in the Dragon in the Baltic, in 1855, receiving the medal for Sweaborg. When the gunboats were paid off, he proceeded to China as lieut. of the Actæon. In Sept., 1857, in Hong Hong, he jumped overboard and saved a seaman who was blown out of a port and severely wounded in reloading a gun during a salute. He was in command of the Haughty in the bombardment and capture of Canton, and was invalided home in 1858. Being promoted to commander, he retired in May, 1866, on account of his health. He was devotedly attached to the Naval service, and it was, perhaps, the great disappointment of his life to have to give up a profession for which he was so well fitted, and with many of his old companions he kept up an uninterrupted correspondence. Having emigrated to New Zealand, he filled the office of stipendiary magistrate. In 1872 he was appointed to the Consular service, at first to Caldena, and shortly afterwards to Cartagena, in Spain. His exertions during the bombardment of the town in the hands of Intransigentes, won for him the flattering message, through Lord Granville, "that her Majesty had personally approved of his humane and gallant conduct." He also received an address from the International Red Cross Association, expressing "their lively gratitude for his philanthropic exertions on behalf of the Spanish women and children." The *Times* correspondent, in a long account of his conduct, remarked :—"There is no quality which Spaniards admire more than spirit, and the post from which the British Consul had declined to retire was this morning certainly not an inviting one for any man who, as the French say, thought too much about his skin. The feeling spread downwards or upwards, whichever it should be, from the Sovereign Junta to the Sovereign people; and the feeling about the Consul extending naturally to his countrymen, we Englishmen suddenly awoke to the altogether novel sensation of being popular. The Red Cross Knights came to ask the English Consul to go and see Gen. Caballos, to try and obtain a suspension of the firing while the women and children, for whom a steamer was being got ready, were taken out of Cartagena. To go out into the enemy's lines on the chance of their seeing and respecting a white flag was not exactly a proceeding which a life-assurance company would cheerfully encourage its policy-holders to perform; but Capt. Pauli, only too glad of a chance to fulfil the duty for which he had stuck to his post, accepted the mission readily enough. A suspension of firing was arranged, but not kept, however. He succeeded in bringing away some 650 souls on board the Anthion, commanded by Capt. de Amazaga, a heavy interchange of firing going on all the while." He was promoted to be Consul at Porto Rico in 1874, and by a Royal Order of Feb. 24, 1876, Don Alphonso XII. conferred the Cross of the Order of Naval Merit, with a distinctive white badge, "for the important part taken by him in saving the shipwrecked passengers and crew of the Spanish merchant steamer Alegria, which was lost on the reefs of the Isle of Cabras at the entrance of the port, on Nov. 25, 1875. In March, 1877, he was appointed Consul for the Province of Andalusia, with his head-quarters at Cadiz; and in 1878 he went to Manilla as Consul for the Philippine Islands, and finally, in 1881, to Buenos Ayres, whence he was invalided home, broken down by long continued ill-health. There is little doubt that Capt. Pauli's life was shortened by the stress of work which the absence of a Vice-Consul entailed upon him when he was at Buenos Ayres. On his return to England, Capt. Pauli received much kindness and hospitality from the Duke and Duchess of Norfolk, and after he died it was at their special request that his sorrowing widow laid him to rest beneath the solemn shadows of the stately minster at Arundel.

Capt. Sir Alexander Collingwood Thomas Dickson, Bart., R.N., of Sydenham, Roxburghshire, died on Sunday, at Gwydyr, Ryde, in the Isle of Wight, aged 74. The deceased was the fifth but eldest surviving son of Admiral Sir Archibald Collingwood Dickson, second baronet (who died in 1827), by his marriage with Harriet, daughter of the late Admiral Bourmaster, of Tichfield. He was born in 1810, was educated at the Royal Naval College, and in 1824 joined the Cambrian as a 1st-class volunteer. He became a com. in 1842, and was placed on the Retired List with the rank of capt. in 1864. He succeeded his brother as fifth baronet in 1868; but, for want of issue, the baronetcy now devolves upon the late baronet's nephew, Mr. John Poynder, who was born in 1866, and in 1881 took the name of Poynder, by Royal licence, in lieu of Dickson.

The military tournament at the Agricultural Hall was brought to a successful termination on Saturday, when the principal prizes were presented by the Lord Mayor. During the afternoon the most notable competitions were those in which the Artillery took part. For the driving competition, open to Field Artillery in marching order, teams had entered from C Baty. 3rd Brig., N Baty. 2nd Brig., S Baty. 2nd Brig., V Baty. 1st Brig., and W Baty. 1st Brig. S Baty. 2nd Brig. only touched one of the pegs placed to mark the limits of the course during their circuits round the arena, and succeeded in carrying off the first prize. For the second, V Baty. 1st Brig. and W Baty. 1st Brig. tied, and had to go over the course again. On this occasion the latter touched two pegs, when their opponents managed to steer clear of all obstacles. A fair amount of timber was demolished during the trotting and galloping competition open to the Royal Horse Artillery, who had to circle the arena at full speed and pass between temporary gate-posts set 6 ft. 8 in. apart. The entries comprised teams from the B Baty. A Brig., H Baty. A Brig., C Baty. A Brig., C Baty. B Brig., and F Baty. B Brig. In the end the H Baty. A Brig. won rather easily, F Baty. B Brig., who occupied the premier position last year, having to put up with second honours. The excellent display of the 3rd and 15th Hussars, for which it is the intention of the committee to award special prizes, was marked by a slight mishap. Whilst the team of the latter regiment were galloping round the arena one of the troopers came into collision with Rdgmr. Smith. For a minute or so he lay insensible, and it was thought that he had sustained serious injury, but he soon recovered, and was able to walk from the ring without assistance. The chief feature of interest in the evening display was the wrestling on horseback. The 4th Dragoon Guards and the 3rd Hussars were the first to face one another, and the former won, with the loss of two of their men. The 1st Life Guards then met the 3rd Hussars. The former speedily unhorsed the whole of their antagonists without the loss of a man. They had now to meet the 2nd Dragoon Guards, who had drawn a bye, and scored another victory. After a rest the Life Guards met the 4th Dragoon Guards in the finals. To the amazement of all, the Household Cavalrymen were pulled from their horses like sacks, and tumbled on to the tan in rapid succession, the Dragoons only losing a single man, and consequently securing the first prize.

THE CHANNEL SQUADRON.

Vice-Admiral H.R.H. the Duke of Edinburgh was to leave Bantry Bay yesterday, having completed the series of torpedo experiments ordered by the Admiralty. The Squadron will proceed to Torbay and thence to Portland, where it will arrive on Wednesday next. During the stay of the Squadron in Berehaven, two experiments were made with charged Whitehead torpedoes. The steam pinnace of the Minotaur discharged a Whitehead torpedo at a large rock at the head of the bay. The machine ran at a rate of 13 knots an hour, being loaded with a charge of 117 lb. of gun-cotton. It was adjusted to run 400 yards, and was discharged when the pinnace was about 300 yards from the rock. The torpedo, a 16-in. one, weighed 600 lb. It struck the face of the rock 7 ft. from the surface, and threw up about 30 tons of water to a height of 300 ft., also several pieces of rock. The result of the experiment was considered most satisfactory, the more so as the rock was very unfavourable for the purpose, containing a number of crevices, and presenting no even surface such as a ship would. The base of the rock was nearly destroyed, large pieces being disconnected. The second experiment, conducted by the Neptune, was not successful; the machine did not go fair, and missed. It ran its full course of 400 yards and sank. During the stay of the fleet, numbers of successful experiments have been conducted with submarine mines and stationary torpedoes.

THE RESERVE SQUADRON.

(FROM A CORRESPONDENT.)

Heligoland, June 23, 1884.

We left Deal at 4.30 p.m. on the 20th inst. under steam, arrived off Heligoland at about 5 o'clock this morning, and anchored at 3 o'clock this afternoon, but the Hercules and Shannon, not having completed their target practice for the present quarter, were diverted from the remainder of the Squadron at 8 o'clock in the morning, and did not finally rejoin the rest of the ships till 2 p.m. While this operation was being performed the seven other ships were kept steaming up and down, which quite cut one of our harbour days out of the programme, and will prevent many officers from landing at all on Heligoland. The cost of the coal consumed will also be a not inconsiderable item, as these seven ships might have been at anchor at 8 a.m., and the Hercules and Shannon could have executed their target practice and anchored in the afternoon. This waste of fuel is all the more extraordinary, as it was only yesterday the Admiral made a signal to "economise coal." We experienced a strong head wind on Saturday, which enabled the performances of the Hecate in a seaway to be to some extent criticised. The sea was only moderate, but her behaviour under these circumstances certainly does not tend to impress one with a favourable opinion of her merits as a "sea-going ship." Volumes of water rushed over the bows, enveloping a large portion of her in spray; and those on board say that the atmosphere below was heated in the extreme, and totally devoid of ventilation. Everyone on board the Hecate is anxiously longing for the termination of the cruise, as anxiety as to her safety has been by no means allayed, besides which she is an uncomfortable ship in every sense of the word. The wind, which had been ahead on Saturday, chopped round yesterday, so that in the morning the ships were able to set their foresails, and in the evening their topsails and topgallant sails, which admitted of the engines being slackened, and the consumption of coal reduced. We have had no more steam-tactics since I last wrote, as Saturday was devoted to "cleaning ship." Yesterday was a day of rest, or at any rate as close an approximation to it as one usually gets on board a man-of-war; and to-day we certainly have been performing steam-tactics, but not of exactly the same description as those laid down in the "Manual of Fleet Manœuvres." I feel bound to say that the ships of the Squadron have, up to the present time, kept station very badly. The other night the Valiant approached somewhat nearer to the Hector than was pleasant for those on board the latter vessel; and the Defence is continually seeing how near she can get to the Valiant without touching her. The other line, consisting of the Hercules, Lord Warden, Shannon, and Penelope, keep much better station, but even then there is room for considerable improvement. With regard to smartness aloft, the Penelope leaves the rest of the Squadron nowhere, the Valiant being the next best. Our arrival has created quite a stir among the small community here, as was to be expected, seeing that the island has only 2,000 inhabitants, while the Squadron can boast of 4,500 men. The despatch-vessels, Hawk and Argus, are now both out here, so that there are at the present time 11 of her Majesty's ships at anchor off this little island. The Hecate is, of course, the great object of attraction, or perhaps it would be more correct to say of curiosity, and this is likely to be the case throughout the cruise. We leave on Wednesday afternoon, the 20th inst., for Kirkwall.

The list of Royal Naval Reserve officers would seem to want a judicious weeding. It appears that out of 397 officers there are at present 38 excused from further drill on account of age, while of the remaining 94 are "honorary" only. This leaves 265 of what might be designated active officers, but of these it is doubtful whether we can calculate on obtaining the services of one-third in the event of the Royal Naval Reserve being called out. 123 out of the 265 are midshipmen who have received their nautical education in the mercantile training ships. The Naval Reserve forces altogether require that more attention should be directed to them than they have hitherto received. The drill batteries and drill ships which we maintain at a considerable cost to train this force in Naval gunnery possess nothing but old and obsolete guns, so that the men composing the force have absolutely no knowledge whatever of modern gunnery, either in regard to breechloading, revolving, or machine guns, and if drafted to a modern ironclad the men would be quite as much like fish out of water as any landsman, and the officers more so.

The Gazettes.

TUESDAY EVENING.

MILITIA.

WAR OFFICE, PALL MALL, June 24, 1884.

ROYAL ARTILLERY.

2nd Brigade, Northern Division—Capt. and Hon. Major W. E. Chapman resigns his commission; also is permitted to retain his rank, and to wear the prescribed uniform on his retirement.

3rd Brigade, Eastern Division—Lieut. S. Paterson resigns his commission.

4th Brigade, Scottish Division—Lieut. A. W. Anstruther to be Capt. (June 13).

2nd Brigade, South Irish Division—Capt. D. Sully resigns his commission.

4th Brigade. South Irish Division—Lieut.-Col. Comdt. and Hon. Col. the Hon. C. S. Vereker resigns his commission; also is permitted to retain his rank, and to wear the prescribed uniform on his retirement (June 16).

INFANTRY.

3rd Battalion, the Royal Scots (Lothian Regiment)—The resignation of the commission held by Capt. M. J. Scobie, notified in the *London Gazette* of the 27th ult., is cancelled.

3rd Battalion, the Queen's (Royal West Surrey Regiment)—Lieut. E. J. T. Crutchley resigns his commission.

4th Battalion, the Royal Fusiliers (City of London Regiment)—Arthur Charles Tompkins, gent., to be Lieut. (June 16).

4th Battalion, the Suffolk Regiment—Charles Robert Whorwood Adeane, gent., to be Lieut.

3rd Battalion, the Prince of Wales's Own (West Yorkshire Regiment)—Lieut. G. F. Phillips, from the 5th Batn. the Connaught Rangers, to be Lieut. (June 2).

3rd Battalion, the Leicestershire Regiment—The under-mentioned Lieuts. to be Capts.:—F. H. A. Yates and M. K. D. Whitting.

3rd Battalion, the Royal Scots Fusiliers—Lieut. J. Mackie to be Capt. (June 7).

3rd Battalion, the Royal Welsh Fusiliers—Lieut. A. H. Bindloss resigns his commission.

3rd and 4th Battalions, the Worcestershire Regiment—Capt. O. C. Walcot resigns his commission.

3rd and 4th Battalions, the Duke of Wellington's (West Riding Regiment)—George Edward Moke, gent., to be Lieut. (June 9).

3rd and 4th Battalions, the Royal Sussex Regiment—Norman Burnand, gent., to be Lieut.

3rd and 4th Battalions, the South Staffordshire Regiment—Lieut. G. J. Plevins resigns his commission.

3rd Battalion, the Black Watch (Royal Highlanders)—Cecil Speid Soote, gent., to be Lieut.

5th Battalion, the Sherwood Foresters (Derbyshire Regiment)—Stanley Everard Clay, gent., to be Lieut.

3rd and 4th Battalions, the Queen's Own (Royal West Kent Regiment)—The appointment of Frank Wigram Foley, gent., as Lieut., notified in the *London Gazette* of April 29, is cancelled.

3rd Battalion, the Durham Light Infantry—Capt. H. C. Molyneux is granted the hon. rank of Major; Lieut. G. S. Morris resigns his commission.

3rd and 4th Battalions, the Highland Light Infantry—Lieut. T. C. Nicholson, from the 3rd Batn. the Cheshire Regt., to be Capt.

3rd Battalion, the Connaught Rangers—George Archibald Ponsonby Hume Warden, gent., to be Lieut. (June 23).

6th Battalion, the Connaught Rangers—Capt. R. G. Mostyn resigns his commission.

5th Battalion, the Rifle Brigade (the Prince Consort's Own)—Capt. J. Bell-Smyth resigns his commission; Richard Guy Le Fanu Williamson, gent., to be Lieut. (June 16).

4th Battalion, the Royal Munster Fusiliers—Lieut. R. N. Leahy resigns his commission.

MEMORANDUM.

R. M. Shankland, late Qrmr., 5th Brigade, Scottish Division, Royal Artillery, has been permitted to commute his retired allowance (June 5).

YEOMANRY CAVALRY.

WAR OFFICE, PALL MALL, June 24, 1884.

Royal East Kent—Lieut. George Edward, Viscount Throwley, to be Capt.

West Kent—Capt. G. R. Tufton, 5th Lancers, to be Adjt., in succession to Capt. C. E. Warde, 4th Hussars, who vacates, on appointment to the Staff (June 9).

Lanarkshire (Queen's Own Royal Glasgow and Lower Ward of Lanarkshire)—Sir John Maxwell Stirling-Maxwell, Bart., to be Lieut.; John Watson, jun., gent., to be Lieut. (supernumerary) (both dated June 19).

VOLUNTEERS.

WAR OFFICE, PALL MALL, June 24, 1884.

ARTILLERY.

1st Ayrshire and Galloway—James McHarrie, gent., to be Lieut.

1st Cumberland—Isaac Clark Hodgson, gent., M.B., to be Acting Surg.

3rd Durham—Henry Chapman, gent., to be Lieut.

1st Gloucestershire—Lieut. G. Dunn resigns his commission.

2nd Kent—Lieut. H. Mills to be Capt.

2nd Lancashire—The under-mentioned officers resign their commissions; also are permitted to retain their rank, and to continue to wear the uniform of the corps on their retirement:—Capt. J. Duck and Capt. and Hon. Major P. Kewley.

1st Lincolnshire—Archibald McGuffie Nell, gent., to be Qrmr.

3rd Middlesex—Lieut. E. F. Trotman resigns his commission.

1st Midlothian (Midlothian Coast)—The under-mentioned gentlemen to be Lieuts.:—Thomas Oliver Fraser and Anthony Babington. Frank Wyville-Thomson, gent., to be Lieut. (supernumerary).

1st North Riding of Yorkshire—Lieut. E. J. Sait to be Capt.

1st West Riding of Yorkshire—Surg. G. P. Kelly resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

ENGINEER.

1st Middlesex—Capt. J. T. Wright, R.E., to be Adjt., in succession to Major G. W. Archer, R.E., whose term of service as Adjt. expires (July 1).

2nd Tower Hamlets (East London)—Major A. Kirby to be Lieut.-Col. (April 30).

RIFLE.

1st Volunteer Battalion, the Gordon Highlanders—Lieut. W. Y. MacDonald to be Capt.

4th Cheshire—Wilfrid Francis Hopwood, gent., to be Acting Surg.

1st Cinque Ports—Major F. S. de B. Cooper to be Lieut.-Col. (March 22).

1st Cornwall (Duke of Cornwall's)—John Henry Genn, gent., to be Lieut.

1st Cumberland—Acting Chaplain the Rev. Canon T. K. Richmond, M.A., resigns his appointment.

1st Devonshire (Exeter and South Devon)—Lieut. F. H. Lloyd resigns his commission.

5th Durham—Capt. J. A. Hunter resigns his commission.

2nd Volunteer Battalion, the Royal Welsh Fusiliers—Lieut. R. D. Williams resigns his commission; Lieut. E. C. Hamilton, Retired List, to be Lieut.

1st Hertfordshire—Herbert Gilbert McLachlan Amos, gent., to be Lieut.

1st Volunteer Battalion, the Buffs (East Kent Regiment)—William Reeve Reeve-Tucker, gent., to be Lieut.

3rd Lancashire—Thomas Lawrie, gent., to be Lieut.

4th Lancashire—Ernest Frederick Bagwell Partridge, gent., to be Lieut.

7th Lancashire—Lieut.-Col. J. Kenworthy resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

19th Lancashire (Liverpool Press Guard)—Robert Russell, gent., to be Lieut.

1st Linlithgowshire—Capt. W. Hislop resigns his commission.

2nd London—Walter Arthur, gent., to be Acting Surg.

1st Volunteer Battalion, the Northumberland Fusiliers—Capt. B. P. Selby to be Major.

1st Oxfordshire (Oxford University)—The under-mentioned officers resign their commissions:—Capt. F. S. K. Douglas, B.A., and Lieut. A. V. Paton.

1st Roxburgh and Selkirk (the Border)—Lieut. W. S. Alexander resigns his commission.

1st Shropshire—Lieut. W. H. Meire resigns his commission.

3rd Volunteer Battalion, the Prince Albert's (Somersetshire Light Infantry)—The under-mentioned Lieuts. resign their commissions:—C. D. Hyatt and T. Holt.

2nd Volunteer Battalion, the South Staffordshire Regiment—Lieut.-Col. and Hon. Col. R. B. R. Bedford is appointed Hon. Col. of the Batn.

5th Surrey—Capt. J. D. Mitchell resigns his commission.

2nd Sussex—Capt. E. Henty is granted the hon. rank of Major.

1st Volunteer Battalion, the Royal Warwickshire Regiment—Thomas Richards, gent., M.B., to be Acting Surg.

2nd Volunteer Battalion, the Royal Warwickshire Regiment—Lieut. N. W. Brown resigns his commission.

2nd Volunteer Battalion, the Worcestershire Regiment—Capt. W. Avery resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the battalion on his retirement.

2nd Volunteer Battalion, the East Yorkshire Regiment—Vicars Henry Fisher, gent., M.B., to be Acting Surg.

1st West Riding of Yorkshire—Lieut. T. S. Mason to be Capt.

(Where not otherwise stated, the foregoing commissions and announcements bear date June 25, and the current year must be understood.)

FRIDAY EVENING.

ARMY.

WAR OFFICE, PALL MALL, June 27, 1884.

2nd Life Guards—Capt. E. H. Hanning-Lee to be Major, vice H. R., Viscount Downe, seconded (Nov. 26, 1883). Lieuts. A. C. S. Abdy to be Capt., vice E. H. Hanning-Lee (Nov. 26, 1883); O. H. Ames, from the 5th Dragoon Guards, to be Lieut., vice A. C. S. Abdy.

2nd Dragoons—Lieut. W. H. Hippisley to be Capt., vice the Hon. W. P. Alexander, seconded (June 1).

Royal Engineers—Lieut.-Col. and Col. E. D. Malcolm, C.B., having completed five years' service as a Regtl. Lieut.-Col., has been placed on half-pay (June 11); Capt. R. Calrow to be Major, under the provisions of Article 10 (*b*), Royal Warrant, March 11, 1882 (May 3).

Grenadier Guards—Lieut. the Hon. C. R. W. Colville (Master of Colville) to be Capt., vice Lieut.-Col. W. H. Mackinnon, seconded for service on the Staff (June 8).

Coldstream Guards—Lieut. A. E. Codrington has been seconded for service on the Staff (May 1).

Scots Guards—Capt. and Lieut.-Col. H. Fludyer to be Major, vice Lieut.-Col. the Hon. F. C. Bridgeman, appointed Regimental Adjt. (June 11).

LINE BATTALIONS.

The Buffs (East Kent Regiment)—Lieut. C. L. Connellan to be Adjt., vice Capt. R. G. Kekewich, promoted (Jan. 21).

The King's Own (Royal Lancaster Regiment)—Supernumerary Lieut. E. R. Penrose, who has ceased to be a probationer for the Indian S.C., to be Lieut., vice G. H. Shakerley, transferred to the King's Royal Rifle Corps.

The Royal Fusiliers (City of London Regiment)—Capt. F. C. Annesley, from the 1st West India Regt., to be Capt., vice A. H. Daunt, who exchanges.

The Norfolk Regiment—Major A. H. Longfield retires on retired pay, with the hon. rank of Lieut.-Col.; Lieut. A. C. Becher to be Capt., vice E. B. James, promoted (May 21).

The Lincolnshire Regiment—Capt. J. H. Hodgson to be Major, vice J. W. Lang, seconded for service as an Adjt. of Auxiliary Forces (May 7).

The Devonshire Regiment—Lieut. H. B. Murray, from the Loyal North Lancashire Regt., to be Lieut., vice H. Bower, appointed a probationer for the Indian S.C.

The Prince Albert's (Somersetshire Light Infantry)—Lieut. F. A. Morse, from the Sherwood Foresters (Derbyshire Regt.), to be Lieut., vice C. N. FitzRoy, resigned.

The Prince of Wales's Own (West Yorkshire Regiment)—Major H. McL. Hutchison has been seconded for service on the Staff (April 2).

The Lancashire Fusiliers—Lieut.-Col. and Col. J. J. S. O'Neill has retired on retired pay, with the hon. rank of Major-Gen. (June 9).

The South Wales Borderers—Major S. B. Royds, from the Duke of Cambridge's Own (Middlesex Regt.), to be Major, vice H. M. Williams, who exchanges; Lieut. G. H. Arbuthnot has been appointed a probationer for the Indian S.C. (April 12).

The King's Own Borderers—Lieut. G. N. Mayne to be Capt., vice J. H. H. S. D. Hogarth, seconded (June 2).

The Duke of Wellington's (West Riding Regiment)—Major A. G. J. Robbins retires on retired pay; Lieut. H. R. Saunders to be Capt., vice A. J. Preston, seconded (May 12).

The Border Regiment—Lieut. C. G. Donaldson to be Capt., vice R. H. Anstice, seconded (May 15).

The South Staffordshire Regiment—Capt. F. W. Lyons to be Adjt., vice Capt. H. A. Raitt, who resigns the appointment.

The Dorsetshire Regiment—Supernumerary Major H. R. Young to be Major, vice C. D'O. Harmar, retired (May 30); Lieut. H. J. J. Kentish to be Capt., vice A. G. W. Malet, retired (March 19).

The Essex Regiment—Capt. T. J. P. Kelly to be Major, vice T. E. Stephenson, seconded (Nov. 27).

The Sherwood Foresters (Derbyshire Regiment)—Capt. J. G. Sparkes to be Major, vice W. H. de Salis, deceased; Lieut. H. C. Wylly to be Capt., vice J. G. Sparkes.

Princess Charlotte of Wales's (Berkshire Regiment)—Major F. C. Gavegan retires on retired pay, with the hon. rank of Lieut.-Col.

The Duke of Cambridge's Own (Middlesex Regiment)—Lieut.-Col. and Col. H. M. L. Colquhoun retires on half-pay; Major H. M. Williams, from the South Wales Borderers, to be Major, vice S. B. Royds, who exchanges.

The Durham Light Infantry—Lieut. J. E. Bush to be Adjt., vice Lieut. A. E. Binyon, deceased (April 15).

Princess Victoria's (Royal Irish Fusiliers)—Capt. C. A. Barker to be Major, vice H. L. Harvest, retired (May 14).

Princess Louise's (Argyll and Sutherland Highlanders)—Capt. E. H. Studdy retires from the service, receiving a gratuity; Lieut. D. G. M. Fowler to be Capt., vice G. B. Robbins, seconded (June 2).

The Royal Dublin Fusiliers—Lieut.-Col. J. A. Corballis to command a battalion (May 21).

1st West India Regiment—Capt. A. H. Daunt, from the Royal Fusiliers (City of London Regt.), to be Capt., vice F. C. Annesley, who exchanges.

Royal Malta Fencible Artillery—Lieut. (with local and temporary rank) A. Cavarra to be Capt. (with local and temporary rank), vice A. Gatt, appointed Adjt. (May 15).

Staff—Capt. C. E. Warde. 4th Hussars, to be Aide-de-Camp to Major-Gen. L. E. Knight, commanding the troops in the Belfast District (April 19).

Commissariat and Transport Staff—Conductor of Supplies G. Forde to be Qrmr., vice W. D. Kennedy, deceased.

Medical Department—Deputy-Surg.-Gen. W. G. N. Manley, V.C., is granted retired pay, with the hon. rank of Surg.-Gen.

Army Hospital Corps—Capt. of Orderlies T. Thompson to be Qrmr. (dated July 1, 1881, such antedate not to carry back pay as Qrmr. prior to June 2).

Army Pay Department—Pymr. and Hon. Major J. B. Thompson has retired on retired pay, with the hon. rank of Lieut.-Col. (June 25). The under-mentioned Pymrs. and Hon. Capts. to have the hon. rank of Major:—G. Shields (June 19), J. Bromfield (June 23), J. E. Orange and A. P. G. Dowdall (both dated June 24). Lieut. W. B. Broughton, from the Dorsetshire Regt., having resigned his combatant commission, to be Pymr., with the hon. rank of Capt. in the Army (Oct. 31, 1883).

Veterinary Department—The surname of Vet.-Surg. Alexander Henry Waddell is as now, and not as hitherto, stated.

Half-Pay—Major and Col. H. E. Jerome, V.C., half-pay, having served five years as a substantive Major on the Staff, to be Lieut.-Col. (May 15).

MEMORANDA.

Capt. and Lieut.-Col. W. E. Montgomery, Scots Guards, to be Col. (May 11).

Lieut.-Col. E. M. Beadon, the King's (Shropshire Light Infantry), to be Col. (June 21).

Deputy-Comy. and Hon. Capt. C. Owens, Bengal Establishment, to have the hon. rank of Major on retirement (Feb. 26).

Qrmrs. J. Baker, retired R.M.L.I., to have the hon. rank of Capt. (June 5); J. Kelly, 21st Hussars, to have the hon. and relative rank of Capt. (June 10).

Lieut. M. A. Cameron, R.E., to have the local rank of Capt. whilst employed as Deputy Colonial Engineer in the Straits Settlements.

RESERVE OF OFFICERS.

Lieut. S. Nicholson, Capt. 3rd Batn. the Bedfordshire Regt., to be Capt.

To be Lieutenants:—Lieuts. J. A. Carpenter and W. C. Horsley, 20th Middlesex R.V.C., and W. J. Terrill, 1st Cornwall R.V.C.

(Where not otherwise specified, the foregoing commissions and announcements bear date June 28, and the current year must be understood.)

London Amusements.

The Royal Italian Opera, COVENT GARDEN, preserves an attractive programme. On Saturday evening, Madame Adelina Patti repeated her popular impersonation of Rosina in Rossini's melodious "Barbière di Siviglia," but was not very strongly supported. On Monday evening, Miss Gertrude Griswold, who has passed from the concert-room to the lyric stage, made her first appearance on these boards as Margherita in Gounod's "Faust." The young American soprano, who is a niece of Mr. Bret Harte, has a good voice, which has been highly cultivated in Paris, and her reception was exceedingly encouraging. On Tuesday, Madame Albani, Madame Sembrich, and Madame Pauline Lucca appeared again in "Le Nozze di Figaro." On Thursday, "Dinorah" was given, with Madame Adelina Patti as the heroine; and for this (Saturday) evening is reserved "Don Giovanni," with a cast promising a most satisfactory representation. The opera has not been played here for two years, and the interest will be increased by the principal parts being now sustained by Madame Patti, Madame Latener, and Madame Furset-Madi, who will make her first appearance this season. The programme of the German opera has this week included "Fidelio" and Mr. C. Villiers-Stanford's great opera of "Savonarola."

At the GAIETY Madame Judic has repeated her lively impersonation of the volatile heroine in "Nitouche," and on Monday next, Madame Sarah Bernhardt is to appear in "Fédora." Mr. Edward Terry, who is now making a holiday tour through Russia, will return at the end of July, with other members of the regular Gaiety company, and perform in comedy and burlesque for a season of three weeks, commencing early in August.

The elaborate revival of "Twelfth Night" is fixed at the LYCEUM for Tuesday evening, July 8. On the preceding Saturday night and Monday the theatre will be closed for dress rehearsals. A special morning performance of "Much Ado About Nothing" will be given on Saturday, July 5.

At the COURT THEATRE a new interest has been imparted to the late T. W. Robertson's comedy of "Play" by an advantageous change of cast. Mr. Arthur Cecil now represents the character of the Hon. Bruce Fanquehere, which he embodies with admirable effect, and Mr. C. A. Maltby humorously embodies the fussy Mr. Bodmin Podder. With the highly-entertaining after-piece of "My Milliner's Bill," in which Mrs. John Wood is so exceedingly amusing, the present programme will run merrily on to the close of the season.

The CRITERION has been supplied by Mr. James Albery with an Anglicised version of MM. Barrière and Goudinot's elaborate farce of "Tête de Linotte," originally produced at the Vaudeville, Paris, in September, 1882. It can hardly be said that "Featherbrain," as the adaptation is called, faithfully reflects the eccentric humour of the original piece. The plot arises out of the complications resulting from the loss of a packet of love-letters written by a foolish young cousin to the flighty young wife of a stupid old husband. "Featherbrain," first acted by Mdlle. Legualt, is here acted with some piquancy by Miss Marie Jansen, and Mr. Mackintosh is the fatuous husband, originally represented by M. Parode. In the English version, the prominent personage is the amorous Portuguese nobleman, excellently portrayed by M. Marius, and Miss Rose Saker, Miss Annie Rose, Miss Norreys, and Miss Evesson agreeably fill up the female portion of the cast.

To the AVENUE THEATRE has been transferred Mr. James Mortimer's adaptation called "Gammon," first played at the Vaudeville Theatre, Strand, at a morning performance two years since. It is the expanded version of a two-act comedy entitled "La Poudre aux Yeux," produced at the Gymnase in 1861. A burlesque of the Haymarket revival of "The Rivals" was added, with very unsatisfactory results.

At the ALHAMBRA the clever juggling performances of M. Trewey have added a fresh attraction to the spectacular German opera of "The Beggar Student."

Mr. Frederic Maccabe, the most variously accomplished of our entertainers, has returned to England after a prolonged tour through America and Australia. On his reappearance at the GREAT ST. JAMES'S HALL on Monday night, he was warmly welcomed by a numerous audience, and for two hours kept his auditors in a most mirthful mood by his clever impersonations and the display of his marvellous ventriloquial deceptions.

Successful Candidates examined by C. S. Commission for 32 Naval Cadetships:—

	Names.	Marks.
1.	Arthur Russell Hulbert	1418
2.	Hon. Algernon Douglas Edward Harry Boyle	1378
3.	Richard Harry Parker	1322
4.	Frank Russell Hudson	1312
5.	John Percival Shipton	1222
6.	Montague Lister Hulton	1204
7.	Francis Elliott Walters	1197
8.	Harry Clarence Boyle	1193
9.	Algernon Walter Heneage	1177
10.	Herbert William James	1151
11.	Francis Gerrard St. George Brooker	1147
12.	Llewellyn Griffiths	1123
13.	Llewellyn Dillwyn Crichton	1064
14.	John Alexander Waugh	1053
15.	Edward Montgomery Phillpotts	1032
16.	Donald Osborn Springfield	1030
17.	Montague William Consett	992
18.	Arthur Courtenay Stewart	989
19.	Henry Gossett Vereker	986
20.	Hugh Fitzroy Hopkinson	978
21.	Henry Edmund Sharp	968
22.	Charles Tuthill Barrett	963
23.	Edwin Harold Edwards	960
24.	Henry Arthur Lyall	954
25.	Stewart Ayscough Perry-Ayscough	888
26.	Thomas Charles Brown	887
27.	Frederick Lawrence Field	881
28.	Thomas Leslie Thorpe Double	834
29.	Henry Douglas Gerrard Foord	827
30.	Horatio Walcot Colomb	814
31.	Arthur Hugh Oldham	787
32.	Launcelot Charles Cox	752

MR. RICHARD JAMES WOOD,

AT THE OFFICE, 16 WELLINGTON STREET, STRAND, *and* NOT *to the* Editor *of the* Army and Navy Gazette.

The subscription to the paper is 7s. per quarter, or 28s. per annum, PAYABLE IN ADVANCE, *inclusive of postage to any part of the United Kingdom.*

To India, £1 12s. 6d. per annum.

The Army and Navy Gazette *can be obtained in Paris of our Agent,* Mr. J. W. S. NEAL, *English Stationer, 248 Rue de Rivoli, to whom Advertisements and Orders for the Paper may be sent.*

IN a recent number, we quoted some passages from the Official Report "on the British Naval and Military operations in Egypt, 1882," printed by the U.S. Navy Department at Washington; because they justified statements made in the *Army and Navy Gazette* relating to the destruction of rifled guns and torpedoes at Alexandria after the bombardment, which had been contradicted by a Minister of the Crown in Parliament, who, of course, relied on information furnished to him officially by his subordinates. The paragraphs we then quoted amply vindicated the correctness of the statements in question, which, indeed, rested on the ocular evidence of one who was not likely to be led astray in his observations. But the Report is one of a large interest and, as an American friend of ours says, "scopefulness," and we may be pardoned if we go back to the work, which will not be seen by many of our readers interested in the subject, and if we reproduce the opinions of a professional witness, who evinces in all his remarks a very favourable disposition, especially towards the Navy. The tone of the Report, with regard to the original causes of the bombardment, is altogether in favour of the measure resorted to by Sir Beauchamp Seymour, under the instructions he received from the Admiralty, based on the representations he felt it his duty to make with regard to preparations bearing on the safety of the ships under his command in the harbour of Alexandria. In a very exhaustive and close examination of the injury done by the bombardment, the United States officer notes almost every hit made by the fleet from end to end of the works at the bombardment of Alexandria. The result of his examination is somewhat disquieting, if it be accepted—as we see no reason to doubt it should be—as the candid truth. He considers the range at which the fleet engaged needlessly great. The outside vessels could have got to within 1,000 yards of the Lighthouse Fort, and within 500 yards of Ada and 200 yards of Pharos, and along the southern shore the ships could have got within 800 yards of all the batteries. Hammering away "at long taw" was very skilful, but it was a disappointment to those who expected short work to be made of the Egyptians, and drained the stock of ammunition to a dangerously low ebb. It must be remembered that the target for each ship at Alexandria was generally the muzzle of a gun—a pin's-head—and a hit meant "good-luck," or phenomenal shooting. Ships engaging forts not superior in force gain more by anchoring, from greater accuracy of fire, than they secure safety by keeping under weigh. The account of the operation is, we think, conceived in a spirit of candid criticism, and some of the remarks of the United States official reporter, corroborated as they must be by the experience of our own officers, deserve the most profound attention from our authorities. Here is an example:—

> "In view of the tremendous fire to which Fort Mex was subjected, and the comparatively short range at which all the ships except the Temeraire engaged it, it is almost impossible to believe the fact that not a single gun here was dismounted or disabled during the action proper. The 10-inch and the 9-inch rifled guns were wrecked with gun-cotton. The 8-inch gun was bowled over by the Penelope long after the fort had ceased firing, and from a distance stated to be about 300 yards. The successful shot was the thirtieth of this series, and was aimed by the gunnery lieutenant. . . . . . Mex was the only fort at Alexandria which could not have resumed the action on the following day, for the party which landed from the Invincible completed the work of destruction but just begun by the fleet, ruining the carriages of the two heavy guns by exploding gun-cotton inside the brackets, and spiking the remaining guns in the lower batteries. Except for this gallant and eminently successful exploit, the parapets might have been sufficiently repaired during the night by heavy gangs of natives to enable the garrison to reopen fire."

As to the defence by "the natives," he says:—

> "The Egyptians had lost so severely that only men of a high order of bravery could have been induced to expose themselves to a repetition of the hammering they had endured on July 11. The actual garrison was whipped, and thoroughly whipped, after a most creditable and determined resistance; but it is hardly to be doubted that if it had been of a *personnel* similar to that on board the attacking fleet, the spiking party would have had difficulty in executing their task, and on July 12 the challenge from the ships would have been promptly accepted."

Again, he says:—

> "In considering the state of the southern line of defences of Alexandria after the bombardment, it is more than ever necessary to distinguish between the real and the apparent damage done to them; the former being those wounds which immediately affected their fighting qualities, in the disabling of the guns, the fatal breaching of the parapets, the wrecking of the gun-pivots, or the destruction of vitally important stores of ammunition; the latter being shell marks on the parapets, not necessarily fatal, however large, and especially shot wounds and holes in the buildings within the enceinte. Self-inflicted harm on each side is, of course, excluded. Applying this test, and summing up the injuries received by the fortifications of this line, one is amazed to find how slight they were in reality. Including even the rifled gun in Mex, which was dismounted by the Penelope at leisure after the fort had ceased firing, the following is the loss of offensive power occasioned directly by the Fleet:—In Saleh-Aga, one 6½-inch S.B. dismounted; in the next battery, one 10-inch S.B. dismounted; in Oom-el-Kabebe, one 6½-inch S.B. dismounted; in Martello Tower Battery, one 10-inch S.B. dismounted; in Mex Fort, one 8-inch M.L.R. dismounted. These make a total of but five guns in the sea batteries extending from Saleh-Aga to Marsa-el-Khanat, and including both works. In the foregoing description of the effects on the fortifications at Alexandria of the bombardment by the vessels under Admiral Sir Beauchamp Seymour, great prominence is given to the Inflexible's practice."

These were the results of the bombardment in which 3,198 projectiles were launched at the works, a general average of twenty rounds per heavy gun! In "General Conclusions," the writer comes to the conclusion that "recent high-powered guns are not adapted to bombarding earthworks, and that the batteries of ships ought to be composite, unless they are armed for the purpose of either engaging other ships or batteries exclusively." A British Naval officer, present at the engagement, he says, stated his opinion that an old line-of-battle ship would have been more effective than the modern ships which took part in the bombardment. All the directions open to the development of ordnance at present are, he asserts, in the way of vertical fire. But it is impossible not to draw the broad inference, says Commander Goodrich, that vessels are not yet able, and never will be able, to fight on even terms with forts. Forts, no doubt, will not *stop the progress* of modern ships; and the works at Alexandria against a fleet, in the way of impeding its progress, would have been utterly powerless

With regard to the unfortunate and costly incendiarism, which has laid upon Egypt a debt of upwards of £4,400,000, the writer makes the candid remark:—

> "It is easy to be wise after the event, and therefore it cannot now be doubted that, in this way, the true state of the *morale* [*moral*] of the garrison would have been revealed, and possibly such measures taken as might have prevented the burning of the city. A few hundred men could have seized and held the place on July 12, so great was the fear on the part of the Egyptians, both soldiers and citizens, caused by the bombardment—a fear not known, at the time, to the British Commander-in-Chief. In consequence of the lack of information, this memorable battle was followed by one of the most shocking, wanton, and deplorable catastrophes of the century."

Of the enemy, whom it is so much the habit of the newspapers here, and of their allies, the annexationists in Egypt, to discredit, Commander Goodrich observes:—

> "The Egyptians were overmatched in guns both as to size and number, but the way that they responded to the heavy fire from the English Fleet was marvellous, standing to their batteries with unexpected and admirable courage. When the Inflexible's 1,700-pound projectiles struck the scarp of the Light-House Fort, immediately underneath an embrasure, they would throw up a cloud of dust and fragments of stone as high as the light-house itself. To the looker-on it seemed impossible to live under such a fire, yet after a few minutes the dust would clear away and the gun's crew would pluckily toss another shell back at their huge opponent. The Egyptian practice was naturally subjected to keener criticism than the British, as the fall of each shot that failed of its target could be distinctly seen. The error was, generally speaking, caused by too much elevation. Certain of the guns were pointed with 'consummate skill,' notably one 36-pdr. (6½-inch S.B.) in the citadel of Mex, which hulled the Invincible with persistent accuracy."

In the end, the Report sums up as follows:—

> "The forts at Alexandria were badly bruised, but the more modern parapets were not seriously harmed. In the generality of cases the real damage they sustained could have been easily repaired in a single night. If the bombardment was directed against the forts in this, their defensive capacity, it must be pronounced a failure. If its object was the dismounting of the new rifled guns, it must be conceded that such results as attended the work of the inshore squadron (only one gun of this type being seriously affected), or even such as were achieved by the offshore squadron (less than one-half being permanently disabled), do not justify the verdict of success. In the wider sense of having driven the garrison from their batteries, and having silenced the forts, the fleet was unquestionably victorious. Into this product, however, enters the important element of *morale*. The British, while surprised by the tenacity of their opponents, were the first to confess that men of a stamp at all similar to their own would have accepted the gage thrown down the next day, and have renewed the fight. With a heavier sea running, to render the fire of the fleet less accurate, and to embarrass the operation of replenishing its almost empty magazines and shell-rooms from the ammunition vessels in the outer roadstead, can any doubt be reasonably entertained that the struggle would have been vastly prolonged, even if the final result had been unaltered?"

And we entreat those concerned to turn their thoughts and their work to the vital matter touched on in the following sentence:—

> "Of the fuzes used by the British, the greater part were the 'general-service' percussion. It is impossible to exaggerate the misbehaviour of the fuze on the occasion of the bombardment. The most careless witness of the action could not help noticing the frequency of premature explosions, and of failures to explode at all. It is not beyond the limits of fair estimation to set down the number of the latter as reaching several hundred, while some British officers think the proportion no less than four-fifths of all fired. In several instances fuzes were driven bodily into the bursting charge without exploding the shell. The stoutest apologist for this fuze, urging that it was designed for use against armoured ships, and therefore given a retarded action, could neither expect nor desire a more violent impact than is shown by this fact to have taken place. As a result of the unreliable nature of these fuzes, it may be mentioned that one of the Penelope's 8-in. shell was afterwards found lying harmless in a magazine containing over four hundred tons of powder."

With regard to Machine-Guns, which some of our officers seem to have "upon the brain," the opinion of Commander Goodrich is not so high as that of the enthusiasts. He says:—"it was quite impossible to determine their exact value. The appearance of the building immediately in rear of the batteries, scarred and pitted, proved that those weapons must have had some effect;" but he says that "had the Machine-Guns contributed in any great measure to the result of the fight, they would have left more traces on the guns." "Their value against properly-constructed forts can hardly be problematical,"—by which he means that they were of very little use; for he goes on to say:—

> "If mounted in the tops, and used at short range, against low parapets, as at Mex, they may be very useful, but in a general engagement at long range, as in the case of the outside Fleet, where the fall of the bullets could not be observed and the aim corrected, owing to the distance of the object aimed at and the thickness of the smoke, they cannot be considered as really formidable."

The dangerous exhaustion of the magazines is noted, but the writer was not aware apparently of the more alarming fact which came out, that the means of replenishing them with projectiles of the larger sizes at the nearest depôt would not have been sufficient to have enabled the fleet to have continued the bombardment, or to have entered upon an engagement with an enemy of similar force at sea. The Report is accompanied by a volume of photographs of the forts, guns, and copious illustrations; and it also gives an account of the military operations on shore, and of the actions which planted us in Egypt, and enabled as to begin our career of fiasco-making.

ELSEWHERE will be found an abstract of a conversation between Mr. A. Bartlett and the Under-Secretary of State for Foreign Affairs respecting what is called the neutralisation of the Suez Canal. The neutralisation of the Suez Canal involves the neutralisation of Egypt, which is a matter more easily talked about than satisfactorily arranged. Egypt is not like Belgium, or like Switzerland, surrounded by powerful civilised States, which have a common interest in guaranteeing the observance of the conditions under which the neutrality of these States was accepted and declared by Europe. In the case of Egypt, on the West there is actually no boundary which can be drawn between the Khedive's dominions and those of his neighbour, the ruler of Tripoli. There are sandwiched in between the Viceroy and the Sultan, *quasi*-independent rulers who have, to a great extent, absolute control over their unsettled populations; and of these Senoussi may be taken to represent a considerable number. To the East of the Suez Canal there is a desert, beyond which extend the Empire of Turkey and the control of the Sultan, not easily defined by any natural line or boundary; and to ensure the neutralisation of the Canal, it would be necessary to demand from the Sultan the cession of a portion of his territory to prevent operations against the Canal from the East by the troops of any Power which might have established Military ascendancy in the region, and be desirous of destroying ships, troops, or commerce, using the Canal belonging to a country with which their master might be at war. We have very great faith in treaties, provided always there is not some immense interest to be gained or maintained by breaking them. The violation of treaties is often the cause of war, just as the end of war is to establish relations by treaty which shall have binding influence until some greater force tends to destroy them. To the South, we know what difficulties there are at present to be found in drawing a frontier line at all between Egypt and the Equatorial lakes; although Sir Samuel Baker has, in a paper with much of which we agree—dissenting, however, from several of his conclusions—given us a very fair and reasonable outline of a line on the map which might be accepted with advantage by Egypt as the furthest limit of her Southern provinces. The littoral of the Red Sea from Massowah to Suez is well defined enough; but it is when we come to the Canal itself that difficulties of the most serious nature would be likely to arise in war-time. We fear it would be too great a strain upon the morality of any victorious Admiral who, having swept the Chinese and Indian Seas of all his enemies, and chased them up into the Gulf of Suez, should find himself at the last moment restrained from their utter destruction by the obligation of a treaty to hold his hand on some plea or another; or, inverting the case, too much to expect that should a Naval Commander in the Mediterranean have succeeded in driving before him all the hostile Naval forces which it was his great object to annihilate, and were to find them quietly anchoring in front of Port Said, within three miles from shore, and be told that he must not touch them, that he would not discover some reason to go in and win. There are other contingencies, numerous and strange, which may be imagined without any great difficulty, placing considerable doubt on the due observance of the artificial conditions imposed upon Europe with regard to the Suez Canal. We do not say they are insuperable, but certainly it would be rather hazardous to rely upon their being, under all circumstances, held in superstitious reverence. Major Maurice has given us some historical instances of war being commenced without notice, and in nearly all such cases treaty obligations have been disregarded. It is not a more flagrant crime, unless the punishment be sure and tremendous, for a country in time of peace to send off a fleet and bombard the capital of a friendly State, and seize upon its fleet, because there were reasons to believe that the ships might be used against itself by another Power, than for a Great Power deliberately, in the interests of self-preservation, or in the execution of some masterpiece of policy, to run all the risks of violating the neutrality of a State declared to be neutral by Great Powers, some of which may be indifferent to its fate, and others unable to avert it. With these reservations, however, it would seem as if the neutralisation of Egypt, involving that of the Canal, is likely to present attractions to diplomatists which will ensure their concurrence, if the Conference arrives at the consideration of so large a question in declaring the Canal and the Pashalic to be in a state of neutrality.

IT may appear strange at first sight to find a Naval officer delivering a lecture on "Machine-Guns in the Field" at the Royal United Service Institution. But, up to the present moment, the Navy has had more experience in working machine-guns in the field than the Army has had. Lord Charles Beresford yesterday contented himself with bringing forward a number of facts and opinions, and in making suggestions, none of which were very novel or striking. The lecturer confined his attention to machine-guns of rifle-calibre, or what has been termed in France the *mitrailleuse*, knowing that the superiority of a battery of 6 or 12-pounders over two batteries of guns of half their calibre is generally recognised. In reference to the objection that the French Montigny guns proved a complete failure during the Franco-German War, Lord Charles Beresford repeats the old arguments that batteries were manned by men and officers who had never worked this new and complicated war machine before. The Montigny batteries were badly handled. They engaged artillery at distances beyond the mitrailleur range. Their equipment and mounting were the same as for a battery of field artillery. They afforded exactly as large a target; and the French, except on a few occasions, persisted in using them as guns, instead of as clusters of rifles. Nevertheless, the man-killing power of the French mitrailleurs was repeatedly proved during the war. Lord Charles Beresford referred to the German records of the various battles, to collect evidence of what the Montigny guns really did do. He quoted the Duke of Wurtemburg's description of the fight around St. Privat la Montagne, on August 18, when Marshal Canrobert so stubbornly held that village against the German Guards, to show that the fire of the mitrailleurs was most murderous, but in the text the Duke says nothing of the mitrailleurs at all. At Mars-la-Tour, however, in the official account of that battle, there is specific mention of the arm:—"The fire of the adversary from mitrailleuses advancing to the crest of the hill increases the losses almost to annihilation. Cavalry were then pushed forward by the Prussians to protect the shattered remnant; but, *on account of the violent mitrailleuse fire*, the leader was unable to deliver home his attack." These quotations would refute assertions, if any one made them, that "*because* machine-guns proved useless in 1870, they can never be of any use at all." Since then this arm has been vastly improved. Its range has been increased, its working simplified. For holding or clearing a street, a road, a gap, these guns are admirable. Sir William Hewett, Captain Wilson, Commander Rolfe, speak most highly in their favour. So do Lord Chelmsford, Sir Donald Stewart, General Roberts, General Hardinge, Colonel Holberton, and others. Both Naval and Military officers, however, are of opinion that it is a mistake to mount the rifle-calibre machine-gun as a field-piece. Captain Wilson particularly insists upon their being so mounted on two wheels as to enable their muzzles to be at all times kept towards the enemy when in action. For cavalry, General Hardinge has recommended the adoption of Lord Charles Beresford's galloping-carriage and a ten-barrel Nordenfelt, the five-barrel gun, mounted on tripods to be carried on mules for use with infantry in the hill country. There, wheels are impracticable; wherever wheels can be used, all authorities agree in the words of Lord Charles Beresford, that, "It would be better to do away with the limber altogether for guns mounted for landing purposes,"—that is to say, for machine-guns in the field. But these and much larger questions connected with the employment of these guns must be profoundly studied by experts before the natures of machine-guns, their mountings and use, can be determined. Abroad, they are not in favour, except in the Navies, and in our own Service there is a general concurrence of opinion as to their value.

IN a forthcoming work by an eminent Chinese statesman and traveller, there are some interesting papers on the institutions of the various countries he visited recently; but the acute diplomatist has not specified the nations to which his descriptions relate, and we are therefore unable to locate them, as the Americans say, or to assign any particular countries as the scenes of the labours of those whom he deals with. We have been favoured with advance sheets of the work, and think our readers might like to see a specimen of our Celestial's impressions of the Military and Naval Departments of the Great Powers; and we shall begin with the account of, we presume, the Generalissimo of the Army of the Sultan, though the Chinese word which is translated "Seraskier" might, we are told, bear another rendering. It is headed:—

MILITARY SKETCHES.

No. I.—THE SERASKIER.

There is no hereditary right to the office of Seraskier, but the Seraskeriat is generally given to some relation of the Sovereign. The Capitan Pasha who commands the Fleet may never have gone to sea, and may have risen to power by attention to bookkeeping. Indeed, he may be considered the representative of the democratic element, as the Seraskier represents the influence of monarchical institutions, and what remains of the old constitution. He must have served in the Army, but the Capitan Pasha is not necessarily a sailor. These officers are under the control of the Grand Council of State, chosen by the Sultan from the General Assembly, which is elected by the people, who are supposed to discover the wisest and best men to rule over the country. The Seraskier, who nominally represents the Sultan, is under the orders of a member of the Grand Council, who is responsible to the General Assembly for the efficiency of the military service; but, by a fiction which is not at all ingenious, the Army is supposed, nevertheless, to be under the control of the Sultan. In early life the present Seraskier saw hard service in a great war; nor has it been the lot of many leaders to have gone through such a stress of fight as that to which he was exposed in an expedition against the Kalmuk Tartars. But soon after the Prince returned home, the old Seraskier, who was not a member of the Imperial family, died, and the post was conferred on his Highness, who was the Chief of the Janissaries, and had in two hard-fought fields displayed the personal courage which is an attribute of the Imperial family. His lot fell on troublous times. From that moment he has been constantly engaged in combating changes in the Army forced upon him by the Grand Council, which is now and then driven into frenzies of reform by energetic Mollahs and Moulvies in the General Assembly. At one time there rose up an authority who declared that soldiers would be more efficient if they wore baggy breeches into which they could stow their praying-carpets; at another there was a movement in favour of cutting off the legs of their nether-garments altogether, so as to allow greater play and freedom for the muscles. At each of these reforms the Seraskier was plunged into the depths of woe, and declared to his confidential friends that "the Army was done for." But, mindful of his duty to the Sultan, in public he maintained on all occasions a cheerful and confident demeanour, announced that he was mightily pleased with what had been done, and declared he was satisfied that, with baggy breeches or without breeches at all, the Army was always equally ready to do its duty. The aggravating tendency of the Grand Council to associate successful Pashas, who have been brought to the front by their services in reducing the Arabian tribes, fighting in the Lebanon, or escorting caravans in Mesopotamia, with him in the discharge of his duties was, however, very hard to endure. The Seraskier has now and then threatened to resign; but the influence of the Sultan has been brought to bear to induce him to forego his resolve, and to the advantage of the Army he has yielded to the pressure. None of the Pashas can direct a division as well as the Seraskier. His activity is prodigious, his industry in what may be called the external duties of his office indefatigable. There is no more admirable tactician. His knowledge of the Army is extensive—it might be called profound, but that it is so often baffled by eccentric reformers, and that at times a complete change of names, and styles, and titles drives him a little out of his latitude. He knows the officers of the Army thoroughly, and in the distribution of patronage is in the main exceedingly just and considerate. It is no imputation upon him to say that he is open to the infirmity of considering his own friends are as good as anybody else's; but it can scarcely be said that in order to do a job for his own, he has been monstrously unjust to the merits of other, people. Altogether, the Seraskier has done a great many good things, and has prevented the doing of a great many bad ones; but he has hard lines now and then, and has had to throw up regular defences to hold his own against the shower of boulders to which he has been exposed from outside. The Seraskeriat has undergone great changes recently. The edifice in which the work of the chief department was carried on formerly has been handed over to the tailors and bakers, each man with his own wash-hand-stand and drawers — a stream of water flowing down the centre corridor, and cisterns of ink on all the landings. But another quarter had been prepared for the Chief and his military officers, under the eye of the Moulvie who superintends the War Department. Here, in one room, the Seraskier receives the Pashas and officers who come to him on business with much courtesy and kindness. All who seek him are sure to be received with genial cordiality and something like affectionate welcome. The disagreeable duty of saying "No!" is delegated to an official of high rank, who has acquired such proficiency in the discharge of his functions that those who retire from that officer's presence are overwhelmed with heart-rending sorrow for having inflicted upon the worthy Pasha the exquisite anguish which he has displayed at being obliged to refuse their requests.

THE treacherous attack made by the Chinese on the French column which was marching to take over possession of Lang Son, has naturally createda. painful impression on the other side of the Channel The non-professional papers, as a rule, severely criticise the conduct of General Millot for having allowed his troops to be surprised, and for not having employed a stronger force in the operation in question. They point out that an officer of his experience in Oriental customs,—disregard for treaties, and general wiliness,—should not have allowed himself to have been lulled to sleep and deceived by the "heathen Chinee." They say that the distance to be performed by the French column was 30 leagues, and that General Millot should have known that half-way between his camp and Lang Son was a Chinese force of 10,000 men lying right across his road. As for the column, as far as we know, it appears to have advanced without any of the usual precautions, and with all the confidence of a force advancing through a friendly country. It evidently thought that it would have nothing more to do than to relieve guard and take over the posts from the Chinese, who, according to treaty, were to evacuate the place. It is certain that if General Millot had been aware of the strong Celestial force lying in his path, he would have acted with more circumspection. The military organs, such as the *Avenir*, and the *Progrès Militaire*, *L'Armée Française*, &c., wish to withhold their verdict. The latter journal reminds us of the outcry there was against a colonel who, a couple of years ago, when in pursuit of the imperturbable Algerian chief, Bou Amena, suffered a disaster. It may be remembered that his column was almost annihilated, and that he lost his baggage. The Parisians wanted to treat the colonel as the Common Council wished to treat the Duke of Wellington, when he fell back on the lines of Torres Vedras. And what was the end of this hubbub? The colonel was promoted, for the military authorities refused to endorse the opinion of the public. The military organs are perfectly justified in saying,—Let us wait for further information. There are a good many contradictory statements as to the losses sustained by the French, and the strength of the Chinese force. It is feared in France that the blow dealt to the column was much more heavy than General Millot acknowledges, and that the 10 killed and 42 wounded does not really represent the loss sustained. This is all the more probable since the fighting is said to have lasted for two days, during which the French were driven back for a couple of miles to a place where they found shelter and entrenched themselves. In this position, they were soon reinforced by General Negrier with two battalions and two batteries. The French column, which was 700 strong, was composed of 300 Marine infantry, with native troops and irregulars, and we find it stated in France, as some explanation of the disaster, that the Marine Infantry is highly dissatisfied with the way in which it has been treated, and is terribly jealous of the Line, whose officers are unduly favoured. The question is, What will the French do now? There is a report that M. Jules Ferry intends to demand a crushing indemnity from China, no less a sum than £20,000,000! There is a report, too, that reinforcements are to be sent out, as the ranks of the expeditionary force have been sadly thinned by sunstroke, fever, and cholera. Now, when it was a question of sending out a respectable force to avenge the death of Commander de Rivière, the Government resorted to asking for volunteers, and we believe that each regiment was obliged to furnish a certain number. Will the same system of procuring volunteers on the *nolens volens* principle be again tried, or will the battalions be disorganised, as was the case when the Tunisian expedition was undertaken? These questions are asked with a good deal of anxiety in France. In the *Débats*, we find a few observations which our own Government would do well to bear in mind. When the news of the Lang Son affair arrived, the *Débats* says:—"We were on the point of committing a great fault, which we should have deeply regretted. A portion of our expeditionary force was about to be withdrawn. Fortunately, time was wanting, and only a few Marine Fusiliers were sent to Madagascar; the corps of occupation was not sensibly diminished. We always considered that the withdrawal of our troops would be an act of great imprudence; the event justified our apprehensions. It is enough to recall a very recent episode in order to understand the danger of such conduct. In Tunis we withdrew our troops too soon; the insurrection at once gathered fresh energy, and we were obliged to despatch more troops. These blunders cost men and money, and we must not recommence them." One of the most awkward things about this affair for the French is that at the present season of the year it would be madness to attempt a campaign. Consequently, if it be discovered that the attack on the French column was made in pursuance of orders from Pekin, it will be impossible for some months to come to wipe out the insult by land.

FOR those who have had no conception whatever of the history of British uniforms, the figures in the glass cases at the Health Exhibition possess some value. They convey a general impression of bygone military equipment with some suggestiveness of truth. But to anyone who has studied the arms and uniforms of the past, there must appear a melancholy deficiency in accuracy. The soldier in a red frock-coat, labelled as appertaining to the time of Charles II., is armed with a musket of later date. Infantry were still equipped with pikes about 16 feet in length, or with matchlock muskets fired from a rest. Then, his collar of bandoliers, instead of being a broad buff belt across his chest, is a black strap about his stomach. Infantry soldiers at this period usually wore grey coats and breeches, the drummers being in purple, with badges. In 1687, however, the uniform of the 2nd or Queen's Royal Regiment of Foot is represented to have been a red frock-coat, with the skirts opening and turned back in front; loose green breeches and white stockings; black broad-brimmed hats turned up on one side, and shoes; buff belts, with rapiers and the sweynes feathers, or fixing daggers, for the muskets, now become firelocks. The ringed bayonets seem to have come into use soon after this period. They were invented by the French, and three regiments are related to have been armed with them in one of King William's campaigns in Flanders. The British Infantry certainly wore swords till about 1745; but the soldier labelled "temp. Queen Anne," appears without one. On the other hand, a soldier belonging to 1780, when swords were undoubtedly no longer worn, has one by his side. The soldier of Queen Anne, moreover, has the black Hanoverian cockade. A soldier of George II. may be correct or otherwise as to having a sword, as he belongs to the transition period. But his sword is certainly of erroneous pattern, being either a Highland claymore or old-fashioned heavy dragoon's sword. Till about the middle of the century officers carried half pikes, which appear to have been about 10 ft. in length; and the serjeants had halberds, wearing swords like the officers. Then spontoons, a species of small halbert with a battle-axe head, were borne by the officers. But the officers of Fusiliers, Highland regiments, and of the flank companies of ordinary regiments carried fusils, or light muskets. It appears, however, that in the campaign in America, about 1759, all the officers were armed with firelocks, or fusils. According to a label on an interesting bundle of spontoons, in the armoury of the Tower, they were disused in 1788. Captain Trimmer, in his "Memoirs of the 35th Regiment," observes that when the officer planted his spontoon, his men halted; when he pointed it forwards, they advanced; when backwards, they retreated. Grenadiers at this epoch wore the conical embroidered cap, with the proud words thereon, "nec aspera terrent." The white waistcoat and breeches and long black gaiters were abandoned, with powder and pigtails, in about 1808. Short gaiters were then worn with trousers; and a felt cap, with a brass plate in front, had been substituted for the cocked hat. The officers still wore the old gorget on their breasts, and serjeants carried a spear. The infantry soldier labelled 1812 certainly appertains to a later period. It is difficult to believe that the figure styled "British Cavalry, 1812," in a sort of old French uniform of grey, blue, and yellow, can possibly represent any British uniform. The Heavy Dragoons still were accoutred, at that time, in the red frock-coats, with the skirts turned back, high boots, and cocked hats. The Light Dragoons usually wore a helmet-shaped cap, with a feather at the side and black crest over it. They had blue jackets, buck-skin breeches, and boots reaching to the knee, and their sabres were curved. In 1810, the 17th Light Dragoons wore blue jackets with silver lace, white pantaloons, and Hessian boots, and a fantastic high fur cap. Regiments of Light Cavalry had been formed about the middle of the eighteenth century. In 1745 the Duke of Kingston raised a regiment of light horse, equipped them as hussars, and armed them with short carbines, pistols, and curved swords. The lance was not revived as a weapon till 1816. In pictures of a Highland regiment of about 1770, an officer is represented with a light gun in his hand, and with, of course, a broadsword at his side; but no bayonet is depicted. The serjeant has a halbert, sword, and dirk. The privates have claymores and dirks, as well as their muskets and bayonets. All wear the flat bonnet, with an eagle's feather in the case of the officer. The hair is powdered, and tied in a sort of club at the back. Of course, the later uniforms in the Exhibition are more correct. But even these provoke criticism. It certainly seems that proper advantage has not yet been taken of an admirable opportunity for illustrating the history of our uniforms by a full and accurate series. In a representation of a private of the 35th Foot, 1742, given in the above-mentioned memoir, his waistcoat is orange, and the ample skirts of his red coat are turned back and display an orange lining; the facings being then liberally displayed. His breeches are red, and the white gaiters, gartered with black, ascend above the knee. His sword hangs, or rather is stuck, into the same broad buff belt as his bayonet. The black, three-cornered cocked hat has a white binding. In 1768, the white breeches and waistcoats were introduced, worn with black gaiters, the character of the facings and linings being still continued. Gradually the coats became more scanty, till, under the fashions of the Regency, they were so tight that the soldiers could with difficulty handle their muskets. About 1816, the chaco became great in height, and extremely weighty, with a very tall white feather. Our tunics and helmets look serviceable at present, but they still appear to be insufficiently roomy. Too much seems to have been sacrificed to the desire for smartness. Certainly the earlier Georgian soldiers were provided with admirably roomy skirts, which must have afforded excellent pockets. But the careful powdering and dressing of the hair, according to regulation, must have been almost excruciating. It must have resulted, however, in great neatness and nicety in the aspect of a battalion, when it had been duly accomplished. A humorous conception of the process is given in a picture of this year, in which a string of soldiers is represented as seated athwart a bench, each operating on the pigtail of the man in front of him.

Captain Wilson, in the *Hecla*, left Spithead with the torpedo flotilla—the first of the kind ever formed in this country—on July 2, to join the Channel Squadron at Portland, and arrived there the same day.

Vice-Admiral H.R.H. the Duke of Edinburgh in the *Minotaur*, with the remaining ships of the Channel Squadron in company, arrived at Torbay on June 30, and left on July 1 for Portland, the Squadron arriving there the same day.

Vice-Admiral the Lord John Hay has informed the Admiralty of his intention to leave Suakim in the *Helicon* on July 5 for Suez and Alexandria; on arrival at this latter place, the Commander-in-Chief's flag will be transferred to the *Alexandria*, flagship on the Mediterranean station.

We believe Prince George of Wales will be entered this year at the Royal Naval College at Greenwich.

We wish someone would overhaul the English of the "Admiral of the Fleet Thomas Symonds" before it is let into print. In a letter to the *Morning Post* last Monday from our respected ex-correspondent, he says that the increase of the French Estimates in 1883, the building of 19 ironclads in the same year, "together with the starved, weak state of our Navy, have obliged me to state that the comparative maritime power of Great Britain is of the past."

The Admiralty have decided to attach two gunboats to each large Coastguard district, and to abolish the sailing cutters at present used to convey the Coastguard and Reserve men from port to port. We advocated this step being taken some months ago.

The Admiralty have requested Colonel Arbuthnot, C.B., Superintendent of the Royal Small Arms Factory, Enfield, through the War Office authorities, to turn his attention to the mountings of rifle calibre machine-guns for the Navy, and at the same time to design or select a landing carriage for this new arm. Colonel Arbuthnot, in making this announcement yesterday at the Royal United Service Institution, further stated that their Lordships intended that he should be assisted in the work by a competent Naval officer, and he expressed a hope that Lord Charles Beresford would be selected to act as his colleague. He considered it high time this work was taken in hand, as at the end of the present financial year the Navy will have 600 machine-guns of rifle calibre, and only twenty extemporised landing carriages, already condemned, owing to the experience gained in the Soudan. The military authorities have also decided that all machine-guns in use in the English service shall be of the same calibre as the new infantry rifle now being perfected at Enfield, so that the same cartridge shall be used throughout the service instead of the mixed ammunition at present served out. These are all steps in the right direction.

As the *Iron Duke* and *Triumph* are both ready for commission, after extensive and costly refits, it would, we think, be advisable to utilise them to replace some of the dummies which at present constitute our Reserve Squadron. The *Defence*, *Hector*, *Valiant*, *Repulse*, *Lord Warden*, and *Penelope* might all, greatly to the advantage of the Navy, be relegated to "Rotten Row."

Ships must have water, one would think, and water must be procured somehow, but the Admiralty apparently think it can be got on board without incurring any expense. When the *Valiant* was at Bantry last winter, great difficulty was experienced in obtaining water, owing to the distance of the river from the ship, and the impossibility of watering there, except at high tide and in fine weather. It was also impossible, except in case of absolute necessity, to condense on board, owing to the ship being housed in for the winter months, and the difficulty of getting the funnel up. The Bantry Board of Guardians, in view of all this, we hear, offered to extend the water supply from the town to the pier by laying down pipes, on condition of a portion of the cost being borne by the Admiralty, or the water used being paid for. Nothing could be more reasonable, we would think; but to save the expenditure during the forthcoming winter, men will have to drag the ship's launch through the sand to procure water, when a trifling outlay would have put water on board.

The decorations granted to the Navy on the Queen's Birthday were certainly meagre in the extreme, and once more disappointing to those many gallant officers who have been hoping year after year for some recognition of their past services. No one grudges Sir A. Ryder his well-merited K.C.B.; but why Sir G. Willes should have been selected for that distinction in preference to many other undecorated officers is a mystery.

The recent attack upon the French troops by the Chinese in Tonquin is but a repetition of the previous tactics of the Celestial Empire in dealing with the troops of European nations after the signature of a treaty of peace. The same thing occurred in 1859. The Treaty had been signed at Tientsin, and the occupation of Canton by the Allies was only continued until the terms of the Treaty, in payment of indemnities, were carried out; but the temptation to attack when opportunity offered could not be resisted, and an uncalled-for assault was made upon a regiment at Mong-Kong, a walled country town a few miles from Canton; the result being that hostilities were resumed, and reprisals taken, much to the detriment of the Chinese. The act of local offence in this case was ignored by the authorities at Tientsin, in much the same manner as Li Hung Chang is said to look on the present collision as no breach of the Treaty, or as a deed that should in any way compromise the Chinese Government. This sort of thing appears strange to a European, but a Chinaman regards it to be the correct thing to conclude a Treaty of Peace at the seat of Government of the Empire, but still commit acts of actual warfare at its extremities. The sooner they are taught to fully recognise the true meaning of a Treaty, and that peace at the capital means also peace at the extremities, the better for all concerned. There is no doubt that, although Li Hung Chang repudiated responsibility in the matter, the French will take good care to compel the Chinese Government to salve the wound.

The Committee on the Instructions for guiding the internal economy of the Royal Marine Divisions met at the Accountant-General's Department of the Admiralty on Thursday last.

The account given by our correspondent with the Reserve Squadron of the performances of the *Hecate* at sea, so far as the cruise has yet progressed, is not a very hopeful one as regards the suitability of vessels of her type for "sea-going ships." Huge volumes of water rushing over the bows of the ship and enveloping a large portion of her in a dense mass of spray, and a heated and arid atmosphere down below, totally devoid of ventilation, scarcely represent the ideal of an efficient ship-of-war at sea, especially when it is recollected that all this is in a moderate sea with only a fresh breeze. When we further consider that the *Hecate* and her sister-ships were reported on by an Admiralty Committee as "safe to go from port to port only in fine weather," we question very much the judgment evinced in sending her to sea, a proceeding which has caused no little anxiety to the relatives and friends of those on board. Experiments which involve the safety of some 150 officers and men are by no means to be desired, so we devoutly hope the *Hecate* will return in safety, and that no more of her class will be sent on experimental cruises of this description. They had much better be retained for the duty for which they were designed and built, harbour and coast defence, unless the result of these trial-trips dissipates the apprehensions which rest on very solid foundations.

The British Tar seems to have changed somewhat of late in his habits, and we doubt very much whether so great an amount of thrift as exists in the English Navy will be found among the seamen of foreign Powers. The Naval Savings'-banks Return, recently presented to Parliament, shows that on March 31, 1882, the deposits and interest amounted to £133,688. There were received in deposits during the twelve months following over £127,714, the interest thereon amounting to over £4.886. During the same twelve months the sum of £126,832 was withdrawn by depositors, and on March 31, 1883, there remained due to 13,509 depositors £139,458, or, say, £10 odd a-piece. The assets of the Naval Savings' banks just exceed the deposits (£139,486 4s. 7d.) by £28 3s. 4d.

We hear that there has lately been a veritable storm-in-a-teacup at Devonport Dockyard. It appears that the Chief Engineer of one of the Coastguard ships refitting there had occasion to visit one of the offices to inquire as to the whereabouts of some demand he had sent in. His inquiries resulted in reference from office to office. A request for some more detailed information as to the probable eventual whereabouts of the document he required resulted in his being requested to remove his cap when in the presence of this dockyard clerk. A positive refusal to receive orders from him in this respect resulted in the matter being referred by the Storekeeper to the Commander-in-Chief, the former gentleman being of opinion that it was not consistent with the dignity (!) of his office that Naval officers should wear their caps when on duty in them. The Port-Admiral supported the civilian against the Naval officer. When the Commander-in-Chief's decision was made known, a garbled account of the affair was supplied to a local paper. The officer reflected on brought the matter to the notice of his Captain, who referred it to the Commander-in-Chief. Endeavours made to discover the author of the paragraph have, of course, been fruitless, and Sir W. H. Stewart has had to content himself with expressing his regret that such an account should have emanated from anyone in the Naval or Civil Service. Why is it that Naval officers are invariably thrown over whenever they have a difference of opinion with a civilian clerk?

Signs of preparations for the moors may be detected in the official answers to the inquisitive Members who wish to find out what Government is going to do, and who "want to know, you know," with regard to many matters Naval and Military. Sir Thomas Brassey is already, we suspect, packing away immense masses of official documents, on the contents of which he will throw a cheering light from the *Sunbeam*; and Lord Hartington has, doubtless, already docketed for him by his assiduous secretary, statistics and reports, and military state papers, to which to give his mind as a refreshment from the cares attendant on the pursuit of the grouse on the moors, or the stag in the forest. It is quite touching to observe the confidence which is inspired in the minds of candid Members by the assurance that the subjects to which they call their attention will be attended to in the autumn. Then is the season when every topic undergoes consideration, and when great resolves are hatched and brought forward to maturity in the fevered and anxious brains of toil-worn statesmen of sporting proclivities. For our own part, we wish them every good fortune and a speedy dismissal to the pleasant retreats where Ashmead-Bartletts cease from troubling and Drummond Wolffs are at rest.

The result of the deliberations of the Aldershot Valise Equipment Committee has been the production of the "modified equipment of 1884," which is now ordered to be tried, and 1,000 sets which have been made are about to be issued experimentally to several battalions. Certain defects were found to exist in the 1882 patterns, which are said to be remedied in the new, for which many fresh advantages are claimed.

It is very pleasant to know that the Royal Society and the British Association have had a hand in amending the regulations for military examinations which are about to be published, and which Lord Hartington desired Sir A. Hayter to inform the House of Commons would be brought into operation after the winter examination of next year. Intending officers ought to be very grateful that the Royal Academy, the Royal Geographical Society, the Society of Antiquaries, the Zoological Society, and the various learned bodies which adorn the metropolis and the great centres of thought, have not been requested to associate themselves with the rules and regulations for the forthcoming scheme to fit them for a military career, by successful answers to the cruxes in all departments of knowledge which have been presented to them.

It is but a short time since that General von Kotzebue, the distinguished chief of the staff to Prince Gortchakoff during the siege of Sebastopol, died at a ripe old age in comparative seclusion. His death was scarcely noticed in the English newspapers, and a letter, giving an account of his eminent services, and of the great consideration and kindness which he always exhibited in his relations with the British Military Authorities during the memorable siege, to the leading journal was suppressed. But Todleben, who declared that General von Kotzebue was one of the most distinguished of the defenders of Sebastopol, was a man whose death could not have been passed over even by the most narrow-minded of foreign journalists. Accordingly, on Thursday, all the papers gave long biographical notices of the splendid career of the great soldier, furnished apparently by one who had been for some time preparing the notes in anticipation of the General's death, as it was well-known for some months past his health was declining rapidly. Elsewhere will be found a detailed account of the work which he did.

We wish Mr. Mallock had not given to the world the painful paper in the *Fortnightly Review*, which sets forth what can scarcely be described as the religious opinions, though they are certainly the fantastic theories, of General Gordon. The actions and practical life of the man and his general good-sense are in such direct opposition to the dreamy, wild speculations which to us seem far more chimerical than the theories of the Irvingites or of the Swedenborgians, that it is with a sense of relief that we close a paper which we read with unmitigated pain and regret.

A proposal has been lately made by Colonel Goodenough for the appointment of a Standing Committee of officers, to act as the responsible advisers of the Secretary of State for War in military matters. Such a committee, in one form or another, exists in most continental countries, and notably in Austria, where Colonel Goodenough, while Military Attaché at Vienna, was an eye-witness of its working; it has achieved very successful results. It is impossible to pronounce on the scheme till we know more of its details. As we understand the proposal, the Committee would have a *locus standi* similar to that of the Council of the Secretary of State for India. We should be glad, however, to know more about its proposed constitution, and especially what relations it would have to the Commander-in-Chief and the Secretary of State for War. If such a Committee is to be of any real use, and to rise above the level of an ordinary departmental board, it should be placed on a permanent footing, and be made independent of the actual Minister of the day, its functions and responsibilities being distinctly defined by Act of Parliament. We understand that the proposal has been received with favour by several prominent Members of Parliament, and it is intended to bring it under the notice of Lord Hartington. We are very glad to hear it. We welcome any proposal, no matter where it comes from, which has for its object to strengthen the military element in the administration of the Army, and to limit the power of the civil control, which has recently been pushed to such unreasonable lengths, and which has reduced the Army to its present deplorable condition.

The departure of Colonel Middleton, with the local rank of Major-General, to Canada from the Royal Military College, will, we are sure, be regretted by very many officers now in the service who passed through in his time, and by those who have been studying there up to the period of his new appointment. Colonel Flood, who succeeds him, will have much to do in fulfilling the expectations which naturally will be formed respecting the commandant who succeeds Colonel Middleton. But he is, if we mistake not, in one sense a comrade of General Taylor, as they were both in the Crimea together, but Colonel Flood's wound at the Alma. where he was on the staff, enabled him to go home for a lengthened period during the war, and he did not enjoy any opportunity of distinguishing himself during the Mutiny, in which the Governor of the Royal Military Academy added to his career of service.

Tuesday's *Gazette* contains some rather curious reading. Some cancellings of appointments, resignations, and secondings, as well as appointments of a class to which there can be no possible objection as long as those who are promoted find themselves in a career which they can enjoy to their own benefit and to that of the service. A Serjeant-Major of the Scots Guards is appointed a Quartermaster, a Colour-Serjeant receives a lieutenancy, one Troop Serjeant-Major is promoted to a lieutenancy in an infantry regiment, a Serjeant also gets a lieutenancy, and one Colour-Serjeant is equally fortunate.

In an article, which is probably due to the fertile pen of Mr. Marvin, in the *Morning Post*,—unless, indeed, General Crealock, who has studied the subject, contributed the paper,—on the "Movement of Russian Troops beyond the Caspian," we have an account, not without interest, of the military dispositions of Russia and the Russians from the Caspian Sea to Merv. Without a map there would be but little use in reproducing the specific allocations of these troops, which, moreover, are subjected to constant change; but as a general result, the force is said not to exceed more than 15,000 in the whole territory. These, however, the author considers are really significant indications of the consciousness of the Russians that they can at any moment detach from their Caucusus Army, 160,000 strong, adequate numbers of men for any purpose they might have in view in the direction of Herat or Afghanistan. Without any unnecessary alarm or panic, there is every need for watchfulness, and when the Delimitation Commission has finished its labours, there is certainly a duty imposed upon the agents of the Government to see that the frontiers once defined shall be scrupulously observed, not only physically, but morally; and that means, at the same time, be provided to assert our rights, and to vindicate our power, without any appearance of undue menace or offensive distrust.

The departure of the 2nd Battalion, South Lancashire Regiment, for Natal will leave seven regiments with both battalions serving abroad, viz., the Essex (44th and 56th), the East Surrey (31st and 70th), the Royal Irish (18th), the Durham (68th and 106th), the Sussex (35th and 107th), the Dublin Fusiliers (102nd and 103rd), and the South Lancashire (40th and 82nd). The Highland Light Infantry continues to have both battalions (71st and 74th) serving at home.

The first part of the second volume of the "Transactions of the Royal Historical Society" opens with the commencement of a paper by Sir Bartle Frere, which he never lived to see in type. It is an historical sketch of South Africa, and it is an admirable *résumé* of the early history of the Dutch settlements at the Cape, which, when carefully perused, will enable English readers to understand how it is that the Holland of to-day has such a sympathetic interest in the fate of the Boers and of the Africanders of their race generally. Independent of the melancholy interest attaching to the paper, we may be sure that the continuation of it, if happily it is carried down to the end, will also enable English readers to comprehend what were the motives and impulses which demanded Sir Bartle Frere's action in the policy which only failed because of the unfortunate instruments and accidents connected with its execution.

In reading of the rascality of true British Christian contractors in the reports of the proceedings of the Egyptian Transport Committee, we have been inflamed with indignation at the idea that the rogues will most probably escape unpunished—they will merely lose the chance of contracts under their old names—and that there is no prompt and ready punishment for the wretches who tried their best to bring ruin on our expedition by poisoning men and horses. An Indian commissariat officer who has had much experience, and who was engaged in resisting the dirty and unsuccessful attempt of the Government to dock the great contractor, Jokee Persand, of his money, in reference to our Christian friends, said, "Well! you know there are pretty sharp customers among the bazarwallahs and contractors in India, but not one of them would venture on such games as were played with our Commandant in Egypt by the fellows at home." And *à propos* of this question of morality we find something to commend to the consideration of the respectable people, who would look with the most holy horror on a "black fellow's" claims to be thought as good as they. The following is a passage, from a speech made by Mr. Seymour Keay at the East India Association, in the course of a discussion on "The Poona Rayyets' Bank":—"As agent of the Presidency Banks of Bombay and Bengal, I have lent—not indeed to the ryots directly, but to the native bankers, who in their turn lent to the ryots—a sum of over seven millions sterling during twelve years, and it says a great deal for the safety of the business which the native banker does, when I state that of that sum of seven millions, every shilling of which was lent to the native bankers without any security except their own promissory notes, I did not lose one single halfpenny by bad debts or otherwise."

The recent movements of troops in the North British district are somewhat unaccountable. The 92nd Highlanders are brought South after only two years' stay in Scotland, the whole of which time has been spent in one station. Surely if it was necessary to make room for the 2nd Battalion Royal Scots, the 92nd might have been moved to Aberdeen, where they would have had a hearty welcome, and no doubt have received a considerable accession of sound Deeside recruits. We are now told that the 72nd at Parkhurst, and the 93rd at Glasgow, are to change stations. Why not let the 72nd go to Fort George, and the 93rd stand fast? We thought the reformers intended to give the territorial regiments a sight of their own district sometimes.

The following seniority list of twenty Captains in Cavalry will doubtless interest some of our readers, and show them what chance they have of getting Captains of 18 years' service to take their places in the event of their wishing to retire as laid down in last Warrant:—Captains Tomkinson, Royal Dragoons, April 23, 1861; Wynter, 14th Hussars, February 2, 1864; Lucas, 3rd Dragoon Guards, November 29, 1864; Cuthell, 13th Hussars, January 24, 1865; Hill, 14th Hussars, May 9, 1865; Thomson, 7th Hussars, July 27, 1866; Stevens, 16th Lancers, August 21, 1866; Becher, 7th Dragoon Guards, September 14, 1866; Beresford, 9th Lancers, June 8, 1867; Phipps, 7th Hussars, June 12, 1867; Godson, 3rd Hussars, July 13, 1867; Wyld, 16th Lancers, September 14, 1867; Welby, 2nd Dragoon Guards, October 16, 1867; Sullivan, 15th Hussars, June 13, 1868; Becher, King's Dragoon Guards, September 30, 1868; Benson, 17th Lancers, January 13, 1869; Paget, 7th Hussars, January 23, 1869; Irwin, 20th Hussars, January 23, 1869; Alexander, 2nd Dragoons, February 3, 1869; and Belwood, 3rd Dragoon Guards, April 3, 1869.

As will be seen on reference to our advertisement columns, preliminary classes are about to be formed in London, under a Volunteer officer of great ability, for the purpose of affording practical instruction to Militia and Volunteer officers in all subjects required for schools of instruction and board examination. As the founder does not seek to make any profit for himself, the classes will be most economically conducted, and should prove valuable to those who are anxious to render themselves efficient in the routine of military duty. Major Davies, the originator of the scheme, certainly deserves thanks for his enterprise, and he ought to be cordially supported.

Although the Queen, when *en voyage*, orders what are called the public to be shut out from the railway-stations, soldiers have certainly no reason to complain of any want of consideration on the part of her Majesty. To the members of the services, her servants, the Queen appears always ready to go out of her way, as it may be called, to bestow on soldiers and sailors marks of the Royal favour. It was in this reign that, for the first time, as far as we are aware, non-commissioned officers and privates were summoned down to Windsor, and there were personally decorated by the hands of her Majesty with the Victoria Cross, or with medals for gallantry in the field. It cannot but have an elevating influence on the character of the Army and of the Navy, which naturally, however, has less field for distinction in the operations which fall to the lot of the services to perform in the small wars which are continually recurring, to be sure that any distinguished act of bravery or conduct will be brought to the notice of the Queen, who is the fountain of all honour; and that soldiers and sailors from the forecastle and the ranks are almost sure of receiving from the hands of the Queen herself the honours awarded to them in the service of the Crown and of the country. We may say, indeed, that for the first time Navy and Army have become, so to speak, nominate in Queen Victoria's reign; and that officers, and non-commissioned officers, and privates, below the rank of captain, have ceased to be anonymous. The institution of the Victoria Cross, which was first recommended by the correspondent of the *Times* in the Crimea, may have, in some instances, developed qualities in the field which have not been in consonance with old traditions, and at first it was certainly regarded with disfavour by old officers. But the advantages, we believe, have far outweighed any of the demerits attributed to the institution of the Victoria Cross; and amongst the former may be reckoned the practice, as it may be called, of the presence of the Queen, and of her active and gracious ministrations, on the occasion when, in her Royal Palaces, the crowning reward of conspicuous gallantry and conduct is awarded to the deserving.

General FitzJohn Porter, whose restoration to the United States Army, after more than twenty years of unjust disgrace and degradation, has recently been voted by Congress, after a heart-breaking struggle for all that lengthened period. He was accused of wilful disobedience, and of something like want of courage, in one of the most critical engagements of the great Civil War of 1861-64, and was made a scapegoat for defeat by all sides with great unanimity. We say his disgrace and degradation were unjust because, after repeated attempts made by powerful enemies, among whom were some of his own brother officers, to prevent investigation and redress, General FitzJohn Porter has been pronounced to be free from blame and to be entitled to the place in the Army from which he was so cruelly forced. When O'Connell was liberated by the decision of the House of Lords, he made a great point of the few months he had passed in comfortable quarters in his prison, and inveighed against the injustice which had deprived him of his freedom; but what can compensate FitzJohn Porter for the misery and the wrong of twenty years? And suppose he had died last year! There is a great lesson to be learnt from his case—and the value of living on and living down is well exemplified by it. But what about those who so cruelly wronged him?

[P.S.—We had written the above in anticipation of a favourable result for the Bill sent up to the Senate, after laborious investigation and long discussion in the House of Representatives. We deeply regret, for the sake of justice and the reputation of a gallant and, we believe, ill-used officer, that President Arthur, acting under the influence of political considerations and parties, thought fit to veto the Bill, and that, on a division in the Senate, the measure was rejected, although the numbers were equal,—the necessary majority in favour of a Bill of the kind not having been obtained to carry it over the President's veto. In addition to the many animosities, wire-pulling, jealousies, and the like, which have obstructed an act of justice, and have discredited the Congress of the United States, must, we fear, be included the consideration, urged again and again, in and out of Washington, that if FitzJohn Porter were restored to his rank, it would be necessary, as a logical consequence, to pay him all the arrears which he would have received had he remained in the Army, and as it is now more than 20 years, such a payment would come to a very considerable sum. It is not *fiat justitia ruat cœlum.*]

What did "Maguire and Manson—Kirkwood and Kelly" do out in India which has exercised *Reis and Rayyet*, an Indian paper, so severely? The journal waxes very eloquently indignant, enlarges on the purity which hitherto distinguished the administration of the law by British judges, and says:—

> "Among the few considerations that reconciled the people of this country to the new alien rule set over them, this peculiarity of the tribunals that alien Government gave, was, perhaps, the most efficacious. The creation of these tribunals, therefore, whether the result of deliberate statesmanship or the mere accident of British rule dependent on the British character, established the Empire more firmly than, perhaps, a century of armed occupation could or all the miserable shifts of unforeseeing despotism. To maintain their purity, or, at least, their reputation for purity (for there is little difference between either in view of the object to be secured), should ever be the care of British statesmen interested in the preservation of the Indian Empire. Ten British armies annihilated in Afghanistan before an advancing Russian force would not, we are persuaded, be a greater disaster to the empire of Britain in the East than the loss of reputation for purity of the English tribunals in India. And be it said to the credit of British statesmanship, if not of British honour, that the annals of Britain's Indian Empire afford but few instances of the wilful condonation in high quarters of judicial recklessness. Unfortunately, however, of late, the tendency is distinctly noticeable in provincial administration of drawing a veil over wilful magistracy. The *esprit de corps* is supposed to justify every act that has for its object the protection of a fellow officer from trouble, even though the latter should deserve removal from the service. The white-washing of Maguire and Manson, of Kirkwood and Kelly, and their *confrères* of the service, are instances in point."

These are dark sayings, but we presume, from the wording, they refer to alleged outrages by soldiers. We have not seen a word about these cases in the Indian correspondence of the *Times*, or other London papers, or in the *Times of India* or *Bombay Standard*. Such accusations deserve to be attended to, for the growth of public opinion in India must exercise a great influence over our rule, whether we like it or not.

The annual meeting of the shareholders of the United Services Proprietary College, Westward Ho! took place in London on Thursday, June 26, Gen. Sir H. Daubeney in the chair. The chairman congratulated the shareholders on the continued success that was attending the school, both financially and educationally. The balance-sheet showed that they might safely have distributed 5 per cent., the maximum allowed; yet, as the school was wholly founded for educational needs, and not as a commercial speculation, the Council recommended that they should content themselves with a dividend of 3½ per cent. As a proof of the excellence of the tuition, he pointed out at the last Woolwich and Sandhurst examinations three boys direct from the school were successful for the former and four for the latter. Major-Gen. Lowry, moved, and Col. Armstrong seconded, the adoption of the report, which was carried unanimously.

The Army.

1st Life Guards. The officers have placed a monumental brass in their memorial chapel at Windsor:—"In memory of Capt. Bulkeley, of Clewer Lodge, Windsor, born Sept. 26, 1807, died May 6, 1882. He served in the 1st Regt. of Life Guards from 1828 to 1849, and to the day of his death remained the true and valued friend of every officer and man. This tablet was erected by his old comrades and their successors in the regiment, 1883." Capt. Dunbar, late of the regiment, died in London on the 30th ult., aged 38 years, much regretted by his old comrades.

2nd Life Guards. Col. Ferguson and the officers entertained the Duke of Cambridge and a large party at dinner on Wednesday evening.

1st King's Dragoon Guards. Capt. and Adjt. Gould-Adams has been granted leave from India to England for seven months, on urgent private affairs.

3rd Dragoon Guards. The regiment has been placed under orders to proceed to India with the 1884-85 reliefs.

5th Dragoon Guards. Troop Serjt.-Major Harrison has been transferred to the Westmoreland and Cumberland Yeomanry.

9th Lancers. It is expected that the regiment will return home with the 1885-86 reliefs.

10th Hussars. Their Royal Highnesses the Prince and Princess of Wales inspected the regiment at Shorncliffe on June 27, when the Princess presented the medals for the Soudan expedition. An interesting incident was the presentation to the widow of a man killed on the battlefield, and to four men still suffering from their wounds, who were brought on to the ground in an ambulance van. The Prince of Wales addressed the regiment as follows:—"I am glad to welcome you home after an absence of upwards of 11 years from England. Eight years ago it afforded me great pleasure to meet you in India. Since then you have been through two campaigns in Afghanistan, and you have only recently returned from an arduous campaign in the East. I congratulate you, Col. Wood, and the officers and men under your command, upon the very high state of efficiency in which I find you, and upon the admirable manner in which all ranks conducted themselves during the time they were in India, and upon their great gallantry in the field. It is now 21 years since her Majesty the Queen conferred upon me the high honour of appointing me colonel of this regiment, and I feel proud of being associated with it. Let me again welcome you home to England." The Prince and Princess were afterwards entertained at luncheon by the officers, and returned to London by special train. The Prince of Wales presided at the regimental dinner at Willis's Rooms, on Monday. There were present to meet his Royal Highness:—Lieut.-Gen. Alexander; Major-Gens. Broadley Harrison and Marshall; Valentine Baker Pasha; Col. Lord R. Kerr; the Earl of Airlie, the Earl of Mayo, Viscount Valentia, Lord Chesham, Lord Alwyne Compton, Sir Thomas Munro, Bart., Lieut.-Col. Sir Charles Frederick, Bart.; Cols. Wood, Cass, Chaine, Buchanan, Bottine, Brabazon, Hon. H. Crichton, Gough, Liddell, Hon. H. Molyneux, Parry Okeden; Majors Hon. J. Napier, Clark-James, Keith Falconer, M. Wood, Levett, Williams, Spottiswoode; Capts. Barthorp, W. Clark, Fisher, Baumgarten, Gill, Given, Hanbury, Sawbridge, Wilson, Loftus, Sandeman; the Rev. J. Murdock, Deputy-Surg.-Gen. Fraser; Messrs. Allsopp, Blair, Hon. G. Bryan, Boulby, Harvey, Hon. T. FitzWilliam, Kavanagh, Greenwood, Hughes, Gordon, Grenfell, Holford, Hon. A. Lawley, Ponsonby, Smith, Surtees, Thorold, Watson, Wyatt-Edgell; Col. Teesdale was in waiting on the Prince of Wales. Covers were laid for 70.

13th Hussars. It has been decided to bring the regiment home from India with the 1884-85 reliefs.

14th Hussars. Lieut. Mitchell has been granted an extension of leave from India to Sept. 14.

19th Hussars. A correspondent of an Indian contemporary draws attention, as an instance of singularly rapid promotion, to the case of Capt. Kerr Fox. This officer enlisted in the ranks in 1878, and now—that is to say, in six years—he has run through all the intervening grades from private to captain. A Staff Corps subaltern in the same time would have been just half-way to his promotion. Serjt. Phipp was decorated at Windsor on Thursday with the medal for distinguished service in the field by her Majesty at Windsor Castle, in recognition of his gallantry in the Soudan campaign. See also 60th Rifles.

20th Hussars. Major Blake becomes second lieutenant-colonel, vice Lieut.-Col. Onslow, retired upon half-pay, Capt. Hon. Stapleton obtaining the majority.

ROYAL ARTILLERY.

It is announced that the command at Chatham has been vacated by Col. Torriano on account of "illness." We have heard of other causes assigned for the retirement. Any way, Col. Benthon is named as his successor.

Capt. Rickards has been granted leave from India to England for four months, on urgent private affairs.

We hear that Major Gambier, commanding J Baty. 2nd Brig., at Allahabad, has met with a severe accident, and will probably not be fit for duty for some time. Capt. Whitehorn has been placed in command of thebattery.

Capt. Churchward, on promotion, retains his adjutancy, and is transferred from Woolwich to Aldershot.

Lieut.-Col. Elliott has been appointed to the 3rd Brig., and posted to Woolwich.

Lieut. Hay has been appointed to B Brig., R.H.A., as adjt., and posted to Woolwich.

Major Younger has been appointed to the command of the Depôt, B Brig., R.H.A., Woolwich.

Lieut. Foster has been selected for R.H.A., and appointed to D Baty. B Brig., at Kirkee.

Gunner Hanson attended at Windsor Castle on Thursday, when her Majesty conferred upon him the medal for distinguished conduct in the field, in recognition of his gallantry in the Soudan.

ROYAL ENGINEERS.

Major Plunkett has succeeded Major Galwey in command of the 11th (Field) Compy., at Chatham.

The 24th Compy. (Submarine Miners), under command of Lieut.-Col. Leach, has removed from Shorncliffe to Lydd.

The 32nd Compy., commanded by Capt. Savage, has been transferred from Cape Town to Natal.

Lieut. Darling has taken over command of the 38th Compy., at Chatham, vice Major Elsdale.

The *Daily News* correspondent at Assouan, in a telegram sent off on Tuesday, states that Major Kitchener had arrived at that place, after reconnoitring for 17 days in the Korosko desert.

Lieut. Chapman died at Murree on May 22, aged 22 years. The deceased only arrived in India in December last. He was the son of Lieut.-Col. Chapman, 1st Bengal Cavalry.

The *Lahore* paper says:—"The survey officers, Lieuts. Talbot and Wahab, who accompanied Sir Sandeman on his late successful mission through Beloochistan, have now returned to recess quarters at Mussoorie, bringing with them the valuable results of their labours. Starting from Kalat, Lieut. Wahab succeeded in carrying a triangulation past Nushki to Kharan; while Lieut. Talbot worked in a southernly direction to Sorab and Gidar, the two parties joined at Kharan. From this point an excursion was made to the Raskoh range of hills which bound the Kharan valley, on the north-west, the Talegar Pass leading through them being thoroughly explored. The survey officers then accompanied the mission across the Kharan desert to Washuk, and thence to Panjgur. The result of the work is eminently satisfactory. Upwards of 20,000 square miles of country, mostly quite unknown, have been surveyed and reconnoitred, and what is perhaps of even more value, a continuous triangulation has been carried down to Panjgur, thus connecting it with the Indian triangulation. The position of Panjgur has hitherto been very doubtful, a fact which was the more unfortunate, as it is practically the point on the correct position of which hinges the proper collation of the routes of Gen. Macgregor, Col. St. John, and Capt. Maitland. Lieut. Talbot's work will now give a thoroughly correct basis for the proper compilation of the various reconnaissances and route surveys which exist, and may in the future be executed in Beloochistan."

Grenadier Guards. The 1st Batn. will move in September to Dublin, the 2nd Batn. to the Tower, and the 3rd Batn. to Windsor.

Coldstream Guards. The 2nd Batn. will be relieved at Windsor in September, when it will return to London.

Scots Guards. The 1st Batn. will return to London shortly from Aldershot. The 2nd Batn. will be relieved in Ireland in September. Mr. Mitford, formerly of the regiment, died at 48 Park Lane on the 27th ult., aged 50 years.

1st, or Royal Scots. Capt. Fenton, 2nd Batn., exchanges with Capt. Lascelles, of the 47th. The following officers of the 2nd Batn. embarked in the Assistance for Edinburgh:—Lieut.-Cols. Manners (in command) and Prior; Majors Thompson and Blane; Capts. Day and Fenton; Lieuts. Maclachlan, Da Costa, Olpherts, Wemyss, Francis, FitzGerald, Molyneux-Seel, and Egan; Capt. and Pymr. Sherrard; and Qrmr. Fuller. The battalion consisted of 560 warrant officers, non-commissioned officers, and men.

12th Suffolk Regiment. Capt. Routh, 1st Batn., station staff officer, Murree, has been appointed brigade-major at Rawul Pindee.

13th Somersetshire Light Infantry. Lieut.-Col. Cary, 2nd Batn., has been granted leave from India to England for six months, on medical certificate.

14th West Yorkshire Regiment. Lieut. Walker has been granted leave from India to England for 12 months, on urgent private affairs. We take the following notes from *Our Journal*, the regimental paper of the 2nd Batn., published at Sealkote on June 1:—"As a parade dress, khaki has at length been totally extinguished. For the last two months the regiment has presented a very variegated appearance on parade, some men in khaki, some in white, and some clad in a colour that can be called neither one nor the other, but rather a sort of mixture of the two blended with a tinge of pink. The order that khaki was to die a gradual death has not tended to increase the usually smart appearance of the regiment on parade. We must thank the gallant Paymaster of our sister battalion—better known as a former Adjutant of our own—Capt. Reid, for the amount of time and trouble that he must have spent in arranging, copying, and sorting the unpublished historical records of the regiment from 1848 up to date."

16th Bedfordshire Regiment. Capt. Riddell, 2nd Batn., has been appointed officiating D.A.Q.M.G., British Burmah Division, Madras Army. Lieuts. Cave and Russell have passed the higher and Lieut. Minchin the lower-standard examination in Hindostanee.

18th Royal Irish Regiment. It is definitely arranged that the 2nd Batn. shall proceed in the winter from Malta to India, to relieve its 1st Batn.

19th Yorkshire Regiment. Major Gipps is retiring.

22nd Cheshire Regiment. Lieut. Thackeray, 2nd Batn., son of Capt. Thackeray, late 74th Highlanders, died at Solon, near Umballa, on the 23rd ult., aged 24 years.

24th South Wales Borderers. A soldier of the 2nd Batn. committed suicide at Fort St. George on June 6. At about 6 a.m. the regiment was on parade, under command of the serjeant-major, while Capt. and Adjt. Clements was inspecting the guards. Pte. Brine, G Company, walked out on the front verandah with his rifle. He sat on a bench, loaded his rifle, took aim, and fired. The bullet struck the ground just beside Capt. Clements's foot. The soldiers saw Brine reload his rifle and take aim again. They dispersed in different directions, while Capt. Clements, with admirable coolness and presence of mind, ordered the guard whom he was inspecting to fix bayonets and arrest Brine, Capt. Clements himself running at their head. Pte. Brine fired again, but hit nobody; and the party had just arrived at the top of the stairs when they heard a third shot fired. Capt. Clements still pressed on, and found that Brine had left the verandah and retired to his room, where he had reloaded his rifle for the third time, held it with his right hand just below the right side of the jaw, and pressed the trigger with his toes. The consequence was instantaneous death. The deceased was never punished by the adjutant, and could therefore have had no reason to entertain any ill-feeling towards him. The men of the battalion are, the Madras paper states, now supplied daily with fresh cocoa-nut toddy. This beverage is considered to be very wholesome; and it has been introduced, during the present hot season, on the recommendation, we understand, of Col. Armstrong, an Indian officer of much experience, in view of diminishing the use of ardent spirits of doubtful quality among the soldiers.

26th Cameronians (Scottish Rifles). The officers are about to erect at Aldershot a memorial brass, mounted on black marble, to the memory of the late Lieut. Thuillier. Surrounded by a border of thistles are the regimental crests, badge, and honours.

31st East Surrey Regiment. It is finally arranged that the regiment shall proceed in the winter from Gibraltar to India.

34th Border Regiment. Capt. Andrews is a candidate for the Pay Department.

35th Royal Sussex Regiment. Sergt. Brightwell has died from the effects of sunstroke at Mangabet camp. This non-commissioned officer had served for upwards of 20 years in the regiment, and leaves a widow and two children. The *Egyptian Gazette* says:—"As this is the fourth death which has occurred during the month in the camp, it becomes a question whether it might not be advisable to give this battalion a change to some cooler place. In any case, the Sussex have not had many of the good things going, since they first landed in Egypt on July 24, 1882; and if it were not for the fine physique of the men of this battalion, the intense heat they have been subjected to at Mangabet would have had most disastrous effects on them. Of course, if Mangabet is to become a permanent station of the British Army, it will be necessary to provide proper accommodation in order to secure the health and well-being of the officers and men; but whilst it is merely a temporary camp, arrangements should be made for as frequent changes of the force quartered there as may be considered practicable by the authorities."

39th Dorsetshire Regiment. It is expected that the regiment will shortly be ordered to the Mediterranean to replace a regiment proceeding to Egypt.

40th South Lancashire Regiment will return home with the 1885-86 reliefs.

41st Welsh Regiment. The *Times of Natal* of May 30 states that "the detachment of the 41st Regt., whose orders to proceed to Middle Drift were countermanded a day or two ago, will proceed thither immediately on the arrival of the reinforcements, consisting of a company of the Royal Engineers, a battery of Royal Artillery, and the mounted infantry of the 58th Regt, who were hourly expected at the port." Writing on the same subject the *Witness* says:—"The 41st will not leave for a day or two, but when they do go to the Middle Drift they will begin the erection of a fort there."

42nd Black Watch (Royal Highlanders). See th Rifles.

43rd Oxfordshire Light Infantry will return home with the 1885-86 reliefs.

44th Essex Regiment has received orders to be in readiness to leave Aden for England in the winter, on relief by the 68th.

46th Duke of Cornwall's Light Infantry. The regiment left Cairo for Kenah on Thursday.

47th North Lancashire Regiment. Capt. Lascelles has arranged an exchange to the Royal Scots with Capt. Fenton.

49th Berkshire Regiment. By the retirement of Major Gavegan the regiment loses a soldier of the old type, one who by his services in the Crimea won a reputation for himself which caused him to be regarded as a landmark, as it were, between the old army and the reformed—would that we could say improved—army of to-day. A thorough soldier at heart, kind almost to a fault, devoted to his regiment and to his profession, it will be many a year before the 49th fills the place left vacant by Major Gavegan's retirement. It is to be regretted that the service of such a man should be lost at such a time, and the fact that a tried soldier should be allowed to leave the service whilst yet in the full vigour of manhood furnishes evidence of the rottenness of our present system, if system it can be called.

ROYAL MARINES.

Qrmr.-Serjt. Hoare, of the Plymouth Division, has been promoted to the rank of warrant officer, and appointed for duty at the Depôt.

The Deputy-Adjt.-Gen. made his annual inspection of the Recruit Depôt at Walmer on June 26 and 27; and of the Division at Eastney, during the past week.

51st King's Light Infantry. Lieut.-Col. Chatfield joins the sister-battalion, the 105th, on promotion. Major Morrison remains with the 51st.

60th King's Royal Rifle Corps. Lieut.-Gen. Stephenson, commanding the Army of Occupation in Egypt, in notifying on the 14th ult. that he had received a Victoria Cross for Lieut. Marling, 3rd Batn., another for Qrmr.-Serjt. Marshall, 19th Hussars, and a third for Pte. Edwards, 42nd Highlanders, which had been conferred on them for their conspicuous bravery during the recent operations in the Soudan, added:—"The Lieut.-Gen. congratulates these soldiers on their brilliant and distinguished conduct, which has earned for them the highest reward which can be attained. He trusts that their bravery will stimulate others to follow the example which has been set them, and that all will remember that from the General Commanding to the last-joined recruit, this high distinction and reward is equally open to all. The Lieut.-Gen. will have the honour of presenting these Victoria Crosses on the

Queen's Birthday parade." The *Standard* correspondent telegraphed from Cairo, on Sunday :—"The trooping of colours in honour of the Queen's Birthday took place yesterday evening in the Abdin Square, after which the Victoria Cross was presented to Lieut. Marling." Lieut. Ross, 3rd Batn., who died of typhoid fever on Saturday, June 7, was interred, we learn from the *Egyptian Gazette*, "with full military honours at the English cemetery outside Rosetta Gate. The funeral was attended by Major-Gen. Earle and all the officers of his staff, by Col. Sir Cromer Ashburnham and the officers of the regiment to which the deceased belonged, by all the departmental officers in Alexandria, and by a large number of civilians." A telegram, dated Assiout, June 30, says :—"Major Stuart-Wortley, with a force of 500 Bedouins, half mounted on horses and half on camels, will start to-day for the Khargeh Oasis, *en route* for Selima." Pte. Hunter, 3rd Batn., received the medal for distinguished conduct in the field at the hands of her Majesty, on Thursday, at Windsor, in recognition of his gallantry in the Soudan.

65th York and Lancaster Regiment. The Queen having signified her intention of personally conferring medals for distinguished conduct in the Mediterranean during the Soudan campaign, the following non-commissioned officers and men attended at Windsor Castle on Thursday and were decorated by her Majesty, viz. :—Colour-Serjts. Wake and Hayward, Serjt. Webb, Lance-Serjts. Doyle, Haycock, and James, and Corpls. Baxter and Dossett.

68th Durham Light Infantry will return home with the 1885-86 reliefs.

70th East Surrey Regiment has received its orders to prepare to leave India for England in the winter.

71st Highland Light Infantry. Lieut. Garland joins the depôt at Hamilton for two years.

74th Highland Light Infantry. The regiment will proceed abroad next winter. The *Times* says :—"The regiment has had an unusually short period of home-service. It returned from Hong Kong in March, 1880, and subsequently took part in the war in Egypt, suffering severely at Tel-el-Kebir. The reason of its being now selected for another tour of foreign service is that the Highland Light Infantry, of which it forms part, is the only regiment of the Line having both its battalions upon the home establishment."

76th West Riding Regiment. The following appeared in the battalion orders on the 27th ult. :—"The commanding officer has much pleasure in placing on record in regimental orders the following act of bravery displayed by No. 9-B 2,379 Lance-Corpl. Sexton, of the West Riding Regt. It appears that Pte. Hayward, of the same regiment, while swimming across the Suir, became exhausted, and sank in the river. Lance-Corpl. Sexton immediately went to his assistance, but Pte. Hayward seized hold of him, and both sank. After a hard struggle, Lance-Corpl. Sexton succeeded in freeing himself, and, although necessarily much exhausted, returned to Pte. Hayward's rescue, and thereby saved his life. The commanding officer congratulates Lance-Corpl. Sexton on the presence of mind, coolness, and courage displayed by him on this occasion."

79th Queen's Own Cameron Highlanders. The *Egyptian Gazette* says :—"The detachment of the Cameron Highlanders which has been quartered at Ramleh for the last few weeks is under orders to proceed to Port Said for the purpose of relieving the remainder of the detachment of Marines at that town, which is to be despatched with all possible speed to Suakim."

82nd South Lancashire Regiment. This regiment, which for the past three years has been stationed at Devonport, embarked in H.M.S. Himalaya for passage to South Africa on the 26th ult., amid manifestations of popular esteem and goodwill. Col. Warren, R.E., in the absence of Major-Gen. Sayer, carefully inspected the regiment prior to its departure. Each half-battalion then faced inwards, and Col. Warren addressed a few words to the men, expressing himself well pleased at their appearance on parade, advising them on the station to which they were going to be careful by their conduct to maintain the excellent character the regiment had won during its stay in the town for orderly behaviour, and wishing them "Good bye." The strength of the regiment was the colonel, the lieutenant-colonel, two field-officers, 16 officers, two warrant officers, two staff serjeants, 38 serjeants, 15 drummers, and 540 rank and file, together with 40 women and 42 children.

87th Royal Irish Fusiliers. Brevet Lieut.-Col. Cox has been appointed to the command of the depôt at Armagh. Lieut. Harrison is a candidate for the Indian S.C., and has been appointed to the 2nd Sikh Infantry, on probation.

88th Connaught Rangers. Capt. Denny has been granted leave from India to England for six months, on urgent private affairs.

90th Cameronians (Scottish Rifles). The *Civil and Military Gazette* says :—"Major Brunker, lately appointed to the Brigade Staff, to officiate during the absence of Major Stockley as brigade-major at Sealkote, has joined his appointment on recall from Cashmere. Major Young, who has just completed his tenure, proceeds home to rejoin his old corps, the 39th Regt. This vacancy in the establishment will be filled by Major Brunker, thus leaving another officiating place. Major Brunker has already served on the Staff, having been Deputy-Assistant-Adjutant-General at Dublin and at Portsmouth. He went on special service to the Cape of Good Hope in 1878. He has passed the Staff College, and served under Brigdr.-Gen. East, when that officer was Chief of the Intelligence Department at home."

91st Argyll and Sutherland Highlanders. A correspondent writes from Natal:—"Owing to disturbances in Zululand, the head-quarters, under Lieut.-Col. Robley, left Pietermaritzburgh on May 24, marching into Etchowe on the 30th. The weather was fine and cool, and the men stepped to the music of the pipers and drummers, who, playing in relays and eliciting cheers after each performance, helped to enliven the road. The River Tugela was waded through, as it was very low at the time, but kilts were taken off. The last day, when passing a patch of tall reeds that waved their white tufts in the breeze, the men made hackles for their helmets, and with these feathery plumes marched into Etchowe. Two hundred men and four officers are now at Entumeni, in a small redoubt about 14 miles advanced (named Fort Chater) in the disturbed territory."

97th Queen's Own (Royal West Kent Regiment). Major Tweedie is about to be promoted into the sister battalion, the 50th, to fill the vacancy caused by the retirement of Lieut.-Cól. Doran.

101st Royal Munster Fusiliers. Lieut. Walker has been selected for the adjutancy, vice Capt. Druitt.

104th Royal Munster Fusiliers. Lieut.-Col. Stokes and Capts. Lane and Kirkpatrick have leave to Sept. 30.

Rifle Brigade. Lieut. Rycroft, 1st Batn., has been granted leave from India to England for 15 months, on private affairs. The 2nd Batn. is to be moved next week from the Curragh to Portsmouth in H.M.S. Assistance, *en route* to Winchester.

Medical Department. The *Standard* states that "One of the important results of the recent Report of Lord Morley's Committee on the Army Medical Service will be a careful revision of surgical and medical equipment for hospital and field use, with the adoption of the latest improved appliances. Various changes are under consideration in the Army Hospital Corps, with a view to a fuller recognition and development of this valuable force."

The Auxiliary Forces.

MILITIA.

Royal Fusiliers. Lady Alison presented new colours to the 5th Batn. at Aldershot on Thursday. The batn. (better known as the Royal South Middlesex), under the command of Lieut.-Col. the Hon. C. E. Edgcumbe, was formed up on the Queen's Parade Ground at 12 o'clock, numbering about 400 of all ranks. After trooping the old colours, three sides of a square were formed, and drums having been piled in the centre, the new colours were placed upon them by the senior and junior majors. Gen. Sir A. Alison then led Lady and Miss Alison into the square, where the consecration of the colours was performed by the Rev. Statham, chaplain to the 1st Brigade, after which Lady Alison, with a few graceful sentences, in which she extolled the former heroic deeds of the Royal Fusiliers, handed the colours to Lieuts. Hillier and Dibley, who received them kneeling. The colonel returned thanks, and Sir A. Alison said he could not allow the battalion to leave his command without expressing to all ranks his high admiration at their general good conduct and military discipline during their stay in camp.

York and Lancaster Regiment. The 3rd Batn. (late 3rd West York) was inspected on Thursday by Major-Gen. Willis. The regiment was under the command of Lieut.-Col. Wilson. The following officers were present on parade :—Hon. Lieut.-Cols. Manwaring and Bottomley, Hon. Major Raikes, and Capts. Naylor, Vincent, Groom, Thomas, Payne, Morgan, O'Hara, Wilbraham, and Walker; Lieuts. Loftus and Foster.

King's Own Light Infantry. The 3rd Batn. arrived in York on Monday from Pontefract, under command of Col. Walker, to undergo its training. The following officers accompanied the regiment :—Hon. Lieut.-Col. Reid, Major Skinner, and Capts. Martin, Jefferson, Whalley, Goldie, Blake Aughton, and Cockburn; Lieuts. Willoughby, Wolff, Elmhirst, Battley, Palmer, Fowke, O'Neil, and Bell; Major and Adjt. Whitehill and Qrmr. Murray.

East Surrey Regiment. Lady Lovelace presented new colours to the 3rd Batn. at Aldershot on Thursday. The battalion, which looked very soldierlike, was formed up under command of Lieut.-Col. Smith, and after the usual trooping of the old colours, and "Auld Lang Syne" had been played, the new colours were deposited on the pile of drums in the centre of the three-sided oblong, where the religious portion of the ceremony was performed by the Rev. T. P. Mullins, Chaplain to the 2nd Brigade. Lady Lovelace then, with some very appropriate remarks, presented the new colours to the two senior Lieutenants, and Col. Smith suitably replied.

The following corps assembled for training on Monday: —4th Brig., Scottish Division, at Cupar; 5th Brig., North Irish Division, at Galway; 5th Brig., South Irish Division, at Duncannon; 4th Durham L.I., at Newcastle-on-Tyne; 3rd Gordon Highlanders, at Aberdeen; 3rd and 4th Batns. North Lancashire Regt., at Preston; 4th Batn. Middlesex Regt., at Hounslow; 3rd Royal Scots Fusiliers, at Dumfries; 3rd and 4th Royal Sussex Regts., at Chichester; 3rd Batn. South Yorkshire Regt., at Pontefract; 5th Batn. Connaught Rangers, at Boyle; 3rd Leinster Regt., at Birr; 4th Leinster Regt., at Maryborough; 6th Rifle Brigade, at Longford; and 8th Rifle Brigade, at Carrick-on-Shannon.

THE VOLUNTEERS.

Nearly 6,000 Volunteers in the Home District were inspected on Saturday last. The first inspection was that of the Inns of Court Rifles on the Horse Guards' Parade by Col. Moncrieff, Scots Guards. The battalion was in four companies, under Lieut.-Col. Russell, and passed the ordeal satisfactorily.

Gen. Lord Wolseley, hon. colonel, inspected the 2nd V.B. Royal Fusiliers in Hyde Park, and was accompanied by Major-Gen. Elkington, Inspector of Auxiliary Forces, and Col. Warren, commanding the Hounslow District. The corps presented a fine appearance in eight companies of 32 files, under Lieut.-Col. Routledge, the total muster being 751 out of 804 enrolled. After a march-past and the execution of the manual and firing exercises, Lord Wolseley addressed the regiment, commended highly its smart and soldierly appearance, and congratulated Col. Routledge on his command.

Two other battalions were also inspected in Hyde Park —the Queen's Westminster Rifles and the Central London Rangers—the former by Col. Moncrieff, Scots Guards, and the latter by Col. Lambton, Coldstream Guards. Under Lieut.-Col. Howard Vincent, the Queen's stood in 12 companies of 28 files, the total muster being 890. At the close of a long drill, Col. Moncrieff, after noting certain defects, commended highly the fine appearance and drill of the battalion. The Rangers, under Lieut.-Col. Alt, had a muster of 690, in eight companies of 25 files. Col. Lambton expressed his satisfaction with the appearance and drill.

Col. Fitzroy, Coldstream Guards, made the inspection of the 19th Middlesex (Bloomsbury) Rifles, on the grounds of the Foundling Hospital, where the corps numbered 777, under command of Lieut.-Col. Smith-Richard. The inspection occupied nearly two hours, and passed off with evident satisfaction to the inspecting officer.

Col. Lynch, commanding the Guildford District, inspected the 4th V.B. West Surrey Regt., in the grounds of Lambeth Palace. The corps was under command of Major Florence, in the absence, through illness, of Lieut.-Col. Ray. At the close, Col. Lynch expressed himself highly satisfied.

Eight battalions of Rifle Volunteers will drill at Aldershot from the 9th to 16th prox., as under :—1st Provincial Battalion (clothing green), 920 of all ranks, composed of detachments of the 6th, 16th, 19th, and 22nd Middlesex, 1st, 5th, and 7th Surrey, and 4th V.B. West Surrey Regt.; Lieut.-Col. Alt, and Major Adderley, adjutant; to be encamped on Swan Inn Plateau. 2nd Battalion (grey), 545 of all ranks; detachments of the 12th and 24th Middlesex; Lieut.-Col. Du Plat Taylor, and Major Kane, adjutant; to be encamped on Cove Hill Plateau. 3rd Battalion (grey), 794 of all ranks; detachments of the 2nd, 3rd, 4th, 5th, 11th, and 20th Middlesex, 2nd Tower Hamlets, and 1st Hertford; Lieut.-Col. Munro, and Major Meares, adjutant; to be encamped on Church Plateau. 4th Battalion (scarlet), 722 of all ranks; detachments of the 1st V.B. Royal Fusiliers, 2nd V.B. Royal Fusiliers, 1st Tower Hamlets, 3rd London R.V., 3rd V.B. West Surrey Regt., and 1st Sussex R.V.; Lieut.-Col. Routledge, and Capt. Glascott, Royal Fusiliers, adjutant; to be encamped on Rushmoor Hill. 5th Battalion (scarlet), 905 of all ranks; detachments of the 2nd Hants, 1st Bedford, 1st Isle of Man, 15th Lancashire, and 1st V.B. Lincolnshire; Lieut.-Col. Green, 1st Bedford; to be encamped on Rushmoor. 6th Battalion (green), 638 of all ranks; detachments of the 1st, 2nd, and 4th V.B. Essex Regt.; Lieut.-Col. Tufnell, and Major Bannister, 2nd Essex, adjutant; to be encamped on Rushmoor Hill. 2nd Wilts Regiment (green), 594 of all ranks; Lieut.-Col. Luce, and Capt. Cotes, adjutant; to be encamped on Rushmoor, and attached to the 1st Brigade. 1st V.B. Gloucester Regiment (green), 468 of all ranks; Lieut.Col. Jones, and Major Jackson, adjutant; to be encamped on Rushmoor Hill.

NOTES FROM ALDERSHOT.

[FROM OUR CORRESPONDENT.]

Military training, musketry practice, and work of ordinary routine employ the troops.

Assist.-Comy.-Gen. Stevens has been transferred from Gibraltar, vice Assist.-Comy.-Gen. Young, ordered to Netley.

Assistant-Commissary-General F. E. Stevens, Commissariat and Transport Staff, has been transferred from Gibraltar to Aldershot, vice Assistant-Commissary-General J. S. Young, ordered to Netley.

Lieutenant Russell, R.E., has been ordered to Gibraltar.

The Rev. E. Ryan, R.C. Chaplain, has been ordered here, vice the Rev. T. O'Reilly, deceased.

Three battalions of Militia—the 5th Royal Fusiliers, 3rd East Surrey, and 4th Oxfordshire—will return to their head-quarters to-day (Saturday), on completion of annual training. The numbers of men borne on the strength of these regiments who were absent from the training are respectively 202, 303, and 75.

Upwards of 500 officers and ladies were present at a dance at the Officers' Club on Tuesday night. Under the admirable management of Lieutenant-Colonel Sartorius, these periodical divisional assemblies have become exceedingly popular.

The annual Summer Race Ball will be held on the 25th inst.

DISCONTENT IN THE ARMY.

"Centurion" writes :—"As your columns are ever open to those who have a just cause of complaint, I think I may fairly instance my case as one which would entitle me to a certain amount of sympathy in any other profession but that of the Army, where 'grin and bear it' is the only satisfaction one gets for every act of injustice. Owing to the supineness and false economy of the War Office, two or three steps in the regiment in which I have the honour to serve are unfilled in the ranks of major and captain. Consequently, for upwards of three months, I have been on perpetual duty, regimental as well as garrison. If the duties can be so efficiently carried out by one officer, one may well say the British Army is over-officered. At the same time, the establishment of 'working' officers being fixed, it would be only fair that that establishment should be maintained, and that those who are on the Staff or who are otherwise employed should be seconded, and their places filled up. From what I gather from other sources, I find that my case is by no means a solitary instance of that neglect of officers' interests which has caused and is causing so much discontent in the Army."

DIMNESS of SIGHT.—Dimness of Sight and Blindness are often caused by the use of unsuitable Spectacles. Mr. H. Laurance, F.S.S., Oculist Optician, 1a Old Bond Street, scientifically adapts his improved Spectacles to strengthen and assist the weakest sights. Testimonials from Earl Lindsay, Sir Julius Benedict, F. D. Dixon Hartland, Esq., M.P., Thomas Cook, Esq., the well-known Tourist Agent, &c. Pamphlet, containing valuable suggestions, post free.

ROYAL CAMBRIDGE ASYLUM
for SOLDIERS' WIDOWS, KINGSTON-ON-THAMES.
Supported by Voluntary Contributions.
LADY-PRESIDENT.
H.R.H. the DUCHESS of CAMBRIDGE.
PRESIDENT.
H.R.H. the DUKE of CAMBRIDGE, K.G.
CHAIRMAN OF COMMITTEE.
General H.S.H. Prince EDWARD of SAXE-WEIMAR, K.C.B.
OFFICE—40 CHARING CROSS, S.W.

This Asylum was opened in February, 1854, to provide a home for the widows of non-commissioned officers and privates of the Army of not less than 50 years of age.

There are 69 widows in the Asylum.

Each widow has a furnished room, and receives seven shillings weekly, besides a monthly allowance of two shillings and sixpence for coals.

The funded income of the charity yields only £930, with an additional £50 from the Princess Mary's Fund for Nurses, to meet an estimated expenditure of £3,000 per annum.

The Committee earnestly appeal for funds to meet the current expenses.

An annual subscription of half-a-guinea, or a donation of five guineas, entitles to one vote at each election, with the right of nominating a candidate.

J. A. STEWART, Colonel, Secretary.

IMPORTANT to NAVAL and MILITARY MEN.

THE MUTUAL LIFE ASSURANCE SOCIETY.
(*Established* 1834.)

Many interesting communications, reviews and letters, &c., are unavoidably omitted, owing to want of space, this week.

Army & Navy Gazette.

LONDON, SATURDAY, JULY 5, 1884.

THE darkness which is setting down in the country south of the land of Egypt has only been relieved this week by a few feeble flashes of the electric light. About Gordon there is no news since April last, but barring, as we have said all along, the heat and the flies, there is not much to be apprehended with respect to his safety, especially with a high Nile, as long as his health and ammunition last, and his men are faithful. The magnificent way in which the Government ordered him to spend any money he might find necessary to ensure his safety in retreat would excite our admiration if we were quite sure her Majesty's Ministers had provided the means of obeying the order; but at any rate it implies the continuance of that unbounded confidence in Gordon's resources which again and again Mr. Gladstone and the inferior officers of State have expressed in Parliament. The opinions which, founded on some knowledge and experience, we have again and again endeavoured to impress upon the minds of the powers that be, that the passage of the desert between Suakim and Berber ought not to attempted by any considerable force for many months to come, have been amply justified by the official reports of Major Kitchener and others to the effect that the desert is now impassable, and that the miserable supplies in the wells which are placed at long intervals, and are bad at the best, cannot now be depended upon at all. That, of course, is just a reason for sending railway plant to Suakim, and preparing cranes and wharves, donkey-engines, and similar adjuncts for an expedition to start from that delectable terminus for Berber. As soon as it appeared pretty certain that Berber had fallen, every preparation was made for an expedition to relieve it; but now that it seems equally certain that Berber is safe, probably the very name of the place will fall out of men's mouths, for the present, as that of Gordon has done. Meantime, the gradual advance of the British Force down south to posts along the Nile, as far as Assouan, indicates an apprehension of mischiefs either from the Mahdi's followers, or from emissaries among the disaffected population—the miserable fellaheen, whose condition has been officially reported upon by British experts as all but intolerable, which, in reality, means that no human beings, save these submissive children of the mud, could endure the grinding imposts placed upon them. However, that is not our concern. It is probable that the presence of British troops amongst them may do some good in restraining the hard hand of the taskmaster and the tax-collector. Evelyn Wood's Egyptians, in advance of the English troops, command the Valley of the Nile from the First to the Second Cataract. By degrees the scandalous misrepresentations which attributed to the regulars of Wood's army the cowardice and undiscipline of the unfortunate levies of labourers and tagrag-and-bobtail of the cities and plains who perished under Hicks, and whose bones now whiten the shore of the Red Sea near Suakim, have been worn down and dissipated. These dark-skinned Mahommedans may well complain of the want of Christian charity shown to them by the white-skinned scribes of Alexandria or Cairo, who have set to work to blacken their reputations. British non-commissioned officers go into hospital and resign their posts on account of their health, and immediately it is said that they have thrown up on account of the cowardice of the Egyptians, and when an official denial of the falsehood is given on the authority of the men themselves, scarcely any notice is taken of it. If thousands of the gallant savages who serve the Mahdi were to attack a body of these Egyptian troops in the open, with the same recklessness as that displayed at Tamai, they would probably break them; and seeing what has occurred, any other result could scarcely be expected with confidence; but we believe they will hold their own under their officers as well as most soldiers opposed to such an enemy. There seems just now a disposition to push a force down to Dongola, where the indomitable and inscrutable Mudir appears to be holding his own; but whether for or against the Khedive is apparently doubted at Cairo. For our own part, we cannot think these doubts are justified. If the Mudir wanted to make a *coup*, and declare for the Mahdi, he would surely have done so before the Egyptian troops had arrived at Wady Halfa. So far the treatment he has received, as reported in this country, would tend to disgust a loyal officer, and to drive him into the arms of the enemy. We are told that it would take twenty days for an English force to move from Wady Halfa to Dongola, while Egyptian troops would do the distance in little more than half the time. That gives occasion for much reflection. Major Stuart-Wortley and Captain Colville, of the Guards, are out Bashi-Bazouking somewhere in the desert, with a chosen band of Arab followers. We wish them every success in their mysterious expedition. But how they are to operate against the Mahdi is quite beyond our ken or power of conjecture. Indeed, so far as we can judge, there appear to be probabilities of two campaigns—one political at home, and the other military, somewhere about the junction of the two Niles—and it will be fortunate if those limits are not extended. It would be an aggravation of the acute symptoms of disorder and unquiet which afflict the world if the French are driven to hostilities with China; but if they should be, we trust the punishment of the perfidious massacre at Langson will be prompt, signal, and efficacious.

In Tuesday's *Gazette* no less than nine serjeants were promoted to their commissions. So far during the present year, honours have been equally divided between Cavalry and Infantry, five serjeants of the former branch having received commissions, while an equal number have been promoted from the Infantry. Following an old precedent, a serjeant-major from the Brigade of Guards has also been selected for a commission as Quartermaster in the Line. The following is a complete list of the commissions awarded during the present year, and will be found to contain several names which can be traced in "Landed Gentry" and other works devoted to family records:—1st Dragoon Guards, Serjeant J. Flint, from Scots Greys; 3rd Dragoon Guards, Serjeant R. J. Spurrell, from 4th Hussars; 8th Hussars, Troop Serjeant-Major P. F. Dwyer, from 17th Lancers; 13th Hussars, Serjeant J. H. Martin, from 19th Hussars; Gloucester Regiment, Serjeant S. Willcock, from Royal Welsh Fusiliers; South Stafford Regiment, Serjeant R. F. Glover, from Shropshire Light Infantry; Serjeant C. P. Weatherby, from Middlesex Regiment; Queen's Own West Kent, Colour-Serjeant J. M. Maxwell, from 7th Fusiliers; York and Lancaster Regiment, Troop-Serjeant-Major P. A. E. Wood, from 15th Hussars; Durham Light Infantry, Serjeant G. A. Ward, from Duke of Cornwall's Light Infantry.

The parts of the Duke of Wellington's statue will arrive at Aldershot next month, when steps will be taken at once for its erection on the site selected.

During these stirring times at Aldershot, it is very pleasant indeed for a Brigadier to be able to promulgate such an order of the day as that given below, the more so if he has a Highland regiment under his command:—"The Major-General commanding has much pleasure in conveying to the officers, non-commissioned officers, and men of the brigade, Sir Archibald Alison's high appreciation of their appearance, steadiness, and good marching on the occasion of the parade in honour of their Sovereign's birthday. The Lieutenant-General was also particularly struck by the bearing and drill of the 5th Battalion, Royal Fusiliers, after so few days' training. Major-General Lyons wishes to add how perfectly satisfied he himself is with the conduct and appearance of the brigade."

Lieutenant-Colonel W. Rorke has been appointed to the command of the Royal Artillery in the West Indies.

The Empress Eugénie has signified her intention of presenting a cup to be run for at the Aldershot Divisional Flat Race Meeting on the 26th instant, for hunters, the property of officers serving in the Division and officers of the Royal Artillery of the Garrison of Woolwich. Entrance free; about two miles on the flat.

Lieutenant-Colonel H. S. Clarke has been selected for the command of the Artillery at Mauritius.

As tending possibly to illustrate in some small degree the effect of the unification system on the social prestige and consideration of the Medical officers of the Army, we may mention that in certain of the service clubs a determined and successful attempt to blackball all the medical candidates for admission has recently been carried out. Whether such an apparently invidious proceeding is calculated to promote the interests and harmony of the clubs in question, is doubtful. But if this state of things continues, the knowledge that they will be excluded from a highly valued privilege, open to all other officers bearing her Majesty's commission, will, it is to be feared, deter numbers of young medical men of good social position from entering the Medical Department of the Army, and thus the service will suffer considerably.

Colonel T. P. Smith, lately promoted, has been given a jacket in B Brigade, R.H.A.

Owing to recent irregularities in Courts-Martial procedure, it has been ordered that in future all proceedings of District Courts-Martial, after confirmation and promulgation, are to be forwarded, through the General Officer commanding District, to the Judge-Advocate-General.

Surgeon-Major Hume-Spry, 2nd Life Guards, who had medical charge of the Household Cavalry in Egypt, and whose care of the men in the field was proverbial, is, we learn, at length to have his services recognised, his case having been reconsidered. His name may therefore be looked for in an early gazette. What the nature of his reward will be is not yet fully decided.

A correspondent who calls attention to the case of Lieutenant Barlow (whose promotion is notified in the last *Gazette*) falls into a error when he says that Lord Alcester is "in a position to grant promotion." The Second Naval Lord can only "recommend," and he has often done so, we believe, in vain.

There is some chaff in the peck of wheat Mr. C. Vincent has been interviewed into threshing-out for last night's *Pall Mall Gazette*. Berber may have fallen or not, but there is no evidence for his report that the Mudir of Dongola has deserted to the Mahdi. Mr. Vincent certainly is wrong in his statement that the Mahdi's men have cut the "comrades" of Wood's soldiers to pieces wherever they have met them, for the Mahdi's men have never met any of Wood's army anywhere or at all. Nor is Debbeh taken,—as yet any way,—nor is there the least evidence that the Mahdi is at Mourad, and the best authority—the ex-Khedive Ismail and others—do not think he will move north of Khartoum if he can help it, but leave his lieutenants to feel their way towards Assouan.

One of her Majesty's Ministers has recently returned from Shorncliffe very much exercised in his mind respecting the personal appearance of her Majesty's troopers in their new uniforms at ease. He has arrived at the conviction that this garb must have been devised by a committee of Methodist ministers and Army chaplains anxious to discourage what is called "flirtation," to reduce to a minimum the attractions of the privates of her Majesty's Forces for nursemaids and the like. The scarlet-fever, in fact, must be suppressed. And certainly, if the soldiers cut as terrible an appearance in the eyes of their enemies as they do when seen about the streets in a country town, or taking a *villegiatura*, stick in hand and pipe in mouth, about the lanes of Portsmouth or Shorncliffe, the fears that have been expressed with regard to the outcome of the conflict between them and their possible enemies may be considered as ill-founded.

The command of the Naas Regimental District falls vacant on the 13th proximo, when Colonel G. F. Herbert completes his five years in the appointment.

A correspondent asks if the Warrant lately issued regarding the promotion and retirement of combatant officers would prevent a Captain going to the Militia for 10 years under Par. 87 of the Royal Warrant of 1882? The Warrant would seem to leave the question an open one.

We understand that Major-General Sir W. Bellairs will probably succeed to the Egyptian Brigade command, which was to have been filled by Major-General Kent.

Mr. Wilfred Blunt's fiasco at Newmarket confirms the opinion which has been so often expressed by good judges respecting the comparative merits of Arab and English race-horses. Each class has its own special qualities and form; but in speed on comparatively short courses, the Arab is nowhere in competition with even a moderate "plater," and equally so, the latter would fail lamentably in a long-continued journey, where a good heart, great courage, and blood produce a will and the power of enduring fatigue.

We regret to say that the health of Bishop Claughton, Chaplain-General to the Army, shows no signs of improvement.

At the dinner given by the officers of the 2nd Life Guards on Wednesday to the Duke of Cambridge, there were three officers present—Lords Strathnairn, Lucan, and Templetown—whose united ages came to no less than 252 years, and their united services to nearly 200 years.

In our regimental column there will be found a note from an Indian paper referring to the case of Captain Fox, of the 19th Hussars, which must have been written in complete ignorance of the antecedents of the officer in question. Before Captain Fox entered the Life Guards as a trooper, he was an officer in a distinguished corps of cavalry in the German Army, whence he passed with a perfect professional knowledge into our ranks, and naturally, in a very short time, was promoted to the higher non-commissioned rank, and finally received his commission to the satisfaction of his comrades, and with the approbation of every officer in the regiment, from the colonel down, who had the opportunity of observing his demeanour and conduct. Since that he has been continuously employed with his regiment in Egypt, including what may be now called the old campaign under Lord Wolseley. The case of the Staff Corps Subaltern referred to by the correspondent has, we venture to say, nothing whatever in common with the career of Captain Fox.

Major Boyce, late 34th Regiment, one of the best-known of Metropolitan Volunteer Adjutants, is, we hear, succeeding to the vacant Lieutenant-Colonelcy of the 3rd London, a corps with which he has been advantageously associated for the last fifteen years.

The Army Estimates come on for discussion on Monday, when Sir W. Barttelot will, on Vote 8, call attention to the present condition of the Army and Reserve Forces.

The report of the Committee of Inquiry into the conduct of the Staffordshire Yeomanry has now been handed in to the Adjutant-General. The report shows, we understand, that the behaviour of the regiment generally has been most exemplary, and that the recent scandal is entirely due to the indiscretion of some young officers, whom there has been no desire to screen. We believe the Marquis of Anglesey will succeed to the command.

Mr. Lawson, the Assistant Director of Supplies and Transport, will again be examined before the Parliamentary Committee on the Egyptian Commissariat, &c., on Monday next.

The Navy.

ADMIRALTY, June 27, 1884.

With reference to the notification in the *London Gazette* of Nov. 17, 1882, of special promotions made in her Majesty's Fleet for services rendered during the operations in Egypt, in 1882, Com. A. W. Moore has been promoted to the rank of Capt. in her Majesty's Fleet (June 27).

In accordance with the provisions of her Majesty's Order in Council of April 1, 1881, Surg. H. B. Collins has been placed on the Retired List of his rank (June 10).

Royal Naval Artillery Volunteers (Liverpool Brigade).—Sir Richard Henry Williams-Bulkeley, Bart., to be Hon. Lieut. (June 27).

ADMIRALTY, June 28, 1884.

Royal Marine Light Infantry.—The under-mentioned officers to be Brevet Majors, under the provisions of her Majesty's Order in Council of March 19, 1883:—Capts. H. A. Peake, R. E. Montgomery, S. Tyers, and W. T. Allen (June 24).

ADMIRALTY, June 30, 1884.

In accordance with the provisions of her Majesty's Order in Council of April 1, 1881:—Staff Surg. T. T. Riordan has been placed on the Retired List of his rank (June 22).

Royal Naval Artillery Volunteers (London Brigade)—The following promotion has been made:—Sub-Lieut. C. E. Seth-Smith to be Additional Lieut. Commanding (June 30).

ADMIRALTY, July 1, 1884.

The following promotions have been made:—Coms. W. C. Karslake, B. F. Clark, and W. M. Lang to be Capts. in her Majesty's Fleet (June 30).

Lieutenants:—C. R. Wood, H. W. A. Littledale, the Hon. R. Bingham, R. F. Hoskyn, R. L. Groome, C. J. Barlow, G. R. Bethell, F. C. B. B. Simpson, and R. F. O. Foote to be Coms. in her Majesty's Fleet (June 30).

Sub-Lieutenants:—S. D. Gordon, W. O. Oliver, H. D. Kirwan, W. H. Eyre, A. B. Prance, L. B. Denman, G. Hubbard, the Hon. F. C. B. Addington, H. S. White, S. H. B. Ash, W. Richardson, E. P. E. Jervoise, A. E. A. Grant, L. H. Hordern, J. H. Goldfinch, C. E. Tower, A. A. Lucas, H. L. Heath, G. A. J. Greville, W. P. Dawson, A. G. H. W. Moore, and C. L. Napier, to be Lieuts. in her Majesty's Fleet (June 30).

ADMIRALTY, July 2, 1884.

With reference to the notice in the *London Gazette* of July 1, 1884, the third Christian name of Com. R. F. O. Foote, R.N., is *Ollive*; and the second Christian name of Lieut. A. B. Prance, R.N., is *Bremridge*, and not as therein stated.

APPOINTMENTS.

Captain—Philip H. Colomb, to the Asia, additional.

Staff Commanders—J. Browne, to the Duncan; E. S. Clapp, to the Achilles.

Commander—Wilmot H. Fawkes, to the Osborne.

Lieutenants—Herbert G. Paris, to the Euryalus, as flag-lieut.; Herbert L. Heath, to the Northampton; Charles L. Napier, to the Alexandra; Henry S. White, to the Iris; Alfred E. H. Grant, to the Bullfrog; Stuart D. Gordon, to the Dragon; Selby H. B. Ash, to the St. Vincent, for Minotaur; Archibald G. H. M. Moore, to the Euryalus; Guy A. J. Greville, to the Minotaur; Edward G. F. Law, to the Orwell; Henry H. Boteler, to the Cockchafer; Wm. L. H. Browne, to the Mallard; Henry M. C. Festing, to the Repulse, additional; George Neville, to the Minotaur.

Chief Engineers—Alfred Waters, to the Neptune; Joseph Turner, to the Pembroke, for the Rodney.

Fleet Surgeons—Thos. G. Wilson, to the Chatham Division, Royal Marines, for the Walmer Depôt; Archibald G. Colquhoun, to Trincomalee; William J. Eames, to the President, additional, for temporary service at the Royal Victoria Yard.

Surgeons—James O'B. Williams, M.D., to the Portsmouth Division, Royal Marines; Edward H. Williams, to the Imogene.

Engineers—Thos. Owen (b.), to the Pembroke, for the Warspite; Horatio F. Walton, to the Asia, supernumerary.

Assistant-Clerk—Albert Greenwood, to the Duke of Wellington, additional.

Gunner—Thomas C. Jones, to the Vernon.

Coastguard.

Commissioned Boatman—William Webb, Littlehaven, to be chief boatman, Porthcawl, vice R. Jago, promoted.

Alecto, Lieut. and Com. Harston, was at Cape Coast Castle up to May 24, awaiting arrival of Opal and Starling, expected shortly.

Avon, Lieut. and Com. S. N. Thompson, is ordered to be ready to embark London Brigade of R.N.A. Volunteers in August for drill afloat.

Boadicea, Capt. Church, flagship of Rear-Admiral Nowell Salmon, V.C., arrived at Simon's Town on July 2, when the Sylvia left.

Condor, Com. Domville, left Alexandria for Suakim on June 30.

Coquette, Lieut. and Com. Crowe, left Alexandria for Malta on June 30.

Dolphin, Com. Eardley Wilmot, left Spithead on June 30 for Devonport, *en route* to join the Commodore at Suakim.

Falcon, Com. Pringle, left Gibraltar on June 29 for Malta.

Forward, Lieut. and Com. Furlonger, arrived at Sierra Leone on June 2, and would proceed to Cape Coast Castle as soon as she had been filled up with coals.

Goshawk, Lieut. and Com. W. J. Moore, was employed on the southern sub-division of the West Coast of Africa on May 24. On being relieved by the Stork, will proceed on the usual tour to the islands.

Hecla, Capt. Wilson, having taken on board naval prisoners at Queenstown from the Revenge, arrived at Portsmouth on June 30, and left for Portland on July 2 with the torpedo flotilla.

Humber, Com. Cæsar Hawkins, arrived at Suakim on July 1, with stores, &c.

Imogene, Lieut. and Com. Hugh G. Gough, was commissioned at Portsmouth on July 3 for the use of her Majesty's Ambassador at Constantinople, to replace the Antelope.

Nelson, Comdre. Erskine, A.D.C., was at Brisbane on July 2.

Northampton, Capt. Digby, flagship of Vice-Admiral Sir John Commerell, was at Halifax up to June 20, and would leave for Newfoundland on June 25. The Canada was cruising on the coast of Newfoundland. The Garnet was at Barbadoes on May 25, and would leave at the beginning of July for Bermuda and Halifax. The Tenedos, Fantôme, and Mallard were on the coast of Newfoundland on June 20. The Dido was at Halifax, and would leave at the end of June for Barbadoes, calling at Bermuda. The Griffon was at Barbadoes on June 20. The Flamingo and Bullfrog were on the Jamaica Division.

Osprey, Com. Dowding, was at Zanzibar on June 3, and has been ordered to join the Tourmaline at Tamatave.

Starling, Lieut. and Com. Sanders, was believed to be on passage from Ascension to Cape Coast Castle on May 24. She was expected at the latter place about June 25, when she will relieve the Stork.

Stork, Lieut. and Com. Blennerhasset, was at Accra on May 24. On arrival of the Starling, the Stork will proceed to relieve the Goshawk on the southern sub-division.

Tourmaline, Capt. Boyle, was at Tamatave on June 3, and is about to visit other ports in Madagascar.

Turquoise, Capt. Woodward, and Kestrel left Gibraltar on July 2.

Vigilant, Lieut. and Com. Maxwell, flying the flag of Vice-Admiral Sir William Dowell, was at Kelung on May 17, and would leave on May 18 for Wenchow, Woo Sung, Shanghai, and Hankow. The Audacious, flagship, was at Kelung on May 17; ordered to proceed to Woosung to coal and give leave, and afterwards proceeds to Chinkiang. The Champion was at Hong Kong on May 7, in dockyard hands, refitting; she would be ready for sea about June 15, and would then be stationed at Amoy. The Daring was at Canton on May 7; would be relieved temporarily by the Tweed about the middle of May, and go to Hong Kong to give leave to crew, returning to Canton about the end of May. The Swift was at Amoy on May 8, and remains. The Linnet was at Pakhoi, in the Gulf of Tonquin, on April 28; would remain in the Gulf of Tonquin until the arrival of the Zephyr, and then proceed to Hong Kong. The Foxhound was at Kelung on May 17; would leave for Hong Kong on May 18, to give leave and complete with stores and provisions prior to proceeding to Singapore to take the place of the Zephyr. The Merlin arrived at Foochow from Hong Kong on May 11, and remains. The Sapphire, senior officer's ship in Japan, was at Yokohama on April 26, and would remain in the neighbourhood. The Cleopatra was at Chemulpho on April 29. The Curacoa was at Shanghai on May 3, and remains as senior officer in the absence of the Cleopatra. The Midge was at Tientsin on May 5, and would remain. The Fly arrived at Shanghai on May 7 from Ningpo, and proceeded to Kinkiang to relieve the Espoir. The Albatross arrived at Hankow on May 3, and will remain. The Cockchafer arrived at Shanghai on May 2, and left on May 4 for Chemulpho. The Espoir was at Kinkiang on May 4, and would proceed to Shanghai when relieved by the Fly. The Pegasus was at Penang on May 31, and would proceed on June 2 to Singapore to wait the arrival of the Foxhound. The Zephyr was at Singapore on May 31, and was to proceed about June 10 to Gulf of Tonquin to relieve the Linnet. The Flying Fish left Amoy on May 9 for the Corea, to survey the coast and off-lying islands. The Tweed was at Hong Kong on May 7, and is commissioned temporarily as tender to the Champion, and manned by that ship. She is to proceed to Canton to relieve the Daring. The Commander-in-Chief, with as many ships of the squadron as can conveniently be assembled, proposes to take the following cruise:—Leave Woosung July 1, arriving at Chefoo July 4; leave Chefoo July 10, arriving at Tientsin July 13; leave Tientsin July 17, arriving at Ninghai July 20; leave Ninghai July 25, arriving at Chefoo July 29; leave Chefoo Aug. 7, arriving at Port Hamilton Aug. 13; leave Port Hamilton Aug. 16, arriving at Nagasaki Aug. 18; leave Nagasaki Aug. 28, arriving at Fusan Aug. 31; leave Fusan Sept. 3, arriving at Port Lazareff Sept. 9; leave Port Lazareff Sept. 13, arriving at Hakodate Sept. 19; leave Hakodate Sept. 27, arriving at Yamada Harbour Sept. 30; leave Yamada Harbour Oct. 4, arriving at Yokohama Oct. 8.

Wanderer, Com. Churchill, left Plymouth Sound on July 1 for the China station.

THE CHANNEL SQUADRON.

[FROM OUR CORRESPONDENT.]

Berehaven, Bantry Bay, Wednesday, June 25.

Last Friday, the 20th, being the anniversary of her Majesty's accession, the Squadron "dressed ship," the flagships flying the Royal Standard at the main, and fired a Royal salute at noon. Friday was a busy day for the torpedo parties; in the forenoon they were exercised at sweeping and creeping, and in the afternoon experiments in destroying booms by charges of gun-cotton and in counter-mining a supposed ship channel were carried out, after which the mechanical mines which had been laid down were tested by being bumped by steam pinnaces. The Admiral returned from Galway in the Seahorse in time to witness the operations in the afternoon. A large number of officers from the different ships, in steam pinnaces and other boats, were also present, and everything went off most successfully. A boom which had been prepared and placed by a party from the Hecla was first of all blown up, three different explosions being made along its length, which completely wrecked it. The counter-mining launches, each towed by a steam pinnace, then advanced in pairs, dropping their mines and firing them in the usual manner. There were six boats, one from each ship. The launches were fitted for jumping the boom, but its destruction was so complete that they had only to pass through the floating fragments. Small blowing charges were attached to each mine, which were exploded; but the last pair of boats, those of the Sultan and Achilles, had each a live mine of 500 lb. of gun-cotton, the exploding of which was the event of the afternoon. They went off beautifully, sending up an immense column of water. It was amusing to see all the boats that had been looking on close in on the scene of the explosion, directly the mines had gone off, in search of fish, as great numbers are always found floating, dead or stunned, on the surface whenever a big explosion takes place. The next day the torpedo parties were fully occupied in weighing all their mines. On Monday, exercise with Whitehead torpedoes, making runs from boats, was carried out. We had an hour's sail drill in the forenoon, making sail from top-gallant down, and shortening and furling; and when that was over, the steam pinnaces, fitted with two Whiteheads each, went down to the western passage. There were only five boats, as the Achilles does not carry one fitted for Whiteheads. The runs took place in the narrowest part of the passage, between the south-western end of Bear Island and the mainland. Two small buoys, about 20 yards apart, with flags, had been laid down for a target, and another about 200 yards distance from them, at which the boats were to slip their torpedoes. The boats made runs in succession, those of the Sultan, Agincourt, and Northumberland firing both their torpedoes together; the Minotaur's and Neptune's only firing one each, as their second, which were live ones, were being kept for firing against the rocks. Very good practice was made, as all the torpedoes passed either between the flags or very close to them. The Minotaur's pinnace then proceeded to discharge her live torpedo. A whitewashed mark had been made on the rocks as a target, and a slipping buoy laid down. A few seconds after she slipped her torpedo, a loud report, followed by the appearance of a splendid column of water shooting up into the air, showed that it had been completely successful. The sight at the time was a very pretty one; the narrow passage was crowded with torpedo boats, steam pinnaces, and other boats from the Squadron, full of officers and men who had come down to witness the experiments. Both the Admirals were there in their steam barges; there was also quite a crowd on the high land on Bear Island, from which an excellent view was obtained. The officers had their photographic apparatuses on the spot, and it is to be hoped that they got successful shots. The second run, made from the Neptune's boat, was not so successful; after the torpedo had been slipped it could be seen burrowing about among the rocks, but no explosion took place. Subsequent examination showed that, owing to its having struck an irregularly shaped rock, instead of getting a fair blow at a flat surface, the head, containing the charge, had been broken completely off. As it would be dangerous to leave such a thing lying about, it has since been found and exploded by a party from the Hecla, under the direction of Capt. Wilson, by letting off a small charge close to it. To-day the steam pinnaces have again been firing Whiteheads, but no more live ones have been expended. This finishes the torpedo work for the present. While the torpedo work has been going on, there has been no cessation of our other drills; 8 o'clock evolutions, sail drill, and general quarters have gone on as usual; the small-arm companies and Marines have landed twice for exercise at skirmishing, &c.; boats have been exercised frequently under sail, and also in landing fire-engines,—in fact, it has been a pretty busy time for everybody. Last Friday evening the officers of the Achilles gave a most enjoyable dramatic entertainment. The piece produced was Byron's burlesque, "Fra Diavolo." It was given with a smoothness and completeness that was really wonderful, when one considers the difficulties of rehearsal, &c., on board ship while in full swing of work. Out of the large number of officers who took part in it, all of whom played exceedingly well, it is almost invidious to select any for special praise; but there is no doubt that Lieut. Bailey, as Beppo, "a very heavy ruffian," and Mr. Ogilvie as Zerlina, "the village beauty," received the warmest applause, not only on account of their personal popularity, but also for the excellence of their acting. On the following night the Agincourt gave a very entertaining Christy Minstrel performance.

Portland, Thursday, July 3.

The Squadron left Berehaven on Friday evening, the 27th, and anchored off Torquay on Monday forenoon; started again on Tuesday morning, and arrived here the same afternoon. We weighed from Berehaven at 5 o'clock, and came out through the western passage; the evening was beautiful, and it was a very pretty sight. We passed through the channel, which is very narrow, in single column line ahead, the Hecla bringing up the rear. When we got outside we formed columns of divisions, and the Hecla left us to go on to Portsmouth. The next day we had fine weather, with a light head wind. The Squadron was exercised at steam tactics during the forenoon, and made and shortened sail in the evening for drill. On Sunday the wind, though still light, drew aft; square sail was carried throughout the day, and furled at night. We were just off the Lizard at noon. The Seahorse, which had been left behind at Bantry to bring on mails, passed us, and went on to Torquay, where she arrived the same night. We passed Berry Head early on Monday morning, stood across Torbay, and on a little way along the coast; the ships separated, and lay to, about a mile apart, for Whitehead torpedo practice. As it was a bright sunny morning, the country on from Torquay, by Babbicombe, Teignmouth, and Dawlish, was looking very pretty. When the torpedo practice was finished, the Squadron reassembled off the Ore Stone, formed columns of divisions line abreast to port, stood in to Torquay Roads, and anchored in that formation, which gave the flagships the berths nearest the town. The afternoon and evening were beautifully fine, and great numbers of people came out from Torquay in yachts and boats to see the Squadron. The sea was quite smooth, so outriggers, skiffs, and pleasure-boats of all descriptions were able to be about. Special leave was given till 8 p.m. On Tuesday, an early start was made. We weighed at 5 a.m., and separated as before for further Whitehead practice, after which the Squadron reassembled and shaped course for this place. We had steam tactics in the forenoon, and watch drill making sail in the forenoon, and furling in the afternoon. We passed the eastern end of the breakwater in columns of divisions, line ahead, the columns two cables apart, and, when abreast of the anchorage, altered course together eight points to port, bringing us into columns of divisions line abreast to port, and came-to in that formation. Directly we had anchored all boats were hoisted out and sails unbent; in the evening general leave was given to our watch till noon on Friday. Yesterday afternoon the torpedo-boats, seven in number, which have been fitted out for an experimental cruise, arrived, after a run of a little over four hours from Portsmouth. They are in charge of Lieuts. Inglefield, of the Minotaur; Bremer, Agincourt; Carus-Wilson, Achilles; Streeten, Sultan; Rolleston, Northumberland; Leslie, Neptune; and Leah, Duke of Wellington. The whole are under the orders of Com. Gallwey, of the Vernon. The Hecla came in and anchored soon after them. We have had beautiful weather for the last fortnight; the day before we left Berehaven was, however, an exception, as it rained heavily all day. It was very unfortunate, as two events which had been arranged for that day had to be given up. The Minotaur's crew had got up athletic sports for the afternoon, and the officers of the Achilles were going to repeat their performance of "Fra Diavolo," which had been so successful the week before, in the evening.

WOMEN ON BOARD MEN-OF-WAR IN ACTION.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—With reference to Mr. Lyons' letter and your remark thereon in your issue of June 28 regarding Maclise's picture of the Battle of Trafalgar, it is on record in this office that one William Porton, who recently died at Wolverhampton, at the age of 100 years and 2 months, was born on board the Saturn, 74-gun ship, off Gibraltar, in August, 1783, in which ship his father was a gunner.—I am, &c., WILLIAM PLAYFAIR, Major, A.P.D.

Pension Office, Lichfield.

P.S.—Porton served under Collingwood, Smith, and Nelson, and was on board the Victory at Trafalgar.

[This does not prove that any women or woman were or was on board the Victory at Trafalgar. The gunner in question may have been married at Gibraltar, or elsewhere abroad, and the child, as many others have been, can have been born during the visit of the wife to her husband on board while in harbour.—ED. *A. & N. G.*]

Dr. T. Brown has been elected president of the Norfolk and Suffolk Medico-Chirurgical Society for the ensuing year.

The Bishop of Sodor and Man will preach at St. Peter's Church, Onslow Gardens, on Sunday next, in aid of the Royal Naval Scripture Readers' Society.

"HEALTH EXHIBITION."—"Visitors should not fail to view the fine exhibit of Messrs. Rose and Co., London, of their Lime Juice Cordial and other Lime Juice beverages, at Stand No. 116, in main transept. The exhibit includes a fine display of the Jamaica Lime Fruit from which these delicious non-alcoholic beverages are made. Their Lime Juice Cordial supplies a most refreshing summer drink in water, effervescing in all aerated waters. No beverage has received higher recommendation from the medical profession as eminently wholesome."—See *Lancet*. No table should be without it. The Wholesale Stores are 11 Curtain Road, Finsbury.

BOOKS, Etc., RECEIVED FOR REVIEW.

The Eastern Pioneer of Western Civilisation, and the Recognition her Efforts Receive, by C. S. Eby, B.A., Tokio, Japan (Yokohama: Japan Mail)—An Important Question for the Constituencies (E. NOTICES TO CORRESPONDENTS, Etc.

EXPECTANS must see, by referring to the *Army List*, that the West Kent Yeomanry have an Honorary Chaplain; they have no Surgeon, there being a blank opposite the word "Surgeon;" and that they have not even the words "Veterinary Surgeon" at all. Some Yeomanry regiments have two Surgeons, others have none at all.

The ARMY AND NAVY GAZETTE exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire; Bulletin de la Réunion des Officiers; L'Armée Française; L'Italia Militare; Rivista Europea; Rivista Militare; Memorial de Ingenieros; La France Militaire; Moniteur de la Flotte; Le Progrès Militaire; Der Veteran; Streffleur's Oesterreichische Militärische Zeitschrift; Jahrbücher für die Deutsche Armee und Marine; Militär Wochenblatt; Giornale d'Artiglieria e Genio; Organ der Militär-Wissenchaftlichen Vereine; Vedette; Deutsche Heeres Zeitung; Militärische Zeitschrift; Armeeblatt, Wien; Army and Navy Journal of New York; The American, Philadelphia; Revista Maritima Brazileira*; in addition to all the home and colonial professional periodicals and journals.

BIRTHS.

HUYSHE.—At Southsea, on June 28, 1884, the wife of Major E. V. Huyshe, 1st Battalion, the Welsh Regiment, and D.A.C.G., of a son.

WAVELL.—On June 30, at The Glen, Camberley, the wife of Major Archibald G. Wavell, 1st Batn. Norfolk Regiment, of a daughter.

MARRIAGE.

ENGLISH—EVANS.—On the 4th ult., at St. Paul's Church, Toronto, by the Right Rev. the Lord Bishop of Toronto, assisted by the Rev. H. Green, E. Taylour English, of Osgoode Hall, barrister-at-law, to Harriette Angelo, eldest daughter of Major R. J. Evans, late 16th Regiment.

DEATH.

DAY.—On the 28th ult., at Bournemouth, Edward Fitzgerald Day, Captain, Royal Navy, third son of the late Very Rev. John Godfrey Day, Dean of Ardfert. Aged 41 years.

WANTED, COOK for OFFICERS' MESS, SOUTH WALES BORDERERS, Kilkenny.—Address to MESS PRESIDENT.

MEMBERS and HONORARY MEMBERS of the ROYAL NAVAL CLUB wishing to join the GOODWOOD LUNCH, Cup Day, July 31, are requested to communicate as soon as possible with the HONORARY SECRETARY, Goodwood Lunch, Royal Naval Club, Portsmouth.
June 25, 1884.

AS AMANUENSIS or SECRETARY to a Private or Official Gentleman or Merchant, &c.—A YOUNG GENTLEMAN of good education, quick, clear writer, good at shorthand and figures, about 21 years of age. Unexceptional references.—Address, "A.," 3 St. James's Street, Pall Mall, S.W.

ROYAL UNITED SERVICE INSTITUTION.

LECTURE, FRIDAY, July 9. The Chair will be taken at 3 o'clock. Major FRANK GRAVES, 20th Hussars, on "The Functions of Cavalry in Modern War."

To be followed by Discussions.

By Order of the Council,
BOUGHEY BURGESS, Captain,
Secretary.

FULL-SIZED BILLIARD TABLE (Burroughs and Watts), SECOND-HAND; slate bed, balls, rack, cues; £35.—Address, "A. D. H.," Eagle House, Lymington, Hants.

GENTLEMEN WANTED to call upon COUNTRY AGENTS to place WELL-SECURED DEBENTURES of a large PUBLIC COMPANY. Travelling expenses and a liberal remuneration will be paid to competent persons. None need apply who have not a good connection amongst the upper classes.—Apply by letter, to "A. B.," care of Mr. COLE, Queen Street, Cheapside, E.C.

ESTABLISHED 1667. Hedges and Butler ESTABLISHED 1667.

ROYAL NAVAL FEMALE SCHOOL,
St. MARGARET'S, TWICKENHAM.
Under the Patronage of
Her Most Gracious Majesty the QUEEN.

The following are the names of the Candidates declared to be Elected on July 2:—

Miss D. Hoare	3531	Miss E. E. Lucas ...	2910
,, Ommanney ...	3419	,, King*	2332
,, Alston	2922	,, McArthur ...	2330

* Has lost both parents.

The next Election of Pupils will take place early in July, 1885. All applications must be in office before April 20 previous.

A limited number of pupils are received into the school without election, at £50 per annum. Early application should be made.

Donations and subscriptions are respectfully solicited.

SAMUEL RAYSON,
Secretary.

Office: 32 Sackville Street, London.

ROYAL NAVAL FEMALE SCHOOL.

The WIDOW of the late Commander HENRY MORTLOCK OMMANNEY, R.N., BEGS to RETURN her SINCERE THANKS to all FRIENDS who so kindly used their votes and interest in obtaining on the 2nd inst. the Election of her daughter Evelyn to the Royal School for daughters of Officers of the Royal Navy.

SCHOOL for OFFICERS' DAUGHTERS, Bath.

Mrs. McCREERY begs to return her best thanks to the Subscribers of the BATH SCHOOL, who voted for her daughter.

Helmsburgh, July 2, 1884.

REQUIRED, for the ROYAL NAVAL SCHOOL, New Cross, S.E., the services of a GENTLEMAN as SECRETARY in London. The duties would be those of conducting correspondence, keeping minutes and accounts in connection with the subscriptions and donations, and with the meetings of the Council, and would not include any charge or control of the domestic or other departments of the School. The whole of the time of the selected candidate would not be needed for fulfilling the required duties. An office will be provided. Salary, £100 a year, with a per-centage on the amount of subscriptions and donations received during the year.—Applications to be sent to Lieutenant-Colonel G. F. BLAKE, R.M., Lamb Buildings, Temple, E.C., not later than July 15.

ADMIRAL SIR SIDNEY COLPOYS DACRES (deceased).—Pursuant to the Act of Parliament, 22 and 23 Victoria, Cap. 35, intituled "An Act to further amend the Law of Property, and to relieve Trustees." NOTICE is HEREBY GIVEN that all CREDITORS and other persons having any claim or demand upon or against the Estate of Admiral Sir Sidney Colpoys Dacres, G.C.B., formerly of The Lodge, Pirbright, in the County of Surrey, but late of No. 47 Brunswick Square, Brighton, in the County of Sussex, deceased (who died on the 8th day of March, 1884, and whose Will was proved in the Principal Registry of the Probate Division of her Majesty's High Court of Justice on the 23rd day of June, 1884, by Dame Emma Dacres, of 47 Brunswick Square, in the County of Sussex, Widow, the sole Executrix named in the said Will), are hereby required to send particulars in writing of their claims and demands to us, the undersigned, the Solicitors for the said Executrix, at our office, No. 2 Bedford Row, London, on or before the 20th day of August, 1884, after which day the said Executrix will proceed to distribute the estate and assets of the said deceased among the parties entitled thereto, having regard only to the claims and demands of which she shall then have had notice, and that she will not be liable for the assets so distributed, or any part thereof, to any person or persons of whose claim or demand she shall not then have had notice. Dated this 28th day of June, 1884.

GORDON and DALBIAC,
2 Bedford Row.
Solicitors for the said Executrix.

ADMIRALTY,
MEDICAL DEPARTMENT OF THE NAVY,
44 Spring Gardens, S.W.
May 31, 1884.

AN EXAMINATION of CANDIDATES for COMMISSIONS, to fill TWENTY-FOUR VACANCIES in the MEDICAL DEPARTMENT of the ROYAL NAVY, will be HELD at the UNIVERSITY of LONDON, Burlington Gardens, by permission of the Senate, on MONDAY, August 11, 1884, and following days, at 10 o'clock. The Forms to be filled up by Candidates will be supplied on application to this Department.

JOHN W. REID, M.D.,
Director-General.

"FOR THE BLOOD IS THE LIFE."

CLARKE'S
WORLD-FAMED
BLOOD MIXTURE.

THE GREAT BLOOD PURIFIER AND RESTORER.

For cleansing and clearing the blood from all impurities, it cannot be too highly recommended.

For Scrofula, Scurvy, Skin Diseases, and Sores of all kinds, it is a never-failing and permanent cure.

It Cures Old Sores.
Cures Ulcerated Sores on the Neck.
Cures Ulcerated Sore Legs.
Cures Blackheads, or Pimples on the Face.
Cures Scurvy Sores.
Cures Cancerous Ulcers.
Cures Blood and Skin Diseases.
Cures Glandular Swellings.
Clears the Blood from all impure matter,
From whatever cause arising.

As this mixture is pleasant to the taste, and warranted free from anything injurious to the most delicate constitution of either sex, the Proprietor solicits sufferers to give it a trial, to test its value.

Thousands of Testimonials from all Parts.

Sold in Bottles, 2s 6d each; and in cases, containing six times the quantity 11s each—sufficient to effect a permanent cure in the great majority of long standing cases—BY ALL CHEMISTS and PATENT MEDICINE VENDORS throughout the world, or sent on receipt of 30 or 132 stamps by The LINCOLN and MIDLAND COUNTIES DRUG CO., Lincoln.

Trade Mark—"BLOOD MIXTURE."

LAMPLOUGH'S
PYRETIC SALINE.

N.B.—Mr. Norton has always on hand a large stock of present Regulation Uniforms, equal to new, at very low prices.

HOLLOWAY'S PILLS.—The Greatest Boon of Modern Times.—These searching Pills act directly on the liver, correct the bile, purify the system, renovate the debilitated, strengthen the stomach, increase the appetite, invigorate the nerves, and reinstate the weak to an ardour of feeling never before experienced. The sale of these Pills throughout the globe astonishes everybody, convincing the most sceptical that there is no medicine equal to Holloway's Pills for removing the complaints which are incidental to the human race. They are indeed a blessing to the afflicted, and a boon to those who suffer from any disorder, internal or external. Thousands of persons have testified that by their use alone they have been restored to health after other remedies had proved unavailing.

SCHOOLS OF INSTRUCTION FOR OFFICERS OF AUXILIARY FORCES.

Classes for affording Practical Instruction to Militia and Volunteer Officers in all the subjects required for Schools of Instruction and Board Examinations, and for Mutual Improvement in Drill, are held at 4 Carlton Chambers, Regent Street, on Tuesday and Thursday Evenings, from 7 o'clock to 10 o'clock p.m., under the Superintendence of Major C. D. DAVIES, P.S. (Special Mention)—T., assisted by experienced practical Military Instructors.

22nd	P. B. J. Petre..................	2572
29th	W. L. M,Mahon...............	2090
32nd	F. M. Sandys-Lumsdaine	1963

Being all sent up. There has been no failure in this examination since April, 1881.

* 1505 in advance of the second candidate.

MILITIA COMPETITIVE. — Major LENDY, assisted by a Field Officer, Graduate of the Staff College, PREPARES a limited number of Candidates. Two hundred and thirty-one of his Pupils have succeeded at purely Military Competitions. Sunbury-on-Thames.

SANDHURST and WOOLWICH.—Assisted by Four Resident Tutors (Cambridge Wrangler, Oxford Honoursman, French and German Diplomas), Major LENDY continues to RECEIVE Candidates. He has already passed 1,300 Pupils, and of the last twenty he sent up to compete fifteen were successful. Sunbury-on-Thames.

THE Rev. A. D. PRINGLE, M.A., VICAR of BLAKENEY, GLOUCESTERSHIRE, wishes to RECEIVE YOUNG LADIES into his Family to EDUCATE with his young daughters, aged 9 and 13 years.

His house is in a very healthy and beautiful position, close to the Forest of Dean.

Special care bestowed on delicate children.

A superior resident Governess, and every care and attention paid to health and training.

Terms.	Per Annum.
Under 12 years of Age	£65
Above 12 and under 15 years	£75

Good references to Members of the Civil and Military Services in India, and to others.

ARMY EXAMINATIONS.—From 15 to 20 Pupils are received by the Rev. WALTER BAKER, M.A., Batcombe Rectory, Evercreech, Bath. A Permanent Staff of five highly qualified Instructors, all resident in the village, besides occasional Assistants, gives a guarantee of individual attention impossible where the number of Pupils is large. There are two departments under separate sets of Instructors, the one under two Graduates, Classical and Mathematical, and a Foreign Master for Candidates for Sandhurst, Woolwich, the Preliminary and Qualifying Literary Examinations; the other under two Experienced Officers for the Final Military Competitive for Lieutenants of Militia. A large per-centage, viz., nearly two-thirds of the Pupils sent up during the last 17 years have passed their respective Examinations. At the recent Military Competitive eight Lieutenants of Militia went up, and four of them who had received all their instruction at Batcombe passed among the first 40, one (Mr. W. H. Lord) taking FIRST place on the list. References are permitted to Sir John Adye, G.C.B., General Elmhirst, C.B., General Thompson (late 7th Dragoon Guards), Colonel A. H. King, R.A., A.D.C. to the Queen, the Bishop of Bedford, and many others, all parents or near relatives of former pupils.

MILITIA CANDIDATES for the LINE.—TUITION in MILITARY SUBJECTS for the COMPETITIVE ARMY EXAMINATION.

Lieutenant-Colonel FITZROY WILSON, late Rifle Brigade, a Graduate of the Staff College, and afterwards Garrison Instructor of the Eastern District, offers the above; also TUITION in MILITARY SUBJECTS to Officers of the Regular Army, partly by letter or otherwise.

Prospectus, with full additional particulars, may be obtained on application to Messrs. ASKIN, GABBITAS, and KILLIK, 38 Sackville Street, London, W.

MILITARY COMPETITIVE. Major DE THOREN and Major MORGAN sent up Four in March. All passed. Many former Successes. Classes limited. Terms moderate.—For all particulars, apply to Major DE THOREN Bellefield, or Major MORGAN, 1 Douro Terrace, Jersey.

JERSEY HIGH SCHOOL for GIRLS

(Limited).

PATRONS.

The Right Reverend the Lord Bishop of WINCHESTER.
His Excellency the Lieut.-Governor of JERSEY.

Head Mistress—Miss M. E. POPE,

Certificate of London University General Examination for Women, with honours, and distinction in French, Scholar of Girton College, Cambridge, and Second-Class Natural Science Tripos in the University of Cambridge.

This School has been established for the purpose of giving a high-class education, on the principles of the Church of England. The school buildings are situated in a healthy suburb of St. Helier's, near the sea. The climate of Jersey is mild and healthy. Special facilities are provided for the acquisition of the French language. Ordinary fees—board (washing included), sixteen guineas per term; tuition, three, four, and five guineas per term.—Application for prospectuses may be made to the Secretary, R. CREWS, Esq., Wyvil House, Georgetown, Jersey.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

At the six Militia Competitions which have taken place since September 1, 1881, Colonel WILKINSON and Lieutenant-Colonel SHAW have secured for their Pupils FORTY-NINE COMMISSIONS, although they have only Prepared and sent up a very Limited Number of Candidates. In the March, 1884, Examination, out of SIXTEEN SENT UP, TEN PUPILS succeeded; one other was two places out, and three more within a few places of being successful. Lieutenant C. J. Stanton took the SECOND PLACE at this Examination, with 2,083 marks.

At the Militia Literary Examinations held during the same period, a Number of Pupils have also passed; in this Competition the FIRST PLACE was taken in April, 1883, by Lieutenant Lord Skelmersdale, and the SECOND PLACE in the following October Examination by the only candidate sent up, Lieutenant the Honourable Victor A. Pelham.

At the recent WOOLWICH EXAMINATION Mr. W. V. Scudamore passed SIXTEENTH on the list. This candidate made very high marks in languages.

The results of the last SANDHURST EXAMINATIONS have also added to the general score, which now amounts to NINETY-FOUR SUCCESSES, obtained by Pupils since September 1, 1881.

Address, DARMSTADT, GERMANY.

NAVAL CADETS, ASSISTANT CLERKS

HOPE HOUSE SCHOOL,
SOUTHSEA.

Principals { Mr. T. H. VICKERY.
Mr. EDWARD M. BEWLAY, B.A., Univ. Coll., Lond.

AN ARMY SECTION IS NOW ADDED. PUPILS PREPARED FOR SANDHURST AND WOOLWICH.

At the late Competitive Examination in June for Assistant-Clerkships in the Royal Navy, ONE of the Five successful Competitors was a Pupil of this Establishment. Two others qualified, one taking sixth place. In June, 1883, of the four who passed, the First and Third were from this School.

CAVENDISH COLLEGE,

CAMBRIDGE.

Four Scholarships of £30 each, tenable for three years, given, one by the Clothworkers' Company, one by his Grace the Duke of Devonshire, K.G., one by Samuel Morley, Esq., M.P., and one by E. B. Foster, Esq., will be offered for competition on August 6, 7, and 8, 1884. Candidates must be under 17 on August 6.

The usual age of entry being between 16 and 17, a Degree may be taken at 19.

The College charges for lodging, boarding (with an extra term in the Long Vacation), and, including all necessary expenses of tuition, and University fees, are £84 per annum. For further information, apply to the WARDEN, Cavendish College, Cambridge.

CHARDSTOCK COLLEGE, CHARD.

Beautiful country; remarkably healthy. Special Preparation for Army, Navy, Public Schools, Universities, &c. Terms moderate. Cricket, fives, gymnastics, &c.

TO OFFICERS, ANGLO-INDIANS, and OTHERS.—First-class School, established 15 years, where boys are prepared from an early age for the Army Examinations. Numerous Staff of Experienced Graduates in Honours. System pursued has resulted in 35 successes and no failures. Indian children received. Highest references.—C. V. GODBY, M.A. (Oxon.), Bute House, Petersham, S.W.

LONDON INTERNATIONAL COLLEGE,

Spring Grove, Middlesex, W.

Inaugurated by H.R.H. the Prince of Wales, July 10, 1867. French and German (or Greek) taught to every Boy.

Amongst the successes during the year are two OPEN SCHOLARSHIPS at CAMBRIDGE, and a 13th WRANGLER.

Several FOUNDATION SCHOLARSHIPS, tenable at the School, which may be increased in amount from a Special Fund in the case of those requiring it.

Also LEAVING SCHOLARSHIPS, tenable at the UNIVERSITIES, WOOLWICH, and SANDHURST.

Apply to the SECRETARY, or to the Head Master, H. R. LADELL, M.A.

MILITIA MILITARY COMPETITIVE and PROMOTION EXAMINATIONS (Army and Auxiliary Forces).—Lieutenant-Colonel J. HAY SHAW (late Royal Inniskilling Fusiliers) and Captain CH. D'ARBOIS (late French Engineers) PREPARE for the above. Apply, Wimpole House, Wharton Road, West Kensington Park, W. Of 29 sent up for the Militia Military Competitive, 20 successful. One sent up March, 1884, Lieut. G. E. Ripley, 3rd Norfolk Regiment, passed 14th (first trial), 1,935 marks.

SCHOLARSHIPS.

BATH COLLEGE, BATH.

PRESIDENT.—His Grace the DUKE of CLEVELAND, K.G.
HEAD MASTER.—T. W. DUNN, Esq., M.A.
HONORARY SECRETARY.—Colonel HARBORD.

Four or more Entrance Scholarships for Competition on September 17th and 18th next, from £25 to £50, to be increased to £85 in case of a scholar who may need it.

Allowance for age in the case of younger boys. Candidates from a distance can be provided for.

The Junior School Boarding House (for boys under 13), now in charge of the Rev. J. C. Dunn, has been removed to more convenient premises, formerly known as Sydney College.

KELLY COLLEGE, TAVISTOCK.

There will be an EXAMINATION for an ELECTION of FOUNDATIONERS on SEPTEMBER 19, 1884. Preference, after Founder's Kin, to Sons of deceased Naval Officers.—For particulars, apply to the HEAD MASTER.

ARMY.—LINE and MILITIA.

IMPORTANT to STUDENTS.

Captain DUMARESQ DE CARTERET BISSON, M.A., Author of "Our Schools and Colleges" (graciously recognised by the Queen and H.R.H. the Commander-in-Chief), sends, free by post, a selected List of Prospectuses of all the most SUCCESSFUL ARMY TUTORS, and gives his Counsel on Military and Civil-Service Education free of Charge. References kindly permitted to the late Secretary of State for War.—Apply by letter only, No. 69 Berners Street, London, W.

ARMY, CIVIL SERVICE, UNIVERSITIES, PUBLIC SCHOOLS.

MESSRS. BISSON, BORMAN, and CO. send, free of charge, PROSPECTUSES of the most SUCCESSFUL TUTORS for Woolwich, Sandhurst, Military Competitive, Staff College, Home and Indian Civil Services, Universities, Public Schools, &c.—3 Berners Street, W.

MILITARY EXAMINATIONS.—Colonel LONSDALE HALE, R.E., recently Professor at the Staff College, and formerly Instructor in Fortification, R.M.C., and also Garrison Instructor, Home and S.E. Districts, and Lieutenant-Colonel C. W. FOTHERGILL, F.G.S., P.S.C., late Instructor in Military Topography, Royal Military College, prepare Officers of the Army for Promotion and for Entrance to the Staff College, LIEUTENANTS of MILITIA for the MILITARY COMPETITIVE EXAMINATION, and Officers of the Auxiliary Forces for the Examination in Tactics.

For particulars and terms, apply to Colonel LONSDALE HALE, 57 Sinclair Road, Kensington.

MILITARY COMPETITIVE EXAMINATION.

THREE sent up in March, TWO PASSED; Hill, 4th, Cumberland, 20th. Third only just failed. Many former successes. Tuition for all Competitive Examinations.—Captain PINHEY, Spring Grove, Isleworth.

CONNAUGHT MILITARY COLLEGE,

WOOLWICH COMMON.

Principal—SAMUEL H. WINTER.

The Pupils of this Establishment have been uniformly successful. In July, 1882, Mr. F. Close was SECOND on the Woolwich List, being FIRST in Mathematics; in July, 1883, Mr. G. Close was TENTH and Mr. R. F. Edwards TWELFTH, all at their first trial. Mr. Winter has prepared more than 200 Pupils for various Military Examinations.

MILITARY EXAMINATIONS.—Lieutenant-Colonel G. M. CARDEW (passed 2nd from the Staff College), PREPARES SIX LIEUTENANTS of MILITIA for MILITARY COMPETITIVE, also Officers for Promotion and other Military Examinations.—14 Observatory Avenue, Kensington, three minutes from the High-Street Station.

MILITARY EXAMINATIONS and GENERAL EDUCATION.—AVRANCHES.—A GENTLEMAN, for many years successfully engaged in preparing Candidates for the Military Competitive Examination and Universities, wishes to RECEIVE PUPILS. Great facilities for acquiring the French language. Terms moderate. Highest references to Parents and Guardians of former Pupils, and to Clergymen and Country Gentlemen.—Apply to Captain CHAWNER, Bois-Guerin, Val-St.-Père, Avranches.

ARMY EXAMINATIONS.—Mr. J. WINDER, M.A., Cranworth House, Eastbourne, Sussex, PREPARES SEVEN PUPILS for WOOLWICH and SANDHURST. Special Masters for French, German, and Science. In 1880, of FOUR Candidates for Woolwich, ALL of whom passed, one was 6th and another 29th. In 1883, of THREE Candidates for Sandhurst, TWO were successful.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS, 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Laboratory, heated Swimming Bath, Fives Courts, &c. — Address, HEAD MASTER.

AN OFFICER in the ARMY WISHES to RECOMMEND strongly a PREPARATORY SCHOOL for YOUNG BOYS on the South Coast.—Apply to Colonel ABBOT ANDERSON, Professor of Military Topography, R.M.C., Yorktown, Farnborough.

HINDUSTANI TAUGHT, Cito, Tuto, Jucunde. Officers prepared for Examinations. Correct Idiom guaranteed. Also Persian, Arabic, and Sanscrit.—PUNDIT, 7 Beechholme Road, Clapton, E.

SANDHURST and WOOLWICH.—PREPARATION at BROMLEY, KENT. Special advantages for French and German. N.B.—Gibson's Sandhurst "Further" and "Preliminary" Guides for July, containing the Questions set in these Examinations, followed by the Answers, will be ready the Wednesday after each Examination.

ARMY and NAVY SCHOOL,

BROMLEY, KENT.

Young BOYS PREPARED from the first on the SPECIAL LINES required for these SEVERE EXAMINATIONS.

Head Master—JOHN GIBSON, M.A., assisted by three resident Graduates, and a resident French and Drawing Master.

TO PARENTS in the ARMY and NAVY.—The under-mentioned (who is in no way connected with the School) is desirous of recommending an old-established YOUNG GENTLEMEN'S BOARDING SCHOOL, delightfully situated facing the sea on the south coast, a short run from London, in which a thorough and first-class education is given, based upon the teaching of the Holy Scriptures.

Pupils who have been educated in the school have successfully passed, among other examinations, the Indian Civil Service, Royal Military Academy, Woolwich, London Matriculation, &c. The sons of Indian Officers and gentlemen on foreign service are in the school

The success, happiness, and training of the boys have been so remarkable in this school that A BOOK OF TESTIMONIALS given by the parents should be read to appreciate results so unusual. Two VICE-CHANCELLORS have placed their wards as pupils in the school.—Reference kindly permitted to Dr. THORN, Paddington, London, W.

NEW BOOKS.

FREDERICK THE GREAT.

By Colonel C. B. BRACKENBURY, R.A.
With Portrait and numerous Maps, crown 8vo, 4s.

⁂ This forms the First Volume of Military Biographies.

"This work is the first of a series of military biographies which Messrs. Chapman and Hall are issuing. The idea is an excellent one, and if the succeeding volumes maintain the high standard which Colonel Brackenbury has fixed in the first issue of the series, the execution will leave little to be desired. Colonel Brackenbury's undertaking presented exceptional difficulties."—*Pall Mall Gazette.*

25 as sample, 6s.

Send Cheque or P.O.O. to
BEWLAY AND CO.
(Cigar Importers to the Royal Family),
49 WEST STRAND, and
143 CHEAPSIDE.
ESTABLISHED OVER 100 YEARS.

having secured the whole of the last exceptionally fine Crop of TRICHINOPOLY CIGARS AND CHEROOTS (Dawson's Muster), which have gained the Gold Medals at the Melbourne and Calcutta Exhibitions, are now offering these delicious Cigars at the wonderfully low prices of 22s 6d per 100, carriage paid, or £10 per 1,000. It is an acknowledged fact that smokers of BEWLAY'S celebrated Trichinopolys prefer them to any other cigars sold at even treble the price, and especially liked by all Officers and Gentlemen who have visited our Indian Empire.

The Analytical Sanitary Commission of the *Lancet* reports that the goods they purchased from Messrs. Bewlay and Co. were not adulterated in the slightest degree.

HOP BITTERS.

If you are a man of business or labourer, weakened by the strain of your duties, avoid stimulants, and take HOP BITTERS.

If you are a man of letters, toiling over your midnight work, to restore brain and nerve waste, take HOP BITTERS.

If you are suffering from over-eating or drinking, any indiscretion or dissipation, take HOP BITTERS.

If you are married or single, old or young, rich or poor, suffering from poor health, or languishing on a bed of sickness, take HOP BITTERS.

Whenever you feel that your system needs cleansing, toning, or stimulating, without intoxicating, one bottle of HOP BITTERS will do more good than £5 in all other medicines or doctor's visits.

Have you dyspepsia, kidney complaint, disease of the stomach, blood, liver, or nerves? You will be cured if you take HOP BITTERS.

If you have flatulency, rheumatism, or gout, or are simply ailing, are weak and low-spirited, try it! Ask your chemist or druggist for HOP BITTERS.

IT MAY SAVE YOUR LIFE. IT HAS SAVED HUNDREDS.

FOR SALE BY ALL CHEMISTS AND DRUGGISTS.

SHAVING WITH EASE AND COMFORT.

GENTLEMEN WHO SHAVE WILL FIND

GLISSADERMOS

A LUXURY; NO BRUSH, NO WATER, NO SOAP REQUIRED.
